Councilman Ortiz-

I saw your agenda item about ticketed, stand-alone music events. This looks like a great idea and something that I would support. I was just wondering if you could give me a few examples of the types of events and the venues that would be used. I'm all for more events that will bring people and/or business to HB. I know we used to have concerts at the bowl on the northside of the pier and in Central Park. Are these the types of places where events would be held? I would like to support this item with a bit more detail. Thanks, Eric Silkenson
