**Subject:** Strategic Planning Workshop

TO: Strategic Planning Workshop  
FROM: Jean Nagy  
DATE: Jan. 4, 2021

Greetings to Mayor, City Council, Department Heads, and Staff,

The Pacific flyway is one of the major North American migration routes for birds. The citizens of HB are fortunate to be able to experience this migratory bird superhighway in our park system. Also, people from all over the world come to Central Park to view bird species.

Requesting:

1. The newly (27) planted trees along the west side of Huntington lake are a wonderful habitat not only birds but they also add to the beauty of the West side of the lake. Many thanks to the city for planting these trees. **Please keep in mind that the East side of the lake is screaming for improvement.**
2. There is a major safety issue of protruding tree roots on the walking path along the side of the lake by the playground equipment. A boardwalk was in the budget and funded to improve this walking path, but for some reason this project was pulled. **Please reinstate this boardwalk project so that citizens can safely walk around the lake on the West side.**

Wishing all of you a healthy 2021.

Jean Nagy  
President of the HB Tree Society

**SUPPLEMENTAL  
COMMUNICATION**

Meeting Date: 1/5/2021

Agenda Item No.: 1(21-001)
