1.0 EXECUTIVE SUMMARY

Catalyst Environmental Consulting LLC (Catalyst) conducted a Phase I Environmental Site Assessment (ESA) on behalf of the Huntington Beach City School District (property owner/intended user) for the property referenced as 20661 Farnsworth Lane, Huntington Beach, California. This ESA was conducted in general accordance with ASTM Standard Practice 1527-21. The purpose of this investigation was to identify the presence of any recognized environmental conditions (RECs), including controlled recognized environmental conditions (CRECs) and historical recognized environmental conditions (HRECs), in connection with the subject property. RECs are defined as are defined as (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term REC is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Findings of this ESA are summarized as follows:

Site Description/Characteristics	
Address:	20661 Farnsworth Lane, Huntington Beach, CA 92646
Parcel:	APN 151-331-12
Size:	15.42 acres
Owner:	Huntington Beach School District
Description:	The subject property consists of Peterson Elementary School, a public elementary school operated by the Huntington Beach City School District. Single-story classroom and administrative buildings are located at the eastern portion of the property. A paved playground area is located west of the buildings, and athletic fields are located along the northern and western property boundaries. A covered eating area is located along the western portion of the playground. Paved parking lots are located along the eastern property boundary, fronting Farnsworth Lane.
On-site Hazardous Materials Usage	
No evidence of the storage or use of significant quantities of hazardous materials or petroleum products likely to result in significant adverse impacts to the subsurface soil, groundwater, and or/soil vapor was observed at the subject property.	

Historical Use(s)

The subject property was reportedly developed with the existing school buildings sometime between 1953 and 1963. Prior to this development, the subject property was in agricultural use to cultivate a low-growing crop (likely sugar beets) from as early as 1938. Operations at the subject property since the early 1960s reportedly included John R Peterson Elementary School, Ethyl Dwyer Middle School, Coastline Community College (in the 1980s and 1990s), a YMCA child care center, and other facilities associated with the Huntington Beach City School District. None of the identified historical uses of the subject property are likely to have resulted in significant adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property.

No evidence of RECs was encountered in association with historical occupants/uses of the subject property.

Adjoining and Nearby Properties

Land use in the immediate site vicinity is dominated by single-family residences. The subject property is bounded to the north, across an alley, by single-family residences (addressed off Indianapolis Avenue); to the south by single-family residences (addressed off Kingfisher Drive); to the east, across Farnsworth Lane, by single-family residences (addressed off Farnsworth Lane); and to the west, across a concrete-lined drainage channel (Huntington Beach Channel), by single-family residences.

Based on a review of agency records and governmental database listings and standard historical information sources for adjoining sites and sites located in the immediate site vicinity, it is unlikely that off-site releases of hazardous materials or regulated substances have adversely impacted the subsurface soil, groundwater, and/or soil vapor beneath the subject property. In addition, no visual evidence of surficial contamination or of hazardous materials or petroleum product storage, use, and/or mishandling that may threaten the subject property was observed on adjacent and nearby properties.

Conclusions & Recommendations

We have conducted a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 of 20661 Farnsworth Lane, Huntington Beach, California, the property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property.

Catalyst recommends **no further action** with regards to environmental site assessment at this time.

2.0 INTRODUCTION

2.1 Purpose of Investigation

The Huntington Beach City School District (property owner/intended user) for , retained Catalyst to conduct a Phase I Environmental Site Assessment (ESA) for the property referenced as 20661 Farnsworth Lane, Huntington Beach, California. This ESA was conducted in order to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (landowner liability protections): that is, the practice that constitutes “All Appropriate Inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C §9601(35)(B).

The objective of this investigation was to identify the presence of any recognized environmental conditions (RECs), including controlled recognized environmental conditions (CRECs) and historical recognized environmental conditions (HRECs), in connection with the subject property.

2.2 Definitions

RECs are defined as are defined as (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term REC is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

A Controlled Recognized Environmental Conditions (CRECs) is defined as a recognized environmental condition (REC) affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

A Historical Recognized Environmental Condition (HREC) is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or

authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

A *de minimis* condition is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis* condition is not a recognized environmental condition nor a controlled recognized environmental condition.

2.3 Scope of Work

This Phase I Environmental Site Assessment was performed in conformance with the scope and limitation of ASTM Standard Practice E1527-21 and in conformance with US SBA Standard Operating Procedure (SOP) 50 10 7.1. The scope of this investigation included:

- An inspection of the property for evidence of contamination and/or the storage/use of hazardous substances or petroleum products;
- A reconnaissance inspection of adjacent and nearby properties;
- Interviews with key personnel familiar with the property;
- A review of readily available standard historical sources such as historical aerial photographs, historical city directories, historical fire insurance maps, historical building department records, and/or historical topographic maps;
- A review of existing environmental site assessment (ESA) reports for the subject property, if provided;
- A review of physical site setting sources such as topographic maps, geologic maps and reports, and/or groundwater condition and quality objective information sources;
- A review of readily available of Federal, State, and Regional governmental agency databases and/or records.

2.4 Limitations

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connections with a property. The performance of the environmental site assessment described in this report was conducted to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property within reasonable limits of time and cost.

The scope of this investigation included a preliminary evaluation of considerations that are considered beyond the scope of ASTM Standard Practice E1527-21 such as asbestos containing materials (ACMs), mold, lead-based paint, and radon. Site specific testing for the

presence or absence of the above referenced non-scope items was not included in the scope of this investigation and was not conducted in connection with this ESA.

This report is intended as a limited assessment of the environmental conditions associated with the referenced property and was prepared in accordance with generally accepted environmental practices within the constraints of the client's directive. This report is intended for the exclusive use of the above named client(s) and parties. Without a written agreement with Catalyst, any third parties who may come into possession of this report, or portions thereof, shall have no rights of recourse or recovery under any course of action against Catalyst. No other warranty, expressed or implied, is made as to the professional advice included in this report. The effective date of this ESA is the date indicated on this report's cover page, and in accordance with ASTM Standard Practice E1527-21, the findings of this ESA may be relied upon by the intended user for 180 days from the effective date. All work elements referenced in this report were conducted within 180 days prior to issuance of the report. Governmental database records and historical site use information were provided by Environmental Data Resources Inc. (EDR), who are responsible for the accuracy/completeness of this data.

2.5 Data Gaps

No significant data gaps and/or data failure that would affect Catalyst's ability to identify RECs in connection with the subject property were encountered in the course of this ESA.

Catalyst was not furnished with any information regarding a review of recorded land title records for environmental liens or activity and land use limitations (AULs). ASTM Standard Practice E1527-21 does not impose on the environmental professional the responsibility to undertake a review of recorded land title records for environmental liens or AULs; however, in order to satisfy the standards and practices for All Appropriate Inquiries (AAI), the user may wish to engage a title company or title professional to undertake such a review. In Catalyst's judgment, this data gap does not affect our ability to identify RECs in connection with the subject property.

3.0 USER PROVIDED INFORMATION

3.1 User Questionnaire

A User Questionnaire was completed by Mr. Mark Manstof, the executive director of operations for the Huntington Beach City School District (property owner). Mr. Manstof indicated that he was not aware of any obvious indicators that point to the presence or likely presence of contamination at the property. He was not aware of any environmental cleanup liens that are filed or recorded against the property or of any AULs that are in place at the property.

No evidence of RECs was encountered in association with information provided on the attached User Questionnaire (**Appendix A**).

3.2 Interviews

Mr. Mark Manstof, the executive director of operations for the Huntington Beach City School District (property owner) indicated that to his knowledge the subject property has operated as a public school campus since approximately the 1960s. He was not aware of any other uses of the subject property. Mr. Manstof was not aware of any spills or releases of hazardous materials at the subject property, of any former or existing underground storage tanks (USTs) at the subject property, or of any environmental concerns in connection with the subject property.

3.3 Previous Environmental Site Assessment Reports

Catalyst was not provided with any other existing Phase I ESA reports, Phase II ESA reports, or other environmental site assessment reports for the subject property.

4.0 SITE DESCRIPTION

4.1 Site Characteristics

The subject property consists of a reported 15.42-acre parcel (Orange County Assessor's Parcel Number [APN] 151-331-12 located on the west side of Farnsworth Lane, between Indianapolis Avenue to the north and Kingfisher Drive to the south, in the city of Huntington Beach, Orange County, California (**Figures 1 and 2**).

The subject property consists of Peterson Elementary School, a public elementary school operated by the Huntington Beach City School District. Single-story classroom and administrative buildings are located at the eastern portion of the property. A paved playground area is located west of the buildings, and athletic fields are located along the northern and western property boundaries. A covered eating area is located along the western portion of the playground. Paved parking lots are located along the eastern property boundary, fronting Farnsworth Lane. General site features are illustrated on **Figure 2**, and site photographs are provided in **Appendix B**.

The subject property buildings are stucco-clad structures set on concrete-slab on grad foundations. They have sloped roofs which are apparently covered with membrane roofing. Observed areas of the subject property buildings appeared to have been mostly recently renovated and were variably finished with drywall, carpeting, ceramic tile, and suspended ceiling tiles. Potable water, gas and electricity, and sewage disposal services are provided by the local public utility companies. Information regarding the age of the sewage disposal system at the subject property was not readily available; however, it was likely installed between 1953 and 1963 in connection with the development of the existing school.

4.2 Physical Setting

Topography

The surface elevation at the subject site ranges from approximately 4 to 7 feet above mean sea level (msl). The surface topography at the subject property and in the site vicinity slopes gently to the southwest, toward the Pacific Ocean, which is located about 0.90 miles southwest of the subject property (**Figure 3**).

Geology

The surface geology at the subject property is depicted on published geologic maps as Recent Alluvium which is described as alluvium and alluvial fan deposits (CDMG, 1992).

According to the US Department of Conservation Service's Web Soil Survey (WSS), near surficial soils beneath the subject property are designated as Bolsa Silt Loam. The parent

material of this soil unit is described as mixed alluvium derived from igneous, metamorphic, and sedimentary rock.

Hydrogeology

The site is located within the East Coastal Plain Hydrologic Subarea of the Lower Santa River Hydrologic Area within the Santa Ana River Hydrologic Unit. Beneficial uses of groundwater include municipal, agricultural, and industrial process, and industrial service supply (Santa Ana Regional Water Quality Control Board, on-line).

Site specific information regarding current groundwater depth and flow direction at the subject property was not readily available. Based on information on the State Water Resources Control Board (SWRCB) GeoTracker database, groundwater at and nearby a release site located approximately 0.75 miles northwest of the subject property (Geer's Plumbing, 222 Adams Avenue, Huntington Beach, CA 92648) was encountered in the 1990s, at depths ranging from approximately 27 to 31 feet bgs. Some of these depth measurements were apparently collected from wells MW-17 and MW-18 on the subject property. The groundwater flow direction in the vicinity of 222 Adams Avenue was reported to be generally westward, but variable.

No groundwater production wells were depicted within ½-mile of the subject property on the USGS topographic quadrangle.

4.3 Site Reconnaissance Inspection

Catalyst performed an on-site inspection of the subject property and a reconnaissance inspection of the immediate site vicinity on August 11, 2025, in general accordance with the scope and limitations of ASTM Standard E1527-21. The objective of the reconnaissance was to obtain information indicating the likelihood of identifying RECs in connection with the subject property.

No evidence of the storage or use of significant quantities of hazardous materials or petroleum products likely to result in significant adverse impacts to the subsurface soil, groundwater, and or/soil vapor was observed at the subject property. In addition, no evidence of surficial contamination or the storage, handling, or misuse of hazardous materials or petroleum products likely to adversely impact the subsurface soil, groundwater, and/or soil vapor beneath the subject property was observed on adjacent and nearby properties.

Specific findings of the site reconnaissance are summarized as follows:

Interior and Exterior Observations	
Hazardous Materials Storage	No evidence of the current storage or use of significant quantities of hazardous materials or petroleum products likely to result in significant adverse impacts to the subsurface soil, groundwater, and or/soil vapor was observed at the subject property.
Storage Tanks	No evidence of existing above ground storage tanks (ASTs) or underground storage tanks (USTs) used to store hazardous substances or petroleum products was observed at the subject property.
Drums	No evidence of drums, 55-gallon or otherwise, used to store hazardous materials and/or regulated substances was observed at the subject property.
Odors and Pools of Liquid	No strong, pungent, or noxious odors were encountered at the subject property. No evidence of pools or sumps containing liquids likely to be hazardous substances or petroleum products were observed at the subject property.
Unidentified Substance Containers	No open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were observed at the subject property.
PCBs	No evidence of spillage or leakage from electrical equipment possibly containing polychlorinated biphenyls (PCBs) was observed at the subject property.
Clarifiers and Lifts	No evidence of subsurface clarifiers, oil-water separators, or subsurface hydraulic vehicle lifts was observed at the subject property.

Interior Observations	
Heating/Cooling	The fuel sources for heating and cooling the building at the subject property are gas and electricity provided by the local public utility company.
Stains or Corrosion	No significant stains or corrosion on the floors, walls, or ceilings were observed in the physically observed portions of the subject property building.
Drains and Sumps	No evidence of floor drains or sumps was encountered in the physically observed portions of the subject property buildings.

Exterior Observations	
Pits, Ponds, or Lagoons	No evidence of pits, ponds, or lagoons was observed at the subject property.
Stained Soil or Pavement	Areas of significantly stained soil or pavement were not observed at the subject property.
Stressed Vegetation	Evidence of stressed vegetation was not observed at the subject property.

Exterior Observations	
Solid Waste	No evidence was observed of solid waste disposal such as stockpiles or areas that are apparently filled or graded by non-natural causes (or filled by soil of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal.
Wastewater	Wastewater from plumbing fixtures (sinks, toilets, drains, etc.) in the subject property building discharge to the local sanitary sewer system, and storm water runoff flows offsite to the local storm drain system. No other evidence of wastewater discharges was observed at the subject property.
Wells	No evidence of wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells) was observed at the subject property.
Septic Systems	No evidence of septic systems was observed at the subject property.

4.4 Adjoining Properties

Land use in the immediate site vicinity is dominated by single-family residences. Land use at adjoining properties and in the immediate site vicinity is illustrated on **Figure 2** and is summarized as follows:

Direction	Use/Occupant
North	Across an alley, single-family residences (addressed off Indianapolis Avenue)
South	Single-family residences (addressed off Kingfisher Drive)
East	Across Farnsworth Lane, single-family residences (addressed off Farnsworth Lane)
West	Across Huntington Beach Channel, single-family residences

No evidence of surficial contamination or the storage, handling, or misuse of hazardous materials or petroleum products likely to adversely impact the subsurface soil, groundwater, and/or soil vapor beneath the subject property was observed on adjacent and nearby properties.

5.0 HISTORICAL USE

Standard historical sources were reviewed with the objective of identifying uses of the subject property since its first developed use or back to 1940, whichever is earlier, in accordance with ASTM Standard Practice E1527-21. Historical use of the subject property was evaluated based on interviews with persons familiar with the property's history and a review of recorded title information, historical aerial photographs, local street directories, topographic maps, fire insurance maps, and building permit records.

The subject property was reportedly developed with the existing school buildings sometime between 1953 and 1963. Prior to this development, the subject property was in agricultural use to cultivate a low-growing crop (likely sugar beets) from as early as 1938 (this use was noted in aerial photographs collected between 1938 and 1953). Operations at the subject property reportedly included John R Peterson Elementary School, Ethyl Dwyer Middle School, Coastline Community College (in the 1980s and 1990s), a YMCA child care center, and other facilities associated with the Huntington Beach City School District.

No evidence of RECs was encountered in association with historical occupants/uses of the subject property. In addition, based on a review of standard historical information sources for adjoining sites and sites located in the immediate site vicinity, it is unlikely that off-site releases of hazardous materials or regulated substances have adversely impacted the subsurface soil, groundwater, and/or soil vapor beneath the subject property. Specific findings of the historical site use research are presented below.

5.1 Interview(s)

Mr. Mark Manstof, the executive director of operations for the Huntington Beach City School District (property owner) indicated that to his knowledge the subject property has operated as a public school campus since approximately the 1960s. He was not aware of any other uses of the subject property. Mr. Manstof was not aware of any spills or releases of hazardous materials at the subject property, of any former or existing underground storage tanks (USTs) at the subject property, or of any environmental concerns in connection with the subject property.

5.2 Historical Aerial Photographs

Historical aerial photographs ranging in age from 1938 to 2022 were provided by Environmental Data Resources, Inc. (EDR). Findings of the aerial photograph review are summarized below, and the historical aerial photographs are provided in **Appendix C** of this report.

Year	Findings
2022	The subject property and site vicinity were developed similarly to present. The existing complex of Peterson Elementary School buildings at the subject property was present. Existing single-family residences at adjacent and nearby properties were present. The existing Huntington Beach Channel adjoined the western property border.
2018	Land use at the subject property and in the immediate site vicinity was similar to the 2022 photograph.
2014	Land use at the subject property and in the immediate site vicinity was similar to the 2018 photograph.
2010	Land use at the subject property and in the immediate site vicinity was similar to the 2014 photograph.
2005	Land use at the subject property and in the immediate site vicinity was similar to the 2010 photograph.
2002	Land use at the subject property and in the immediate site vicinity was similar to the 2005 photograph.
1994	Land use at the subject property and in the immediate site vicinity was similar to the 2002 photograph.
1990	Land use at the subject property and in the immediate site vicinity was similar to the 1994 photograph.
1987	Land use at the subject property and in the immediate site vicinity was similar to the 1990 photograph.
1977	Land use at the subject property and in the immediate site vicinity was similar to the 1987 photograph.
1972	Land use at the subject property and in the immediate site vicinity was similar to the 1977 photograph.
1963	Except that Huntington Beach Channel appeared to be unlined, land use at the subject property and in the immediate site vicinity was similar to the 1972 photograph.
1953	The subject property and its surrounding area were in agricultural use to cultivate a low-growing crop (or fallow land). The existing road system in the site vicinity, and Huntington Beach Channel, were not present.
1947	Land use at the subject property and in the immediate site vicinity appeared to be fallow agricultural land.
1938	Land use at the subject property and in the immediate site vicinity was similar to the 1947 photograph.

Evidence pointing to the presence or likely presence of RECs in connection with the subject property was not encountered in association with the aerial photograph review. In Catalyst's opinion, limited agricultural uses of the subject property prior to its development

as a school are unlikely to have resulted in significant adverse impacts beyond a *de minimis* condition. Although sampling and laboratory analysis of near surficial soil would be required in order to evaluate the possible presence of any residual pesticides, site conditions are very unlikely to exceed health-based screening levels. The California Department of Toxic Substances Control (DTSC) evaluated 354 agricultural sites being considered for use as school sites, and less than 1 percent of the evaluated sites contained residual pesticides at concentrations requiring mitigation. DTSC concluded that “the vast majority of agricultural sites that have been used for crop production do not contain residual concentrations of pesticides or metals that would pose an unacceptable risk or hazard to future students and staff”. Although the subject property, along with much of southern Huntington Beach, were used for agricultural purposes in the mid-20th Century at a time in which organochlorine pesticides such as DDT, chlordane, and dieldrin were used in California agriculture, environmental degradation, volatilization, leaching, and dilution processes act over time to reduce concentrations in surficial and near surficial soils. Based on the limited period of time in which the subject property was used for agricultural purposes, the absence of continued pesticide inputs since the 1950s or early 1960s, and the more than six decades which have passed since agricultural activities ceased (allowing for substantial natural attenuation through photolysis, and microbial degradation), the likelihood of the presence of residual pesticides in soil exceeding health-based screening levels based on its current use and/or other commercial uses is considered low.

5.3 Historical City Directories

A *City Directory Abstract Report* summarizing listed occupants at the subject property and at adjoining properties in local street directories was provided by EDR (**Appendix D**). Information sources cited by EDR in the *City Directory Abstract Report* include city directories produced by Cole Information Services, Pacific Bell Telephone, the Haines Company Inc., RL Polk & Co, Luskey Brothers & Co., Home Directory Service, and others.

Listed occupants at the subject property are summarized below, and a complete listing of identified occupants at the subject property and in the immediate site vicinity is provided in **Appendix D** of this report.

Year	Listed Occupant(s)
2022	ETHEL DWYER MIDDLE SCHOOL/HUNTINGTON SEACLIFF ELEMENTARY SCHOOL/JOHN R PETERSON ELEMENTARY SCHOOL/HUNTINGTON BEACH CITY SCHOOL DISTRICT/SEASIDE COMMUNITY CHURCH/YMCA/numerous individuals
2017	No listings
2014	HUNTINGTON BEACH CITY ELEMENTARY SCHOOL
2010	JOHN R PETERSON ELEMENTARY/PETERSON YMCA CHILD CARE CENTER

Year	Listed Occupant(s)
2005	BECKMAN SCIENCE/JOHN R PETERSON ELEMENTARY/PETERSON YMCA CHILD CARE CENTER
2000	No listings
1995	COASTLINE COMMUNITY COLLEGE
1992	COASTLINE COLLEGE/HUNTINGTON BEACH SCHOOL FOOD SERVICE
1987	COASTLINE COLLEGE/HUNTINGTON BEACH SCHOOL FOOD SERVICE
1982	HUNTINGTON BEACH SCHOOL FOOD SERVICE
1976	JOHN R PETERSON SCHOOL/HUNTINGTON BEACH CITY SCHOOL
1973	JOHN R PETERSON SCHOOL/HUNTINGTON BEACH CITY SCHOOL
1968	No listings
1964	No listings

None of the identified occupants of the subject property are likely to have resulted in adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property. In addition, no evidence of significant environmental concerns was encountered in connection with listed occupants at adjacent and nearby sites.

No evidence pointing to the presence or likely presence of RECs in connection with the subject property was encountered in association with the city directory review.

5.4 Historical Fire Insurance Maps

A *Certified Sanborn Map Report* was provided by EDR. Fire insurance maps contain detailed information about property structures and uses, and were produced primarily between the 1880s through the early 1960s. The Sanborn Library is the largest and most complete collection of fire insurance maps, and includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others.

According to EDR's *Certified Sanborn Map Report (Appendix E)*, no map coverage was available for the subject property in the complete holdings of the Sanborn Library, LLC collection. Fire insurance maps were produced primarily for urban and other densely developed areas, and a lack of map coverage typically reflects an area which had undergone little or no development during the time period when these maps were being produced.

5.5 Historical Topographic Maps

A *Historical Topographic Map Report* was provided by EDR. This report included nineteen historical topographic maps produced by the United States Geologic Survey (USGS) from 1896 to 2022 (**Appendix F**). Huntington Beach Channel was not depicted in a 1950 map, and earlier maps. No evidence of RECs was encountered in association with the historical topographic maps.

5.6 Building Permit Records

Catalyst queried available building permit records for the subject property using the city of Huntington Beach's online records portal. Records were not found under this source. Catalyst reviewed a summary of building department records which was provided by EDR via the Lightbox online review portal. Pertinent findings of the Lightbox online review portal review are summarized as follows:

Year(s)	Description
2021	Pre-construction review permit for an addition of a new parking lot that modifies the existing fire lane around the school

Evidence pointing to the presence or likely presence of RECs in connection with the subject property was not encountered in association with the review of building department records from EDR.

6.0 REGULATORY AGENCY RECORDS REVIEW

6.1 Subject Property

6.1.1 Governmental Database Report

A search of current Federal, State, and Local regulatory agency databases was conducted by Environmental Data Resources, Inc (EDR). The governmental database report included a review of standard federal, state, and tribal environmental record sources as well as supplemental database sources as defined in ASTM Standard E1527-21. The governmental database report is provided in **Appendix G**.

The subject property was listed in the following databases:

- CalEPA Hazardous Waste Information System (HAZNET)
- US EPA Facility Index System (FINDS)
- USEPA RCRA Non Generator/No Longer Regulated (RCRA NonGen/NLR)
- California Office of Emergency Services/Hazardous Materials Information Reporting System (CHMIRS)

The HAZNET, FINDS, and RCRA NonGen/NLR listings are related to disposal records for the off-site disposal of regulated wastes by Clapp School, Huntington Beach City School District, and John R. Peterson Elementary School. Clapp School reportedly generated 17.2774 tons of asbestos-containing waste in 1993. Huntington Beach City School District reportedly generated 0.33 tons of other inorganic solid waste in 2005. John R. Peterson Elementary School reportedly generated 0.23 tons of asbestos-containing waste in 2014. The storage/use of the above referenced items are unlikely to have resulted in significant adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property. In Catalyst's opinion, these waste disposal listings do not represent a REC in connection with the subject property.

The CHMIRS listing is related to an incident where a release of mineral oil with PCBs occurred due to equipment failure of a pole top transformer. The incident occurred on June 11, 2007. Southern California Edison was the responsible party. The incident was minor. Actions relating to this incident were not reported. This listing does not represent a significant environmental concern in connection with the subject property.

The subject property was not listed in any other databases in the attached governmental database report.

6.1.2 Certified Unified Program Agency (CUPA) Records

Catalyst requested copies of documents related to the subject property unit from the Orange County Health Care Agency (OCHCA), the local regulatory agency that oversees hazardous materials compliance, permitted underground storage tanks (USTs), and environmental site assessment and mitigation operations. Catalyst requested records related to the subject property from OCHCA; however, OCHCA responded that no records were available.

6.1.3 Regional Water Quality Control Board (RWQCB) Records

Catalyst reviewed the State Water Resources Control Board (SWRCB) GeoTracker online database which provides records from local Regional Water Quality Control Boards (RWQCBs) and other local regulatory oversight agencies related to Leaky Underground Storage Tank (LUST) sites, Spills, Leaks, Investigation and Cleanup (SLIC) sites, and permitted Underground Storage Tanks (UST) sites. Information related to documented spills or releases of hazardous materials or petroleum products at the subject property was not available on the GeoTracker database.

Information related to environmental site assessment operations conducted at nearby sites reviewed on the GeoTracker database is summarized in **Section 6.2** of this report.

6.1.4 California Department of Toxic Substances Control (DTSC) Records

Catalyst reviewed California Department of Toxic Substances Control (DTSC) records on the EnviroStor online database which is a data management system for tracking DTSC cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reasons to investigate further. The subject property was not listed on the EnviroStor database.

Information related to environmental site assessment operations conducted at nearby sites reviewed on the EnviroStor database is summarized in **Section 6.2** of this report.

6.1.5 California Division of Oil, Gas, and Geothermal Resources (DOGGR) Records

Catalyst reviewed California Division of Oil, Gas, and Geothermal Resources (DOGGR) records on the Well Finder online database which is DOGGR's online mapping application that provides information on oil and gas wells and other types of related facilities throughout California. No wells were depicted on or in the immediate vicinity of the subject property.

6.2 Properties in the Site Vicinity

A search of current Federal, State, and Local regulatory agency databases was conducted by EDR in general accordance with distances outlined in ASTM Standard Practice 1527-21 (**Appendix G**). Findings of the governmental database search are summarized as follows:

Category	Sel	Site	1/8	1/4	1/2	> 1/2	ZIP	TOTALS
<i>NPL</i>	Y	0	0	0	0	0	0	0
<i>NPL Delisted</i>	Y	0	0	0	0	0	0	0

- Totals --		7	57	101	1	5	1	172

6.2.1 Adjacent Property and Nearby Listings/Sites of Concern

One or more adjacent and nearby properties were listed in the governmental database report. Based on a review of these database listings and information regarding listed sites available from additional sources, it is Catalyst's opinion that none of these sites represent an REC in connection with the subject property. The locations of these listed sites are illustrated on **Figure 2** and/or on Maps A to D in the attached FirstSearch report (**Appendix G**). Numerous adjoining and nearby sites were listed as residential generators of asbestos-containing wastes, and thus do not represent a material threat of adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property.

6.2.2 Other Listed Sites

In Catalyst's opinion, none of the sites listed in the governmental database report represent a material threat of adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property, based on the nature of the listings and their locations in relation to the subject property.

There are two off-site listings related to documented releases from a leaky underground storage tanks (LUST) or other Spills, Leaks, Investigation and Cleanup (SLIC) site located approximately ½-mile southeast of the subject property. Catalyst reviewed information regarding release sites within approximately 1/4-mile on the State Water Resources Control Board (SWRCB) GeoTracker database and/or the Department of Toxic Substances Control (DTSC) Envirostor database, and this release site does not pose a significant threat of adverse impacts to the subsurface soil, groundwater, and/or soil vapor beneath the subject property.

In Catalyst's judgment, none of the sites listed in the attached governmental database report (**Appendix G**) represent a recognized environmental condition (REC) in connection with the subject property.

7.0 VAPOR ENCROACHMENT CONDITIONS

Catalyst conducted a screening of the subject property in order to evaluate the likelihood that a vapor encroachment condition (VEC) exists at the subject property. A VEC is defined as the presence or likely presence of chemical of concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property. This screening did not include the recovery and/or analyses of soil vapor samples or any other direct sampling of subsurface environmental media by Catalyst, and included an evaluation by the environmental professional (EP) of the potential for COCs to migrate in vapor form into the subsurface of the subject property based on readily available/reasonably ascertainable data sources researched during the course of this ESA. The limited screening method included an evaluation of the physical setting of the subject property (**Section 4.2**), the nature and extent of documented releases in the site vicinity and/or subject property as identified in governmental database listings and/or agency records (**Section 6.0**), historical uses of the subject property and its adjoining sites based on a review standard historical resources (**Section 5.0**), and site conditions observed at the subject property and its adjoining sites during the site reconnaissance inspection (**Sections 4.3 and 4.4**).

Based on the on the findings of the above referenced screening, Catalyst concludes that it is unlikely that a vapor encroachment condition (VEC) exists at the subject property.

8.0 NON-SCOPE CONSIDERATIONS

Assessment of non-scope considerations, such as asbestos containing materials, lead based paint, radon, methane, wetlands, and/or mold, is considered outside the scope of ASTM Practice 1527-21 and is not required for appropriate inquiry as defined by ASTM Practice 1527-21. An evaluation of non-scope considerations was not included within the scope of this ESA.

9.0 FINDINGS AND OPINIONS

Known or suspect recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, and *de minimis* conditions identified during the course of this investigation are summarized as follows.

<p>Recognized Environmental Conditions</p>	<p>Recognized Environmental Conditions (RECs) are defined as (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.</p> <p><i>This assessment has revealed no evidence of known or suspect RECs.</i></p>
<p>Controlled Recognized Environmental Conditions</p>	<p>A Controlled Recognized Environmental Conditions (CRECs) is defined as a recognized environmental condition (REC) affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).</p> <p><i>This assessment has revealed no evidence of known or suspect CRECs.</i></p>
<p>Historical Recognized Environmental Conditions</p>	<p>A Historical Recognized Environmental Condition (HREC) is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).</p> <p><i>This assessment has revealed no evidence of known or suspect HRECs.</i></p>
<p>De Minimis Conditions</p>	<p><i>De minimis</i> conditions are conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.</p> <p><i>This assessment has revealed no evidence of de minimis conditions.</i></p>
<p>Data Gaps</p>	<p><i>No significant data gaps affecting the ability of the Environmental Professional to identify RECs in connection with the subject property were encountered during the course of this ESA.</i></p>

10.0 CONCLUSIONS AND RECOMMENDATIONS

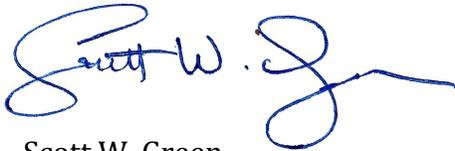

We have performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 of 20661 Farnsworth Lane, Huntington Beach, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property.

Catalyst recommends **no further action** with regards to environmental site assessment at this time.

11.0 STATEMENT OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property (**Appendix H**). We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX A
User Questionnaire

USER QUESTIONNAIRE

Property Address:

20661 Farnsworth Ln
HB CA 92646

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to comply with the requirements of ASTM Standard Practice E1527-21. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Attach additional pages if necessary.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
 Yes No If yes, please describe:
2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
 Yes No If yes, please describe:
3. Do you have specialized knowledge or experience related to the property or nearby properties? For example, are you in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
 Yes No If yes, please describe:
4. Is the purchase price being paid for the property or the property valuation lower than the fair market value of the property because contamination is known or believed to be present at the property?
 Yes No NA If yes, please describe:
5. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know the past uses of the property, do you know specific chemicals that are present or were once present at the property, do you know of any spills or chemical releases at the property, or do you know of any environmental cleanups that have taken place at the property?
 Yes No If yes, please describe:
6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
 Yes No If yes, please describe:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Catalyst Environmental Consulting LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 705D-4AAC-AC8F
PO # CE1804
Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 705D-4AAC-AC8F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Catalyst Environmental Consulting LLC (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Completed Info:

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Site Screening

Completed Date: 08/13/1991

Comments: SSI Report reviewed by Region 4 staff. Site is bounded by Goldenwest St., Ellis Ave., Gothard St., Garfield Ave., Crystal St., and Earnest Ave. in central Huntington Beach, Orange County. About 1926, Holly Sugar refining operations were closed down and the facilities were converted to petroleum refining processes. In 1964, the 55-acre Holley Sugar property was acquired by the Huntington Beach Company, a subsidiary of Chevron USA. Production ceased by 1964 and refinery structures dismantled. Staff recommends HRS I be compiled to determine if this site should go in the AWP backlog or referred to a local agency.

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROLS - Institutional Controls Sites List.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: LUST REG 4 LUST REG 5 - Leaking Underground Storage Tank Database. LUST REG 7 - Leaking Underground Storage Tank Case Listing. LUST REG 8 - Leaking Underground Storage Tanks. LUST REG 9 - Leaking Underground Storage Tank Report. LUST SANTA CLARA - LOP Listing. LUST - Leaking Underground Fuel Tank Report (GEOTRACKER). SAN DIEGO CO. SAM - Environmental Case Listing. SAN MATEO CO. LUST - Fuel Leak List. NAPA CO. LUST - Sites With Reported Contamination. SONOMA CO. LUST - Leaking Underground Storage Tank Sites. SAN FRAN CO. LUST - Local Oversight Facilities. VENTURA CO. LUST - Listing of Underground Tank Cleanup Sites. SOLANO CO. LUST - Leaking Underground Storage Tanks. ORANGE CO. LUST - List of Underground Storage Tank Cleanups. RIVERSIDE CO. LUST - Listing of Underground Tank Cleanup Sites. LUST REG 6L - Leaking Underground Storage Tank Case Listing. LUST REG 6V - Leaking Underground Storage Tank Case Listing. LUST REG 1 - Active Toxic Site Investigation. LUST REG 2 - Fuel Leak List. LUST REG 3 - Leaking Underground Storage Tank Database. Leaking Underground Storage Tank locations. Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Cruz counties. LUST REG 3 - Leaking Underground Storage Tank Database INDIAN LUST R4 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R7 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R6 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R8 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R9 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R1 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R5 - Leaking Underground Storage Tanks on Indian Land. CPS-SLIC - Statewide SLIC Cases (GEOTRACKER). SLIC REG 1 - Active Toxic Site Investigations. SLIC REG 2 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 3 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 4 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 5 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6V - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6L - SLIC Sites. SLIC REG 7 - SLIC List. SLIC REG 8 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. Sacramento Co. CS - Toxic Site Clean-Up List. SLIC REG 9 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing.

State/Tribal Tanks: MILITARY UST SITES UST - Active UST Facilities. UST CLOSURE - Proposed Closure of Underground Storage Tank (UST) Cases. Active UST facilities gathered from the local regulatory agencies UST CLOSURE - Active UST Facilities AST - Aboveground Petroleum Storage Tank Facilities. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land.

Database Descriptions

State/Tribal VCP: VCP Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. VCP - Voluntary Cleanup Program Properties SAN FRANCISCO MAHER - Maher Ordinance Property Listing.

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Other SWF: SAN DIEGO CO. LF VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites. LOS ANGELES CO. LF - List of Solid Waste Facilities. WMUDS/SWAT - Waste Management Unit Database. CA LA LF - City of Los Angeles Landfills. Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites. CA LA LF - Inventory of Illegal Abandoned and Inactive Sites

Other Haz Sites: SCH This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose. SCH - School Property Evaluation Program SAN DIEGO CO. HMMMD - Hazardous Materials Management Division Database. CERS HAZ WASTE - California Environmental Reporting System Hazardous Waste. US CDL - Clandestine Drug Labs.

Other Tanks: SWEEPS UST Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. SWEEPS UST - SWEEPS UST Listing ALAMEDA CO. UST - Underground Tanks. KERN CO. UST - Underground Storage Tank Sites & Tank Listing. MARIN CO. UST - Underground Storage Tank Sites. NAPA CO. UST - Closed and Operating Underground Storage Tank Sites. ORANGE CO. UST - List of Underground Storage Tank Facilities. RIVERSIDE CO. UST - Underground Storage Tank Tank List. SAN FRAN CO. UST - Underground Storage Tank Information. SOLANO CO. UST - Underground Storage Tanks. SUTTER CO. UST - Underground Storage Tanks. VENTURA CO. UST - Underground Tank Closed Sites List. YOLO CO. UST - Underground Storage Tank Comprehensive Facility Report. LOS ANGELES UST - Active & Inactive UST Inventory. EL SEGUNDO UST - City of El Segundo Underground Storage Tank. LONG BEACH UST - City of Long Beach Underground Storage Tank. TORRANCE UST - City of Torrance Underground Storage Tank. UST SAN JOAQUIN - San Joaquin Co. UST. UST MENDOCINO - Mendocino County UST Database. SAN FRANCISCO AST - Aboveground Storage Tank Site Listing. LOS ANGELES AST - Active & Inactive AST Inventory. CERS TANKS - California Environmental Reporting System (CERS) Tanks. CA FID UST - Facility Inventory Database.

Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

Database Descriptions

Spills: HMIRS Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT. HMIRS - Hazardous Materials Information Reporting System CHMIRS - California Hazardous Material Incident Report System. Orange Co. Ind Site - List of Industrial Site Cleanups Orange County. SPILLS 90 - SPILLS90 data from FirstSearch.

Other: RCRA NonGen / NLR RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. RCRA NonGen / NLR - RCRA - Non Generators / No Longer Regulated FEDLAND - Federal and Indian Lands. TSCA - Toxic Substances Control Act. APPENDIX H

Professional Qualifications

Professional Qualifications

Scott W. Green

President

University of California at Santa Barbara
Bachelor of Arts, Environmental Science

Mr. Green has over 30 years of experience in environmental consulting. He graduated from UCSB with a degree in Environmental Science in 1994 and has worked as an environmental consultant since that time. His consulting experience includes supervision of assessment and remediation projects associated with contaminated soil, groundwater, and soil vapor sites. These assessment and mitigation operations have been conducted at gas stations, dry cleaners, bulk oil and fuel distribution centers, oil fields, agricultural redevelopment properties, and other industrial properties. He has successfully overseen projects from release discovery, assessment/characterization of contamination, mitigation design and implementation, and ultimately regulatory agency release case closure. He has designed and overseen the installation of groundwater pump and treat remediation systems, soil vapor extraction systems, air sparging systems, dual phase extraction systems, and in-situ injection systems. Mr. Green is also experienced in using computer models to predict the fate and transport of contaminants in the environment and in conducting health risk evaluations associated with vapor intrusion into indoor air.

Mr. Green has conducted assessments for real estate transactions, including Phase I Environmental Site Assessments (ESAs), Phase II ESAs, and Transaction Screen Assessments (TSAs), at more than 1,500 properties over the past 30+ years. He has performed these environmental assessment and mitigation operations at sites throughout California, Arizona, Nevada, Florida and Georgia, and is experienced in interfacing with clients and regulatory agencies.

Professional Qualifications

Jeffrey B. Fleming

Senior Environmental Scientist

University of Washington, Seattle, Washington
Bachelor of Science, Physics/Scientific and Technical Communication

San Diego State University, San Diego, California
Master of Arts, Physical Geography

Mr. Fleming has over 30 years experience conducting and managing environmental investigations, teaching environmental science, and managing environmental risk. His environmental work experience includes private consulting, County government, banking, and college-level instruction. He has conducted or managed Phase I, II, and III Environmental Site Assessments (ESAs), Transaction Screens, Second Level Reviews, asbestos surveys, and lead-in-paint sampling. He has conducted these assessments and surveys at a large variety of sites, including commercial, residential, agricultural, and undeveloped properties. His fieldwork experience includes borehole drilling; underground storage tank removal; groundwater, surface water, soil, and soil vapor sampling; and geophysical surveys.

As an Environmental Resources Specialist III with the Orange County Environmental Management Agency, California, Mr. Fleming was tasked with the management of Phase I ESAs, conducted storm water sampling and gauging, and assisted in the development of Best Management Practices in the control of storm water runoff quality. As an Environmental Analyst with a major bank in the State of California, Mr. Fleming assessed and managed environmental risk associated with collateralized loans and foreclosures. He was active in the supervision of Phase II assessments and Phase III characterization activities. His teaching experience at San Diego State University and the University of Wisconsin - Madison included undergraduate instruction in physiography, hydrology, and climatology.

Mr. Fleming is a Registered Environmental Property Assessor (REPA #994321) with the National Registry of Environmental Professionals.
