Agenda Item No. 9 (25-065)

You don't often get email from gorba6810@gmail.com. [Learn why this is important](#)

Public Comment, Item 9. 25-065.

I'm writing to request that the displacement of violent squirrels into Northwest Huntington Beach stop, and that they be much more effectively trapped by animal control. These squirrels are repetitious-ly destroying every inch of the backyards and potted plants here, and I believe there will be biting and rabies soon. This is a very serious problem among residents and associations that is not solved. Please, this needs to stop.

This is a very serious problem here that is preventing residents from living their lives, a normal request that the city council should be able to solve. I do believe that the squirrels were displaced by development, regardless, a solution needs to be found. This is the city council's responsibility, not

others.

- Ben, NWHB
