

SHOR Beach Bar and Restaurant

Narrative: We would like to paint the building exterior with a California, Surf City inspired theme to bring better visibility to the location and destination as a whole. This will include an "instagram" type mural on each end of the building with a wave theme carried around the building on both the PCH and Beach facing walls. This will include colorful depictions of the pier and coastal attributes as well as the state flower.

- o Identify the art consultant and/or artist Local Artist, Melissa Murphy www.melissamurals.com
- o Indicate the intended site(s), media, colors, and materials of murals - • Behr Marquee Exterior wall paint in colors depicted in attached renderings. She creates gradients and color blending with colors shown in mock up.
- o Detail the schedule for the when murals will be painted : We would like to get this accomplished somewhere between April and May before summer.
- o Describe plans for maintenance of the murals including how the murals are protected due the environment and graffiti:• Mural will be coated with an epoxy two component anti-graffiti coating. Due to the environment there will be consistent monitoring and maintenance over time, as with every mural or paint coating.

- Plans: The Ocean and PCH facing walls are roughly 92' long and 8' 6' to top of wall under roof line. The mural will only be painted on the stucco areas above the split face block which is 4'10" of paintable space. The ends of the building are 30' wide and 8' 6" tall at edges, reach to a center peak of 11' 6". Those are fully stucco walls and will be painted all the way to ground level.
