RESOLUTION NO 2025-32

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF HUNTINGTON BEACH, CALIFORNIA, APPROVING THE 2025-2029 CONSOLIDATED PLAN, 2025-2026 ACTION PLAN, 2025-2029 ORANGE COUNTY REGIONAL ASSESSMENT OF FAIR HOUSING, AND THE 2025-2029 CITIZEN PARTICIPATION PLAN FOR FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIPS PROGRAMS

WHEREAS, the City of Huntington Beach ("City") participates in the United States Department of Housing and Urban Development (HUD) Community Development Block Grant (CDBG) and HOME Investment Partnerships (HOME) programs; and

WHEREAS, the City is required by HUD to adopt a five-year Consolidated Plan, Action Plan, Assessment of Fair Housing, and a Citizen Participation Plan as part of the federal requirements for the CDBG and HOME programs; and

WHEREAS, a Resolution by the City Council is required for adoption of the 2025-2029 Consolidated Plan, 2025-2026 Action Plan, 2025-2029 Orange County Regional Assessment of Fair Housing, and 2025-2029 Citizen Participation Plan that is due to HUD within 60 days of receiving the final 2025-2026 allocation amounts; and

WHEREAS, the City's 2025-2029 Consolidated Plan contains a housing needs assessment, a survey of available resources, and a five-year strategy that specifies achievable housing and community development goals and programs; and

WHEREAS, the City's 2025-2026 Action Plan implements the first year of the five-year strategy of the 2025-2029 Consolidated Plan; and

WHEREAS, the 2025-2029 Orange County Regional Assessment of Fair Housing implements the Federal Fair Housing Act, which requires jurisdictions receiving HUD funding to affirmatively further fair housing by identifying barriers to housing choice and take actions to overcome those barriers; and

WHEREAS, the 2025-2029 Citizen Participation Plan sets forth the City's policies and procedures for encouraging citizen involvement in the planning, implementation and evaluation of the City's CDBG and HOME programs; and

WHEREAS, a notice was published in The Wave on April 3, 2025 regarding a City Council public hearing and the availability of the Draft 2025-2029 Consolidated Plan (including the 2025-2026 Action Plan), 2025-2029 Orange County Regional Assessment of Fair Housing, and the 2025-2029 Citizen Participation Plan for a minimum 30-day public review and comment period from April 4, 2025 to May 6, 2025; and

WHEREAS, the City's CDBG and HOME funding allocations for the 2025-2026 Program Year have not yet been determined or released by HUD, and therefore all funding references in this resolution are based on anticipated amounts; and

WHEREAS, as directed by HUD, the Citizen Participation Advisory Board (CPAB) on February 20, 2025, made 2025-2026 CDBG public services program recommendations based on the current year's (2024-2025) funding levels, pending final allocation amounts from HUD for 2025-2026; and

WHEREAS, for Fiscal Year 2025-2026, the City anticipates receiving approximately \$1,121,195 in CDBG funds and \$538,328 in HOME funds from HUD; and

WHEREAS, in the event HUD releases the final CDBG and HOME funding allocations after the May 6, 2025 City Council meeting, the funding allocations approved by this resolution will be adjusted upward or downward accordingly, and staff will implement the proportional changes as outlined in this resolution; and

WHEREAS, in addition to the estimated CDBG funding allocations of \$1,121,195 and HOME funding of \$538,328 from HUD, carry over funding and program income from prior years of \$258,868 for CDBG and \$306,100 for HOME funds increases the total estimated allocation within the 2025-2026 Action Plan to \$1,380,063 for CDBG and \$844,428 for HOME; and

WHEREAS, in addition to the estimated \$844,428 in HOME funds for 2025-2026, \$85,000 in 2020-2021 and \$55,000 in 2021-2022 HOME Administration funds can be allocated to cover certain costs in 2025-2026 related to: 1) preparation of the 2026-2027 Action Plan; 2) annual monitoring costs of existing HOME affordable housing projects; 3) fair housing services provided by Fair Housing Foundation; and 4) City staff salaries and public noticing costs, for a total of \$984,428 in HOME funding for 2025-2026; and

WHEREAS, the City Council has considered the community needs, priorities and strategies set forth in the draft 2025-2029 Consolidated Plan and the allocation of \$1,380,063 in CDBG funds, and \$984,428 in HOME funds in the draft 2025-2026 Action Plan; and

WHEREAS, the proposed 2025-2026 CDBG and HOME programs and activities are summarized in Exhibit "A" and fully described in the 2025-2026 Action Plan, which is a component of the 2025-2029 Consolidated Plan attached hereto as Exhibit "B"; and

WHEREAS, one of the CDBG activities described in the 2025-2026 Action Plan, the Homeowner Rehabilitation Loans and Grants Program, staff desires to amend this program's Policies and Procedures to increase the maximum grant amount from \$15,000 to \$20,000 in order to address significant increases in labor and construction material costs; and

WHEREAS, the proposed 2025-2029 Orange County Regional Assessment of Fair Housing is attached hereto as Exhibit "C", and the 2025-2029 Citizen Participation Plan is attached hereto as Exhibit "D"; and

WHEREAS, pursuant to Section 15378 of the California Code of Regulations relating to implementation of the California Environmental Quality Act, the proposed activities to be funded are not considered projects resulting in a direct alteration of the environment and, therefore, are exempt from the requirements of California Environmental Quality Act; and

WHEREAS, the proposed activities to be funded are subject to the provisions of the National Environmental Protection Act of which any and all projects funded shall comply, except that, in accordance with 24 CFR Sections 58.34 (a) and 58.35 as to review pursuant to the National Environmental Protection Act, the 2025-2029 Consolidated Plan, the 2025-2026 Action Plan, the 2025-2029 Orange County Regional Assessment of Fair Housing, and the 2025-2029 Citizen Participation Plan are not subject to federal environmental review.

NOW, THEREFORE, the City Council of the City of Huntington Beach DOES HEREBY RESOLVE as follows:

SECTION 1. That the 2025-2029 Consolidated Plan, attached hereto as Exhibit "B", the 2025-2026 Action Plan, included in the 2025-2029 Consolidated Plan attached hereto as Exhibit "B", the 2025-2029 Orange County Regional Assessment of Fair Housing, attached hereto as Exhibit "C", and the 2025-2029 Citizen Participation Plan, attached hereto as Exhibit "D" are hereby adopted, and the City Manager or the City Manager's designee is hereby authorized to execute all necessary related budget approvals and documents deemed necessary by HUD or the City to implement the 2025-2029 Consolidated Plan and the 2025-2026 Action Plan including but not limited to, executing all implementing and related documents and agreements, such as, grant and loan agreements with subrecipients, professional services agreements and service agreements for program administering for all approved CDBG and HOME programs and projects set forth in the 2025-2029 Consolidated Plan and 2025-2026 Action Plan.

SECTION 2. That \$168,179 in CDBG Public Service funds, \$987,645 in CDBG Capital and Housing Preservations Project Funds, \$224,239 in CDBG Administration Funds, \$790,595 in HOME Capital and Housing Preservation Project Funds, and \$193,833 in HOME Administration Funds (including 2020-2021 and 2021-2022 HOME Administration) are hereby allocated to the CDBG and HOME projects indicated in Exhibit "A."

SECTION 3. That the City Manager or his designee is hereby authorized to implement the following adjustments, as approved by the City Council, in the event that the final 2025-2026 CDBG and HOME funding allocation amounts from HUD differ from the anticipated levels reflected in this Resolution:

CDBG Public Service allocations:

1. If actual CDBG funding is less than the anticipated amount: Decrease the funding allocation for each of the six recommended organizations identified in Exhibit "A" by a proportionate share (weighted average).

2. If actual CDBG funding is greater than the anticipated amount: Allocate increased funds by equal amount to the six recommended organizations identified in Exhibit "A".

Capital and Housing Preservation Project allocations:

- 1. If actual CDBG funding is less than the anticipated amount: Maintain the recommended funding allocations for Special Code Enforcement and Housing Services for TBRA Program and reduce funding to Housing Rehabilitation Loans and Grants Program and Maintenance Zone Area 3 ADA Improvements equally.
- 2. If actual CDBG funding is greater than the anticipated amount: Maintain the recommended funding allocations for Special Code Enforcement and Housing Services for TBRA Program and increase funding to Housing Rehabilitation Loans and Grants Program and Maintenance Zone Area 3 ADA Improvements equally.
- 3. If actual HOME funding is less than or greater than the anticipated amount: Adjust the Mobile Home TBRA program accordingly. Other HOME capital programs to remain unchanged.

Administration allocations

- 1. If actual CDBG funding is less than or more than the anticipated amount: Adjust CDBG Administration allocation shown in Exhibit "A" accordingly but will not exceed the 20 percent maximum requirement of the HUD CDBG allocation for 2025-2026.
- 2. If actual HOME funding is less than or more than the anticipated amount: Adjust HOME Administration and Community Housing Development Organization funding reserves as shown in Exhibit "A" but will not exceed the 10 percent and 15 percent maximum requirements of the HUD HOME allocation for 2025-2026.

In the event of such changes, no additional City Council action shall be required unless the adjusted allocations exceed the thresholds or priorities previously approved herein.

SECTION 4. That the City Council authorizes staff to amend the Policies and Procedures for the Homeowner Rehabilitation Loans and Grants Program to increase the maximum grant amount from \$15,000 to \$20,000.

SECTION 5. That the 2025-2029 Consolidated Plan and the 2025-2026 Action Plan projects and programs shall undergo an environmental review prior to any release of funds consistent with the Program Regulations found in 24 CFR, Part 58.6 and the City Manager or the City Manager's designee is authorized to execute all environmental documentation required by HUD.

SECTION 6. The City Clerk shall certify to the passage of this Resolution and shall take effect as provided by law.

PASSED AND ADOPTED by the City Council of the City of Huntington Beach at a regular meeting held on the 6th day of May, 2025.

EXECUTIVE SUMMARY

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

Introduction

The Executive Summary of the five-year Consolidated Plan for FY 2025/26 – 2029/30 (Con Plan) provides an overview of the City of Huntington Beach's (City) housing and community development needs, as well as the City's priorities and strategies to address these needs. It is meant to inform the U.S. Department of Housing and Urban Development (HUD), housing and service providers, City residents, and businesses.

Each year, the City of Huntington Beach receives federal funds through the Community Development Block Grant (CDBG) and Home Investment Partnership Program (HOME) to support housing and community development projects that primarily benefit low- and moderate-income households. In order to receive these funds, the City must adopt a five-year strategic plan that identifies local needs and outlines how these needs will be addressed using the available funds. The City's current five-year plan (FY 2020/21–2024/25) will end on June 30, 2025, requiring the adoption of a new plan before that date.

The new five-year Con Plan builds on several key documents, including the current Con Plan, the City's Draft 2013-2021 Housing Element, the 2024 Orange County Homeless Point-in-Time Count and Report, and the 2024 Orange County Continuum of Care.

The Con Plan includes the following sections:

- Executive Summary
- The Process
- Needs Assessment
- Housing Market Analysis
- Strategic Plan
- One-Year Action Plan

Summary of the Objectives and Outcomes Identified in the Plan Needs Assessment Overview

The City's Con Plan strategy outlines general priorities to address community needs and guides the investment of federal funds. To effectively meet these needs, the City has identified seven priority areas that require the most attention. These priorities are:

- **1. Housing Needs**: The need for affordable housing options in the City continues to be high, based on the proportion of households in the City experiencing cost burdens.
- 2. Community Facility Needs: The City recognizes the high need for public improvement activities throughout the City in order to provide for and maintain a safe and decent

environment for its citizens. Identified community facility needs include, but are not limited to, parks and playgrounds, community and neighborhood facilities, and childcare and youth centers.

- **3. Infrastructure Needs**: The City recognizes the high need for public infrastructure improvements throughout the City in order to provide for and maintain a safe and decent environment for its citizens. Identified public infrastructure needs include, but are not limited to, sidewalk improvements, bicycle and walking paths, street and alley improvements, and tree planting and beautification.
- **4. Homeless Needs**: The is a high need for continued investment of federal funding into serving the City's homeless and at risk of homelessness populations. Using CDBG public service funds, the City will provide assistance to homeless service providers that assist various subcategories of homeless populations such as homeless youth and women.
- **5. Special Needs**: Huntington Beach prioritizes housing and services for special needs populations. Special needs populations include the elderly, families with young children, developmentally disabled, victims of domestic violence, homeless individuals, and those with behavioral or physical health issues.
- **6. Community Service Needs**: There are a number of vital community services in the City that need continued support. These community services serve low- to moderate-income households and generally do not fall under the other service populations (homeless, special needs, etc.).
- 7. Other Housing and Community Development Needs: The City has identified the need to provide support for the HOME and CDBG programs in the City, as well as to affirmatively further fair housing. These activities are vital to the continuation of the City's efforts to administer these programs.

These priorities are aligned with the national objectives and outcomes set by the U.S. Department of Housing and Urban Development (HUD), as described below:

National Objectives

HUD's national objectives are guidelines that federal funds must meet in order to address community development needs. These objectives are set by HUD for programs such as CDBG and HOME. The three national objectives are:

 Provide decent affordable housing: This objective focuses on activities that increase or improve the availability and quality of affordable housing for low- and moderate-income households. This includes efforts such as building new housing, rehabilitating existing housing, or assisting with rent or homeownership.

- Create a suitable living environment: Activities under this objective aim to improve the quality of life for individuals and families by addressing various community issues. This can involve improving public facilities, increasing safety, upgrading infrastructure, or addressing environmental hazards to create a healthier and safer living environment.
- **Create economic opportunities**: This objective relates to activities that promote economic development, such as job creation, business expansion, or commercial revitalization. The goal is to support local economies, improve job opportunities, and reduce poverty in low- and moderate-income areas.

National Outcomes

HUD's national outcomes are the specific results that HUD seeks to achieve through funded activities. These outcomes help to assess whether a project or program is effectively addressing the national objectives. The three national outcomes are:

- Availability/Accessibility: This outcome focuses on ensuring that housing, services, or facilities are available and accessible to those who need them, especially for low- and moderate-income individuals. It includes activities that increase access to housing, public facilities, or services such as healthcare, education, or transportation.
- Affordability: The goal of this outcome is to make housing, services, or infrastructure
 affordable for low- and moderate-income individuals and families. It typically includes
 activities like providing rental assistance, creating affordable housing units, or reducing
 the cost of essential services.
- **Sustainability**: Sustainability focuses on long-term impact. It involves ensuring that projects or investments are designed to be enduring and continue to benefit the community over time. This could mean building energy-efficient housing, upgrading infrastructure to last, or implementing programs that will maintain positive community outcomes in the future.

The City's strategy for meeting HUD's national objectives and outcomes is outlined below.

Huntington Beach 2025/26 – 2029/30 Consolidated Plan Programs By HUD Objectives and Outcomes			
OBJECTIVE/ OUTCOMES	AVAILABILITY/ ACCESSIBILITY	AFFORDABILITY	SUSTAINABILITY
DECENT HOUSING	 Implementing Programs: Housing Rehabilitation Loan Program Housing Rehabilitation Administration Fair Housing Program 	 Implementing Programs: HOME Acquisition/Rehabilitati on of Affordable Housing HOME New Construction of Affordable Housing

ECONOMIC OPPORTUNITY			

Table 1 – 2025/26 - 2029/30 Consolidated Plan Programs

Evaluation of Past Performance

HUD requires that grantees provide an evaluation of past performance. Since the current year, 2024/25, is still in progress, the City of Huntington Beach will measure the current years' performance for CDBG and HOME in the 2024/25 Consolidated Annual Performance Evaluation Report (CAPER) which will capture the City's progress towards meeting its five-year goals and objectives outlined in the 2020/21 - 2024/25 Con Plan. However, the following is an evaluation of performance to date:

Decent Housing

- In FY 2020/21, the City of Huntington Beach allocated \$2.8 million in HOME funding to support the development of a 43-unit affordable senior housing project at 18431 Beach Boulevard. This project, in partnership with the Community Housing Development Organization (CHDO) Jamboree Housing Corporation, is a significant step in addressing the housing needs of seniors. Of the 43 units, nine are HOME-income and rent-restricted, ensuring affordability for very-low-income households. The project was completed in December 2024 and contributes to nearly 50% of the City's 20-unit development goal for the 2020/21-2024/25 Consolidated Plan period.
- Since July 2020, the City has allocated nearly \$3 million in HOME funds for the Tenant-Based Rental Assistance (TBRA) program, which helps low- and moderate-income households with rental costs. This program has been instrumental in addressing housing affordability challenges and has assisted 218 households so far, showcasing its effectiveness in supporting vulnerable populations.
- The City's Homeowner Rehabilitation Loans and Grants Program provides critical support to lower-income homeowners. The Rehabilitation Grant Program offers one-time grants of up to \$15,000 for deferred maintenance and health/safety repairs, while the Rehabilitation Loan Program offers deferred payment loans up to \$75,000 for larger repairs. To date, 43 homeowner rehabilitation projects have been completed through these programs, with more households currently being assisted in FY 2024/25. These

efforts demonstrate the City's ongoing commitment to supporting homeownership and preserving affordable housing for its residents.

Suitable Living Environment

- The City's Special Code Enforcement program has consistently surpassed its goal of assisting 600 housing units each year in CDBG-eligible areas. Since July 2020, the program has issued over 4,500 code violations, which in most cases, are voluntarily addressed by homeowners. This proactive approach to maintaining community standards and ensuring safe and habitable living conditions, underscores the City's commitment to ensuring compliance with housing standards and contributing to the overall well-being and livability of neighborhoods within CDBG-eligible areas.
- The City of Huntington Beach continues to prioritize the delivery of high-quality services to various segments of the community, including youth, homeless individuals, seniors, the disabled, and illiterate adults. These efforts are supported through public service funding and aim to improve the well-being and accessibility of essential services for residents.

Since July 2020, the City has made significant progress in its public service initiatives. For example, over 700 youth have benefited from subsidized after-school programming, enriching their educational experiences and offering valuable opportunities for personal growth. Additionally, 2,250 homeless individuals have received a range of services, including case management, emergency housing, outreach services, and other supportive programs. These efforts highlight the City's commitment to addressing homelessness and supporting vulnerable populations.

Furthermore, around 1,500 seniors and individuals with special needs have accessed services through the City's Senior Care Services Program and the Oak View Family Literacy Program. These programs are designed to meet the specific needs of these groups, ensuring they receive the support and care they require. These initiatives reflect the City's ongoing dedication to enhancing the lives of its residents and ensuring that all members of the community have access to the services they need.

- As part of its commitment to enhancing public facilities and community infrastructure, the City set a goal to assist 5,000 persons with improved or new public facilities during the 2020/21-2024/25 Consolidated Plan period. In FY 2023/24, the City allocated CDBG funding to the Central Library Restrooms Project, which includes ADA improvements. This project not only contributed to enhancing accessibility but also exceeded the goal by serving a larger number of individuals than initially targeted.
- The City used CDBG funding in FY 2020/21, 2021/22, FY 2023/24, and in FY 2024/25 to make ADA curb cut improvements in various areas of the City. By the end of FY 2023/24, over 6,500 persons had already benefited from the handicap-accessible curb cuts, surpassing the 5-year goal of 2,000. An estimated 2,750 additional persons are set to benefit from the latest project in FY 2024/25.

Economic Opportunity

In 2024, the City of Huntington Beach updated its Economic Development Strategic Plan. The City Council initiated this update to reinforce existing economic development efforts, address current needs, and prioritize new initiatives. The plan provides a roadmap for strengthening the local economy, creating jobs, and ensuring that Huntington Beach remains a vibrant and welcoming place for businesses, residents, and visitors. A blend of new initiatives and enhancements across four main areas are featured in the plan:

- Business Retention, Attraction & Expansion
- Tourism, Culture & Community
- Responsive & Effective Government
- Communication & Collaboration

The plan aims to enhance the City's economic vitality and quality of life by retaining and attracting a diversified mix of businesses, strengthening tourism and cultural offerings, growing the Streamline Surf City Initiative, and fostering stronger collaboration with local stakeholders. Each area includes specific goals and objectives with actionable milestones, as well as priorities for the upcoming year.

In addition, in October 2023, the City Council adopted the 2023-2027 Strategic Plan for the City of Huntington Beach. This 2023-2027 Strategic Plan identifies various policies and programs that the City should prioritize, over and above normal operations, within the limited financial, human, and operational resources of the City. The goal of economic development is for greater business retention, investment, and job growth in Huntington Beach.

Summary of citizen participation process and consultation process

The City developed its Con Plan through extensive consultation and coordination with housing, social service and healthcare providers; public agencies; and the local public housing agency as presented in Table 2. As a means of gaining input from these agencies, the City conducted an agency consultation workshop, public meetings, a survey, and invited local grantees to provide comments on the draft Con Plan and Annual Action Plan. In addition, consultation in the development of the Con Plan involved several City departments.

Table 2 – Citizen Participation Consultation

The City of Huntington Beach has followed HUD guidelines for citizen and community involvement in the preparation of its Con Plan and Annual Action Plan. This process aims to ensure that the community has an active role in shaping the documents, which will guide the allocation of federal funding for housing and community development projects.

To encourage broad participation, the City engaged the public through various activities, including:

- Agency Workshop
- Community Meetings
- Community Needs Survey
- Public Hearings

These efforts allowed residents and stakeholders to provide valuable input on the City's priorities and needs.

A draft of the five-year Con Plan will be available for public comment from April 4 to May 6, 2025. During this period, the public will have the opportunity to review and provide feedback on the draft plan. Additionally, a City Council public hearing is scheduled for May 6, 2025, offering a final opportunity for residents and interested parties to comment on the plan before it is formally adopted and submitted to HUD.

Summary of public comments

Public comments received at the agency workshop, community meetings, the results of the community survey, and comments made at public hearing can be found in the Appendix.

Summary of comments or views not accepted and the reasons for not accepting them

The City responded to all relevant comments. All comments received were accepted.

Summary

Key findings of the Needs Assessment include:

- Housing overpayment is the most prevalent housing problem, with 76% of Huntington Beach's low and moderate income (<80% AMI) renter households facing a cost burden (>30% of income on housing costs), and 40% facing a severe cost burden (>50% of income towards housing). Consultation with housing, homeless and public service providers identify the shortage of affordable rental housing as the most significant issue facing Huntington Beach's extremely low-, low- and moderate-income residents.
- Household overcrowding is a far less significant problem than overpayment in Huntington Beach though it has doubled in the last decade from 5% of all renters in 2010 to 10% a decade later (as documented by the 2007-2011 and 2016-2020 ACS¹). However, certain neighborhoods continue to experience high levels of overcrowding.
- Many of the workers who make up Huntington Beach's workforce earn modest incomes, making it challenging to afford to in live in the City where they work. The analysis of rental housing costs and affordability illustrates that households earning extremely low, low and moderate incomes cannot afford average market rents in Huntington Beach. Local occupations priced out of the rental market include: bookkeepers, bus drivers, preschool teachers, retail sales managers, and food service managers.
- For homeless people or people at-risk of becoming homeless, the most significant problem is the lack of affordable rental housing. This problem has been compounded by record high rents combined with decreases in public funding previously used to support affordable housing.
- The City's Capital Improvement Program identifies the following general projects (within low- and moderate-income areas) in need of CDBG funds over the next five years:
 - ✓ American with Disabilities Act (ADA) improvements to public facilities
 - ✓ Sidewalk, curb and gutter improvements, including accessibility ramps
 - ✓ Main Street Library HVAC installation project
 - ✓ Critical repairs to police and fire stations throughout the City
 - ✓ Necessary improvements to the Oak View Library, Oak View Family Resource Center, Central Library, and playground improvements at 9th Street and Lagenbeck Parks

HUNTINGTON BEACH 2025/26 - 2029/30 CONSOLIDATED PLAN

¹ The American Community Survey (ACS), performed by the U.S. Census Bureau, is an ongoing Census statistical survey that samples a small percentage of the population every year, and publishes five-year averages of this data. Many of the tables in the Consolidated Plan are "pre-populated" by HUD with data from the 2016-2020 ACS, and thus the City has utilized the 2016-2020 ACS as the primary data source throughout the Plan.

Table 3 - Responsible Agencies

Narrative

The Community Enhancement Division of the City of Huntington Beach serves as the lead agency responsible for overseeing the development of both the Con Plan and the Annual Action Plan. This division plays a crucial role in coordinating the allocation of funding for various community development projects and initiatives. It is also responsible for monitoring community-based organizations that receive funding, ensuring compliance with program requirements, and managing the successful implementation of these projects. Additionally, the division administers the CDBG and HOME programs, which support affordable housing and other community development efforts. Beyond these responsibilities, the division also oversees other housing and community development initiatives, ensuring that all efforts align with the City's goals and HUD guidelines. Through these activities, the Community Enhancement Division plays a key role in fostering the growth and improvement of Huntington Beach's housing and community services.

Introduction

Provide a concise summary of the jurisdiction's activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

The City of Huntington Beach developed its Con Plan through a collaborative process that involved consultation with a wide range of stakeholders. These stakeholders included the Orange County Housing Authority, various City departments, health and social service providers, and neighboring local governments. A key part of this process was seeking input from housing, homeless, and social service providers active within Huntington Beach.

To gather valuable insights, the City held an agency workshop to better understand the services they offer, identify priority needs within the community, and pinpoint any gaps in services. This workshop was an important tool for capturing the perspectives of organizations that work directly with residents in need of housing assistance, homeless services, and other social support.

By engaging a diverse group of stakeholders and utilizing surveys and consultations, the City ensured that the Con Plan was shaped by the knowledge and experiences of those most directly involved in addressing the community's housing and social service needs. This collaborative approach was essential in making sure the plan reflects the community's priorities, ultimately guiding the allocation of resources to effectively address the key challenges Huntington Beach faces.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

The City of Huntington Beach actively participates in the Orange County Continuum of Care (CoC), which is led and coordinated by the Orange County Health Care Agency. This partnership between public and nonprofit entities aims to ensure comprehensive and regional coordination of efforts and resources to address homelessness and support individuals at risk of homelessness throughout Orange County.

As part of the CoC, the City's Homeless Outreach Case Manager collaborates with other stakeholders to promote community-wide commitment to the goal of ending homelessness. The CoC serves as a regional convener of year-round planning processes and facilitates the involvement of public and private agencies within the regional homeless system of care.

The Orange County Continuum of Care system is structured to achieve several key objectives:

- 1. Promote Community-wide Commitment: The CoC fosters a shared commitment among stakeholders to end homelessness through regional coordination and collaboration.
- 2. Advocate for Funding and Resources: It advocates for funding and resources to support efforts aimed at quickly rehousing individuals experiencing homelessness while minimizing trauma and dislocation.
- 3. Promote Access to Mainstream Programs: The CoC works to ensure that homeless individuals and families have access to and effectively utilize mainstream programs and services.
- 4. Implement Best Practices: It promotes the implementation of best practices and evidence-based approaches to homeless programming and services to ensure effectiveness and efficiency.

By actively participating in the Orange County Continuum of Care, the City of Huntington Beach contributes to the collective efforts aimed at addressing homelessness and improving outcomes for individuals and families experiencing housing instability in the region.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

Not applicable. The City of Huntington Beach does not receive ESG funds.

Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdiction's consultations with housing, social service agencies and other entities

Citizen Participation Advisory Board (CPAB). The City of Huntington Beach will continue to maintain strong relationships with service providers through the Citizen Participation Advisory Board (CPAB) to help implement the five-year strategy outlined in the Con Plan. The CPAB plays a key role in ensuring that community input and collaboration remain central to the process of allocating resources and addressing the social service needs of the community.
Huntington Beach City Council	Civic Leaders	 Housing Need Assessment Non-Homeless Special Needs Market Analysis Economic Development Non-Housing Community Development Strategy Anti-Poverty Strategy 	Public hearings. Public hearings are a key component of the City's process for ensuring that the Con Plan accurately reflects the needs and priorities of the community. City Council members, who represent the needs of their constituents, play an important role in this process by incorporating community feedback into the Con Plan. The needs and priorities identified through public hearings, consultations, and surveys have been integrated into the Con Plan, ensuring that the City's strategy addresses the most pressing concerns of residents. These public hearings provide a platform for community members to voice their opinions and influence the allocation of resources to meet the housing and social service needs of Huntington Beach. Through this process, the City ensures that the Plan is responsive to the community's evolving needs.

Table 4 – Agencies, groups, organizations who participated

Identify any Agency Types not consulted and provide rationale for not consulting

The City of Huntington Beach diligently engaged in the development of its Consolidated Plan by consulting with a broad spectrum of stakeholders. These consultations included housing, social, and health service providers, as well as local agencies and governments, and the Orange County Housing Authority. By actively seeking input from these various entities, the City ensured that a comprehensive range of perspectives and expertise were considered in the planning process. The City is unaware of any Agency Types relevant to the Consolidated Plan that were not consulted.

Table 5 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(I))

The City of Huntington Beach has notified adjacent local governments including Costa Mesa, Fountain Valley, Seal Beach, Westminster and the County of Orange of the availability of the draft Consolidated Plan for 30-day review and comment. Huntington Beach coordinates with the local CoC in implementation of the Consolidated Plan's homeless strategy, and with the Orange County Housing Authority in implementation of the Housing Choice Voucher Program.

Summary of citizen participation process/Efforts made to broaden citizen participation

The City followed HUD's guidelines for citizen and community involvement in preparation of the Consolidated Plan and Action Plan. To encourage citizen participation in the preparation of the documents, the City undertook several activities as summarized below.

Housing and Community Development Needs Survey

In order to evaluate public opinion of specific housing and community development needs, the City utilized a Needs Survey (in English and Spanish) in which the respondent was asked to rank the level of need for a particular housing program, capital improvement and public infrastructure project, and public service need.

Hard copies of the survey were distributed in various community locations within low- and moderate-income neighborhoods and at the Senior Center, and published on the City's website. A total of 334 responses were received with the following results:

- Top Housing Needs include the construction of new or rehabilitation of existing affordable rental housing, property maintenance/code enforcement, and the development of affordable senior housing.
- Top **Capital Improvement** Needs include parks and playgrounds, community/neighborhood centers, and childcare/youth centers.
- Top **Infrastructure Improvement** Needs include sidewalk improvements, bicycle and walking paths, street/alley improvements, and tree planting/beatification projects.
- Top **Public Service** Needs include anti-crime, homeless, and domestic violence preventative and response services.

A copy of the Housing and Community Development Survey, along with the Needs Survey Report can be found in the Appendix.

Community Workshops

The City held two community workshops on October 30, 2024, at Oak View Community Center and November 7, 2024, at Central Library. The presentation covered CDBG and HOME programs, eligible funding uses, and current funding uses, while also gathering public input on priority needs. Sixteen residents attended.

Stakeholders Workshop

On November 14, 2024, a stakeholders meeting was convened with various agencies that provide services to Huntington Beach's low- and moderate-income households, special needs populations, and homeless populations. The discussion focused on identifying priority needs and gaps in the services provided. A total of eight agencies participated in the meeting, including

those offering fair housing, tenant-based rental assistance, homelessness support, literacy programs, and other public services.

Community Meetings and Public Hearings

The Citizen Participation Advisory Board (CPAB) held a public hearing on January 16, 2025, at Huntington Beach City Hall to discuss community needs. Following this, two community meetings occurred on January 30 and February 20, 2025, allowing agencies and individuals to express opinions on public service gaps in Huntington Beach. The represented agencies/programs included Oakview Children's Bureau/Boys and Girls Club Afterschool Program, Fair Housing Foundation, Open Arms Food Pantry and Resource Center, Pathways to Independence, Project Hope Alliance, Robyne's Nest, Senior Center Care Management, and StandUp for Kids Orange County.

NEEDS ASSESSMENT

NA-05 Overview

Needs Assessment Overview

The Consolidated Plan's Housing and Community Development Needs Assessment was conducted in a variety of ways, including data review and analysis²; consultation with housing, homeless and service providers, and City Departments; Community Needs Assessment Survey; and community meetings to take public input on community needs. Key findings of the Needs Assessment include:

- Housing overpayment is the most prevalent housing problem, with 80% of Huntington Beach's low and moderate income (<80% AMI) renter households facing a cost burden (>30% of income on housing costs), and 45% facing a severe cost burden (>50% of income towards housing). Consultation with housing, homeless and public service providers identify the shortage of affordable rental housing as the most significant issue facing Huntington Beach's low- and moderate-income residents.
- Household overcrowding is a far less significant problem than overpayment in Huntington Beach and has decreased from 13% of all renters in 2000 to just 5% a decade later (as documented by the 2007-2011 ACS). However, certain neighborhoods continue to experience high levels of overcrowding.
- For homeless persons or persons at risk of becoming homeless, the most significant problem is the lack of affordable rental housing. This problem has been compounded by record high rents combined with decreases in public funding previously used to support affordable housing. Surveys of homeless service providers in Huntington Beach identify additional affordable housing as the top priority need, followed by the need for additional substance abuse services, and additional tenant-based rental assistance.
- The City's Capital Improvement Program (CIP) presents a comprehensive listing of planned and projected capital project needs based on various long-range plans, goals, and policies. Pursuant to the 2023/24-2027/28 CIP, the following general projects (within low- and moderate-income areas) have been identified in need of CDBG funds over the next five years:
 - Citywide sidewalk, curb and gutter improvements, including accessibility ramps
 - ✓ Residential overlay and slurry seal program
 - ✓ Other public facilities and infrastructure projects

² The American Community Survey (ACS), performed by the U.S. Census Bureau, is an ongoing Census statistical survey that samples a small percentage of the population every year, and publishes five-year averages of this data. Many of the tables in the Consolidated Plan are "pre-populated" by HUD with data from the 2016-2020 ACS, and thus the City has utilized the 2016-2020 ACS as the primary data source throughout the Plan.

Table 14 – Crowding Information – 2/2

Describe the number and type of single-person households in need of housing assistance.

According to the 2023 5-year American Community Survey (ACS) estimates, there are approximately 10,170 single-person renter households in the City, but only 1,465 studio rental units and 8,170 one-bedroom rental units available (2016-2020 ACS — refer to Section MA-10 later in the report). These figures highlight a critical shortage of affordable rental units, with high rents making these options inaccessible to low- and moderate-income individuals. Tables 11 and 12 indicate that 4,225 low- and moderate-income single-person renter households are spending more than 30% of their income on housing costs, with nearly half (1,940 households) experiencing a severe cost burden, allocating more than 50% of their income to housing.

Since 2010, the proportion of single-person renter households has remained steady, representing about 30% of all renter households and 12% of all households, regardless of tenure.

In contrast, the 2023 5-year ACS data shows that there are 9,983 single-person owner-occupied households in Huntington Beach, presumably residing in the 260 studio units and 1,255 one-bedroom owner units available. Of these owner-occupied households, 11% (1,105 households) face some form of cost burden, with 425 experiencing severe cost burdens. While this is a significant challenge, it is far less pronounced than among the single-person renter households, highlighting the relative stability and lower cost burden faced by those who own their homes. These findings underscore the ongoing need for affordable rental housing, particularly for lowand moderate-income single-person households.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

Among the 628 Huntington Beach residents reported by the Orange County Housing Authority (OCHA) as receiving Housing Choice Vouchers, 19% (117) have a disabled member. These statistics confirm the significant need for housing assistance among the City's disabled population.

Persons spending greater than half their incomes on housing are considered precariously housed, and at risk of homelessness. The 2016-2020 CHAS documents 30% of Huntington Beach's low-and moderate-income households as spending more than half their incomes on housing; applying the same 30% severe housing overpayment figure to the City's estimated 22,698 disabled population (2008-10 ACS) translates to approximately 6,809 persons with disabilities in need of housing assistance.

Domestic violence disproportionately affects women and children, with survivors often fleeing violent situations in search of safety and support. While specific data for Huntington Beach is limited, state-level statistics provide valuable insights into the scope of the issue. According to the California Partnership to End Domestic Violence (CPEDV), approximately 40% of women in California have experienced physical intimate partner violence at some point in their lives. When applying this statewide statistic to Huntington Beach's 2023 adult female population (age 18+), it is estimated that approximately 32,326 women in the City may have been victims of domestic violence at some stage.

In contrast, the California Department of Justice reported 443 domestic violence-related calls in Huntington Beach in 2023. This significant gap between the number of potential victims and the actual number of calls for police assistance suggests a troubling underreporting of domestic violence incidents. Many victims may be reluctant to seek help due to fear, shame, or lack of knowledge about available resources, further underscoring the need for additional support services in the community.

Beyond immediate safety concerns, women and children fleeing domestic violence often require a range of critical services, including emergency shelter, transitional housing, counseling, and childcare. These services are essential for helping survivors rebuild their lives and regain their independence. Given the large number of potentially affected women in Huntington Beach, the City may benefit from expanding domestic violence prevention and support programs to ensure that all victims have access to the care and protection they need.

Dating violence is defined as the physical, sexual, psychological, or emotional violence within a dating relationship, including stalking. Dating violence is widespread with serious long-term and short-term effects. Many teens do not report it because they are afraid to tell friends and family. A 2019 CDC Youth Risk Behavior survey found that 41% of females and 26% of males have experienced contact sexual violence, physical violence, or stalking by an intimate partner during their lifetime. Even more alarming, is the same study reports that one in every 12 teens experience physical dating violence and about the same number face sexual dating violence. Supporting healthy, nonviolent relationships could reduce teen dating violence and prevent its harmful, long-lasting effects on individuals, their families, and their communities. During the preteen and teen years, it is critical for youth to begin learning skills to create and maintain healthy relationships, including managing feelings and communicating in a healthy way. Research also highlights the need for prevention efforts that address the unique needs of teens who are at greater risk of experiencing teen dating violence.

What are the most common housing problems?

Based on the CHAS tables provided by HUD (extrapolated from 2016-2020 ACS data), the following summarizes two key housing problems in Huntington Beach:

- Among Huntington Beach's approximately 18,420 low and moderate income (<80% AMI) renter households, 14,090 (76%) face a cost burden of spending greater than 30% of income on rent. Over 40% of the City's low- and moderate-income renters face a severe cost burden, with 7,910 spending more than 50% of income on rent. As depicted in Figure 4 located in Appendix B, census tracts with the highest concentrations of severe renter overpayment (32-55% of all renters spending >50% income on rent) are scattered throughout the City, with a predominance north of Warner Avenue. Consultation with housing, homeless and public service providers identify the shortage of affordable rental housing as the most significant issue facing Huntington Beach's low- and moderate-income residents.
- Household overcrowding, defined as more than one person per room (excluding kitchens, porches, and hallways), is less prevalent than overpayment for housing in Huntington Beach, yet it remains a growing concern. Over the past decade, the rate of overcrowding has doubled from 5% in 2010 to 10% in 2020, as documented by the 2007-2011 ACS. Among low- and moderate-income renters, Table 13 highlights that 1,890 households—representing 10% of Huntington Beach's 18,420 low- and moderate-income renter households—are overcrowded. This marks a notable increase from 2015, when the number of overcrowded households stood at 1,190.
- For homeless persons or persons at-risk of becoming homeless, the most significant problem is the lack of affordable rental housing. This problem has been compounded by record high rents combined with decreases in funding available through Section 8 and HOME, and the loss of \$3 million in annual Redevelopment Housing funds previously used to support affordable housing. Surveys and discussions with homeless service providers in Huntington Beach conducted for the Consolidated Plan identify additional affordable housing as the top priority need, followed by the need for additional tenant rental assistance and wrap around support services.

Are any populations/household types more affected than others by these problems?

As reflected in Tables 12 and 13, small-related and single person, non-elderly ("other") households are most impacted by renter cost burden. Small, related households comprise 5,410, or 38%, of Huntington Beach's 14,105 low- and moderate-income renters spending greater than 30% of income on housing costs. Elderly person households are also most impacted by severe cost burden (> than 50% of income of housing costs) among low- and moderate-income renters, comprising 43% of the total low-and moderate-income households that experience severe cost burden.

Based on input from local service providers, low- and moderate-income populations particularly impacted by housing overpayment in Huntington Beach include single-parent families, senior citizens on fixed incomes, the working poor, young adults, and persons suffering from a physical, mental or developmental disability.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Record-high rents in Huntington Beach have significantly increased the risk of homelessness, particularly for lower-income individuals and families. Among the most vulnerable are family households and single mothers, who are disproportionately affected by the high costs of housing and childcare. Additionally, individuals working in low-wage jobs are particularly vulnerable, as rising rent prices further strain their already limited resources. The lack of sufficient funding and limited availability of Section 8 vouchers exacerbates the situation, leaving many households with few options for affordable housing.

Low-income renter households earning less than 50% of the Area Median Income (AMI) and facing extreme cost burdens—spending more than 50% of their income on rent—are at especially high risk of becoming homeless. This risk is compounded for those who are unemployed, employed in low-paying jobs, or dealing with serious health issues among family members. These factors create a perfect storm that can push households into homelessness if they do not have access to stable housing solutions.

In response, the City of Huntington Beach offers three tenant-based rental assistance programs aimed at individuals and families at imminent risk of becoming homeless or residing in shelters. These programs provide up to 24 months of assistance, along with case management and support services to help households transition to stable, non-assisted housing. Beneficiaries include homeless individuals, those at risk of homelessness, families with children, veterans, and seniors. For households nearing the end of their rental assistance, maintaining stable housing requires more than just financial support. Full-time employment, affordable childcare, reliable transportation, and access to affordable housing are critical. In addition, healthcare access, life skills training, and opportunities for further education or vocational training play an essential role in ensuring long-term housing stability and self-sufficiency.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

Not applicable. The City adheres to HUD's criteria for defining homelessness to identify those at imminent risk of homelessness.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

As highlighted in Table 12, an estimated 5,285 low- and moderate-income renter households, along with 4,485 owner-occupied households in Huntington Beach, are spending more than half

of their gross monthly income on housing costs. This significant financial burden leaves these households with limited resources to cover essential living expenses such as food, transportation, healthcare, utilities, and other necessities. With so little disposable income remaining, these households are especially vulnerable to eviction and homelessness. A sudden reduction in income—whether due to job loss, reduced work hours, or cuts in government benefits—can have catastrophic consequences. Similarly, unexpected expenses, such as a medical emergency, major car repair, or the onset of a serious illness that prevents someone from working, could push these households into financial instability, making it even more difficult to stay housed.

Discussion

As discussed above, housing affordability is a critical issue among Huntington Beach's renter population. With nearly 30% of low and moderate income (<80% AMI) renter households spending more than half their incomes on housing, severe housing cost burden is the most pervasive housing problem in the community. The need far exceeds the resources available through the Consolidated Plan and is further exacerbated by the increased costs associated with developing affordable housing.

As described in the City's 2013-2021 Housing Element, many of the workers who make up Huntington Beach's workforce earn modest incomes, making it challenging to afford in live in the City where they work. The analysis of rental housing costs and affordability presented in the Housing Market section of this report (Section MA-15) illustrates that households earning low and moderate incomes (up to 80% AMI) cannot afford average market rents in Huntington Beach.

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

A disproportionately greater housing need exists when the members of a racial or ethnic group at an income level experience housing problems at a greater rate (10% or more) than the income level as a whole. The following tables identify the presence of one or more housing problems among households of differing race/ethnicities and income levels, with the analysis that follows identifying any racial/ethnic group evidencing a disproportionate housing need. The four housing problems are:

- 1) Lacks complete kitchen facilities.
- 2) Lacks complete plumbing facilities.
- 3) More than one person per room; and
- 4) Cost Burden greater than 30%.

Discussion

Tables 15-18 above identify the presence of one or more housing problems (lacks complete kitchen, lacks complete plumbing, overcrowding at > 1 person per room, or overpayment at > 30%) for different racial/ethnic group within a given income category. The following summarizes the results of these CHAS tables and identifies groups experiencing disproportionate housing need in Huntington Beach.

Extremely Low Income (0-30% AMI)

- 78% of extremely low-income households in Huntington Beach have one or more housing problems, ranging from 44% to 100% by racial or ethnic group.
- The highest incidence of housing problems (100%) is experienced by Pacific Islanders, representing a disproportionate need based on the CHAS data provided by HUD. However, at just 15 households, the total number of extremely low-income Pacific Islander households in Huntington Beach is minimal, representing just 0.1% of the total 9,480 extremely low-income households in the City.
- Extremely low-income Black/African American and Hispanic households meet the definition of having a disproportionately greater housing need. A total of 90% of Black/African American and 89% of Hispanic extremely low-income households have one or more of the hour housing problems, compared to 78% of all households as a whole.

Low Income (30-50% AMI)

- 77% of low-income households in Huntington Beach have housing problems, ranging from 67% (American Indians) to 74% (Whites) to 82% (Hispanics) to 100% (Black/African Americans).
- Black/African American households have a disproportionate housing need in this income category; however, at only 85 households, the total number of low-income Black/African American households only represents 1% of the total households in this income group.

Moderate Income (50-80% AMI)

• 59% of moderate-income households in Huntington Beach have housing problems, ranging from 31% (Pacific Islanders) to 68% (Hispanics) by racial or ethnic group.

Median Income (80-100% AMI)

- 39% of all households in Huntington Beach in the median income bracket have housing problems, ranging from 32% to 60% by racial or ethnic group.
- Pacific Islander households earning median incomes evidence a disproportionate housing need, with 60% experiencing one or more housing problems. At 15 households, Pacific Islander households represent only 2% of Huntington Beach's median income households.

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Introduction

A disproportionately greater housing need exists when the members of a racial or ethnic group at an income level experience housing problems at a greater rate (10% or more) than the income level as a whole. The following tables identify the presence of *severe* housing problems among households of differing race/ethnicities and income levels, with the analysis that follows identifying any racial/ethnic group evidencing a disproportionate housing need. The four severe housing problems are:

- 1) Lacks complete kitchen facilities.
- 2) Lacks complete plumbing facilities.
- 3) More than 1.5 persons per room.
- 4) Cost Burden over 50%.

Table 22 – Severe Housing Problems 80 - 100% AMI

Data Source: 2016-2020 CHAS

Discussion

Tables 19-22 above identify the presence of one or more *severe* housing problems (lacks complete kitchen, lacks complete plumbing, overcrowding at > 1.5 person per room, or overpayment at > 50%) for different racial/ethnic group within a given income category. The following summarizes the results of these CHAS tables and identifies groups experiencing disproportionate housing need in Huntington Beach.

Extremely Low Income (0-30% AMI)

- 70% of all extremely low-income households in Huntington Beach experience one or more of the identified severe housing problems, ranging from 44% to 100% by racial or ethnic group.
- The highest incidence of severe housing problems (100%) is experienced by Pacific Islanders, representing a disproportionate need. However, at just 15 households, the

total number of these households in Huntington Beach is minimal, representing well under 1% of the total extremely low-income households in the City.

Low Income (30-50% AMI)

- 52% of low-income households in Huntington Beach have severe housing problems, ranging from 0% (Pacific Islanders) to 82% (Black/African Americans) by racial or ethnic group.
- Black/African American and American Indian/Alaska Native households earning low incomes evidence a disproportionate housing need, with 82% and 66% respectively, experiencing one or more severe housing problems. At 70 households, Black/African American households represent only under 1% of Huntington Beach's low-income households. Likewise, American Indian/Alaska Native households represent under 1% of low-income households as well, at 50 households.

Moderate Income (50-80% AMI)

- 25% of moderate-income households in Huntington Beach have severe housing problems, ranging from 0% to 39% by racial or ethnic group.
- Hispanic households earning moderate incomes evidence a disproportionate housing need, with 39% experiencing one or more housing problems. At 820 households, Hispanic households represent 7% of Huntington Beach's moderate-income households.

Median Income (80-100% AMI)

- 10% of median-income households in Huntington Beach experience severe housing problems, ranging from 0% to 20% by racial or ethnic group.
- Median income Asian households represent a disproportionate need, with 20% experiencing severe housing problems. Asian households represent under 2% of all households in this income category.

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Introduction

Housing Cost Burden

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	47,850	14,430	13,580	840
White	34,795	10,000	8,830	590
Black / African American	440	195	185	0
Asian	5,370	1,525	1,530	90

Hispanic	5,740	2,240	2,715	135

Table 23 - Greater Need: Housing Cost Burdens AMI

Data Source: 2016-2020 CHAS

Discussion

A disproportionately greater housing need exists when the members of a racial or ethnic group at an income level experience housing problems at a greater rate (10% or more) than the income level as a whole. Table 23 above identifies cost burden for each racial and ethnic group earning up to 100% AMI in Huntington Beach, including no cost burden (<30% income towards housing), cost burden (30-50%), severe cost burden (>50%), and not computed due to no/negative income. According to the CHAS data on which this table is based, 19% of Huntington Beach 0-100% AMI households experience a cost burden, with an additional 18% experiencing a severe cost burden. In comparison with this citywide average, only one racial/ethnicity group — Pacific Islanders - experience disproportionate housing cost burdens. However, with a total of just 90 Pacific Islander households (earning 0-100% AMI) identified as residing in Huntington Beach by the 2016-2020 American Community Survey (ACS), combined with the sampling methodology utilized by the ACS, the results for such a small sample size are less than statistically significant.

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

The analysis of housing problems and severe housing problems in sections NA-15 and NA-20 identify Hispanic, Asian, African American, Pacific Islander, and American Indian households as evidencing a disproportionate housing need. Tables 24A and 24B below identify the specific income categories among these racial groups where disproportionate need is apparent:

	% Households with Housing Problems (# Households with Housing Problems)								
Income Category	Citywide	Hispanic	Asian	African American	Pacific Islander	American Indian			
0-30%	78% 9,480	89% 1,865		90% 140	100% 15				
30-50%	77% 6,100			100% 85	1				
50-80%	59% 7,215								
80-100%	39% 3,145				32% 380				

Table 24A – Housing Problems: Greater Disproportionate Need

		% Households with Severe Housing Problems (# Households with Severe Housing Problems)							
Income Category	Citywide	Citywide Hispanic Asian African Pacific American Islander In							
0-30%	70% 9,475	86% 1,790		84% 130	100% 15				
30-50%	52% 7,960			82% 70		66% 50			
50-80%	25% 12,290	39% 820							
80-100%	10% 8,065		20% 140		1				

Table 24B – Severe Housing Problems: Greater Disproportionate Need

As illustrated in the above tables, the actual number of households within the Asian, Pacific Islander, African American and American Indian racial groups identified by the HUD CHAS data as experiencing disproportionate housing problems is extremely limited. As previously mentioned, given this small number of households, combined with the sampling methodology utilized by the American Community Survey, the results in such a small sample size are less than statistically significant.

In contrast, disproportionate housing needs among low- and moderate-income Hispanic households are evident in Huntington Beach, particularly for those households of extremely-low income.

If they have needs not identified above, what are those needs?

Not applicable.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

A minority concentration is defined as a census block group with greater than the City average of minority population (20%). Figure 6 (located in Appendix B) depicts minority concentrations in Huntington Beach. Under this definition, seven census block groups are identified as having a concentration of minorities. The majority of these areas are located in the area bound by Bolsa Avenue on the north, Talbert Avenue to the south, Goldenwest Street to the west and Newland Street to the east. Four of the seven census tracts correspond to the City's low- and moderate-income areas (refer to Figure 2).

NA-35 Public Housing – 91.205(b)

Introduction

The Housing Choice Voucher (HCV) program, formerly called the Section 8 program, is HUD's largest program that helps low-income families, the elderly, and the disabled find affordable decent, safe, and sanitary housing in the private market. Participants receive federally subsidized vouchers that they can use to rent the home or apartment of their choosing, provided that it meets the requirements of the program and agreement of the landlord. The funding assistance is provided to the family or individual, the voucher holder, and can move with the family or individual rather than being tied to the property or unit.

The Orange County Housing Authority (OCHA) is the local public agency providing Housing Choice Vouchers within Huntington Beach. According to a special data run conducted by OCHA for the City, as of February 2025, there were a total of 628 Huntington Beach households receiving tenant-based Housing Choice Vouchers; 85 of these were Veterans Affairs Supportive Housing Vouchers, 39 were Continuum of Care Vouchers, 16 were Family Self-Sufficiency Vouchers, and 24 were Family Unification Vouchers. Elderly households comprise 61% of the City's Section 8 recipients (381 households), indicative of several large senior housing complexes with significant numbers of Section 8 tenants. The City also has a significant number of disabled households receiving Section 8 (116 households), although many of these households are also likely to be seniors. There are no public housing projects located within Huntington Beach.

Data Source: PIC (PIH Information Center)

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

Not Applicable, as there is no public housing in Huntington Beach and OCHA does not have a public housing program.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

The most immediate need of residents with Housing Choice Vouchers is available, affordable rental units that fall within the rent levels of HUD's Fair Market Rents.

How do these needs compare to the housing needs of the population at large

High rents and low vacancy rates in Orange County effect the population at large, not just low and extremely low-income residents. The increase in home prices has led to a decline in housing affordability, contributing to additional demand for rental housing.

Discussion

The impact of the high cost of rentals and low vacancy rates is evidenced in the increase in renter overpayment over the past decade. The 2016-20 American Community Survey (ACS) documents 46% of all Huntington Beach renters spend greater than 30% of their income on rent, compared to 38% in 2000. Furthermore, the ACS documents 8% of Huntington Beach's population as below the poverty level. These conditions have contributed to a lengthy waiting list for housing assistance, both for Housing Choice Vouchers from OCHA, tenant based rental assistance offered through the City, and for occupancy within the affordable rental projects within the City.

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction

Homelessness has become an increasingly urgent challenge across the United States, particularly in the Los Angeles and Orange County regions. A variety of factors contribute to this rise, including the lack of affordable housing for low- and moderate-income individuals, a growing number of people living below the poverty line, reductions in public assistance programs, substance abuse issues, the de-institutionalization of individuals with mental illness, and, in some cases, an increase in people who choose homelessness as a lifestyle.

The U.S. Department of Housing and Urban Development (HUD) mandates that all Continuum of Care jurisdictions conduct a biennial unsheltered count and an annual sheltered count to measure homelessness on a single night during the last ten days of January. For 2024, Orange County's Sheltered Point in Time (PIT) Count was held on the night of Monday, January 22, 2024, with demographic data collected from all emergency shelter and transitional housing programs throughout the county. The Unsheltered PIT Count took place over three days, from Tuesday, January 23, to Thursday, January 25, 2024, to ensure that the county's 800-square-mile jurisdiction was thoroughly canvassed. With improvements in the PIT process, methodology, and data quality—thanks to the use of GIS technology—the results from the 2019, 2022, and now 2024 counts offer the most accurate representation of Orange County's homeless population to date. It is important to note that the PIT Count not only involves a physical tally of those experiencing homelessness but also includes a formula to estimate the total number of homeless individuals.

The 2024 PIT Count identified 7,322 homeless individuals in Orange County, representing a substantial 28% increase from the 2022 count, which recorded 5,718 individuals. In Huntington Beach specifically, the count found 433 homeless individuals—173 of whom were unsheltered and 260 sheltered. This marks an increase from the 2022 figures, which reported a total of 330 homeless individuals: 188 unsheltered and 142 sheltered. Pinpointing the exact cause of the increase is a challenge given the number of variables that could influence the fluctuation of the numbers. The County does know, however, that certain resources existed in 2022 that did not exist during the 2024 PIT Count. Some of those include:

- The Emergency Rental Assistance Program (ERA). Approximately \$300 million in rental assistance was awarded by the County and state to Orange County residents to prevent evictions due to COVID-19.
- The Eviction Moratorium pursuant to the COVID-19 pandemic was still in effect; the moratorium ended on May 31, 2022.

While the 2024 Point-in-Time Count report provides specific demographic information about the homeless population for the entire County, data for Huntington Beach specifically is limited.

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

Nature and Extent of Homelessness: (Optional)

Race	Sheltered	Unsheltered
American Indian, Alaskan Native, or Indigenous	36	75
American Indian, Alaska Native, or Indigenous & Hispanic/Latino/e/o	91	28
Asian or Asian American	103	164
Asian or Asian American & Hispanic/Latino/e/o	8	7
Black, African American, or African	329	223
Black, African American, or African & Hispanic/Latino/e/o	13	7
Hispanic/Latino/e/o	37	1509
Middle Eastern or North African	1	40
Middle Eastern or North African & Hispanic/Latino/e/o	0	2
Native Hawaiian or Pacific Islander	53	45
Native Hawaiian or Pacific Islander & Hispanic/Latino/e/o	12	5
White	1,120	1,772
White & Hispanic/Latino/e/o	1,275	205
Multi-Racial & Hispanic/Latino/e/o	20	14
Multi-Racial & not Hispanic/Latino/e/o	51	77
TOTAL	3,149	4,173
Ethnicity	Sheltered	Unsheltered
Hispanic/Latino/e/o	1,456	1,777
Not Hispanic/Latino/e/o	1,693	2,396

Notes: Race and ethnicity categories have been combined and expanded to align with HUD guidance for race and ethnicity reporting.

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

Individuals and families experiencing homelessness have diverse needs, which can range from medical care, job training, childcare, mental health services, credit counseling, and substance abuse treatment to English language education. Homeless families, in particular, may require housing that accommodates their unique needs, such as sufficient space for family members, affordable childcare, and support through counseling and life skills training.

According to the 2024 PIT Count, Orange County's homeless population includes 1,128 people in 347 families with at least one adult and one minor. Of these families, 291 (representing 948 people, including 362 adults and 586 children) were sheltered, which accounts for 84 percent of the total homeless families. Given that Huntington Beach constitutes six percent of the county's

homeless population, it is estimated that approximately 68 individuals in 21 families within Huntington Beach may require housing assistance.

For veterans, specific family data is unavailable for the 328 counted in the county. However, applying the same six percent estimate suggests that about 20 veterans in Huntington Beach may also need housing assistance.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

The 2024 Point-In-Time Count provides an analysis of the racial and ethnic composition of the homeless population in Orange County. The data indicates that Hispanic individuals account for 56% of this population, followed by White individuals at 39%, Black individuals at 8%, Asian individuals at 4%, American Indian/Alaska Native individuals at 2%, and multi-racial individuals at 2%. This reveals a notable overrepresentation of Hispanic and Black/African American groups within the homeless demographic compared to their respective proportions in the general population, where Hispanics comprise 20% and Black/African Americans less than 2%.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

The 2024 Point-in-Time (PIT) Count reported that Huntington Beach had an estimated 173 unsheltered homeless individuals and 260 sheltered individuals, accounting for 40% and 60%, respectively, of the total homeless population in the area. In contrast, approximately 57% of the total homeless population of 7,322 in Orange County were unsheltered. This suggests a lower incidence of unsheltered homelessness in Huntington Beach compared to the county overall. This difference may be attributed to the presence of the City's Navigation Center and a Homekey Program site in the city, which was functioning as an emergency shelter at the time of the count. This Homekey Program site is in the process of transitioning to permanent housing.

Discussion

The data collected from the Orange County 2024 PIT describing 7,322 homeless persons within Orange County, coupled with a 2024 Continuum of Care housing inventory count showing a total of 9,812 total year-round emergency, transitional, and permanent beds/units for homeless persons Orange County suggests the overall need for additional housing for homeless has been met, though not by type of housing. The prevalence of health-related conditions such as substance abuse, mental health, alcoholism, and other issues experienced by homeless persons also suggest a need for public services to assist with these conditions. Public outreach to housing and homeless service providers conducted in support of the Consolidated Plan echoes this need.

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction

Certain segments of the population may have greater difficulty finding adequate and affordable housing due to their unique special needs and circumstances. Such circumstances range from fixed incomes to limited mobility to the need for supportive services. The groups that categorically fall under special needs are the elderly and frail elderly, persons with disabilities, victims of domestic violence, persons with HIV/AIDS, and persons with substance abuse problems. These groups represent a significant part of Huntington Beach's population, and efforts must be made to ensure that decent, affordable and accessible housing is available to all such special needs populations.

Describe the characteristics of special needs populations in your community:

Elderly

The elderly and frail elderly special needs population (age 65 and above) comprise approximately 39,110 residents in Huntington Beach (20%), reflecting a slightly greater proportion of seniors in comparison with Orange County (17%) and California as a whole (16%). Over 47% of Huntington Beach's seniors are 75 years of age and above, a population, which may require more supportive housing options as they age and tend to become more frail. Some of the more pressing housing needs of Huntington Beach's seniors include:

- Rental affordability. Rising rents are a particular concern due to the fact that most seniors are on fixed incomes. Of Huntington Beach's approximately 7,495 senior renter households, 70% are low and moderate income (<80% AMI), with 42% low income (<50% AMI). Market rents in Huntington Beach are well beyond the level affordable to low- and moderate-income households, as confirmed by the Census which documents 45% of the City's low/mod income senior renters spending more than half their incomes on rent.
- **Disabilities.** The Census identifies approximately 32% of Huntington Beach's seniors as having one or more disabilities, encompassing physical, sensory and mental disabilities, as well as conditions that limit the senior's ability to leave their home. Combined with the significant number of older seniors (age 75+) indicates a large segment of the senior population that may require various levels of housing support.
- Housing maintenance. Huntington Beach has approximately 22,000 senior homeowners.
 As these homeowners age, many may be unable to maintain their homes or perform
 minor repairs. The installation of grab bars and other assistance devices may be necessary
 to enhance accessibility.

Addressing the diverse housing needs of Huntington Beach's senior population will require strategies which foster independent living (such as home accessibility improvements, second

units, rehabilitation assistance), as well as strategies that encourage the provision of a variety of supportive living environments for seniors of all income levels.

Persons with Disabilities

The 2016-2020 ACS identifies 22,698 Huntington Beach residents as having one or more disabilities, representing 12% of the City's population. About one-third of these adult residents are unable to live independently. The ACS documents the presence of following types of disabilities among Huntington Beach's disabled residents:

- Ambulatory 42%
- Cognitive 40%
- Hearing 29%
- Vision 14%

Of the City's senior population, 32% suffer from a disability. As Huntington Beach's population continues to age, the number of residents with disabilities will also increase.

Victims of Domestic Violence

Individuals fleeing domestic violence are generally women and children. It is difficult to estimate the number of victims of domestic violence, as many victims do not call the police or seek services. Women between the ages of 18 and 44 are at an increased risk for domestic violence, with lower-income and immigrant women particularly vulnerable to abuse. This group needs transitional housing with counseling and supportive services.

Persons with HIV/AIDS

Persons with HIV/AIDS are considered a special needs group due to their need for affordable housing, health care, counseling and other supportive services. The Orange County Health Care Agency tracks HIV/AIDS cases and reports 266 newly diagnosed HIV cases in 2023 in Orange County. Among the top give cities impacted by new HIV cases include Santa Ana (60), Anaheim (41), Orange (18), Graden Grove (17), Costa Mesa (17), and Irvine (14). Short-term housing needs for persons with AIDS — many of whom face homelessness — may include hospice facilities, shelters or transitional housing. Long term needs include affordable housing near public transportation and health care facilities.

Alcohol/Other Drug Abuse

According to the National Center for Drug Abuse Statistics, one in ten Americans over the age of 12 suffers from Alcohol Use Disorder. In California, excessive alcohol use is responsible for an average of 15,443 deaths annually. Similarly, about half of individuals aged 12 and older in the United States have used illicit drugs at least once. Drug use is most prevalent among individuals aged 18 to 25, with 39% reporting use, compared to 34% of those aged 26 to 29. In California, an average of 6,198 drug overdoses occur each year, and approximately 2.31% of all deaths in the state are attributed to drug overdose, a figure that has increased by 10.37% over the past three years.

Individuals struggling with drug and alcohol addictions often require a supportive living environment to break the cycle of substance abuse. Supportive housing for individuals with substance use disorders typically includes transitional housing programs that offer counseling, job training, and other resources to facilitate recovery. The County is the primary funding source for these types of programs, helping to provide the necessary services for those in need.

What are the housing and supportive service needs of these populations and how are these needs determined?

Housing and service needs are addressed under each group heading in the prior section. The housing needs of persons with disabilities is further elaborated on below.

Persons with Disabilities

Some people with disabilities may live comfortably without special housing accommodations, but persons with physical and/or sensory disabilities often require specially designed, barrier-free housing that allows freedom of movement not only to and from the housing unit, but also within the unit itself. Special modifications to permit free access are very important in maintaining independence. The California Code of Regulations Title 24 requirements set forth access and adaptability requirements for the disabled population. These regulations apply to public buildings and require that ramps, larger door widths, restroom modifications, and other special facilities be incorporated into building designs. However, these standards are not mandatory for new single-family residential construction. Therefore, conventional housing may require modification to ensure its suitability for occupancy by a disabled person.

The City has a well-defined Reasonable Accommodation procedure that ensures individuals with disabilities are protected. Specifically, Chapter 17.77 – Reasonable Accommodation Procedures of the Huntington Beach Municipal Code (HBMC) provides an application process and review requirements for a Reasonable Accommodation request from the City's zoning and land use regulations, policies, and practices when necessary to provide an individual with a disability an equal opportunity to use and enjoy a dwelling. Chapter 17.77 ensures that reasonable accommodation requests are processed efficiently without imposing costs on the applicant. The City does not assess a fee for reasonable accommodation requests and does not require a public hearing. The administrative approval of reasonable accommodations is an objective decision-making process. The findings the City must make to provide a reasonable accommodation are based on the objective need to provide an individual with a disability an equal opportunity to use and enjoy a dwelling.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

As reported in the Orange County Health Care Agency HIV/AIDS Surveillance Program's 2023 HIV Fact Sheet, by the end of 2023, there were 7,044 individuals living with HIV disease in Orange County. Among these individuals, 266 (or 4%) were newly diagnosed with HIV in 2023, highlighting ongoing challenges in both prevention and treatment.

The demographic profile of those living with HIV in the county reflects a significant gender disparity, with the majority (78%) of individuals being male. Ethnically, the population is predominantly Hispanic and White, accounting for 51% and 31% of cases, respectively. Asians make up 11% of those living with HIV, and African Americans represent 6% of the population. This distribution points to specific communities that may face unique challenges in terms of access to care, education, and prevention efforts.

When examining age distribution, the largest group of individuals diagnosed with HIV in 2023 were between the ages of 26 and 35, comprising 33% of new diagnoses. The next largest age groups were individuals aged 36 to 45 years (25%) and 19 to 25 years (18%). Individuals aged 46 to 55 years made up 14% of new diagnoses, while those 56 years and older accounted for 9%. This age distribution underscores the ongoing need for targeted HIV prevention and treatment strategies, particularly among younger populations, while also addressing the needs of older individuals who may face different health challenges related to living with HIV.

This data highlights the importance of continuing efforts to provide comprehensive care, support, and education for individuals living with HIV, while also addressing the specific needs of different demographic groups within the county.

If the PJ will establish a preference for a HOME TBRA activity for persons with a specific category of disabilities (e.g., persons with HIV/AIDS or chronic mental illness), describe their unmet need for housing and services needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2) (ii))

Not applicable. The City of Huntington Beach administers HOME Tenant-Based Rental Assistance (TBRA) programs designed to provide crucial support for individuals and families facing housing instability. These programs are specifically targeted to assist homeless individuals, those at risk of homelessness, veterans, victims of domestic violence, families with children, and seniors. The HOME TBRA programs offer rental assistance to help eligible participants secure safe and stable housing while also providing case management and support services to facilitate long-term housing stability. By offering temporary financial assistance and resources, the City aims to prevent homelessness, reduce the risk of eviction, and help vulnerable populations transition into stable, independent living situations. These efforts are essential in addressing the unique challenges faced by these groups, including limited income, high housing costs, and the need for additional supportive services.

Discussion

There is a small but significant population of non-homeless special needs persons in the City. Particular attention should be paid to elderly and disabled populations. Seniors 65 and over make up 20% of Huntington Beach's population. It's notable that the elderly population in the City is higher compared to the proportion of seniors in Orange County (17%) and the State as a whole (16%). In addition, among Huntington Beach's 7,500 senior renter households, nearly three-quarters are low and moderate income. This population is particularly vulnerable to rent increases as the majority are on fixed incomes.

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

The City of Huntington Beach is home to a wide array of public facilities designed to serve the diverse needs of its residents. These amenities include five libraries, 79 parks covering nearly 767 acres with 190 playgrounds, a gym and pool facility, three clubhouses, a nature center, a golf club, a senior center, three community centers, a civic center, an art center, an International Surf Museum, and a community college. Additionally, the City is fortunate to have 208 acres of public beach and a 98-acre public golf course, providing recreational opportunities for residents and visitors alike.

However, despite these extensive resources, many of the City's public facilities are aging and require significant repair and modernization. Key infrastructure assets such as the Civic Center, fire stations, libraries, and community centers are facing a range of critical issues, including water intrusion, failing HVAC systems, and outdated electrical infrastructure. Years of underfunding have led to deferred maintenance, creating safety risks and limiting the effectiveness of these facilities. To ensure the continued delivery of essential services and protect public safety, the City must prioritize investment in upgrades, secure additional funding, and adopt sustainable, modern infrastructure practices.

The City's 2024 Infrastructure Report Card outlines a number of immediate, near-term, and long-term facility needs. Among the most urgent are the Main Street Library HVAC installation project, critical repairs to police and fire stations throughout the City, and necessary improvements to the Oak View Library, Oak View Family Resource Center, Central Library, and playground improvements at 9th Street and Lagenbeck Parks.

To address these challenges, the City follows a five-year Capital Improvement Program (CIP), which serves as a strategic guide for future facility and infrastructure investments. The City's 2023/24 – 2027/28 CIP identifies citywide facility ADA improvements that could potentially utilize Community Development Block Grant (CDBG) funding over the next five years. Many of the City's public facilities require significant accessibility improvements to comply with the Americans with Disabilities Act (ADA). These improvements may involve the removal of architectural barriers and updates to restrooms, doors and doorways, signage, and paths of travel to ensure greater accessibility for all residents.

By investing in these critical facility projects, the City of Huntington Beach aims to ensure that its public facilities continue to serve the needs of its residents safely and effectively for years to come.

How were these needs determined?

The City of Huntington Beach's Capital Improvement Program forecasts capital needs over a five-year period based on various long-range plans, goals, and policies. The plan presents a comprehensive listing of planned and projected capital project needs which have been identified by City staff for the five-year planning period. The CIP document includes both new projects and upgrades to existing facilities.

Needs were also determined in the City's 2024 Infrastructure Report Card which offers an evaluation of 13 infrastructure subcategories, including public facilities and parks, and aim to highlight strengths and urgent challenges while creating a long-term plan for a resilient Huntington Beach. While Huntington Beach benefits from adequate services in areas like parks, the pier and plaza, and roads, several systems—including stormwater, wastewater, and city facilities—are aging and approaching the end of their useful life. Of particular concern are the rehabilitation of City facilities, alleys, and pump stations, which have been identified as critical objectives requiring immediate attention to prevent service disruptions and safety risks.

Finally, a Housing and Community Development survey was available during the development of this Con Plan. Of the 334 surveys collected, respondents ranked parks and playgrounds, community/neighborhood facilities, and childcare/youth facilities as the top three facility needs in Huntington Beach.

Funds for capital improvement projects are provided mainly from Infrastructure Funds, however, some projects, particularly those involving sidewalk, curb, and gutter construction in enhancement areas, community center renovations, and citywide ADA improvements, can be funded with CDBG funds.

Describe the jurisdiction's need for Public Improvements:

Infrastructure improvements cover such issues as upgrades or expansion of streets, sidewalks, curbs and gutters, sewer and drainage systems, and streetlights, and are in general an eligible expenditure for CDBG funds within low and moderate-income areas. Most of Huntington Beach's low- and moderate-income neighborhoods are older, and many contain aging infrastructure. The City's CIP has identified ADA ramp repairs and installation to be funded with CDBG funding in the next five years. CDBG funds will be allocated for the repair, design, and construction of ADA ramps throughout Huntington Beach, enhancing accessibility across key public spaces and ensuring that residents with mobility challenges have equal access to the City's services and facilities.

How were these needs determined?

The City's Capital Improvements Plan identifies infrastructure and public improvements to be undertaken in Huntington Beach from 2023/24 to 2027/28. The City has generally relied on a variety of other non-CDBG funding sources to pay for infrastructure improvements, and is actively addressing water, sewer, storm drain and street deficiencies through ongoing projects.

Nonetheless, the City may direct CDBG funds towards infrastructure improvements in low- and moderate-income enhancement neighborhoods as needed.

The Consolidated Plan Housing and Community Development Needs Survey, completed by 334 households in Huntington Beach identified sidewalk improvements, bicycle and walking paths, street and alley improvements, and tree planning/beautification as the most critical community development needs in Huntington Beach.

Describe the jurisdiction's need for Public Services:

Huntington Beach is home to a diverse range of special needs populations, as well as numerous low- and moderate-income households, all of which have distinct public service needs. Consultation with community residents and social service providers, conducted as part of this Consolidated Plan, has led to the identification of several critical service needs within the City. These needs are essential to supporting the well-being of vulnerable groups and enhancing overall community health and resilience. The following key service areas were highlighted:

- Homeless Services: Addressing the needs of the homeless population, including services tailored to homeless youth, mental health care, case management, and wraparound services that offer comprehensive support.
- 2. **Senior Services**: Providing resources for homebound seniors, offering home modification assistance, ensuring access to nutrition resources, and providing respite for caregivers to support aging residents.
- 3. **Healthcare and Mental Health Services**: Expanding access to mental health services, substance abuse treatment, healthcare specifically for seniors, and drug and alcohol education to foster improved health outcomes for residents.
- 4. **Financial Support Services**: General support services that provide additional financial resources to assist individuals and families in need.
- 5. **Disability Services**: Offering resources for persons with disabilities, including assistive technology and other tools to support independence and enhance quality of life for individuals with disabilities.
- 6. **Affordable Childcare**: Access to affordable childcare services that enable families to work and maintain financial stability while ensuring quality care for their children.
- 7. **Youth Services**: Providing recreational and sports programs to engage young people, promoting physical activity, teamwork, and social skills development.

Additionally, the Housing and Community Development Needs Survey revealed that the most urgent needs identified by residents included anti-crime efforts, homelessness prevention, and services for victims of domestic violence (for further details, see Appendix C).

The City of Huntington Beach, along with local nonprofit organizations, offers a wide range of services to address the needs of low- and moderate-income residents, as well as those with special needs such as persons with disabilities and the homeless. The City actively supports the delivery of these essential services through its Community Services and Police Departments,

alongside its ongoing partnership with public service providers, ensuring a coordinated and effective response to the community's most pressing challenges.

How were these needs determined?

Consultation with social service providers actively engaged in the Huntington Beach area, coupled with the distribution of a comprehensive Housing and Community Development Needs Survey, has resulted in valuable and detailed input regarding the needs of the diverse populations they serve. This feedback has been instrumental in identifying critical areas of concern and in shaping a clear understanding of the challenges facing these communities. Additionally, the Community Development Department has played a vital role by offering crucial guidance in prioritizing public service needs, ensuring that resources and efforts are strategically directed toward the most pressing issues. This collaborative approach ensures that both community needs and departmental objectives are aligned, fostering a more effective and responsive strategy for addressing housing and social service challenges in Huntington Beach.

HOUSING MARKET ANALYSIS

MA-05 Overview

Housing Market Analysis Overview

Table 28 presents the City's housing unit mix, as reported in the 2016-2020 ACS. The City has approximately 81,840 housing units, reflecting a net increase of about 2,679 units over the past 10 years. The mix of housing types in Huntington Beach has remained relatively stable over the past two decades, with 60% of units being single-family homes and 36% being multi-family units. Additionally, the City has 18 mobile home parks, containing approximately 3,290 mobile home units, which make up 4% of the City's total housing stock.

Housing tenure refers to whether a housing unit is owned, rented, or vacant. It serves as a key indicator of the housing climate within a community, reflecting the relative affordability of housing and residents' ability to access housing opportunities. Tenure also influences residential mobility, with owner-occupied units generally experiencing lower turnover rates compared to rental housing. According to the 2016-2020 ACS (Table 29), 54% of Huntington Beach's households are homeowners, while 41% are renters. Over the past two decades, owner occupancy has slightly declined in the City. This trend can be partly attributed to the increasing cost of homeownership and the development of multi-family housing designed to maximize the use of residentially zoned land.

Another important characteristic of the City's housing supply is unit size in relation to the number of bedrooms. Large households, defined as those with five or more members, create a demand for units with three or more bedrooms. The 2016-2020 ACS identifies 8,430 rental units in Huntington Beach with three or more bedrooms, which generally aligns with the needs of the City's 5,592 large renter households. While it may seem that there is a sufficient supply of large rental units, many of these units are likely single-family homes, which may not be affordable for renters.

Regarding single-person households, approximately 25% of the City's renters are one-person households, yet only 4% of the rental stock consists of studio units (without a bedroom). Although one-bedroom units account for an additional 24% of rental housing in Huntington Beach, the high rental prices make these units unaffordable for many single individuals.

The vacancy rate is a key indicator of overall housing availability within a community and often reflects how well the current supply of for-sale and rental housing meets demand. A vacancy rate of 5% for rental housing and 2% for ownership housing is typically regarded as healthy, indicating a balance between housing supply and demand. According to the 2020 Census, the residential vacancy rate in Huntington Beach was 1.2% for ownership units, signaling a limited supply of homes on the market. For rental housing, the 2020 Census reported a vacancy rate of 2.6%, which is significantly below the healthy rate of 5%. Moreover, the City's August 2024 *Multi-Family*

Submarket Report by CoStar Group, a company specializing in real estate information and analytics, documented a multi-family rental vacancy rate of 3.2% for the Huntington Beach/Seal Beach area. This report suggests that the Huntington Beach multi-family vacancy rate is declining due to insufficient supply growth. Additionally, a recent survey conducted in February 2025 on the California Regional Multiple Listing System (CRMLS) indicated only 165 available rental units in Huntington Beach, with prices ranging from \$1,495 per month for a 300-square-foot unit to \$35,000 per month for a nearly 6,800-square-foot harbor front property.

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

As presented in the Affordable Rental Housing Table below, Huntington Beach currently has 2,459 deed-restricted affordable units. Approximately 20 percent (502 units) of these affordable units are for senior citizens, with the remainder available to family households. This inventory includes all multi-family units assisted under federal, state, and local programs, including HUD, state/local bond programs, density bonus, inclusionary, and former redevelopment programs.

TOTALS			2,459 units	

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

In return for public assistance, the developer/owners of affordable housing developments are typically required to make the units affordable to lower income households for a specified period of time contingent on the requirements of individual funding programs or city incentives (such as density bonus).

Upon expiration of a project's affordability controls, the affordable units are at risk of being sold or converted to market rate housing. As documented in the City's Affordable Rental Housing Table above, the City has 293 deed-restricted affordable units that are at risk of conversion to market rates during the 2025-2029 Con Plan period. This includes 48 senior units and 245 family units.

Does the availability of housing units meet the needs of the population?

The available housing units do not meet the needs of low-income City residents, as evidenced by the high rates of housing overpayment discussed in the following section on the Cost of Housing (MA-15).

Describe the need for specific types of housing:

The following types of housing are not being provided for in the market without some level of public assistance:

- Rental housing affordable to extremely low-, low- and moderate-income households.
- Rental housing with three or more bedrooms affordable to low- and moderate-income large households (5+ members).
- Studio rental units affordable to low- and moderate-income single person households.
- Homeownership housing affordable to the moderate- and middle-income workforce.
- Affordable, accessible housing for persons living with disabilities.
- Permanent supportive housing for persons with special needs, including homeless individuals and families, persons living with HIV/AIDS and their families, transition age (emancipated foster care) youth, persons with chronic mental illness, and others.

Discussion

The City of Huntington Beach utilizes a diverse range of funding sources for housing development, rehabilitation, tenant-based rental assistance, and services for special needs and at-risk populations. However, the overall funding available to the City is limited, and it can take several years to accumulate sufficient resources for housing projects. Some funding sources, such as the remaining housing successor funds from the dissolution of the Huntington Beach Redevelopment Agency, have been allocated to the Homekey Program project for major renovation/construction of "The Oasis" at 17251 Beach Boulevard.

The City's primary funding source for affordable housing is the federal HOME program, though unfortunately, these funds have been steadily reduced each year. Over the past five years, the City has directed its HOME funds toward a significant affordable senior housing project, Pelican Harbor at 18431 Beach Boulevard consisting of 43 units, nine of which are HOME-restricted. Additionally, the City has supported several tenant-based rental assistance programs, which have provided housing opportunities for homeless individuals, those at risk of homelessness, seniors, veterans, and victims of domestic violence. These programs have not only facilitated access to

housing but have also provided essential support services to promote self-sufficiency and independence.

As federal HOME funds continue to decline, the City will increasingly rely on alternative funding sources, such as Low-Income Housing Tax Credits, to finance future affordable housing initiatives. In this context, the City must also advocate for legislative changes that would secure increased funding for affordable housing.

MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

Many housing challenges, such as overcrowding and cost burden, are directly linked to the cost of housing within a community. When housing costs are high in relation to household income, the prevalence of housing issues tends to be significantly higher. This section examines the affordability of housing in Huntington Beach for lower and moderate-income households.

Cost of Housing

	Base Year: 2009	Most Recent Year: 2020	% Change
Median Home Value	642,900	803,400	25%
Median Contract Rent	1,535	1,881	23%

Table 33 – Monthly Rent

Data Source Comments: Online Rental Survey conducted on 02/25/2024 on the California Regional Multiple Listing System (CRMLS)

Is there sufficient housing for households at all income levels?

No. The greatest need for affordable housing in Huntington Beach continues to be for extremely low-income households. However, even moderate-income households face significant challenges due to high rent levels, making it difficult to find suitable housing.

Table 32, "Housing Affordability," outlines the number of owner and renter housing units in Huntington Beach that are affordable for households within each income range, based on the affordability standard of spending no more than 30% of income on total housing costs. By incorporating data from the 2016-2020 CHAS (Comprehensive Housing Affordability Strategy) report, which details the number of owner and renter households in each income category, we can better understand the housing shortage for low- and moderate-income households.

For instance, the table reveals that there are only 4,355 rental units in Huntington Beach affordable to low-income (<50% AMI) households, while there are 11,265 lower-income renter households, creating a shortfall of more than 250% in affordable rental housing. In the case of owner-occupied housing, the 2016-2020 CHAS report identifies just 7,290 affordable homeowner units, while there are 19,995 owner households earning less than 100% of the Area Median Income (AMI). These disparities between household incomes and housing costs mean a significant portion of Huntington Beach's population is spending more than 30% of their income on housing.

How is affordability of housing likely to change considering changes to home values and/or rents?

High prices and low inventory keep home ownership out of reach for many Huntington Beach residents. Limited land for new development, increasing construction costs, and rising inflation rates are all anticipated to keep home prices from dropping to affordable levels for many households. At the same time, the "Great Recession" and housing crisis in 2008 and 2009 resulted in many previous homeowners becoming renters. This increased demand for rental housing has placed upward pressure on rents, negatively impacting housing affordability for renters.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

A rental survey conducted on the CRMLS in February 2025 documented a total of 169 rental units available, including three 0-bedroom units, 33 one-bedroom units, 49 two-bedroom units, 43 three-bedroom units, 36 four-bedroom units, three five-bedroom units, and two six-bedroom units. According to the survey data, the median rents by bedroom size are as follows: \$2,725 for a studio/0-bedroom, \$2,800 for a one-bedroom, \$3,750 for a two-bedroom, \$6,250 for a three-bedroom, \$6,950 for a four-bedroom, \$8,800 for a five-bedroom, and \$10,250 for a six-bedroom rental unit.

As shown in Table 33, HUD Fair Market Rents (FMRs) are significantly underestimated compared to actual market rents in February 2025. For example, a 0-bedroom studio rents for a median price of \$2,725, while HUD's reported fair market rent is \$2,200, resulting in a difference of \$525. The most significant discrepancies between current rental rates and FMRs are seen in three- and four-bedroom units, with deviations of nearly \$2,500 each.

The high rental market in Huntington Beach particularly affects the Section 8 rental subsidy program, administered by the Orange County Housing Authority, which relies on private landlords who request rents above the payment standards allowed.

Discussion

Housing affordability is based on the relationship between household income and housing expenses. According to HUD and the California Department of Housing and Community Development (HCD), housing is considered "affordable" if the monthly payment is no more than 30% of a household's gross income.

Table 34 presents maximum affordable rents by income level and household size and compares that with median market apartment rents in Huntington Beach. As the table indicates, citywide average rents are above the level of affordability for all extremely low-, low- and moderate-income households. For example, the maximum affordable monthly rent for a three-person low-income household is \$1,776, or up to \$2,841 for moderate income household, whereas the median market rent for a two-bedroom apartment is \$3,750.

	Maximum Affordable Rent					
Income Level	Studio (1 person)	1 Bedroom (2 person)	2 Bedroom (3 person)	3 Bedroom (4 person)		
Extremely Low Income (0 - 30% AMI)	\$829	\$948	\$1,066	\$1,184		
Low Income (31 - 50% AMI)	\$1,381	\$1,578	\$1,776	\$1,973		
Moderate Income (51 - 80% AMI)	\$2,210	\$2,525	\$2,841	\$3,156		
Huntington Beach Average Apt Rents	\$2,725	\$2,800	\$3,750	\$6,250		

Table 34 – Comparison of Market and Affordable Rents

Housing sales price statistics for January 2025 were gathered from the CRMLS, providing an indepth look at the housing market in Huntington Beach. According to the data, 89 condominiums and single-family homes were sold during the month, with a median sales price of \$1,355,000. This price point is well beyond the reach of low- to moderate-income households, who struggle to afford homes in this price range.

While there are some older and more affordable units on the market, these are becoming increasingly rare. Moreover, it is highly unlikely that any market-rate homes or condominiums

would be affordable to lower- or moderate-income residents, particularly those earning up to 80% of the Area Median Income (AMI). For households in this income bracket, the current housing prices in Huntington Beach present an insurmountable barrier to homeownership.

The sales price data underscores a broader trend in beach communities, where housing costs are generally much higher than in other regions. In order to make homeownership accessible to low-and moderate-income buyers, it is clear that significant public subsidies are required. Without such subsidies, it is virtually impossible for these households to purchase homes at market prices, given the extreme price disparities between what they can afford and the current market rates. This highlights the growing need for affordable housing initiatives and the importance of providing financial support to bridge the gap between market prices and the needs of lower-income buyers.

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

To adequately meet the needs of residents, housing within a city must be in habitable and safe condition, free from hazards such as lead-based paint, faulty electrical wiring, or other structural or safety concerns. Housing units in poor condition pose a significant risk to the health and safety of residents, potentially leading to serious injuries or long-term health issues. In addition to the immediate risks to residents, housing in disrepair can result in considerable financial costs for the City or housing providers including costly repairs, potential legal liabilities, and a decrease in property values.

Ensuring that all housing units meet basic standards of safety and quality is crucial not only for the well-being of individuals and families, but also for maintaining the overall health of the community. Substandard housing conditions can also contribute to broader issues such as increased emergency services calls, public health concerns, and a lower quality of life for residents.

This section provides a comprehensive overview of the condition of housing throughout Huntington Beach, examining the prevalence of housing in need of repairs or upgrades and identifying areas where intervention is needed to maintain safety standards and improve living conditions for residents.

Describe the jurisdiction's definition of "standard condition" and "substandard condition but suitable for rehabilitation":

The term "standard housing condition" is defined as a dwelling unit that complies with the California State Health and Safety Codes. According to this definition, substandard conditions, as outlined in the State Health and Safety Code Section 17920.3, refer to a dwelling that presents any of the following hazards that could pose a risk to health or safety: (a) inadequate sanitation, (b) structural hazards, (c) nuisances, (d) electrical wiring issues, (e) plumbing problems, (f) mechanical equipment malfunctions, (g) faulty weather protection, (h) risk of fire or explosion, and other unsafe conditions.

A dwelling is generally considered suitable for rehabilitation if the cost of repairs does not exceed 75% of the unit's replacement value.

Condition of Units

	Owner-Occupied		Renter	-Occupied
Condition of Units	Number	%	Number	%

Need for Owner and Rental Rehabilitation

The age of a community's housing stock can provide an indicator of overall housing conditions. Typically housing over 30 years in age is likely to need rehabilitation work to major elements of

the structure, such as roofing, siding, plumbing and electrical systems. As a mature community, the majority of Huntington Beach's housing stock consists of units older than 30 years of age, as shown in Table 36. Among owner-occupied housing, 74% of units were constructed prior to 1980, reflective of post WWII building boom throughout much of Orange County. Similarly, a substantial proportion of Huntington Beach's rental housing is greater than 30 years in age (71%); this housing typically suffers more wear-and-tear from tenants than owner-occupied housing.

Table 35 presents the number of housing units in Huntington Beach with one or more housing problems, including: 1) lack of complete plumbing facilities, 2) lack of complete kitchen facilities, 3) more than one person per room, and 4) cost burden greater than 30 percent. As presented, approximately 30% of owner units have one or more of these problems (or "conditions"), and approximately 50% of renter units have one or more problems. The majority of these problems are associated with housing cost burden, rather than household overcrowding or the physical condition of the unit, as confirmed by Table 9 Housing Problems (among households earning up to 100 percent AMI) which identifies 650 units in Huntington Beach as lacking complete plumbing or kitchen facilities, and 2,170 overcrowded households, in comparison to 23,230 households experiencing cost burden.

As indicated in Table 38, given the strength of Huntington Beach's housing market, City Code Enforcement staff are unaware of any homes sitting vacant or bank-owned in need of rehabilitation or replacement.

Estimated Number of Housing Units Occupied by Low- or Moderate-Income Families with LBP Hazards

The age of the housing stock is the key variable for estimating the number of housing units with lead-based paint. Starting in 1978, the use of lead-based paint on residential property was prohibited. National studies estimate that 75 percent of all residential structures contain lead-based paint and that older structures have the highest percentage of lead-based paint. As shown Table 36, about 74% of Huntington Beach's owner-occupied units were built prior to 1980, and of these 32,520 units, just 4% or 1,820 units have occupants that include children. Similarly, among Huntington Beach's rental housing, 71% were built prior to 1980 (23,990 units), with children present in just 3% or 920 of these units.

Pre-1980 housing units with children pose the greatest threat of lead poisoning. With an estimated 2,740 such households in Huntington Beach, lead exposure among children is not a sizable issue. Another risk factor is household income, with lower income households having a greater risk of exposure. The 2016-2020 CHAS identifies 43 percent of Huntington Beach's households as earning less than 80 percent HAMFIError! Reference source not found, translating to an estimated 33,355 low- and moderate- income households residing in the City's approximately 56,510 pre-1980 housing units.

Discussion

As documented in Huntington Beach's 2013-21 Housing Element, City Code Enforcement staff conducted a citywide windshield survey to identify neighborhoods with deteriorating or deteriorated housing conditions. The survey focused on the exterior and publicly visible areas of units, rating each unit as "good," "fair," or "poor" based on several factors, such as roof condition, paint, and landscaping. A total of 318 units were identified as needing significant repair or replacement. The City is committed to maintaining housing units in compliance with standards and continues to monitor those in need of repair or replacement through its Code Enforcement Division.

In addition to the housing conditions survey, City staff identified areas of deterioration based on observed violations of the Uniform Housing Code. This effort was part of a broader strategy to identify geographic areas that meet the U.S. Department of Housing and Urban Development (HUD) guidelines for utilizing Community Development Block Grant (CDBG) funding for targeted code enforcement and preservation activities. The survey revealed a significant deterioration issue in the area bounded by Bolsa Chica Street to the west, Bolsa Avenue to the north, Brookhurst Street to the east, and Atlanta Avenue to the south. This area, known as the "Special Code Enforcement Target Area," includes several census tracts and has a total population of 67,625. Of these residents, 45,300 individuals (69.99%) fall within the low- to moderate-income bracket.

MA-25 Public and Assisted Housing – 91.210(b)

Introduction

The following section discusses the Housing Assistance Voucher (formerly Section 8) rental assistance program administered by the Orange County Housing Authority (OCHA), consisting of 628 vouchers for low-income households in use in the City of Huntington Beach (2025). The City's inventory of 2,459 units of assisted rental housing, and 293 units at risk of conversion to market rate, is discussed in the earlier section MA-10. OCHA does not have any public housing.

Within the overall Housing Assistance Voucher rental assistance program, OCHA administers several specialized HUD programs. The three specialized programs active in Huntington Beach are: Veteran Affairs Supportive Housing, Shelter Plus Care, and Family Unification. Each of these programs is described below, and the number of participants in the City identified.

- The Housing and Urban Development-Veterans Affairs Supportive Housing (HUD-VASH) Program provides permanent housing subsidies and case management services to homeless veterans with mental and addictive disorders through a collaboration of the Departments of Housing and Urban Development and Veteran Affairs. A total of 650 HUD-VASH vouchers are being currently utilized in Orange County, with 85 (13%) in use within Huntington Beach.
- The CoC (Continuum of Care) Program is designed to assist individuals and families experiencing homelessness by providing services to help them move into transitional and permanent housing. The program aims to promote communitywide commitment to ending homelessness by funding nonprofit providers and local governments. Additionally, the housing choice voucher program allows very low-income families to choose their own housing, with the assistance of the Public Housing Authority (PHA). A total of 40 CoC families are currently receiving housing choice vouchers as of January 2025.
- **Self-Sufficiency (FSS) Program** is a proactive initiative by HUD that assists families living in public housing or receiving Section 8 vouchers. It aims to foster economic independence by providing services such as case management, referrals, and supportive social services. Eleven households in Huntington Beach are currently enrolled in the FSS Program.
- The Family Unification Program (FUP) provides housing assistance to families for whom the lack of adequate housing is a primary factor in the separation of children from their parents. Under FUP, rental assistance is provided to families for whom the lack of adequate housing would result in 1) the imminent placement of the family's child or children in out-of-home care, or 2) the delay in the discharge of the child or children to

the family from out-of-home care. Twenty-four families in Huntington Beach are currently assisted through the FUP program.

- Families assisted under OCHA's HCV program, may move from their current unit to another unit within OCHA's jurisdiction, or to a unit outside OCHA's jurisdiction under Portability. Within the limitations of the regulations a participant family or an applicant family that has been issued a voucher has the right to use tenant-based voucher assistance to lease a unit anywhere in the United States providing that the unit is located within the jurisdiction of a PHA administering a tenant-based voucher program The process by which a family obtains a voucher from one PHA and uses it to lease a unit in the jurisdiction of another PHA is known as portability. There are 115 Huntington Beach residents utilizing the portability allowability.
- The Rental Assistance for Non-Elderly Persons with Disabilities Program provides incremental Section 8 Housing Choice Vouchers (HCV) for non-elderly disabled families served by PHAs with demonstrated experience and resources for supportive services. These vouchers will enable non-elderly disabled (NED) persons residing in nursing homes or other healthcare institutions to transition into the community with appropriate services. One Huntington Beach resident is currently receiving a NED voucher.
- The Emergency Housing Voucher (EHV) program provides a significant opportunity for PHAs, Continuums of Care's, and Victim Service Providers (VSPs) to develop collaborative partnerships and strategies that effectively address the needs of vulnerable populations in their communities. Through EHV, HUD provided 70,000 housing choice vouchers to local PHAs to assist individuals and families who are homeless, at-risk of homelessness, fleeing, or attempting to flee, domestic violence, dating violence, sexual assault, stalking, or human trafficking, or were recently homeless or have a high risk of housing instability. Fifty-nine Huntington Beach households are currently receiving emergency housing vouchers.

MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

Table 40 presents an inventory of emergency shelter, transitional, and permanent supportive housing facilities located within Huntington Beach, as well as in the surrounding communities of Costa Mesa, Santa Ana, Fountain Valley and Westminster, as reported by the Orange County Continuum of Care. Transitional housing is intended to facilitate the transition of homeless individuals and families to permanent housing. This type of housing limits the length of stay and re-circulates the assisted unit to another eligible individual or family. Supportive housing is defined as permanent rental housing linked to a range of support services designed to enable residents to maintain stable housing. A total of 3,301 beds were counted as part of the 2024 Orange County Continuum of Care (CoC) Housing Inventory, with 336 beds specifically available within Huntington Beach.

The narrative that follows describes these facilities, as well as homeless services available to Huntington Beach's homeless and at-risk population.

Facilities and Housing Targeted to Homeless Households

					nt Supportive
	Emergency S	Shelter Beds	Housing Beds	Hous	ing Beds
	Year Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	51	0	64	400	
Households with Only Adults	1,085	0	44	1,649	
Chronically Homeless Households	0	0	0	312	
Veterans	2	0	0	207	
Unaccompanied Youth	8	0	0	0	

Table 40 - Facilities and Housing Targeted to Homeless Households

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted at homeless persons.

The City of Huntington Beach has launched a comprehensive strategy to address homelessness. In FY 2021/22, the City appointed a Deputy Director of Homelessness & Behavioral Health Services and created the Homeless & Behavioral Health System of Care. This system provides outreach, engagement, case management, and connects individuals to shelter, housing, and behavioral health support. While the Deputy Director's role has evolved since February 2022, the City continues to support homelessness services.

The HB Cares Volunteers program, established in 2023, is a key component of the system. It has trained 21 volunteers in de-escalation, trauma-informed care, vicarious trauma, and Mental Health First Aid. Volunteers manage the homeless outreach line, ensuring a streamlined communication process, and facilitate group activities at the Navigation Center such as resume building, job skill development, recovery groups, bingo, etc. Additionally, a licensed Marriage and Family Therapist began volunteering in December 2023, assisting with 62 Disabling Condition Assessments and continuing to support mental health services as needed.

The system also includes three full-time homeless outreach social workers and a social services supervisor who engage with individuals, families, veterans, and seniors at risk of or experiencing homelessness. They connect people to resources, service providers, and help secure documents for County of Orange housing programs. They work closely with local shelters, such as the Navigation Center, and partner with crisis teams like Be Well to offer comprehensive support.

Be Well OC (BWOC) in Huntington Beach employs a Mobile Crisis Response Team consisting of two operating vans and two Crisis Interventionists who provide in-community assessments and stabilization. The team is trained to offer information, referrals, transportation, and follow-up support to address mental health situations.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

The City of Huntington Beach has developed a variety of services and facilities aimed at meeting the needs of homeless individuals, particularly chronically homeless persons, families with children, veterans, and unaccompanied youth. The Navigation Center, located at 17642 Beach Boulevard, opened in December 2020 and provides emergency shelter and essential services to individuals experiencing homelessness. Operated by Mercy House, the Navigation Center can shelter up to 174 adults and couples with ties to Huntington Beach. It offers case management, access to health services, and connections to permanent housing solutions, specifically supporting chronically homeless individuals and families as they work toward housing security in a safe, stable environment.

Looking ahead, the City is still in the process of analyzing a repurposing of the Navigation Center property into a permanent navigation center and affordable housing development. It is proposed that the permanent project will offer supportive housing paired with services to chronically homeless individuals, further addressing long-term homelessness in the community. The City's ongoing collaborations with organizations like the State of California Homekey Program, the County of Orange, National CORE, and American Family Housing help leverage additional resources and expertise, enhancing the impact of these homelessness initiatives. Through these services and facilities, Huntington Beach remains committed to providing comprehensive support

to homeless individuals and families, helping them transition from homelessness to permanent housing and stability.

Furthermore, in FY 2021/22, the City launched the HB Oasis project at 17251 Beach Boulevard, repurposing the former Quality Inn & Suites into transitional housing for up to 64 adults and households experiencing homelessness. This initiative, in collaboration with the State of California Homekey Program, the County of Orange, National CORE, and American Family Housing, provided trauma-informed, evidence-based support and services, including case management and connections to permanent housing. The HB Oasis project helped participants, including veterans and those with mental health or substance use issues, transitioning to long-term stability. In May 2024, HB Oasis was converted into permanent supportive housing and has since undergone major renovation and construction with the addition of kitchenettes to individual units and the use of project-based vouchers to assist with securing permanent housing. Supportive services offered at HB Oasis include mental and physical health care, substance use treatment, trauma counseling, employment assistance, and support for individuals involved in the criminal justice system. These wraparound services are essential for individuals overcoming barriers to housing and self-sufficiency, especially those experiencing chronic homelessness.

Finally, the City is continuing its Tenant-Based Rental Assistance Program, which has been instrumental in preventing homelessness since 2014. The program assists homeless individuals, families, seniors, and veterans by providing rental assistance to help them secure affordable housing, preventing displacement and promoting long-term stability.

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

This section outlines the facilities and services available in Huntington Beach for populations with special housing needs. By offering additional support, these services enhance residents' quality of life and facilitate their transition to full independence when appropriate.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify and describe their supportive housing needs.

Elderly and Frail Elderly

As presented previously in MA-10, Huntington Beach has six senior housing projects providing 842 rental units affordable to a mix of very low-, low- and moderate-income senior households. The State Community Care Licensing Division identifies 70 residential care homes for the elderly in Huntington Beach, providing 1,052 beds for seniors 60 years of age and over (February 2025). The majority of these residential care facilities are small (6 or fewer beds) "board and care" homes, with five larger assisted living facilities: Huntington Terrace (185 beds); Ivy Park at Huntington Beach (142 beds); Merrill Gardens (150 beds); Oakmont (111 beds); and Sea Cliff Health Care Center (84 beds). These residential facilities provide care, supervision and assistance with activities of daily living, such as bathing and grooming, and may also provide incidental medical services.

For those seniors who live on their own, many have limited incomes and as a result of their age may not be able to adequately maintain their homes. The City administers a Housing Rehabilitation Program that provides low interest loans and emergency grants to assist lower income homeowners in making needed repairs. Mobile homes are also eligible for emergency rehabilitation grant assistance, a large number of which are occupied by seniors.

The City also provides monthly rental assistance to eligible very low-income senior mobile homeowners in Huntington Beach to help cover a portion of their space rent for up to 24 months. As of March 2025, approximately 81 households were selected through a lottery process to participate in the program. Under the program guidelines, participating households are required to pay no more than 30% of their gross monthly income toward space rent, with the City covering the remaining balance up to the local fair market space rent.

The Huntington Beach Community Services/Senior Services Division operates the Senior Center at Central Park. Programs offered include recreational and social activities, a congregate and home delivered meals program, preventative healthcare, transportation services, and supportive services. The Senior Outreach Center specifically focuses on programs and services to support independent living for frail or homebound seniors.

The Huntington Beach Council on Aging (HBCOA) was formed in 1973 with the mission of enhancing the dignity and quality of life of the City's senior population through comprehensive services, education and advocacy. HBCOA publishes the monthly newsletter *OUTLOOK* on *Active Aging*, providing information on monthly activities at the Senior Center and community resources for seniors living in Huntington Beach.

Persons with Disabilities

There are a number of resources available throughout the County to serve the disabled and mentally ill residents of Huntington Beach. Table 41 below identifies some of the organizations in and near Huntington Beach that specialize in providing services for the disabled and mentally ill population.

Organization Name	Type of Service Provided	Population Served
Ability First - Newport Mesa Center	After School enrichment programs for children with developmental disabilities	Developmentally disabled youth
Alzheimer's Family Services Center	Provides dementia-specific adult day health care, caregiver support, and education outreach	Persons with dementia and their families
Blind Children's Learning Center of Orange County	Braille instruction, occupational and communication therapies, and vision services	Children from birth to 12 th grade
CSR Children's Foundation Inc.	Assists children challenged by mental or physical disabilities by providing "once in a lifetime" watersport experiences that can be shared with their families.	Children with special needs
Creative Support	Individualized service plans to promote independent and fulfilling lives	Adults with a wide range of abilities and challenges including intellectual disability, autism spectrum disorder, seizure disorder, cerebral palsy, physical challenges, traumatic brain injury, and mental illness.
Independent Endeavor	Apartment Search, housing application process, social security paperwork, medical appointments, medication monitoring, community & personal safety, community interaction, and social interaction & skills	Disabled adults
Independent Options, Inc. Orange County	Residential services, day services, and adult family home agency	Disabled adults
Dayle McIntosh Center for the Disabled (DMC)	Skills training, adaptive life skills, resource/referrals, transitional youth services, etc.	Disabled persons

Organization Name	Type of Service Provided	Population Served
Goodwill Industries of Orange County	Vocational evaluation, training, and employment opportunities	Adults with physical, psychiatric, and developmental disabilities
ICAN California Abilities Network	Provides quality employment, life skills, and social programs for Southern California's adults with intellectual & developmental disabilities.	Adults with intellectual and developmental disabilities
John Henry Foundation	Medically supervised residential facility	Mentally disabled persons
Mental Health Association of Orange County	Medication support, case management, vocational rehabilitation, etc.	Mentally disabled persons
No Ordinary Moments, Inc.	Coordinates the OC Regional Center to provide services to developmentally disabled. Operates a supported living program and a mobile intervention unit/crisis team	Developmentally disabled persons
Orange County Arc	Educational, vocational, and life skills training	Developmentally disabled adults
Project Independence	Support for independent living, day programs, positive behavior supports, recreational and vocational resources	Developmentally disabled persons
Providence Speech and Hearing Center	Complete diagnostic and treatment services	Persons with speech and hearing impairments
Regional Center of Orange County	Educational and vocational skills training, resources and referrals	Developmentally disabled adults
United Cerebral Palsy Association of Orange County, Inc.	Support group, life skills training	Persons with cerebral palsy and similar disabilities
Visiting Nurse Association Home Health Systems	Home-based nursing, rehabilitation, etc.	III, injured, or physically disabled persons
Vocational Visions	Health-related services and job placement support	Developmentally disabled adults

Table 41 - Inventory of Facilities and Services for the Disabled and Mentally III Population: Huntington Beach and Surrounding Areas

The living arrangements for persons with disabilities depends on the severity of the disability. Many persons live at home in an independent environment with the help of other family members. To maintain independent living, disabled persons may require assistance. This can include special housing design features for the physically disabled, income support for those who are unable to work, and in-home supportive services for persons with medical conditions. Accessible housing can also be provided via senior housing developments.

The State Community Care Licensing Division (February 2025) identifies two small family homes for children with mental, developmental or physical disabilities (11 bed capacity) and three adult residential facilities (11-person capacity) in Huntington Beach that provide 24-hour non-medical care.

Substance Abuse Facilities and Services

The Orange County Care Agency offers a variety of outpatient and residential programs aimed at reducing or eliminating alcohol and drug abuse within the community. These services include substance use disorder (SUD) treatment at different levels of care, such as Outpatient, Intensive Outpatient, Withdrawal Management (both Social Model and Medical Detox), Residential Treatment, and Aftercare/Recovery Services.

The programs provide a range of services, including crisis intervention, assessments and evaluations, individual, group, and family counseling, HIV education, pre- and post-test counseling, voluntary testing, and referrals to additional services when necessary. Outreach efforts are also made to schools and the broader community to raise awareness and offer support.

The Perinatal Program offers services at both outpatient and residential levels, focusing on promoting the health of the community by providing evidence-based treatment for pregnant and parenting women. Special emphasis is placed on supporting women who are pregnant or IV drug users. These programs aim to increase understanding of addiction and recovery, teaching coping skills, fostering safe living environments, and addressing issues such as domestic violence and abuse.

Additional specialized programs include Methadone maintenance and detoxification, other Medication-Assisted Treatment (MAT), Recovery Residences, and services for individuals referred by the Orange County Collaborative Court, such as those involved in Drug and DUI courts.

Substance abuse services available to Huntington Beach residents include, but are not limited to:

- Orange County Drug & Alcohol Treatment Centers Outpatient, Short Term and Long Term Residential for a mix of mental health and substance abuse services.
- Crecent Moon Recovery Addiction treatment center providing drug rehab services including evidence-based and medically assisted care, mental health therapy sessions, and medical detox
- SoCAL Beach Recovery Drug and alcohol rehab, detox programs, dialectical behavior therapy, dual-diagnosis programs, and PTSD services.
- Coastline Behavioral Health Substance abuse treatment and detoxification through inpatient, partial hospitalization programs, intensive outpatient programs, and sober living.
- Buckeye Recovery Network Outpatient care for addictions in alcohol, benzodiazepine, cocaine, fentanyl, gabapentin, opioids, and opiates.
- Seacliff Recovery Center Substance abuse treatment and detoxification through hospital inpatient, short-term and long-term residential services.
- Hired Power Personal Recovery Assistants Work one-on-one with clients to overcome addictive behaviors through outpatient services.

• Connor Ranch Treatment Center – Alcohol, detox, recovery, residential drug rehab center.

HIV/AIDs

As the most populous city in Orange County, Anaheim receives and administers the federal Housing Opportunities for persons with AIDS (HOPWA) for the entire County, including Huntington Beach. The County's Health Care Agency is also responsible for administering federal grants provided by the Department of Health and Human Services and for collecting data on HIV/AIDS patients.

HOPWA funds are utilized to support a variety of activities on a regional basis. These services include the following:

- Supportive services and housing offered via contracts with the Orange County Health Care Agency, including:
 - ✓ Short-term emergency housing and/or utility assistance
 - ✓ Transitional housing
 - ✓ Housing coordination services
 - ✓ Medical detoxification-bed services
- Tenant-based rental assistance administered by the Anaheim Housing Authority (available for residents countywide, including Huntington Beach)

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

Huntington Beach supports a comprehensive approach to ensuring that individuals with mental health conditions in Orange County are discharged from facilities in a manner that adheres to both legal and ethical standards. According to California Health and Safety Code Section 1262, mental health patients cannot be discharged from psychiatric, skilled nursing, or hospital facilities without a written aftercare plan. The Orange County Health Care Agency (HCA) is responsible for determining the timing and appropriate location for the discharge of clients diagnosed with serious and persistent mental illnesses, both from inpatient stays and outpatient services. The County contracts with a variety of inpatient providers that offer different levels of care. These contracts ensure compliance with state law regarding "anti-dumping" policies, which prevent patients from being discharged to unsafe or unsuitable living conditions.

Before discharge, each patient is assessed to determine the appropriate level and type of residential care. Patients may be placed in Adult Residential Facilities (ARF) or Residential Facilities for the Elderly (RFE), especially if they are over 60 years old, where they can receive care and supervision. In some cases, patients are placed in more specialized settings, such as Residential Rehabilitation beds or programs, which offer enhanced services. Some individuals may return to their former residences or be placed with family members. Others are connected to clinics and placed in supported short-term housing programs, room and board facilities, or independent living arrangements, depending on their ability to live on their own and whether they have funding or employment. For those determined to be capable of independent living,

assistance is provided to transition into Supportive Housing or Mental Health Services Act (MHSA) units as they become available.

A range of agencies collaborate to ensure that individuals with mental illnesses in Orange County are provided with appropriate housing and aftercare. The Continuum of Care, OC Community Services, the Orange County Health Care Agency, Mercy House, Friendship Shelter, and several inpatient programs all play distinct yet coordinating roles. Other active organizations include Community Care Licensing, the California Hispanic Commission on Drugs and Alcohol, and the Illumination Foundation, which also contribute to the housing and support network for individuals transitioning out of inpatient care.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

Huntington Beach is planning a range of initiatives in the coming year to address the housing and service needs of its special needs population. The City will allocate Community Development Block Grant and HOME funding to support various programs and activities aimed at improving the quality of life for individuals facing unique challenges. The City is committed to continuing its support for programs targeting groups such as the elderly, individuals with disabilities, victims of domestic violence, those struggling with alcohol and drug abuse, and veterans.

CDBG funds will be specifically allocated to two key initiatives: the Huntington Beach Senior Center Care Management Program, which provides vital support and resources to seniors in the community, and a homeowner rehabilitation program which provides both grants and loans that may be used to assist lower income seniors and disabled persons with accessibility improvements, ensuring that residents can remain safely in their homes.

Additionally, HOME funding will support a tenant-based rental assistance program aimed at senior mobile homeowners, helping them afford the rising costs of space rents. This program will provide rental assistance for up to 24 months, offering much-needed financial relief to seniors living in mobile homes.

In addition to supporting the senior mobile homeowner rental assistance program, HOME funding will also benefit victims of domestic violence, veterans, and other individuals with special needs through two other tenant-based rental assistance programs. Administered by Mercy House and Families Forward, these programs provide up to 24 months of rental assistance for 30 households a year, offering crucial financial support to help individuals secure stable housing. Beyond just rental assistance, these programs are designed to assist participants in achieving long-term independence by providing services that support self-sufficiency, such as case management, life skills training, and connections to other community resources. This multifaceted approach aims to ensure that those who face significant challenges have the support they need to transition to independent living and maintain stable housing over time.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

Same as above.

MA-40 Barriers to Affordable Housing – 91.210(e)

Negative Effects of Public Policies on Affordable Housing and Residential Investment

Huntington Beach has demonstrated a strong commitment to supporting affordable housing through various measures, including updates to its zoning ordinance and direct financial assistance to affordable housing projects. In late 2021, the City conducted public meetings to revise its Affordable Housing ordinance to better align with community needs and legal requirements. These updates aimed to provide compliance options with the law, implement current Housing Element programs, and adjust in-lieu fees and methodology to reflect current market conditions.

Despite funding constraints resulting from the loss of Redevelopment Housing Funds, which previously generated approximately \$3 million annually for housing activities, the City remains dedicated to developing affordable housing. However, one of the primary challenges faced by Huntington Beach in this regard is the scarcity of vacant land suitable for residential development. Much of the underdeveloped residentially zoned land is owned by separate owners, making lot consolidation and the demolition of existing structures necessary to accommodate higher density infill development.

To address this challenge, the City has adopted alternative policy tools, such as the Amended Downtown and Beach and Edinger Corridors Specific Plans. These plans provide opportunities for high-density mixed-use and residential infill development, facilitating the creation of affordable housing units within the community. Through continued collaboration and innovative approaches, Huntington Beach aims to overcome barriers and enhance the availability of affordable housing for its residents.

MA-45 Non-Housing Community Development Assets - 91.215 (f)

Introduction

The tables and narrative that follow describe the local economic condition of Huntington Beach and compares the ability of the local work force to satisfy the needs of local business. The tables give data on the primary industries in the City, the total population in the labor force, the unemployment rate, occupations by sector, travel time to work, the educational attainment of Huntington Beach residents by age, and median earnings.

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

As presented in Table 42, in Huntington Beach, the local economy includes the following primary industries:

- Arts, entertainment, and accommodations (18% of jobs)
- Manufacturing (14% of jobs)
- Education and health care services (13% of jobs)
- Retail trade (13% of jobs)
- Professional, scientific, and management services (8% of jobs)
- Construction (8% of jobs)

The 2020 Census estimates that jobs in the arts, entertainment, and accommodations represent 18% of all jobs, while an additional 13% of all jobs are in retail trade. The high concentration of jobs in these two industries is indicative of Huntington Beach's prosperous tourist economy. With beautiful beaches along the Pacific Ocean, combined with a wide variety of entertainment options, Huntington Beach welcomes over 11 million tourists throughout the year. The City boasts top-class restaurants, shopping, hotels, resorts, spas and a thriving downtown district. The downtown district includes an active art center, an eclectic shopping district, and the International Surfing Museum. Downtown was also once the home of the famous music club "The Golden Bear," which hosted the likes of Jimi Hendrix and Frank Sinatra. Visitors can also find the Surfing Hall of Fame and the Surfing Walk of Fame downtown. The City is also host to several special events each year including a very popular Independence Day Parade, the U.S. Open of Surfing, the AVP Pro Beach Volleyball Series, the, an Annual Cruise of Lights Boat Tour, and a Main Street Halloween Celebration, to name a few.

Manufacturing comprises nearly 14% of all jobs in Huntington Beach mainly due to several major companies being located there such as Boeing, Quicksilver, Cambro Manufacturing, and C&D Aerospace. The 2020 Census reports approximately 10,000 manufacturing jobs in the City, with only 8,000 workers in the manufacturing sector.

Jobs in education and health care, and professional, scientific, and management services, and construction round out the top six industries in Huntington Beach.

Describe the workforce and infrastructure needs of the business community:

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

With nearly 50% of Huntington Beach's employment base in the manufacturing, retail and arts/entertainment/accommodations industries combined, a large segment of the City's economy does not necessarily require an educated workforce. However, as indicated in Table 46, 79% of Huntington Beach's employed workforce has at least some college education. Nearly half (48%) of the employed population has a Bachelor's degree or higher. Furthermore, approximately 75% (60,249 persons) ages 18 and over have at least some college experience. Persons with a bachelor's degree or higher make up 41% of the 18+ years population.

Huntington Beach has adequate transportation infrastructure to support its growing manufacturing and tourism business community. The City is served by three major freeway/highways - Interstate 405, Pacific Coast Highway (Highway 1), and Beach Boulevard (Highway 39) running through the heart of Huntington Beach. Regional bus service is offered through the Orange County Transportation Authority (OCTA), with 14 bus routes currently in Huntington Beach and the number of routes and lines adjusted by OCTA based on ridership patterns. Major bus lines, such as Greyhound and Trailways, also provide transportation to the area.

For passenger service, Amtrak stations are located in Santa Ana and Anaheim, each approximately 20 minutes away. The Union Pacific Railroad serves the City's Gothard Street with freight transportation to this industrial corridor that forms the central spine of the community. This rail service permits direct line shipment to the Midwest and Northwest.

And lastly, the Ports of Long Beach and Los Angeles are located 18 miles northwest and provide worldwide access to the global marketplace. The Ports of Long Beach and Los Angeles are committed to promoting maritime commerce and international trade.

The City recognizes the importance of providing a transportation system that supports the economic vitality of the City. The Goldenwest Transportation Center at the intersection of Center Avenue and Gothard Street provides multiple bus routes and park-and-ride facilities serving transit riders. Both the City and OCTA operate demand responsive services. OCTA runs the ACCESS program, while both the City and OCTA operate the Senior Services Mobility Program.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

Huntington Beach boasts a highly educated workforce, with 34% of its labor force having completed some college or earned an associate degree, 26% holding a bachelor's degree, and 15% attaining a graduate or professional degree. This educational composition supports the city's primary industries and aligns with the skill sets required for many of its leading occupations. The largest occupational sector in the city is management, business, and finance, employing 43% of the labor force, followed by sales and office roles, which account for 30% of the workforce. Additionally, 25% of the labor force holds a high school diploma or less, often working in service or retail sectors, where minimum wage is common. These individuals could potentially benefit from job training programs that could provide opportunities for career advancement.

In support of local businesses, the City of Huntington Beach has partnered with the business community to establish two Business Improvement Districts (BIDs), aimed at improving the local economy and attracting new businesses. The Downtown Business Improvement District, formed in 2004, focuses on promoting the downtown commercial area. Businesses within this district contribute an annual assessment based on their size and type, with funds being allocated to marketing and improvements through decisions made by a BID Advisory Board. Additionally, the Tourism Business Improvement District, created in 2014 after the disbanding of the Hotel/Motel BID, aims to market the City as a destination for tourists, meetings, and events. The Tourism BID is funded by a 6% assessment on gross short-term room revenue, helping to increase overnight room sales and further strengthen the City's tourism economy. These efforts are vital in fostering business growth and improving Huntington Beach's image as a prime destination.

The two BIDS will continue to promote job and business growth in the 2025/26 – 2029/30 Consolidated Plan period.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

The City of Huntington Beach supports a variety of economic development activities that help to create and retain jobs for low- and moderate-income households. Activities supported include a commercial property locator; employment assistance in the form of referrals to resources for finding and training employees; financial assistance through the Small Business Administration; business counseling and training via a litany of not-for-profit Orange County agencies; technical assistance in permits, trademarks, environmental review, and taxes; and export and trade assistance. Micro-enterprise assistance, job training services, and technical assistance are some areas that may warrant consideration for funding during the Consolidated Plan period.

In 2024, the City of Huntington Beach completed its updated Economic Development Strategic Plan. The Strategic Plan is designed to strengthen the local economy by focusing on business retention, attraction, and expansion. It also enhances tourism and culture, ensures responsive governance, and fosters proactive communication and collaboration. The updated plan promotes sustainable growth and active community engagement for a vibrant, resilient future for the City of Huntington Beach.

This updated strategy provides a structured roadmap for economic resilience and growth, focusing on strategic business initiatives, cultural enhancement, responsive governance, and robust collaboration. With outlined milestones, the strategy aims to create a thriving, diverse, and sustainable economy for all residents and businesses, ensuring steady progress and adaptability, and positioning Huntington Beach for a prosperous future.

In terms of workforce training initiatives, the City's Library has implemented a Adult Literacy Program, offering English speaking, reading, and writing skill development for persons 18 years and older. The goal of the program is to promote literacy and improved job skills.

The Community for Entrepreneurship & Leadership at Golden West College is an endeavor to support workforce and economic development. The program began as a collaborative of the Oak View Renewal Partnership, a nonprofit organization that provided assistance to residents of Oak View (a low-income neighborhood in Huntington Beach), and Golden West College. In July 2021, the program transitioned away from workforce development services to a finer focus of entrepreneurial education and coaching, allocating its team and resources to the success and impact of aspiring entrepreneurs. CIELO, as the program is now called, serves as a small business support system for all Orange County residents, with a focus on low-income and under-resourced individuals who lack access to resources, knowledge, and support to change their economic trajectory. CIELO aims to reduce opportunity inequality by providing participants with the resources or connections they wouldn't otherwise have.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

No.

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

As described above, Huntington Beach has prepared an Economic Development Strategic Plan which identifies the City's highest priority economic development objectives, and establishes goals, policies and recommended actions. The Strategic Plan aims to strengthen the local economy through business retention, attraction, and expansion, enhancing tourism and culture, ensuring responsive governance, and fostering proactive communication and collaboration. The plan promotes sustainable growth and active community engagement for a vibrant, resilient future, including:

- ✓ Business Retention, Attraction, & Expansion
 - Retain and Grow Local Businesses: Prevent closures or relocations, support expansion, and provide resources.
 - Attract New Businesses: Increase tax revenue and job opportunities by showcasing Huntington Beach's strengths.

- Market Business Opportunities: Promote local businesses to residents and visitors.
- Promote a Year-Round Economy: Support businesses throughout all seasons.
- Conduct Research and Make Recommendations: Gather data to support informed policymaking.

✓ Tourism, Culture, & Community

- Expand Tourism, Film, and Event Opportunities: Collaborate with Visit Huntington Beach to attract more visitors and events.
- Raise Awareness of Local Businesses During Special Events: Highlight and support local businesses.
- Prepare for the LA 2028 Summer Olympics: Ensure readiness to maximize economic opportunities.
- Enhance Arts and Culture: Develop new cultural programs and events.
- Support the Social Economy: Boost local social venues and implement tourism enhancement programs.

✓ Responsive & Effective Government

- Enhance Infrastructure: Invest in key infrastructure improvements.
- Promote Business-Friendly Policies: Develop policies that facilitate business growth.
- Deliver Exceptional Customer Service: Simplify processes and provide high-quality services.

✓ Communication & Collaboration

- Engage with Stakeholders: Connect with local partners and address feedback.
- Strengthen Partnerships: Work with business organizations to support local businesses.
- Share Information and Resources: Use digital platforms to disseminate valuable information.

2025 Action Plan Priorities:

- Organize business outreach visits and events.
- Market available sites and develop an economic profile.
- Engage with stakeholders and build partnerships.
- Expand visibility with business recognition opportunities.
- Elevate online presence with updated content.
- Deliver exceptional permitting service.
- Launch a shop/dine local campaign.
- Expand and attract new cultural/sports events.
- Lead projects to improve resident and visitor experiences.

The City may choose to utilize CDBG funds to assist in implementation. For example, the enhancement of public services, commercial façade programs and assistance with tenant improvements, job training and literacy programs, street improvements, technical assistance, business incubator support, and job retention and attraction services are all activities which can

implement funding.	the	City's	Economic	Development	Strategic	Plan	and	are	eligible	uses	for	CDBG

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

Low- and moderate-income households are most impacted by housing problems in Huntington Beach. The City defines an area of low/mod concentration as a census block group in which a minimum of 51 percent of households earn 80 percent or below the area median income; the census block groups that meet these criteria are depicted in Figure 2 - Low- and Moderate-Income Areas, located in Appendix B. As reflected in this Figure, low- and moderate-income areas are located throughout the City.

Certain minority populations are also more affected by multiple housing problems in Huntington Beach. As shown in Table 53, among households earning up to 80% of the Area Median Income (AMI), Hispanic and Asian households evidence a greater percentage of housing problems than households that are White.

	Households Earning 0 - 80% Area Median Income (AMI)							
	Total	White Non- Hispanic	Hispanic	Asian				
Total Households	28,935	19,245	6,010	3,210				
Households with any housing problems	20,715	12,910	4,770	2,105				
% Racial/Ethnic Group with any housing problems	72%	67%	79%	66%				

Table 49 - Huntington Beach Housing Problems by Race/Ethnicity

Data Source: Table reflects compilation of housing problems by race/ethnicity and income derived from the 2016-2020 CHAS, as presented previously in Tables 15-17. Housing problems include: 1) Lacks complete kitchen facilities, 2) Lacks complete plumbing facilities, 3) > than one person per room (overcrowded), or 4) Cost Burden > than 30%.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

A minority concentration is defined as a census block group with greater than the City average of minority population (20% for Hispanics and 15.6% for Asians). Figure 6 and 7 (located in Appendix B) depicts minority concentrations of Hispanic and Asian households, respectively, in Huntington Beach. Under this definition, several census block groups are identified as having a concentration of minorities. These areas are scattered around the City and in many cases correspond with low and moderate income areas as seen in Figure 2.

What are the characteristics of the market in these areas/neighborhoods?

The majority of Huntington Beach's low- and moderate-income neighborhoods coincide with the City's four Special Code Enforcement area due to high levels of housing deterioration. Within this area, the City's housing conditions survey in 2007 identified a total of 318 units as needing significant repair or replacement. These areas are the focus of increased code enforcement and neighborhood preservation activities by the City to improve the quality of life and condition of housing.

Are there any community assets in these areas/neighborhoods?

Huntington Beach is home to numerous public parks and neighborhood community centers, particularly in its low- and moderate-income areas, offering valuable resources to residents. For example, the Oak View Family and Community Center and Gymnasium provide a range of services, including recreational activities, educational programs, and human and family services. Additionally, the Oak View Branch Library serves as an important community resource, offering a Family Literacy Program that includes individualized tutoring to support residents' educational needs. The City of Huntington Beach uses Community Development Block Grant funds to enhance and improve these facilities, ensuring that they can better serve the needs of neighborhood residents and contribute to the overall well-being of the community.

Are there other strategic opportunities in any of these areas?

As outlined in Section MA-45, CIELO is a new initiative designed to provide entrepreneurial education and coaching to aspiring entrepreneurs. Serving as a small business support system for all residents of Orange County, CIELO primarily focuses on low-income and under-resourced individuals who may not have access to the necessary resources, knowledge, or support to change their economic trajectory. The goal of CIELO is to reduce opportunity inequality by offering participants the resources and connections that they may not otherwise have access to, helping them overcome barriers and achieve success in their entrepreneurial endeavors. By empowering individuals with the tools and guidance they need, CIELO aims to foster economic mobility and create more equitable opportunities for all.

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households - 91.210(a)(4), 91.310(a)(2)

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

Digital equity revolves around understanding who in the United States has access to the internet, suitable devices, and the digital skills needed to navigate the online world — and who does not. In response to the Digital Equity Act of 2021, the U.S. Census Bureau released data detailing broadband availability and usage alongside demographic information for every state. The data reveals the number of individuals in the U.S. who belong to "covered populations" as defined by the Digital Equity Act, as well as the percentage of the population living in areas without access to fixed broadband, those in households lacking a computer or broadband subscription, and those not using the internet, a PC, or a tablet. The underlying data was collected through a collaboration between the Census Bureau and the National Telecommunications and Information Administration (NTIA).

The covered population totals include individuals who fall into one or more of eight demographic categories. These categories tend to be associated with lower levels of digital inclusion. They may lack reliable broadband services, internet-ready devices or the skills needed to connect and ensure online privacy and cybersecurity. The eight categories are:

- Individuals living in households with incomes at or below 150% of the poverty line.
- Individuals 60 years of age or older.
- Veterans.
- Individuals living with one or more disabilities.
- Individuals with barriers to the English language (including English language learners and those with low literacy).
- Members of racial and ethnic minority groups.
- Individuals residing in rural areas.
- Individuals incarcerated in a nonfederal correctional facility.

According to data for Huntington Beach, less than 2.5% of the population lives in areas where fixed broadband service with speeds of at least 25 Mbps download and 3 Mbps upload is unavailable. While broadband is accessible to 97.5% or more of the population, three census tracts still show a high percentage of households without a computing device and/or broadband subscription. For instance, in census tract 99402, 36.9% of households lack a computer or internet service. This tract is home to 80% minority residents, and 42% face language barriers. Similarly, just under 17% of residents in census tracts 99212 and 99411 also lack computers or internet access. When combined with data on income and minority populations, it is evident that these tracts, which have high rates of digital exclusion, also face high levels of poverty and significant concentrations of Hispanic households.

Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

The top residential internet providers in Huntington Beach, including Spectrum, AT&T, Earthlink, and Frontier, contribute to a competitive broadband market in Orange County and Huntington Beach, making internet access widely available to most residents. This competition helps drive rates lower, which is particularly significant for low- and moderate-income (LMI) households, as it makes broadband more affordable. Despite the fact that almost all households in the City have computers and broadband access, lower-income households are still less likely to have their own internet subscription. However, while internet access is common, the exact percentage of income that LMI families spend on digital access remains unknown. This is an important consideration, as the cost of internet services could still place a financial strain on these families.

Describe the jurisdiction's increased natural hazard risks associated with climate change.

Consolidated Plans are now required to consider resiliency to natural hazards within the jurisdiction, ensuring that communities are better prepared for the risks posed by climate change and other natural events. The natural hazards most strongly linked to climate change in Huntington Beach are flooding and fire hazards. Flooding can result from rising sea levels and increased rainfall, while the risk of wildfires is heightened due to hotter temperatures, dry conditions, and changing weather patterns.

To address these challenges, the City has developed strategies for resilience and mitigation through its Local Hazard Mitigation Plan and Natural and Environmental Hazards Element. These plans outline actions to reduce risks, improve preparedness, and ensure that the City can better cope with the impacts of climate change. This includes measures such as improving infrastructure to withstand floods, implementing fire prevention programs, and developing long-term strategies to manage hazardous materials and waste safely.

Flooding

Flooding can be caused by a number of natural events, including heavy rains and coastal storms. Less often, floods can be caused by high tides (tidal flooding), or tsunamis. Flood events can also happen as a result of infrastructure failure; for example, if a water tank breaks. Flooding is the most common hazard in Huntington Beach.

Areas at an elevated risk of flooding are generally divided into 100-year flood zones and 500-year flood zones. The City has areas within both flood zones. As land uses and climate conditions shift and as improvements are made to flood control channels, the size of these flood zones is likely to change.

One hundred-year floods are those that have a 1/100 or 1% chance of occurring in any given year. The 100-year flood is a regulatory standard used by Federal agencies and most states to administer floodplain management programs and is also used by the National Flood Insurance Program (NFIP) as the basis for flood insurance requirements nationwide. Flood insurance rates are based on FEMA designations of flood zones. Standard practice is to avoid or restrict construction within 100-year flood zones, or to engage in flood-proofing techniques such as elevating building pads or constructing walls, dams, and levees. Large portions of the City of Huntington Beach are located within a 100-year flood plain, primarily along wetlands, coastal areas, rivers, channels, and storm drains in the City. Approximately one-third of the City is located within the 100-Year to 500-Year Flood Zone.

Fire Hazards

Fires can occur in urban environments and can also impact unpopulated areas that may contain brush or grasslands. As an urbanized area surrounded by other urbanized communities, Huntington Beach does not face the wildfire risks that are a threat to other areas of California. Urban fires are the primary fire hazard in the City, which can be caused by electrical faults, unattended cooking, or flammable or combustible materials exposed to a heat source, among other causes. Several areas and activities pose unique urban fire challenges due to the age of buildings, the size and density of structures, and the presence of flammable or combustible materials. As a result, the City must continue to address the growing need to defend both persons and property from fires. Proactive efforts, such as fire sprinkler systems, fire alarms, fire resistant roofing and construction methods, can help reduce the frequency and severity of urban fires.

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

While the City of Huntington Beach does have areas with an elevated risk of flooding, it is not considered a major hazard or constraint to housing development. Several housing projects have already been successfully built within the floodplain by implementing improvements to surrounding flood infrastructure, such as flood channels. These projects have received approval through proper mitigation measures, which include ensuring that flood risks are adequately addressed. Going forward, any new housing developments will undergo environmental reviews to ensure that flood protection measures are in place. This approach helps protect future residents, including those from low and moderate-income households, from environmental hazards like flooding.

Similarly, while fire hazards pose a risk, particularly in older areas of Huntington Beach, newer structures are designed with safety features such as fire sprinkler systems and fire-resistant materials. These features help contain fires within the building of origin and reduce the risk of spreading. However, in older neighborhoods where building materials may not meet modern fire safety standards and fire sprinklers may not be installed, there is a higher probability of structural fires spreading to neighboring buildings. This is especially true in high-density areas, where the risk of fire spreading between buildings is greater.

The City's General Plan Safety Element ensures that areas with a higher fire risk are carefully considered in development planning. It requires the identification of lands designated as a State Responsibility Area for fire services and those within a very high fire severity zone. Fortunately, there are no lands with these designations in the areas designated for future residential development in Huntington Beach. This reduces the risk of wildfire impacts on new residential areas, though urban fire safety remains a key consideration in the City's planning and building practices.

STRATEGIC PLAN

SP-05 Overview

Strategic Plan Overview

The Housing and Community Development Strategy is the centerpiece of the Consolidated Plan. The Strategy describes:

- General priorities for assisting households
- Programs to assist those households in need
- Five-year **objectives** identifying proposed accomplishments

The Strategic Plan also addresses the following areas:

- Financial resources
- Anti-poverty strategy
- Lead-based paint hazard reduction
- Reduction of barriers to affordable housing
- Institutional Structure/Coordination among agencies

In establishing five-year priorities for assistance with CDBG and HOME funds, the City of Huntington Beach has taken several factors into consideration: 1) those households most in need of housing and community development assistance, as determined through the Consolidated Plan Needs Assessment, Agency consultation, the Housing and Community Development Needs Survey, and public participation process; and 2) the extent of other non-federal resources and programs available to address the needs.

SP-10 Geographic Priorities – 91.215 (a)(1)

Geographic Area

1	Area Name	Citywide
	Area Type	Local Target Area
	Other Area Type Description	Not Applicable
	HUD Approval Date	Not Applicable
	% of Low Mod	44.75%
	Revital Type	Comprehensive
	Other Revital Description	Not Applicable
	Identify the neighborhood boundaries for this target area.	Citywide
	Include specific housing and commercial characteristics of this target area.	Not applicable; this geographic area is used to identify where CDBG-funded homeless, special needs, and general community services are delivered.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	Consultation with local service providers, City departments, and the Housing and Community Development Survey highlighted the need for funding community services in Huntington Beach. The most requested services include those for the homeless and victims of domestic violence. Additionally, the high senior population in Huntington Beach emphasizes the need for senior services.
	Identify the needs in this target area.	There is a need for community services for low- and moderate-income individuals, including the homeless, veterans, families with children, the elderly, and victims of domestic violence.
	What are the opportunities for improvement in this target area?	Opportunities for improvement in this target area include expanding community services for vulnerable populations such as the homeless, seniors, and families with children. Additionally, there is an opportunity to improve coordination between local service providers and City departments to meet the needs of low- and moderate-income residents.
	Are there barriers to improvement in this target area?	A key barrier to improvement in this target area is the lack of funding to address all local needs.
2	Area Name	Special Code Enforcement Area
	Агеа Туре	Local Target Area
	Other Area Type Description	Not Applicable
	HUD Approval Date	Not Applicable
	% of Low Mod	66.99%
	Revital Type	Comprehensive
	Other Revital Description	Not Applicable
	Identify the neighborhood boundaries for this target area.	Bolsa Chica Street to the west, Bolsa Avenue to the north, Brookhurst Street to the east, and Atlanta Avenue to the south.

Include specific housing and commercial characteristics of this target area.	Housing owned or rented by predominantly low- and moderate-income households. Signs of property and structure deterioration seen from windshield survey and supported by census data (predominately built before 1980).
How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	Consultation with Code Enforcement and Housing Divisions resulted in this area being set apart for CDBG-funded Code Enforcement programs and other programs that will, together, arrest the deterioration of the local target area. Further, a Housing and Community Development Survey found that code enforcement and property maintenance was highly needed in the City.
Identify the needs in this target area.	Need for code enforcement, street and alley improvements, curb cuts and ramp improvements, housing rehabilitation, and community services for low-and moderate-income households.
What are the opportunities for improvement in this target area?	There is an opportunity to direct federal investment to reverse the area's decline through code enforcement, homeowner rehabilitation, better infrastructure, improved public facilities, and enhanced community services.
Are there barriers to improvement in this target area?	The main barrier is the lack of funding to address the area's overall deterioration.

Table 50 - Geographic Priority Areas

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA)

California. Much of the City's residentially designated land has already been developed. Future residential development rests primarily upon the recycling of existing parcels and infill development. Surrounding Huntington Beach are the Cities of Seal Beach to the northwest, Westminster to the northeast, Fountain Valley and Costa Mesa to the east, Newport Beach to the southeast, and the Pacific Ocean to the southwest.

The City utilizes CDBG and HOME funds for projects and programs operated citywide. However, the majority of CDBG-funded infrastructure and facility projects are targeted to the most-needy neighborhoods: those census tracts where 51% or more of the residents are low- or moderate-income, as seen in Figure 2 in the Appendix.

Specifically, for Code Enforcement, after establishing the general definition of "deteriorated" or "deteriorating" for purposes of code enforcement, the City conducted a visual (windshield) survey of CDBG eligible areas for properties, businesses, parkways, alleys, and structures that met the definition. Based on the visual (windshield) survey, the City determined that low- and moderate-income areas within the area bound by Bolsa Chica Street to the west, Bolsa Avenue to the north, Brookhurst Street to the east, and Atlanta Avenue to the south contained the most properties with deterioration. In some cases, some structures had multiple violations per parcel. This target area is known as "Special Code Enforcement Target Area." Inclusive of the following census tracts, the Special Code Enforcement Target Area is comprised of 67,625 persons, 45,300, or 66.99%, of which are of low-moderate income.

Table 52 - Priority Needs Summary

Narrative

In establishing five-year priorities for assistance with CDBG and HOME funds, the City of Huntington Beach has taken several factors into consideration: 1) those households most in need of housing and community development assistance, as determined through the Consolidated Plan needs assessment, consultation, and public participation process; 2) which activities will best meet the needs of those identified households; and 3) the extent of other non-federal resources and programs available to address these needs.

Huntington Beach's primary source of funds used to address the community's housing needs is HOME. CDBG funds are directed almost entirely towards community development activities. The unmet housing needs identified in this section are based on 2016-2020 census statistics of households with housing problems compiled as part of the CHAS Databook.

Huntington Beach's priority non-community development needs include unmet community facility, infrastructure, public service, and planning needs. Identified needs and priorities reflect the results of input from various City departments, as well as input from agency consultations and the citizen participation process.

Influence of Market Conditions

Affordable	
Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based	TBRA is the fastest way to provide affordable housing to those in need as it partners
Rental Assistance	existing rental housing owners with voucher holders. With over 14,000 low- and
(TBRA)	moderate-income renter households cost burdened, the need for additional rental
	assistance is substantial. The challenge is that the use of TBRA is completely dependent
	on landlords' willingness to accept tenant-based rental assistance and to participate in a
	contractual relationship with Subgrantees, OCHA and/or HUD. In addition, Fair Market
TDDA for Nor	Rent levels are well below actual rents.
TBRA for Non-	Similar market characteristics that influence the use of TBRA above are applicable to the
Homeless Special	use of TBRA to serve persons with special needs, such as veterans and senior
Needs	citizens. However, special needs populations, on average, are likely have an even greater need for TBRA than the general low- and moderate-income population. An additional
	market characteristic that may influence the use of TBRA for special needs tenants is the
	willingness and ability of service providers to assist TBRA clients to remain stable in their
	housing.
New Unit	As documented in the Needs Assessment, 76% of low- and moderate-income renter
Production	households are cost burdened, with 40% severely cost burdened. These households
	would theoretically qualify for new affordable housing if sufficient resources existed to
	build them. The cost of land, labor and materials affects the total development costs and
	the number of units the City can support in any given year. While funds are limited, the
	City will use regulatory tools - such as flexible development standards, density bonus and
	other incentives - to support the expansion of needed affordable housing.
Rehabilitation	Based on the visual (windshield) survey, the City determined that low- and moderate-
	income areas within the area bound by Bolsa Chica Street to the west, Bolsa Avenue to
	the north, Brookhurst Street to the east, and Atlanta Avenue to the south contained the
	most properties with physical deterioration. Further, the potential presence of lead-based
	paint in the City's 56,510 owner and rental housing units built before 1980 would
	theoretically qualify for rehabilitation assistance if sufficient resources existed. The City
	prioritizes limited CDBG and HOME resources for rehabilitation and code enforcement of
Acquisition	substandard housing. With 14,090 low- and moderate-income Huntington Beach renter households cost
Acquisition, including	burdened and nearly 2,000 overcrowded, these households would theoretically qualify for
preservation	newly acquired and rehabilitated affordable housing if sufficient resources existed.
preservation	Typically, the City's rehabilitation resources support combined acquisition and
	rehabilitation projects in partnership with non-profits that leverage City dollars with other
	funding sources. The cost of land, labor and materials affects the total development costs
	and the number of units that the City can support in any given year. Another critical issue
	that influences the use of funds to acquire properties for the creation or preservation of
	affordable units is the lack of a permanent source of financing. The elimination of the
	Huntington Beach Redevelopment Agency, coupled with continued reductions in
	the HOME entitlement, makes addressing priority housing needs more challenging.

Table 53 – Influence of Market Conditions

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

The table below outlines the CDBG and HOME funding available for housing and community development activities during this Consolidated Plan period. The City receives approximately \$1,121,195 in annual CDBG entitlement and \$538,328 in annual HOME funds. While HOME funds are exclusively allocated for affordable housing activities, CDBG funds are primarily used for community development initiatives.

Anticipated Resources

			Expe	cted Amour	nt Available Yo	ear 1	Expected	
Program	Source of Funds	Uses of Funds	Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$	Amount Available Remainder of ConPlan \$	Narrative Description
CDBG	Public- Federal	Acquisition, Planning, Economic Development, Housing, Public Improvements, Public Services	\$1,121,195	\$30,000	\$228,868	\$1,380,063	\$4,604,780	Entitlement funds allocation plus estimated program income plus prioryear resources.
HOME	Public- Federal	Acquisition, Homeowner Rehab, Multifamily rental new construction, Multifamily rental rehab, New construction for ownership, TBRA	\$538,328	\$125,000	\$181,100	\$844,428	\$2,653,312	Entitlement allocation plus estimated program income and prior-year resources.

Table 14 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Federal funds are essential for implementing the Consolidated Plan, as local private and non-federal funds are often insufficient to meet the significant demand for housing and services in the community. Agencies receiving CDBG and HOME funds use these resources as leverage to secure additional funding from other sources.

The City also maximizes other resources through various formula grant programs. For instance, the HOME program is often matched with private and public investments, including low-income housing tax credits. Future matching funds may come from sources such as inclusionary housing in-lieu fees and residual receipts from former Redevelopment Agency loans.

HUD requires a 25% match for HOME funds used in affordable housing projects. Historically, the City has met this requirement with redevelopment tax increment funds, which were combined with HOME funds for affordable housing development. Although redevelopment tax increment funds are no longer available for matching, the City has a surplus of match funds from prior contributions by the former Huntington Beach Redevelopment Agency. As of September 2023, this match surplus stands at approximately \$3,725,103.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

Table 55 – Institutional Delivery Structure

Assessment of Strengths and Gaps in the Institutional Delivery System

Huntington Beach boasts a well-established housing and community development delivery system, supported by strong City and County agencies that anchor federal programs. The City is also backed by a robust network of experienced non-profit organizations that provide a wide range of services to residents.

The Community Enhancement Division maintains close communication with other City departments when updating or revising housing policies, issues, and services. Through daily interactions, City staff implement programs, track issues of concern, and have easy access to data related to building activity, housing conditions, zoning, growth issues, employment trends, and other demographic information.

Beyond the City's internal network, Huntington Beach collaborates with various non-profit agencies and public service groups through its federal entitlement and other resources. These agencies receive assistance from City staff in program planning, ensuring activity eligibility, compliance with federal regulations, and monitoring the timely expenditure of program funds.

Agencies are required to submit quarterly and annual reports, meet federal requirements, and undergo periodic audits and on-site reviews.

Additionally, the City of Huntington Beach performs project monitoring for all rent-restricted affordable units funded by HOME, CDBG, and former Redevelopment Agency housing funds. This includes:

- Annual audits to ensure compliance with regulatory agreements and affordability covenants.
- Periodic on-site visits, including property inspections and in-depth reviews of rentrestricted affordable unit files.

As part of the Consolidated Plan process, the City gathered input from numerous housing and public service agencies through consultation workshops, interviews, and a Housing and Community Development Survey. This valuable input helped identify service needs and gaps, informing the development of the City's five-year Strategic Plan.

Table 56 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

There are a variety of homeless and supportive services in the City that provide a range of care for homeless and at-risk households. These services work together, within the framework of the larger Continuum of Care to meet the needs of households.

Homeless Prevention Services

- Project Self-Sufficiency Orange County: Helps low-income single parents graduate from college or vocational training with the skills necessary to achieve economic independence. Participants are provided customized, wraparound services throughout their educational journey and transition into career.
- Interval House: This six-unit transitional housing facility in the heart of Huntington Beach
 provides safe housing for women and children recovering from domestic violence. Near
 major transportation routes, shopping, and services, the 3-bedroom apartments all have
 enclosed patios and in-unit laundry facilities. Interval House Crisis Shelters provides their
 residents counseling, education programs, and assistance in becoming self-sufficient.
- Collette Children's Home: The eight-unit Colette's Children's Home provides transitional
 housing for battered/homeless mothers with children and chronically homeless women.
 Support services provided include job development and retention training, parenting and
 life skill training, financial planning and assistance, case management services,
 counseling, and more.
- **Senior Outreach Center**: Provides services that assist elders in the City with their physical, emotional and nutritional needs through professionally trained staff and volunteers. The Outreach Center focuses on programs and services for frail or homebound seniors to promote safety, self-sufficiency and independence.
- Oak View Community Center: The Children's Bureau, a non-profit agency, provides a
 variety of family support and youth development services at the Oakview Community
 Center, including parent education classes, in-home parenting support and case
 management, health education and health access assistance, domestic violence
 prevention and intervention, literacy programs, homework clubs, tutoring, youth clubs,
 teen programs and clubs, community enrichment and culturally sensitive activities.

Supportive Services

- Huntington Beach Navigation Center: The Center can shelter up to 174 adults and couples with ties to Huntington Beach. The Center, operated by Mercy House, provides access to vital services that will help individuals experiencing homelessness on the path towards housing security.
- **Be Well HB:** Be Well OC in Huntington Beach assists with a variety of non-emergency and non-medical, public assistance situations that have historically been handled by the Huntington Beach Police Department (HBPD). Be Well HB is equipped to de-escalate and assist with mental health crisis, suicidal ideation, public assistance, non-domestic violence

- family disputes, drug and alcohol abuse/addiction, welfare checks, death notifications, and homelessness (with the HB Homeless Task Force).
- Waymakers Huntington Beach Youth Shelter: The Youth Shelter offers a short-term crisis
 intervention residential program with the goal of family reunification. Children at risk of
 homelessness, institutionalization, incarceration, or hospitalization are given emergency
 shelter, meals, 24-hour supervision, individual, group and family counseling, academic
 tutoring, prevention, education, and life skills development activities as well as aftercare
 services.
- Beach Cities Interfaith Services (BCIS): Coordinates the provision of a variety of financial and human services for the homeless and persons at-risk of homelessness in Huntington Beach. The organization provides sack lunches for homeless individuals and grocery allotments for persons with housing. Other services offered include utility assistance, food/clothing, personal hygiene kits, counseling/referrals, transportation assistance, mail box service, and financial assistance for prescriptions. BCIS is in the process of developing an intake/case management and referral system for the homeless, with the goal of functioning as a multi-service center for the homeless in Huntington Beach.
- American Family Housing (AFH): Provides a continuum of services to Huntington Beach residents, including emergency shelter in coordination with local churches; transitional housing in scattered site locations; and permanent affordable rental housing.
- Salvation Army Family Service Office: From their Emergency Family Services Office in Huntington Beach, the Salvation Army provides a variety of supportive services for those in need, such as emergency utility bill and rental assistance, clothing and household items, transportation assistance, free food and school supplies.
- Mental Health Association of Orange County: Serving adults with severe and persistent
 psychiatric disorders through direct service, advocacy, education, and information
 dissemination. Three outpatient recovery centers include mental health assessments,
 diagnosis, treatment, medication services, individual and group therapy, crisis
 intervention and case management, support and encouragement. Also, psychosocial
 consumer clubhouses, wellness centers, veterans services, and resource and referral
 services are available.
- Straight Talk Counseling: Offers affordable, high-quality counseling and prevention services to the community since it was founded in 1971. The mission of Straight Talk Counseling is to make available a variety of mental health, substance abuse, and rehabilitative services to individuals and families in need, for whom access, or utilization of such services is limited, restricted or otherwise unavailable.
- **Pathways to Independence:** Assists single young women from disadvantaged backgrounds through education, therapy, mentoring, housing, and healthcare, to break the cycle of poverty and abuse. The vision is to change the course of young women's lives from abuse and poverty to empowerment and self-sufficiency.

Outreach Services

 Huntington Beach City Manager's Office: The City of Huntington Beach has established a comprehensive System of Care for those experiencing, or are at risk of, homelessness with

- a focus on outreach, engagement, case management, and linkage to shelter, housing, and other supportive services. The City's Homeless and Behavioral Health Division is committed to taking a positive, balanced approach to assisting the homeless with compassion while upholding our community's overall quality of life.
- Project Hope Alliance: PHA's mission is to "end the cycle of homelessness, one child at a time." A proactive, education-centric approach focuses holistically on each child's development so that each child can realize a future without homelessness and become self-sufficient adults.
- Robyne's Nest: Resources to school students in the Huntington Beach area, with little to no parental support, to complete high school and pursue a path to self-sufficiency. This includes fostering these students an increased sense of self-worth and dignity, by providing housing, mental health therapy and teaching them how to become independent and self-supporting, and by providing them life skills, counseling services in nutrition, health, finance, educational aid, job training and other related areas. Robyne's Nest focuses on the front-end of the homeless crisis by breaking the cycles of toxicity that leads to homelessness, drug/alcohol addictions, domestic violence, teen pregnancies and more.
- StandUp for Kids Street Outreach: Program provides wrap-around support aimed at moving youth facing homelessness from crisis to self-sufficiency. The youth are identified through weekly street outreach and referrals from partner agencies within the City. Youth are assessed for their immediate needs and provided with food, clothing, hygiene products, and transitional housing, as needed.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

Collaboration between public agencies, assisted housing providers, and private and governmental health, mental health, and human services agencies remains essential for the effective delivery of housing and support services. To strengthen this coordination, the City of Huntington Beach continues its involvement in the Commission to Address Homelessness, working alongside regional partners to improve outcomes for individuals and families experiencing homelessness and housing instability.

The primary gap in Huntington Beach's service delivery system is a function of the significant cuts in public and private funding and associated reductions in service. Funding cuts in the CDBG and HOME programs over the last several years, combined with the increased demand for services stemming from increases in housing and rental costs, has resulted in significant gaps in service.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

The City proposes to strengthen, coordinate and integrate the governmental institutions, non-profit and private delivery systems to implement the City's five-year strategy and to address the priority needs outlined in the Consolidated Plan for Fiscal Years 2025/26 – 2029/30. Engaging the

community and stakeholders in the delivery of services and programs for the benefit of low to moderate residents will be vital in overcoming gaps in service delivery. The City will also utilize public notices, Community Workshops and Meetings (as appropriate), the City's website, and other forms of media to deliver information on carrying out the Consolidated Plan strategies.

Table 57 – Goals Summary

Goal Name	Goal Description
Sustain and Strengthen Neighborhoods	Using CDBG funds, the City will sustain and strengthen neighborhoods by eliminating unsafe conditions and blight while improving the quality of life of residents within the community.
	(Programs Under Consideration: Special Code Enforcement; Homeowner Rehabilitation Loans and Grants Program)
Preserve Existing and Create New Affordable Housing	To the extent possible, based upon the availability of funds and a project's viability, HOME funds will be used to assist affordable housing developers in the acquisition, construction and/or rehabilitation of low-income rental and/or owner housing units, and in the provision of tenant-based rental assistance (TBRA).
	(Programs Under Consideration: Acquisition/Rehabilitation, New Construction, Mercy House TBRA, Families Forward TBRA, Mobile Home TBRA, and Housing Services for TBRA)
Support Efforts to Address Homelessness	Using CDBG public service funds, the City will provide assistance to homeless service providers.
	(Programs Under Consideration: Pathways to Independence, Project Hope Alliance, Robyne's Nest, StandUp for Kids Street Outreach; Other TBD Homeless Programs)
Support Agencies that Assist Special Needs Populations	Using CDBG public service funds, the City will provide assistance to special needs service providers.
	(Programs Under Consideration: Senior Outreach Care Management; Other TBD Special Needs Programs)
Increase Access to Community Services for Low- and Moderate-Income Persons	Using CDBG public service funds, the City will provide assistance to various social service agencies for programs for youth, fair housing, anti-crime, and general public services. Services must benefit at least 51 percent low/mod persons.
	(Programs Under Consideration: Children's Bureau; Other TBD Community Services)
Preserve Community and Public Facilities	Using CDBG funds, the City will provide financial assistance to improve public facilities and parks.
	(Programs Under Consideration: Various TBD Public Facility Projects)
Provide Needed Infrastructure Improvements	Using CDBG funds, the City will provide financial assistance to improve public infrastructure.
	(Programs Under Consideration: ADA Curb Cuts and Ramps; Other TBD Infrastructure Improvements)

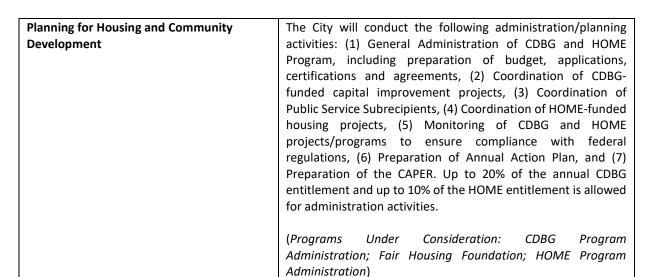

Table 58 - Goal Descriptions

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

Over the next five years, the City of Huntington Beach plans to continue its efforts to address housing affordability challenges by providing tenant-based rental assistance (TBRA) to households in need. Specifically, the City intends to allocate HOME funding for TBRA through partnerships with Families Forward and Mercy House, with the goal of assisting 75 homeless, senior, veteran, and/or family households each. Additionally, a separate TBRA program will be available to senior households requiring assistance with mobile home space rents. The Consolidated Plan outlines a target of assisting 30 mobile home residents over the five-year period.

In addition to these initiatives, the City is required to allocate 15% of each annual HOME entitlement allocation to support the development of affordable housing. This allocation will amount to approximately \$584,751 over the next five years, which may be sufficient to fund the development of at least two affordable rental units. While no specific projects are currently under consideration for the development of affordable housing, the City remains committed to exploring potential opportunities and is open to discussions with community housing development organizations (CHDOs) interested in collaborating on future projects.

While the 5-year affordable housing goals have been established using FY 2025/26 allocations, the City reserves the right to adjust funding as needed during the course of the Consolidated Plan period, including reallocating funds to other initiatives or other TBRA providers based on emerging needs and priorities.

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

Plan to remove the 'troubled' designation.

Not applicable.

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

Huntington Beach has a well-established history of supporting affordable housing initiatives. The City has implemented several provisions in its Zoning Ordinance that facilitate diverse residential development and promote affordable housing, including a density bonus ordinance, an inclusionary housing ordinance, a planned development zone, and reasonable accommodation procedures for individuals with disabilities.

However, the primary barrier to the development of affordable housing in Huntington Beach is the limited availability of vacant land suitable for residential use. Much of the underdeveloped and residentially zoned land in the City is owned by separate entities who hold smaller parcels, creating challenges for cohesive development. This situation necessitates alternative policy strategies, such as lot consolidation or the demolition of older structures, to accommodate higher-density infill development.

Beyond the challenges faced by market-rate housing development—such as high land prices and construction costs—affordable housing projects encounter additional hurdles. While there are sites with some potential to accommodate affordable housing, including those targeting special needs populations, financial assistance for these projects remains scarce and highly competitive.

Typically, a combination of funding sources is required to finance an affordable housing development, as substantial subsidies are necessary to ensure the units are affordable for extremely low, very low, and low-income households. It is not uncommon for affordable housing projects to rely on five or more funding sources to become financially viable. Each funding source may have different requirements, application processes, and deadlines, with some even requiring that financing commitments be secured before applications can proceed. Because securing financing is so critical and competitive, funding agencies often influence the scope and nature of housing projects. In recent years, funding for housing targeting special needs populations—such as veterans, individuals with mental disabilities, and the homeless—has generally been more available than for other low- and moderate-income households.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

Through the administration of the CDBG and HOME programs, every effort is made to remove barriers to affordable housing through agreements with for-profit and non-profit affordable housing developers. These efforts also include working with neighborhood residents to ensure affordable housing projects are acceptable. Ongoing monitoring of "for sale" affordable units is conducted by department staff by assuring that the affordable housing covenants are recorded on title when the unit is sold. To address the decline in sources of housing funds, the City will continue to advocate for and pursue federal, state, local and private funding sources for affordable housing.

Additionally, as part of the City's Housing Element update, the City must assess and to the extent feasible, mitigate, its governmental constraints to housing for lower- and moderate-income households and persons with disabilities. The Housing Element addresses the City's provisions for affordable housing, emergency shelters, transitional housing, and supportive housing. The following programs in the City's 2013-2021 Housing Element specifically address the variety of regulatory and financial tools used by the City to remove barriers and facilitate the provision of affordable housing:

Multi-family Acquisition/Rehabilitation through Non-Profit Developers: Acquire, rehabilitate, and establish affordability covenants on 80 rental units.

Residential and Mixed-Use Sites Inventory: Maintain current inventory of vacant and underutilized development sites and provide developers with information on incentives.

Beach and Edinger Corridors Specific Plan: Facilitate development through flexible, form-based standards and streamlined processing. Encourage affordable housing by requiring inclusionary units to be provided on-site, or within the Specific Plan, and providing additional incentives for increased percentages of affordable units.

Inclusionary Housing Program and Housing Trust Fund: Continue implementation and reevaluate Ordinance to provide consistency with case law and market conditions. Establish in-lieu fee amount for projects between 10-30 units.

Affordable Housing Development Assistance: Provide financial and regulatory assistance in support of affordable housing. Provide information on incentives to development community.

Affordable Housing Density Bonus: Continue to offer density bonus incentives as a means of enhancing the economic feasibility of affordable housing development.

Development Fee Assistance: Continue to offer fee reductions to incentivize affordable housing. Specify the waiver of 100% of application processing fees in the Code for projects with 10% extremely low-income units.

Residential Processing Procedures: Provide non-discretionary development review within the Beach and Edinger Corridors Specific Plan. Adopt streamlined review procedures for multi-family development on a citywide basis.

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

Homelessness has been a growing challenge across the country including in the Los Angeles and Orange County regions. Contributing factors include a shortage of affordable housing, increasing poverty rates, reduced subsidies, substance abuse issues, the de-institutionalization of the mentally ill, and a rising number of individuals who may view homelessness as a lifestyle choice.

To address this issue, Orange County conducts a biennial enumeration of both sheltered and unsheltered homeless individuals in a 24-hour period. This effort, known as the Homeless Point-in-Time (PIT) Count, is required by Congress for all communities receiving U.S. Department of Housing and Urban Development (HUD) funding for homeless programs. HUD mandates that the PIT Count take place during the last ten days of January. For 2024, the count was conducted by the County of Orange and the Orange County Continuum of Care, with the sheltered count taking place on the night of January 22, 2024, and the unsheltered count occurring from the morning of January 23 through January 25, 2024.

The 2024 PIT Count identified 7,322 homeless individuals in Orange County, marking a significant 28% increase from the 2022 count, which recorded 5,718 individuals. Specifically in Huntington Beach, the count revealed 433 total homeless persons, with 173 classified as unsheltered and 260 as sheltered. This represents an increase from the 2022 figures, where there were 330 total homeless individuals – 188 unsheltered and 142 sheltered.

The City of Huntington Beach has implemented an ambitious strategy to address and ultimately end homelessness. In FY 2021/22, the City took significant steps by appointing a Deputy Director of Homelessness & Behavioral Health Services and establishing the Homeless & Behavioral Health System. This comprehensive system aims to support individuals experiencing homelessness or at risk of homelessness through outreach, engagement, case management, and connecting them with essential services such as shelter, housing, and behavioral health support. Although the Deputy Director's position has evolved since February 2022, the City continues to staff and support homelessness services.

The HB Cares Volunteers program is an integral part of the Homeless & Behavioral Health System in Huntington Beach, serving as the backbone of the initiative and driving positive change within the community. Since its launch in 2023, the HB CARES Program has successfully recruited and trained 21 volunteers who have undergone various training sessions, including de-escalation techniques, trauma-informed care, vicarious trauma, and Mental Health First Aid. Volunteers answer the homeless outreach line daily and return calls, so those in need have a streamlined means of communication with our outreach team. Further, a licensed Marriage and Family Therapist started in December 2023 and has assisted with 62 Disabling Condition Assessments. The therapist will continue to support mental health services on an as-needed basis.

The Homeless & Behavioral Health System also incorporated homeless outreach social workers who actively engaged with unhoused and at-risk of being unhoused individuals, families, veterans, and seniors. Social workers offered support by linking individuals to resources, service providers, and aiding in securing necessary documents for County of Orange housing programs. They maintained close collaboration with local and county shelters, including the Huntington Beach Navigation Center, while also partnering with crisis response teams like Be Well to provide comprehensive assistance and support to those in need. Working in collaboration with Homeless Task Force officers, they ensured that individuals received the necessary care and resources to address their unique situations effectively.

Be Well OC in Huntington Beach (BWOC) is another component of the Homeless & Behavioral Health System. BWOC employs a Mobile Crisis Response Team (two operating vans) composed of two Crisis Interventionists who drive to locations and provide in-community assessment and stabilization services. The teams are well-trained and experienced in providing appropriate information, referrals, transportation to services, and additional follow-up support and case management - to help address mental health-related situations.

In the ensuing years covered by this Consolidated Plan, the City intends to support homeless public service programs that provide outreach and assessment of homeless individuals. Such programs could include the Pathways to Independence Program which focuses on young single women experiencing homelessness, or Project Hope Alliance, Robyne's Nest, and StandUp for Kids Street Outreach which focus on homeless youth and providing them wrap around services unique to young individuals such as mentoring, food, clothing, housing, academic support, and educational aid.

Further, the City may continue to support the operations and services at the Navigation Center, located at 17642 Beach Boulevard. The Navigation Center, which opened in December 2020, offers 174 beds for overnight shelter and provides direct access to essential services aimed at helping individuals experiencing homelessness move towards housing stability.

These combined efforts reflect the City's commitment to addressing homelessness and facilitating pathways to long-term housing solutions.

Addressing the emergency and transitional housing needs of homeless persons

As mentioned above, the City has partnered with Mercy House to launch the Navigation Center, an emergency homeless shelter. The facility received significant federal funding to support its operations, including CDBG, CDBG-CV (for activities related to COVID-19 prevention, preparation, and response), and HOME funding from the American Rescue Program (HOME-ARP). The Navigation Center can shelter up to 174 adults and couples under normal conditions.

In FY 2021/22, the City initiated the HB Oasis project in collaboration with the State of California Homekey Program, the County of Orange, National CORE, and American Family Housing. This

project involved acquiring and rehabilitating the former Quality Inn & Suites motel at 17251 Beach Boulevard to address homelessness in the region. HB Oasis served as interim housing for up to 62 individuals and households in Orange County's Central Service Planning Area. It provided not only transitional housing but also comprehensive property management and residential support services. The focus was on trauma-informed, evidence-based operations to support residents' reintegration into the community through robust case management and connections to permanent housing solutions.

In May 2024, the HB Oasis project transitioned to permanent supportive housing. This transition involved renovating the individual units to include kitchenettes and utilizing project-based vouchers to support long-term housing stability for its residents.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

In its ongoing commitment to addressing homelessness and preventing those at risk from becoming homeless, the City of Huntington Beach has implemented a series of strategic initiatives designed to support a variety of populations, including chronically homeless individuals, families with children, veterans, victims of domestic violence, and unaccompanied youth. The City's approach is centered around facilitating the transition to permanent housing and independent living, reducing the duration of homelessness, improving access to affordable housing, and preventing recidivism among recently housed individuals. Key efforts include securing both short-term and long-term funding, collaborating with experienced service providers to leverage additional resources, and creating or securing affordable housing opportunities.

The City also provides comprehensive case management services and conducts street outreach to connect homeless individuals with available resources. One notable initiative, the conversion of the former Quality Inn Hotel into the Huntington Beach Oasis project, created 62 noncongregate transitional housing units. This project offers extensive wraparound supportive services to address challenges such as mental and physical health issues, substance use, trauma, and employment barriers. The success of this program led to the conversion of these transitional units into permanent housing in May 2024.

Similarly, the Navigation Center, supported by approximately \$4.5 million in funding from CDBG, CDBG-CV, and HOME-ARP, offers a range of wraparound services to help individuals transition from emergency shelter to more stable housing. The City plans to repurpose the Navigation Center property into a permanent navigation center and affordable housing development project, which will provide both affordable housing and supportive services for chronically homeless individuals.

Finally, the City intends to prioritize tenant-based rental assistance (TBRA), with plans to provide subsidies to 180 households between 2025/26 and 2029/30, further reinforcing its commitment to supporting those in need of stable housing.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

To prevent homelessness and support at-risk populations, Huntington Beach actively participated in the Orange County Continuum of Care System. This system is designed to provide assistance to individuals at risk of becoming homeless, ensuring a network of support for those in need.

The City is also committed to supporting families through HOME-funded rental assistance programs. During the five-year period covered by this Consolidated Plan, the City is proposing to support three rental assistance programs that will assist a variety of vulnerable population groups in Huntington Beach. For example, Families Forward assists families that are homeless or at risk of homelessness, while Mercy House targets lower-income households, veterans, and victims of domestic violence. The Mobile Home Tenant-Based Rental Assistance Program targets senior owners of mobile homes with space rents.

Although the City does not receive Emergency Solutions Grants (ESG) or Housing Opportunities for Persons with AIDS (HOPWA) funding and therefore is not required to develop a discharge coordination policy, it remains committed to addressing this issue. The City will continue to work with the Orange County Housing Authority and the Continuum of Care Homeless Issues Task Force to develop and refine its discharge coordination policy.

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

As a means of better protecting children and families against lead poisoning, in 1999 HUD instituted revised lead-based paint regulations focused around the following five activities:

- Notification
- Lead Hazard Evaluation
- Lead Hazard Reduction
- Ongoing Maintenance
- Response to Children with Environmental Intervention Blood Lead Level

The City has implemented HUD Lead Based Paint Regulations (Title X), which requires federally funded rehabilitation projects to address lead hazards. Lead-based paint abatement is part of the City's Residential Rehabilitation Program and the Acquisition/Rehabilitation of Affordable Rental Housing Program. Units within rental housing projects selected for rehabilitation are tested if not statutorily exempt. Elimination or encapsulation remedies are implemented if lead is detected and is paid for by either the developer of the project, or with CDBG or HOME funds, as appropriate.

How are the actions listed above related to the extent of lead poisoning and hazards?

As discussed earlier in the Housing Market Analysis, 74% of Huntington Beach's owner-occupied units were built prior to 1980, however of these 32,520 units, only 5.6% or 1,820 units have occupants that include children. Similarly, 71% of Huntington Beach's rental housing was built prior to 1980 (23,990 units), with children present in just 3.8% or 920 of these units. Pre-1980 housing units with children present pose the greatest threat of lead poisoning. With an estimated 2,740 such households in Huntington Beach, lead exposure among children is not a sizable issue.

Another risk factor is household income, with lower income households having a greater risk of exposure. The 2016-2020 CHAS identifies 43% of Huntington Beach's households as earning less than 80% HAMFI, translating to an estimated 24,300 low and moderate income households residing in the City's 56,510 pre-1980 housing units.

Based on the visual (windshield) survey, the City determined that low- and moderate-income areas within the area bound by Bolsa Chica Street to the west, Bolsa Avenue to the north, Brookhurst Street to the east, and Atlanta Avenue to the south contained the most properties with physical deterioration. Further, the potential presence of lead-based paint in the City's 56,510 owner and rental housing units built before 1980 would theoretically qualify for rehabilitation assistance if sufficient resources existed. The City prioritizes limited CDBG and HOME resources for rehabilitation and code enforcement of substandard housing.

How are the actions listed above integrated into housing policies and procedures?

The Huntington Beach Community Enhancement Division leads the City's efforts to mitigate lead-based paint hazards. As part of its commitment to ensuring safe housing, all rehabilitation and tenant-based rental assistance (TBRA) projects funded through CDBG and HOME are subjected to testing for lead and asbestos. If a lead hazard is identified, the City engages a lead consultant to oversee the necessary abatement or implementation of interim controls to eliminate the risk.

In addition, for Section 8 housing programs, the Orange County Housing Authority conducts annual inspections of both existing and newly available units. In all cases, any defective paint surfaces must be repaired. For units occupied by households with children under the age of six, corrective actions are taken, including testing and abatement when necessary, or abatement without prior testing if deemed appropriate to protect the health of the children. These measures reflect the City's and County's commitment to ensuring that all housing remains safe and free from lead-based paint hazards, particularly in vulnerable households.

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

The 2016-2020 American Community Survey reported that 8% of City residents had incomes below the poverty level. Of greatest concern is record high rents in Huntington Beach that have placed many lower-income persons at greater risk of homelessness. As discussed previously in Section NA-10 Housing Needs Assessment, of the City's approximately 18,420 low- and moderate-income renter households, 14,090 (76%) face a cost burden of spending greater than 30% of income on rent. Additionally, 40% of the City's low- and moderate-income renters face a severe cost burden, with 7,910 spending more than 50% of income on rent.

Many of the workers who make up Huntington Beach's workforce earn modest incomes, making it challenging to afford in live in the City where they work. The analysis of rental housing costs and affordability (Section MA-15) illustrates that households earning low- and moderate-incomes (up to 80% AMI) cannot afford average market rents in Huntington Beach. In general, individuals working in lower-wage service, retail, and support roles are most likely to find themselves priced out of the rental housing market in Huntington Beach due to the high cost of living in the area.

For the homeless or those at-risk of becoming homeless, the most significant problem is the lack of affordable rental housing, which has been exacerbated by decreases in funding available through Section 8 and HOME, and the loss of approximately \$3 million in annual Redevelopment Housing funds previously used to support affordable housing.

The City's anti-poverty strategy seeks to enhance the employability of residents through the promotion and support of programs which provide employment training and supportive services, while expanding employment opportunities through the implementation of three Business Improvement Districts, and its recently completed Economic Development Strategic Plan.

The City of Huntington Beach supports a variety of economic development activities that help to create and retain jobs for low- and moderate-income households. Activities supported include a commercial property locator; employment assistance in the form of referrals to resources for finding and training employees; financial assistance through the Small Business Administration; business counseling and training via a litany of not-for-profit Orange County agencies; technical assistance in permits, trademarks, environmental review, and taxes; and export and trade assistance. Micro-enterprise assistance, job training services, and technical assistance are some areas that may warrant consideration for funding during the Consolidated Plan period.

In 2024, the City of Huntington Beach completed its updated Economic Development Strategic Plan. The Strategic Plan is designed to strengthen the local economy by focusing on business retention, attraction, and expansion. It also enhances tourism and culture, ensures responsive governance, and fosters proactive communication and collaboration. The updated plan promotes

sustainable growth and active community engagement for a vibrant, resilient future for the City of Huntington Beach.

This updated strategy provides a structured roadmap for economic resilience and growth, focusing on strategic business initiatives, cultural enhancement, responsive governance, and robust collaboration. With outlined milestones, the strategy aims to create a thriving, diverse, and sustainable economy for all residents and businesses, ensuring steady progress and adaptability, and positioning Huntington Beach for a prosperous future.

In terms of workforce training initiatives, the City's Library has implemented an Adult Literacy Program, offering English speaking, reading, and writing skill development for persons 18 years and older. The goal of the program is to promote literacy and improved job skills.

The Community for Entrepreneurship & Leadership at Golden West College is an endeavor to support workforce and economic development. The program began as a collaborative of the Oak View Renewal Partnership, a nonprofit organization that provided assistance to residents of Oak View (a low-income neighborhood in Huntington Beach), and Golden West College. In July 2021, the program transitioned away from workforce development services to a finer focus of entrepreneurial education and coaching, allocating its team and resources to the success and impact of aspiring entrepreneurs. CIELO, as the program is now called, serves as a small business support system for all Orange County residents, with a focus on low-income and under-resourced individuals who lack access to resources, knowledge, and support to change their economic trajectory. CIELO aims to reduce opportunity inequality by providing participants with the resources or connections they wouldn't otherwise have.

Finally, the City will fully comply with Section 3 of the Housing and Community Development Act, which helps foster local economic development and individual self-sufficiency. This set of regulations requires that to the greatest extent feasible, the City will provide job training, employment, and contracting opportunities for low or very low-income residents in connection with housing and public construction projects.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

Huntington Beach's affordable housing programs are closely aligned with the City's broader goals and strategies for reducing poverty among local families and individuals. These programs work together to address both the immediate housing needs of low-income residents and the long-term economic self-sufficiency of vulnerable populations. Examples of the coordination between affordable housing initiatives and poverty reduction efforts include:

 Housing Choice Rental Assistance Program: Over 600 low and extremely low-income households in Huntington Beach participate in the Housing Choice Rental Assistance Voucher Program, which is administered by the Orange County Housing Authority (OCHA). This program directly supports poverty reduction by helping these households

- access affordable rental housing, thus easing financial strain and enabling them to allocate resources toward other basic needs, such as food, healthcare, and education.
- Tenant-Based Rental Assistance (TBRA) Programs: The City plans to utilize HOME funds
 to support three tenant-based rental assistance programs. These programs will provide
 direct rental subsidies to eligible low-income households, helping reduce the financial
 burden of housing costs and offering families a better chance at achieving long-term
 stability and upward mobility.
- Pathways to Independence Program: With CDBG funding, the City supports the Pathways to Independence program, which serves single women who are homeless or unstably housed. This program helps participants achieve economic self-sufficiency through education and personal development, providing a critical link between stable housing and the long-term reduction of poverty. By equipping individuals with the skills and support they need to succeed, the program contributes to breaking the cycle of homelessness and poverty.
- Affordable Housing Development: During the five-year period of the Consolidated Plan,
 the City will work to utilize HOME funds to gap finance an affordable housing project at a
 yet-to-be-determined location. The development of new affordable housing will directly
 address the need for affordable living spaces for low-income families and individuals,
 providing them with stable housing opportunities that can help reduce economic
 vulnerability and improve quality of life.

Through these initiatives, Huntington Beach's affordable housing programs are intricately connected to the City's poverty reduction goals. By ensuring access to affordable housing, supporting programs that enhance self-sufficiency, and developing new affordable housing units, the City is working to reduce poverty and improve the economic stability of its residents.

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements.

Huntington Beach follows monitoring procedures for CDBG-funded public service subrecipients which includes desk reviews of quarterly progress reports and expenditures, and periodic on-site visits to ensure compliance with federal regulations. All subrecipients are required by their subrecipient agreement to submit performance reports that demonstrate work is being performed in accordance with the scope of service, that evidences progress in meeting performance milestones, and that shows expenditures are allowable under the agreement. Staff also conducts periodic on-site monitoring of project activities to document compliance with HUD eligibility guidelines, performance in reaching contract goals, to determine if administrative and fiscal systems are adequate, and to ensure compliance with other crosscutting federal regulations.

CDBG-funded capital projects are monitored by regular status and fiscal reports for Davis/Bacon and Section 3 requirements throughout the course of the project, as well as frequent site visits by staff. For some projects, the City's Public Works Department outsources monitoring and project inspections on construction work.

The City is also responsible for monitoring HOME-assisted rental projects (e.g., transitional, permanent and special needs housing projects) throughout the period of affordability to ensure that these projects are in continued compliance with Federal and State regulations. Monitoring guidelines are intended to assist City staff in making informed judgments about asset management, HOME Investment Partnerships Act (HOME) Program compliance, and management efficiency of HOME-assisted rental projects. The City's monitoring protocol serves to determine if HOME-assisted rental housing remains affordable, its occupants are low- and very low-income, and that the property is maintained in standard condition throughout the affordability period.

Rental project monitoring occurs at three levels:

- Annually, a desk audit is performed wherein the owner/property manager will submit information certifying household sizes, household incomes and rents for all HOMErestricted units;
- An on-site visit will be conducted triennially (once every three years) during which an indepth review will occur of all HOME and federal crosscutting requirements, e.g., affirmative marketing and tenant selection procedures;
- Upon receipt of a developer's project pro forma, the City conducts an economic analysis to ensure that, in accordance with the City's adopted underwriting and layering review

guidelines, the amount of warranted HOME assistance is necessary to provide affordable housing.

The City has the prerogative to monitor on-site more frequently, especially if a project is at risk because of outstanding findings or insufficient capacity.

The City shall also follow steps to monitor beneficiaries of the Homeowner Rehabilitation Program. During the pre-monitoring phase, applicants will sign a clause on the application form certifying that the property is the principal residence.

Project and financial data on CDBG and HOME-funded activities is maintained using HUD's IDIS (Integrated Disbursement Information System) software. Use of this system allows HUD staff easy access to local data for review and progress evaluation.

EXPECTED RESOURCES

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

Huntington Beach is an entitlement jurisdiction and as such, will receive an estimated \$1,121,195 in CDBG entitlement funds, will have approximately \$228,868 in prior year CDBG funds carried forward, and is estimated to receive around \$30,000 in program income for a total of \$1,380,063. The City does not have any income from float-funded activities or surplus from urban renewal settlements, sale of real property, prior period adjustments, loans outstanding or written off, CDBG-acquired property available for sale, or lump sum drawdown payments. Nor is the City funding any "urgent need activities." CDBG funds will be used for public services, housing services in support of eligible HOME activities, a homeowner rehabilitation program, code enforcement, infrastructure improvements, and CDBG administration.

The City will also receive an estimated HOME entitlement allocation of \$538,328. Prior year unallocated funds of \$181,100 and approximately \$125,000 in program income will also be available, for a total of \$844,428. The City will use HOME funds for administration of the HOME program, three tenant-based rental assistance programs, and will reserve at least 15% for a future affordable housing project. The City is also proposing to use prior-year HOME administrative funds for current year fair housing services.

In the event that final CDBG and HOME entitlement allocations differ from the estimated amounts described above, the following adjustments, as approved by the City Council, will be made to the FY 2025/26 Annual Action Plan:

CDBG Public Service Allocations

- If actual CDBG funding is less than the anticipated amount, decrease the funding allocation for each of the six recommended organizations by a proportionate share (weighted average).
- If actual CDBG funding is greater than the anticipated amount, allocate increased funds by equal amount to the six recommended organizations identified in AP-35

Capital and Housing Preservation Project Allocations

• If actual CDBG funding is less than the anticipated amount, maintain the recommended funding allocations for Special Code Enforcement and Housing Services for TBRA Program and reduce funding to Housing Rehabilitation Loans and Grants Program and Maintenance Zone Area 3 ADA Improvements equally.

- If actual CDBG funding is greater than the anticipated amount, maintain the recommended funding allocations for Special Code Enforcement and Housing Services for TBRA Program and increase funding to Housing Rehabilitation Loans and Grants Program and Maintenance Zone Area 3 ADA Improvements equally.
- If actual HOME funding is less than or greater than the anticipated amount, adjust the Mobile Home TBRA program accordingly. Other HOME capital programs are to remain unchanged.

Administration Allocations

- If actual CDBG funding is less than or more than the anticipated amount, adjust CDBG Administration allocation accordingly but will not exceed the 20 percent maximum requirement of the HUD CDBG allocation for 2025/26.
- If actual HOME funding is less than or more than the anticipated amount, adjust HOME Administration and Community Housing Development Organization funding reserves accordingly, but will not exceed the 10 percent and 15 percent maximum requirements of the HUD HOME allocation for 2025/26.

Another potential resource is SB-2, also known as the Permanent Local Housing Allocation funding, which was implemented in January 2019. It imposes an additional recording fee on property sales, with the aim of collecting revenues that are then distributed by the state to local jurisdictions. These funds are earmarked for financing affordable housing projects. Huntington Beach is set to receive annual revenues from this source, but it's contingent upon the certification of the 2021-2029 Housing Element by the State of California. Once the Housing Element is certified, Huntington Beach can continue to access these funds. This funding serves as a crucial resource that can be utilized to complement CDBG and HOME funds, particularly in addressing issues related to affordable housing and homelessness within the community. Leveraging these various funding sources can significantly bolster efforts to combat housing insecurity and homelessness in Huntington Beach.

The Huntington Beach Housing Authority also contributes approximately \$220,000 annually from the Low- and Moderate-Income Housing Asset Fund (LMIHAF) for homeless services personnel as part of the City's Homeless Taskforce effort.

The City will pursue competitive public and private grants for the development and preservation of programs, housing, and services and work to support legislation that promotes funding for future affordable housing during the Consolidated Plan period.

Anticipated Resources

			Expe	cted Amour	nt Available Yo	ear 1	Expected

Table 52 - Expected Resources - Priority Table

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Federal funds play a vital role in implementing the Consolidated Plan. Since local, private, and non-federal resources are often insufficient to meet the community's demand for housing and services, agencies receiving CDBG and HOME funds rely on substantial financial and in-kind support from individuals, foundations, and private organizations to address the needs outlined in the plan.

Additionally, the City leverages other resources from formula grant programs. For instance, the HOME program is supported by a range of funding sources, including private and public investments, as well as low-income housing tax credits. Other potential matching funds include inclusionary housing in-lieu fees, residual receipts from former Redevelopment Agency loans, and State SERAF loan repayments from former Redevelopment Low/Mod Housing Funds.

The City has also combined CDBG and CDBG-CV funds with local funding to support the operation of the Navigation Center, an emergency homeless shelter initially established to provide a safe place for people experiencing homelessness during the COVID-19 pandemic. The center has since become a permanent shelter for Huntington Beach's homeless population.

Historically, the City has used former redevelopment tax increment funds and surplus contributions from the Redevelopment Agency to meet the 25% match requirement for HOME funds. Although redevelopment tax increment funds are no longer available for future matches, the City continues to use the surplus for this purpose. As of September 2023, the surplus stands at approximately \$3,725,103, providing a valuable resource for meeting match requirements and supporting affordable housing development.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The City Council approved the acquisition of property at 17631 Cameron Lane, which was developed as an emergency homeless shelter to address the needs of the homeless population. This aligns with the priority need identified in the previous 2020/21–2024/25 Consolidated Plan and continues to be a priority in the 2025/26–2029/30 Consolidated Plan.

Table 3 – Goals Summary

Goal Descriptions

Goal Name	Goal Description
Sustain and Strengthen Neighborhoods	Using CDBG funds, the City will sustain and strengthen neighborhoods by eliminating unsafe conditions and blight while improving the quality of life of residents within the community.
	(Projects: Special Code Enforcement; Homeowner Rehabilitation Loans and Grants Program)
Preserve Existing and Create New Affordable Housing	To the extent possible, based upon the availability of funds and a project's viability, HOME funds will be used to assist affordable housing developers in the acquisition, construction and/or rehabilitation of low-income rental and/or owner housing units, and in the provision of tenant-based rental assistance (TBRA).
	(Projects: Mercy House TBRA, Families Forward TBRA, Mobile Home TBRA, and Housing Services for TBRA)
Support Efforts to Address Homelessness	Using CDBG public service funds, the City will provide assistance to homeless service providers.
	(Projects: Pathways to Independence, Project Hope Alliance, Robyne's Nest, StandUp for Kids Street Outreach)
Support Agencies that Assist Special Needs	Using CDBG public service funds, the City will provide
Populations	assistance to special needs service providers.
	(Project: Senior Outreach Care Management)
Increase Access to Community Services for	Using CDBG public service funds, the City will provide
Low- and Moderate-Income Persons	assistance to various social service agencies for programs for youth, fair housing, anti-crime, and general public services. Services must benefit at least 51 percent low/mod persons.
	(Project: Children's Bureau)
Provide Needed Infrastructure	Using CDBG funds, the City will provide financial assistance to
Improvements	improve public infrastructure.
	(Projects: ADA Curb Cuts and Ramps)
Planning for Housing and Community Development	The City will conduct the following administration/planning activities: (1) General Administration of CDBG and HOME Program, including preparation of budget, applications, certifications and agreements, (2) Coordination of CDBG-funded capital improvement projects, (3) Coordination of Public Service Subrecipients, (4) Coordination of HOME-funded housing projects, (5) Monitoring of CDBG and HOME projects/programs to ensure compliance with federal regulations, (6) Preparation of Annual Action Plan, and (7) Preparation of the CAPER. Up to 20% of the annual CDBG entitlement and up to 10% of the HOME entitlement is allowed for administration activities.
	(Projects: CDBG Program Administration; Fair Housing Foundation; HOME Program Administration)

Table 61 – Annual Action Plan Goal Descriptions

PROJECTS

AP-35 Projects – 91.220(d)

Introduction

The City plans to undertake the following CDBG and HOME-funded activities during FY 2025/26 to address its priority housing and community development needs. All proposed activities are eligible and meet program service targets. Additionally, the City of Huntington Beach has not exceeded any of its maximum allocations for CDBG public services, CDBG administration, or HOME administration. With an estimated CDBG allocation of \$1,121,195, the City of Huntington Beach will allocate \$168,179 for public services, representing 15% of the CDBG entitlement. This Action Plan proposes to allocate the following to 2025/26 public services: Pathways to Independence (\$20,530); Project Hope Alliance (\$20,530); Robyne's Nest (\$40,529); StandUp for Kids (\$15,530); Senior Outreach Care Management (\$30,530); and Children's Bureau (\$40,530). CDBG regulations also permit a maximum allocation of 20% of the annual entitlement, or \$224,239, for CDBG administration activities. The City has allocated this entire amount to CDBG Administration. Lastly, a maximum of 10% of the annual HOME entitlement, \$53,833, will be allocated to HOME Program Administration in FY 2025/26.

Consistent with the City's Draft Citizen Participation Plan for 2025/26-2029/30 (to be adopted with this Consolidated Plan), the Annual Action Plan may contain a list of "back-up" projects to be activated during the given program year due to one or more of the following circumstances:

- Additional funding becomes available during the program year from the close out of current projects that were completed under budget.
- More program income becomes available than originally estimated and budgeted in the Annual Action Plan.
- If, during the development of the Annual Action Plan, the City of Huntington Beach has not definitively decided which public facility or infrastructure improvement project to fund, the City may opt to categorize each option as a "back-up" project until further project and budget planning is performed. Initiation and funding of one or more of the "back-up" projects would not constitute a substantial amendment as defined in the Citizen Participation Plan. Preferential consideration will be given to those projects that demonstrate the ability to spend CDBG funds in a timely manner, consistent with the City's goal to meet CDBG timeliness rules, as well as those projects that meet the needs of the community as defined in the Consolidated Plan.

Table 62 – Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

The highest priority is given to the needs of the lowest-income residents, recognizing their increased vulnerability to displacement, homelessness, and other severe housing challenges due to limited financial resources and various other hardships they may face.

The Consolidated Plan highlights several barriers to addressing underserved needs, including the persistent high demand for public services and the insufficient funding available to meet the community's needs, particularly in housing. This plan allocates resources specifically aimed at overcoming these challenges.

AP-38 Project Summary

Project Summary Information

1	Project Name	Special Code Enforcement		
	Target Area	Special Code Enforcement Target Area		
	Goals Supported	Sustain and Strengthen Neighborhoods		
	Needs Addressed	Priority Housing Needs		
	Funding	CDBG: \$246,506		
	Description	Eligibility Citation: 24 CFR 570.202 (c) - Code Enforcement National Objective Citation: 24 CFR 570.208 (a)(1) - Low Mod Area Benefit		
		Funding will be used to support two (2) full-time Code Enforcement Officers (CEO) to support code enforcement in the Special Code Enforcement Target Area. As the City ages, certain areas within the City of Huntington Beach need ongoing, proactive property maintenance inspections by code enforcement to maintain a safe, habitable living environment. Thus, with continued code enforcement efforts and education, the quality of life and housing standards are maintained. The Special Code Enforcement Program benefits the community overall by working to upgrade the housing stock within deteriorating/deteriorated areas.		
	Target Date	6/30/2026		
	Estimate the number and type of families that will benefit from the proposed activities	600 housing units		
	Location Description	Special Code Enforcement Target Area		
	Planned Activities	Same as description.		

2	Project Name	Homeowner Rehabilitation Loans and Grants Program
	Target Area	Citywide
	Goals Supported	Preserve Existing and Create New Affordable Housing
	Needs Addressed	Priority Housing Needs
	Funding	CDBG: \$381,139
	Description	Eligibility Citation: 24 CFR 570.202 - Housing/Rehab: Single Unit Residential
		National Objective Citation: 24 CFR 570.208(a)(3) - Low Mod Housing Benefit
		The Homeowner Rehabilitation Loans and Grants Program assists lower-income households with much-needed home repairs and improvements. Available to eligible homeowners is a \$75,000 loan to pay rehabilitation costs for a single-family home, town home, or condominium. The City charges a 3% simple interest. Repayment of the loan is deferred until the home is sold, transferred, or refinanced.
		The City also offers a one-time grant not to exceed \$20,000 to low-income homeowners for deferred maintenance and health and safety-related household repairs. Qualified households may include owners of mobile homes.
		The Homeowner Rehabilitation Loans and Grants Program will also fund operation costs associated with the implementation program.
	Target Date	6/30/2026
	Estimate the number and type of families that will	12 housing units
	benefit from the proposed activities	
	Location Description	Citywide
	Planned Activities	Same as description.

3	Project Name	Families Forward Tenant-Based Rental Assistance (TBRA)
		Program
	Target Area	Citywide
	Goals Supported	Preserve Existing and Create New Affordable Housing
	Needs Addressed	Priority Housing Needs
	Funding	HOME: \$200,000
	Description	Eligibility Citation: 24 CFR 92.205(a)(1) – Tenant Based
		Rental Assistance
		National Objective Citation: 24 CFR 570.208(a)(3) - Low
		Mod Housing Benefit
		Families Forward will continue administering a Tenant
		Based Rental Assistance Program with a goal of assisting 15
		households with short and medium-term rental assistance
		as well as housing relocation and stabilization services.
	Target Date	06/30/2026
	Estimate the number and type of families that will	15 households
	benefit from the proposed activities	
	Location Description	Citywide
	Planned Activities	Same as description.

4	Project Name	Mercy House Tenant-Based Rental Assistance (TBRA)
		Program
	Target Area	Citywide
	Goals Supported	Preserve Existing and Create New Affordable Housing
	Needs Addressed	Priority Housing Needs
	Funding	HOME: \$200,000
	Description	Eligibility Citation: 24 CFR 92.205(a)(1) – Tenant Based
		Rental Assistance
		National Objective Citation: 24 CFR 570.208(a)(3) - Low
		Mod Housing Benefit
		Mercy House will continue administering a Tenant Based
		Rental Assistance Program with a goal of assisting 15
		households with short and medium-term rental
		assistance as well as housing relocation and stabilization
		services.
	Target Date	06/30/2026
	Estimate the number and type of families that will	15 households
	benefit from the proposed activities	
	Location Description	Citywide
	Planned Activities	Same as description.

5	Project Name	Mobile Home Tenant-Based Rental Assistance Program
	Target Area	Citywide
	Goals Supported	Preserve Existing and Create New Affordable Housing
	Needs Addressed	Priority Housing Needs
	Funding	HOME: \$128,841
	Description	Eligibility Citation: 24 CFR 92.205(a)(1) – Tenant Based
		Rental Assistance
		National Objective Citation: 24 CFR 570.208(a)(3) - Low
		Mod Housing Benefit
		The City of Huntington Beach will offer a Mobile Home
		Tenant-Based Rental Assistance Program to seniors (age
		62+) with at least one year of mobile home residency. The
		homeowners must also be very low income (50% area
		median income) or below and preference will be given to
		veterans, extremely low income, or to seniors who are
		severely cost burdened (paying over 50% of their income
		on housing). The program proposes assisting 6 households
		with much needed rental assistance.
	Target Date	06/30/2026
	Estimate the number and type of families that will	6 households
	benefit from the proposed activities	
	Location Description	Citywide
	Planned Activities	Same as description.

6	Project Name	Housing Services for Tenant-Based Rental Assistance (TBRA) Program
	Target Area	Citywide
	Goals Supported	Preserve Existing and Create New Affordable Housing
	Needs Addressed	Priority Housing Needs
	Funding	CDBG: \$235,000
	Description	Eligibility Citation: 24 CFR 570.201 (k) – Housing Services National Objective Citation: 24 CFR 570.208(a)(3) - Low Mod Housing Benefit The City will allocate \$235,000 in CDBG funds to be used to pay costs in support of activities eligible for funding under the HOME program. This activity will fund services such as housing counseling in connection with tenant-based rental assistance, inspections, tenant selection, and management of the three Huntington Beach Tenant Based Rental Assistance Programs.
	Target Date	06/30/2026
	Estimate the number and type of families that will	36 households
	benefit from the proposed activities	
	Location Description	Citywide
	Planned Activities	Same as description.

7	Project Name	Pathways to Independence	
	Target Area	Citywide	
	Goals Supported	Support Efforts to Address Homelessness	
	Needs Addressed	Priority Homeless Needs	
	Funding	CDBG: \$20,530	
	Description	Eligibility Citation: 24 CFR 570.201 (c) - Operating Costs of Homeless/AIDS Patients Programs National Objective Citation: 24 CFR 570.208 (a)(2) - Low/Mod Limited Clientele Benefit	
		The mission of Pathways to Independence is to transform the lives of single young women from disadvantaged backgrounds through education, therapy, mentoring, housing, and healthcare, to break the cycle of poverty and abuse. Pathways to Independence plans to utilize City of Huntington Beach CDBG funds to support a residential program, which empowers low-income young women with the financial security to complete their college education and achieve upward mobility. Support from the City of Huntington Beach CDBG Program will offset expenses to support program staff, utilities, and transportation costs for clients and case managers.	
	Target Date	6/30/2026	
	Estimate the number and type of families that will	40 persons (homeless)	
	benefit from the proposed activities		
	Location Description	Citywide	
	Planned Activities	Same as description.	

8	Project Name	Project Hope Alliance
	Target Area	Citywide
	Goals Supported	Support Efforts to Address Homelessness
	Needs Addressed	Priority Homeless Needs
	Funding	CDBG: \$20,530
	Description	Eligibility Citation: 24 CFR 570.201 (c) - Operating Costs of Homeless/AIDS Patients Programs National Objective Citation: 24 CFR 570.208 (a)(2) - Low/Mod Limited Clientele Benefit
		PHA's mission is to "end the cycle of homelessness, one child at a time." PHA utilizes a unique program methodology - placing full time, professional case managers directly on school campus for the purpose of serving the educational and social-emotional needs of students experiencing homelessness. Project Hope Alliance has continued their work at Huntington Beach High School, Valley Vista High School, Westminster High School and Ocean View High School. PHA continues to host four case managers at our four partner HBUHSD schools to work with students experiencing homelessness, providing intensive, individualized, and long-term care that includes resources for academic guidance, social-emotional mentorship, transportation, technology, basic needs, and external referrals for additional needs.
	Target Date	6/30/2026
	Estimate the number and type of families that will	105 persons (homeless)
	benefit from the proposed activities	
	Location Description	Project Hope Alliance is located in Costa Mesa, CA; however, services will be offered at various schools in Huntington Beach, including: Huntington Beach High School: 1905 Main Street, Huntington Beach, CA 92648 Valley Vista High School: 9600 Dolphin Street, Fountain Valley, CA 92708 Westminster High School, 14325 Goldenwest St., Westminster CA 92683 Oceanview High School: 17071 Gothard Street, Huntington Beach, CA 92647
	Planned Activities	Same as description.

9	Project Name	Robyne's Nest
	Target Area	Citywide
	Goals Supported	Support Efforts to Address Homelessness
	Needs Addressed	Priority Homeless Needs
	Funding	CDBG: \$40,529
	Description	Eligibility Citation: 24 CFR 570.201 (c) - Operating Costs of
		Homeless/AIDS Patients Programs
		National Objective Citation: 24 CFR 570.208 (a)(2) -
		Low/Mod Limited Clientele Benefit
		The mission of Robyne's Nest is to identify at-risk and homeless high school students and provide them a path to become stable and productive citizens. Robyne's Nest helps high school students in the Huntington Beach area who have little to no parental support with academic, financial, and life skills. They assist students with security, routine, and a place to belong. Their purpose is to enable students to complete their high school diploma and continue onward with college, trade school, or military programs. Robyne's Nest provides housing resources; basic needs such as food, clothing, and supplies; educational assistance such as tutoring, Chromebooks, school supplies, and fees; and overall help with health and wellbeing in the form of counseling, therapy, mentoring, and life skills classes.
	Target Date	6/30/2026
	Estimate the number and type of families that will	25 persons (homeless)
	benefit from the proposed activities	City models
	Location Description	Citywide
	Planned Activities	Same as description.

10	Project Name	StandUp for Kids Street Outreach Program
	Target Area	Citywide
	Goals Supported	Support Efforts to Address Homelessness
	Needs Addressed	Priority Homeless Needs
	Funding	CDBG: \$15,530
	Description	Eligibility Citation: 24 CFR 570.201 (c) - Operating Costs of
		Homeless/AIDS Patients Programs
		National Objective Citation: 24 CFR 570.208 (a)(2) -
		Low/Mod Limited Clientele Benefit
		StandUp for Kids Street Outreach provides wrap-around support aimed at moving youth facing homelessness into safe and stable housing. Youth are assessed for their immediate needs and provided with food, clothing, hygiene products, and transitional housing as needed. Youth are then linked with a volunteer mentor who assists the youth to create a pathway to self-sufficiency and to obtain safe and stable housing. This pathway can include assistance, job search and resume strategies, household and budget management, and home-finding assistance.
		Mentoring normally continues for six months, and
		sometimes much longer. Huntington Beach citizens will
		benefit through creating new self-supporting,
		contributing members of their communities.
	Target Date	6/30/2026
	Estimate the number and type of families that will	110 persons (homeless)
	benefit from the proposed activities	l cu
	Location Description	Citywide
	Planned Activities	Same as description.

11	Project Name	Senior Services Care Management
	Target Area	Citywide
	Goals Supported	Support Agencies that Assist Special Needs Populations
	Needs Addressed	Priority Special Needs
	Funding	CDBG: \$30,530
	Description	Eligibility Citation: 24 CFR 570.201(e) - Public
		Services/Senior Services
		National Objective Citation: 24 CFR 570.208(a)(2) - Low
		Mod Limited Clientele Benefit
		The CDBG funded Senior Center Care Management project
		will consist of two part time staff who will assist over 165
		at-risk, older adult, Huntington Beach residents in fiscal
		year 2025/26. Various services will be provided to these
		residents and can include thorough intake, need
		assessment, care plan development, service
		implementation, as well as provision of senior specific information and referrals. Additional direct services to
		address unmet needs in the areas of nutrition, mobility,
		home safety, housing insecurity, access to services,
		emotional and social support needs are also provided to
		ongoing care management clients. Services can be short or
		long-term, depending on individual needs. Many of those
		served through this program lack the ability to access
		services on their own and do not have an adequate
		support system to assist. Most older adults served by care
		management are individuals and couples, with low
		incomes and who are at-risk. Care Managers work closely
		with community partners, local resources, County
		agencies, faith-based groups, philanthropic organizations
		and other City departments to help optimize the lives of
		our most vulnerable and isolated citizens. For all these
		reasons, this project positively impacts the residents of
		Huntington Beach.
	Target Date	6/30/2026
	Estimate the number and type of families that will	165 persons (seniors)
	benefit from the proposed activities	
	Location Description	The Senior Services Care Management Program is located
		at 18041 Goldenwest Street, Huntington Beach; however,
		the service is available to elderly persons citywide.
	Planned Activities	Same as description.

12	Project Name	Children's Bureau
	Target Area	Citywide
	Goals Supported	Increase Access to Community Services for LMI Persons
	Needs Addressed	Priority Community Services
	Funding	CDBG: \$40,530

	Estimate the number and type of families that will	Not applicable.
	benefit from the proposed activities	
	Location Description	Citywide.
	Planned Activities	Same as description.

AP-50 Geographic Distribution - 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

Huntington Beach, situated in northwestern Orange County, California, is an urbanized coastal community characterized by extensive residential development. With much of the residentially designated land already developed, future residential growth primarily depends on the reuse of existing parcels and infill development. The City is bordered by Seal Beach to the northwest, Westminster to the northeast, Fountain Valley and Costa Mesa to the east, Newport Beach to the southeast, and the Pacific Ocean to the southwest.

CDBG and HOME funds in Huntington Beach are allocated for projects and programs citywide, with a focus on addressing the needs of the most vulnerable neighborhoods, particularly those where 51% or more of the residents are low- or moderate-income.

For Special Code Enforcement efforts, the City conducted a visual survey of CDBG-eligible areas to identify properties, businesses, parkways, alleys, and structures with violations. This survey identified areas within the vicinity bounded by Bolsa Chica Street to the west, Bolsa Avenue to the north, Brookhurst Street to the east, and Atlanta Avenue to the south as having significant deterioration issues. This designated area, known as the "Special Code Enforcement Target Area," encompasses several census tracts with a total population of 67,625 people. Of these residents, 45,300 individuals, or 69.99%, fall within the low- to moderate-income bracket.

Geographic Distribution

Target Area	Percentage of Funds
Citywide	89%
Special Code Enforcement Target Area	11%

Table 64 - Geographic Distribution

Rationale for the priorities for allocating investments geographically

The City is committed to using CDBG funds to improve all Huntington Beach communities. Public services will reach eligible residents citywide, providing much-needed services to Huntington Beach's youth, homeless, and senior populations. Nearly 90% percent of the City's federal budget for FY 2025/26 will be allocated to projects that provide citywide benefits.

Also, alleviating blight motivates investments in the Special Code Enforcement Target Area. The Special Code Enforcement Program aims to transform the area by identifying substandard residential and commercial properties and seeing to it that code deficiencies are resolved. Eleven percent of the City's federal budget for 2025/26 will be used to fund these services.

Table 66 - One Year Goals for Affordable Housing by Support Type

Discussion

In FY 2025/26, the City of Huntington Beach plans to allocate \$528,841 in HOME funds to support three tenant-based rental assistance programs. Families Forward and Mercy House will operate two of these programs, each aimed at assisting 15 households each comprising of homeless individuals, veterans, and victims of domestic violence. The third program, managed by GRC Associates, is specifically designed to aid senior residents of mobile home communities facing escalating space rent costs.

Additionally, the City anticipates having an unallocated balance of approximately \$261,754 in HOME funds, which it intends to allocate towards a new Community Housing Development Organization (CHDO) affordable housing project in the future.

AP-60 Public Housing – 91.220(h)

Introduction

The City of Huntington Beach does not have any public housing developments. However, it benefits from the services of the Orange County Housing Authority (OCHA), which manages Housing Choice Vouchers (Section 8) for residential units within Huntington Beach. Currently, 687 households in Huntington Beach receive Section 8 vouchers from OCHA.

Additionally, OCHA administers various other voucher programs, including 40 Continuum of Care, 11 Family Self-Sufficiency, 24 Family Unification, one Non-Elderly Disabled, 115 Portability, 85 Veterans Affairs Supportive Housing, and 59 Emergency Housing Vouchers. However, the waiting list for these programs is currently closed.

Actions planned during the next year to address the needs to public housing

Not applicable.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

Not applicable.

If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

Not applicable.

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

Homelessness has been a growing challenge across the country including in the Los Angeles and Orange County regions. Contributing factors include a shortage of affordable housing, increasing poverty rates, reduced subsidies, substance abuse issues, the de-institutionalization of the mentally ill, and a rising number of individuals who may view homelessness as a lifestyle choice.

To address this issue, Orange County conducts a biennial enumeration of both sheltered and unsheltered homeless individuals in a 24-hour period. This effort, known as the Homeless Point-in-Time (PIT) Count, is required by Congress for all communities receiving U.S. Department of Housing and Urban Development (HUD) funding for homeless programs. HUD mandates that the PIT Count take place during the last ten days of January. For 2024, the count was conducted by the County of Orange and the Orange County Continuum of Care, with the sheltered count taking place on the night of January 22, 2024, and the unsheltered count occurring from the morning of January 23 through January 25, 2024.

The 2024 PIT Count identified 7,322 homeless individuals in Orange County, marking a significant 28% increase from the 2022 count, which recorded 5,718 individuals. Specifically in Huntington Beach, the count revealed 433 total homeless persons, with 173 classified as unsheltered and 260 as sheltered. This represents an increase from the 2022 figures, where there were 330 total homeless individuals – 188 unsheltered and 142 sheltered.

The City of Huntington Beach has implemented an ambitious strategy to address and ultimately end homelessness. In FY 2021/22, the City took significant steps by appointing a Deputy Director of Homelessness & Behavioral Health Services and establishing the Homeless & Behavioral Health System. This comprehensive system aims to support individuals experiencing homelessness or at risk of homelessness through outreach, engagement, case management, and connecting them with essential services such as shelter, housing, and behavioral health support. Although the Deputy Director's position has evolved since February 2022, the City continues to staff and support homelessness services.

Describe the jurisdictions' one-year goals and actions for reducing and ending homelessness including:

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The HB Cares Volunteer Program, a key component of the Homeless & Behavioral Health Program, plays a vital role in outreach to homeless individuals and assessing their needs. Since its launch in 2023, the program has successfully recruited and trained 21 volunteers, equipping them with skills in de-escalation techniques, trauma-informed care, vicarious trauma, and Mental

Health First Aid. Volunteers are responsible for answering the daily homeless outreach line and returning calls, providing a streamlined communication channel for individuals seeking help. In addition, a licensed Marriage and Family Therapist joined the team in December 2023, assisting with 62 Disabling Condition Assessments. The therapist will continue to offer mental health support on an as-needed basis.

The Homeless & Behavioral Health System also incorporated homeless outreach social workers who actively engaged with unhoused and at-risk of being unhoused individuals, families, veterans, and seniors. Social workers offer support by linking individuals to resources, service providers, and aiding in securing necessary documents for County of Orange housing programs. They maintain close collaboration with local and county shelters, including the Huntington Beach Navigation Center, while also partnering with crisis response teams like Be Well to provide comprehensive assistance and support to those in need. Working in collaboration with Homeless Task Force officers, they ensure that individuals receive the necessary care and resources to address their unique situations effectively.

Be Well OC in Huntington Beach (BWOC) is another component of the Homeless & Behavioral Health System that provides outreach to Huntington Beach's homeless population. BWOC employs a Mobile Crisis Response Team composed of two operating vans and two Crisis Interventionists who drive to locations and provide in-community assessment and stabilization services. The teams are well-trained and experienced in providing appropriate information, referrals, transportation to services, and additional follow-up support and case management to help address mental health-related situations.

Further, over the course of the years covered by this Consolidated Plan, the City intends to support homeless public service programs that offer outreach and assessment for homeless individuals. In FY 2025/26, for example, the Pathways to Independence Program focuses on young single women experiencing homelessness, while Project Hope Alliance, Robyne's Nest, and StandUp for Kids Street Outreach focus on homeless youth and providing wrap around services unique to young individuals such as mentoring, food, clothing, housing, academic support, and educational aid.

Finally, the City may continue to support the operations and services at the Navigation Center, located at 17642 Beach Boulevard. The Navigation Center, which opened in December 2020, offers 174 beds for overnight shelter and provides direct access to essential services aimed at helping individuals experiencing homelessness move towards housing stability.

Addressing the emergency shelter and transitional housing needs of homeless persons

The City has partnered with Mercy House to launch the Navigation Center, an emergency homeless shelter. The facility received significant federal funding to support its operations, including CDBG, CDBG-CV (for activities related to COVID-19 prevention, preparation, and response), and HOME funding from the American Rescue Program (HOME-ARP). The Navigation

Center can shelter up to 174 adults and couples under normal conditions and will continue to operate in FY 2025/26.

In FY 2021/22, the City initiated the HB Oasis project in collaboration with the State of California Homekey Program, the County of Orange, National CORE, and American Family Housing. This project involved acquiring and rehabilitating the former Quality Inn & Suites motel at 17251 Beach Boulevard to address homelessness in the region. HB Oasis served as interim housing for up to 62 individuals and households in Orange County's Central Service Planning Area. It provided not only transitional housing but also comprehensive property management and residential support services. The focus was on trauma-informed, evidence-based operations to support residents' reintegration into the community through robust case management and connections to permanent housing solutions.

In May 2024, the HB Oasis project transitioned to permanent supportive housing. This transition involved renovating the individual units to include kitchenettes and utilizing project-based vouchers to support long-term housing stability for its residents.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

The City of Huntington Beach is implementing a comprehensive approach to address homelessness, with a focus on both immediate relief and long-term solutions. The strategy involves securing both short-term and long-term funding, collaborating with experienced service providers, and creating affordable housing opportunities. The City's key efforts aim to support various populations, including chronically homeless individuals, families with children, veterans, victims of domestic violence, and unaccompanied youth.

A central initiative is the Navigation Center, which has received around \$4.5 million in funding from CDBG, CDBG-CV, and HOME-ARP grants. This center offers wraparound services to help individuals transition from emergency shelter to more stable housing. The City plans to repurpose the property into a permanent facility that will provide affordable housing and supportive services for chronically homeless individuals.

Additionally, the City continues to prioritize tenant-based rental assistance (TBRA), with plans to offer rental subsidies to 36 households in 2025/26. Families Forward is responsible for providing rental assistance to households with children, while Mercy House focuses on supporting those experiencing homelessness, victims of domestic violence, and veterans. Another program is also in place to provide space rent relief for senior mobile homeowners for up to 24 months.

By focusing on both immediate housing solutions and long-term support, Huntington Beach is working to not only reduce homelessness but also prevent those recently housed from falling back into homelessness.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs

To prevent homelessness and support at-risk populations, Huntington Beach actively participated in the Orange County Continuum of Care System. This system is designed to provide assistance to individuals at risk of becoming homeless, ensuring a network of support for those in need.

The City is also committed to supporting families through HOME-funded rental assistance programs. In FY 2025/26, the City is proposing to support three rental assistance programs that will assist a variety of vulnerable population groups in Huntington Beach. As mentioned above, Families Forward assists families that are homeless or at risk of homelessness, while Mercy House targets lower-income households, homeless persons, veterans, and victims of domestic violence. The Mobile Home Tenant-Based Rental Assistance Program targets senior owners of mobile homes with space rents.

Although the City does not receive Emergency Solutions Grants (ESG) or Housing Opportunities for Persons with AIDS (HOPWA) funding and therefore is not required to develop a discharge coordination policy, it remains committed to addressing this issue. The City will continue to work with the Orange County Housing Authority and the Continuum of Care Homeless Issues Task Force to develop and refine its discharge coordination policy.

AP-75 Barriers to affordable housing – 91.220(j)

Introduction

Huntington Beach has demonstrated a strong commitment to supporting affordable housing through various measures, including updates to its zoning ordinance and direct financial assistance to affordable housing projects. Despite funding constraints resulting from the loss of Redevelopment Housing Funds, which previously generated approximately \$3 million annually for housing activities, the City remains dedicated to developing affordable housing. However, one of the primary challenges faced by Huntington Beach in this regard is the scarcity of vacant land suitable for residential development. Much of the underdeveloped residentially zoned land is owned by separate owners, making lot consolidation and the demolition of existing structures necessary to accommodate higher density infill development.

To address this challenge, the City has adopted alternative policy tools, such as the Amended Downtown and Beach and Edinger Corridors Specific Plans. These plans provide opportunities for high-density mixed-use and residential infill development, facilitating the creation of affordable housing units within the community. Through continued collaboration and innovative approaches, Huntington Beach aims to overcome barriers and enhance the availability of affordable housing for its residents.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

Through the administration of the CDBG and HOME programs, every effort is made to remove barriers to affordable housing through agreements with for-profit and non-profit affordable housing developers. These efforts also include working with neighborhood residents to ensure affordable housing projects are acceptable. Ongoing monitoring of "for sale" affordable units is conducted by department staff by assuring that the affordable housing covenants are recorded on title when the unit is sold. To address the decline in sources of housing funds, the City will continue to advocate for and pursue federal, state, local and private funding sources for affordable housing.

Additionally, as part of the City's Housing Element update, the City must assess and to the extent feasible, mitigate, its governmental constraints to housing for lower and moderate-income households and persons with disabilities. The Housing Element addresses the City's provisions for affordable housing, emergency shelters, transitional housing, and supportive housing. The following programs in the City's 2013-2021 Housing Element specifically address the variety of regulatory and financial tools used by the City to remove barriers and facilitate the provision of affordable housing:

Multi-family Acquisition/Rehabilitation through Non-Profit Developers: Acquire, rehabilitate, and establish affordability covenants on 80 rental units.

Residential and Mixed-Use Sites Inventory: Maintain current inventory of vacant and underutilized development sites and provide developers with information on incentives.

Beach and Edinger Corridors Specific Plan: Facilitate development through flexible, form-based standards and streamlined processing. Encourage affordable housing by requiring inclusionary units to be provided on-site, or within the Specific Plan, and providing additional incentives for increased percentages of affordable units.

Inclusionary Program and Housing Trust Fund: Continue implementation and re-evaluate Ordinance to provide consistency with case law and market conditions. Establish in-lieu fee amount for projects between 10-30 units.

Affordable Housing Development Assistance: Provide financial and regulatory assistance in support of affordable housing. Provide information on incentives to the development community.

Affordable Housing Density Bonus: Continue to offer density bonus incentives as a means of enhancing the economic feasibility of affordable housing development.

Development Fee Assistance: Continue to offer fee reductions to incentivize affordable housing. Specify the waiver of 100% of application processing fees in the Code for projects with 10% extremely low-income units.

Residential Processing Procedures: Provide non-discretionary development review within the Beach and Edinger Corridors Specific Plan. Adopt streamlined review procedures for multi-family development on a citywide basis.

AP-85 Other Actions – 91.220(k)

Actions planned to address obstacles to meeting underserved needs

The City of Huntington Beach has identified long-range strategies, activities, and funding sources to implement the goals in the areas of housing and community development services for the benefit of the residents.

- The City will continue to seek other resources and funding sources to address the biggest obstacle to meeting the community's underserved needs, which is the lack of funding and/or inadequate funding.
- The City will look for innovative and creative ways to make its delivery systems more comprehensive and will continue existing partnerships with both for-profit and not-forprofit organizations.
- The City will use HOME and CDBG funds to concentrate on both affordable rental housing, tenant-based rental housing, and homeowner rehabilitation programs.
- The City is currently addressing certain housing needs with federal funds, such as availability, condition, and fair housing practices to prevent homelessness.
- The City is also addressing community development needs with federal funds, such as infrastructure, improving public facilities and code enforcement.
- The City is working with surrounding jurisdictions on a regional approach to meeting the underserved needs.

Actions planned to foster and maintain affordable housing

The City's Consolidated Plan has identified the preservation of existing, and the creation of new, affordable housing as an implementing goal during the 2025/26-2029/30 timeframe. The City will continue to maintain the Affordable Housing Viewer on its website to allow the public to view where affordable housing units are located in the City.

The City will continue to offer funding to tenant based rental assistance programs in Huntington Beach through a combination of CDBG and HOME funds. In FY 2025/26, the City will allocate \$235,000 in CDBG and nearly \$528,841 in HOME funds to assist 36 households with rental assistance. The City will offer rental assistance to both eligible Huntington Beach renters, as well as to senior mobile home residents to help with increasing space rents in Huntington Beach's mobile home park communities.

Furthermore, the City will continue its residential rehabilitation programs available to Huntington Beach homeowners. The first program offers a one-time grant of up to \$20,000 to eligible lower-income homeowners to make emergency and health or safety-related household modifications. The second program offers a loan of up to \$75,000 with an interest rate of 3% for single family home and multifamily rental housing improvements. Collectively, the City is proposing to assist 12 lower-income households with rehabilitation assistance in FY 2025/26.

Lastly, to supplement the cost of the City's effort to update the streamlining process of affordable housing, the City may be awarded an SB 2 Planning Grant Program grant funds from the California Department of Housing and Community Development once the 2021-2029 Housing Element is certified. Huntington Beach is slated to receive approximately \$550,000 per year to leverage CDBG and HOME funds in the areas of affordable housing and homelessness.

Actions planned to reduce lead-based paint hazards

As a means of better protecting children and families against lead poisoning, in 1999 HUD instituted revised lead-based paint regulations focused around the following five activities:

- Notification
- Lead Hazard Evaluation
- Lead Hazard Reduction
- Ongoing Maintenance
- Response to Children with Environmental Intervention Blood Lead Level

The City has implemented HUD Lead Based Paint Regulations (Title X), which requires federally funded rehabilitation projects to address lead hazards. Lead-based paint abatement is part of the City's Residential Rehabilitation Program and the Acquisition/Rehabilitation of Affordable Rental Housing Program. Units within rental housing projects selected for rehabilitation are tested if not statutorily exempt. Elimination or encapsulation remedies are implemented if lead is detected and is paid for by either the developer of the project, or with CDBG or HOME funds, as appropriate.

Actions planned to reduce the number of poverty-level families

Huntington Beach has a strategy to help reduce poverty among local families and individuals. These programs work together to address both the immediate housing needs of low-income residents and the long-term economic self-sufficiency of vulnerable populations. Examples of the poverty reduction efforts include:

- Housing Choice Rental Assistance Program: Over 600 low and extremely low-income
 households in Huntington Beach participate in the Housing Choice Rental Assistance
 Voucher Program, which is administered by the Orange County Housing Authority
 (OCHA). This program directly supports poverty reduction by helping these households
 access affordable rental housing, thus easing financial strain and enabling them to
 allocate resources toward other basic needs, such as food, healthcare, and education.
- Tenant-Based Rental Assistance (TBRA) Programs: The City plans to utilize HOME funds
 to support three tenant-based rental assistance programs. These programs will provide
 direct rental subsidies to eligible low-income households, helping reduce the financial
 burden of housing costs and offering families a better chance at achieving long-term

- stability and upward mobility. The City's goal is to provide a total of 36 households with TBRA in FY 2025/26.
- Pathways to Independence Program: With CDBG funding, the City will support the
 Pathways to Independence program, which serves single women who are homeless or
 unstably housed. This program helps participants achieve economic self-sufficiency
 through education and personal development, providing a critical link between stable
 housing and the long-term reduction of poverty. By equipping individuals with the skills
 and support they need to succeed, the program contributes to breaking the cycle of
 homelessness and poverty. Pathways to Independence plans to enroll 40 women into
 their program in FY 2025/26.
- Affordable Housing Development: During the five-year period of the Consolidated Plan,
 the City will work to utilize HOME funds to gap finance an affordable housing project at a
 yet-to-be-determined location. The development of new affordable housing will directly
 address the need for affordable living spaces for low-income families and individuals,
 providing them with stable housing opportunities that can help reduce economic
 vulnerability and improve quality of life.

Actions planned to develop institutional structure

The City proposes to strengthen, coordinate and integrate the governmental institutions, non-profit and private delivery systems to implement the City's five-year strategy and to address the priority needs outlined in the Consolidated Plan for Fiscal Years 2025/26 – 2029/30. Engaging the community and stakeholders in the delivery of services and programs for the benefit of low to moderate residents will be vital in overcoming gaps in service delivery. The City will also utilize public notices, Community Workshops and Meetings (as appropriate), the City's website, and other forms of media to deliver information on carrying out the Consolidated Plan strategies.

Actions planned to enhance coordination between public and private housing and social service agencies

In an ongoing effort to bridge the gap of various programs and activities, the City has developed partnerships and collaborations with local service providers and City departments that have been instrumental in meeting the needs and demands of the homeless, low-income individuals and families, and other special needs. The array of partners include, but are not limited to: the Huntington Beach Police Department, Library Services, Community Services, and Public Works Departments; Mercy House, Families Forward, Colette's Children's Home, AMCAL, Orange County Community Housing Corporation, Jamboree Housing, National CORE, Community SeniorServ, Project Self Sufficiency, Alzheimer's Family Services, StandUp for Kids, Robyne's Nest, Project Hope Alliance, Pathways to Independence, the Fair Housing Foundation, the Orange County Housing Authority, 2-1-1 Orange County, and OC Community Services (Orange County Continuum of Care). During FY 2025/26, the City will continue to develop these partnerships.

PROGRAM SPECIFIC REQUIREMENTS

AP-90 Program Specific Requirements – 91.220(I)(1,2,4)

The City of Huntington Beach participates in HUD's CDBG Program that is used for creating decent affordable housing, suitable living environments, and economic opportunities. The program year (2025/26) will begin on July 1, 2025. The FY 2025/26 CDBG allocation of approximately \$1,121,195 will be used to implement CDBG projects and programs during the program year.

Community Development Block Grant Program (CDBG) Reference 24 CFR 91.220(I)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

\$0
\$0
\$0
\$0
\$0
\$0

Other CDBG Requirements

1. The amount of urgent need activities \$0

HOME Investment Partnership Program (HOME) Reference 24 CFR 91.220(I)(2)

A description of other forms of investment being used beyond those identified in Section 92.205 is as follows:

The City will provide grants, interest-bearing and non-interest-bearing deferred payment loans or residual receipts loans permitted under 24 CFR 92.206 (b) (1). The City will not institute other forms of investment forms not described in the aforementioned section nor provide loan guarantees described under 24 CFR 92.206 (b) (21).

A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:

The City is not administering a homebuyer program with CDBG or HOME funds as part of its 2025/26 Annual Action Plan. The Annual Plan, therefore, does not describe resale or recapture guidelines as required in 92.254.

A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds? See 24 CFR 92.254(a)(4) are as follows:

The City is not administering a homebuyer program with CDBG or HOME funds as part of its 2025/26 Annual Action Plan. The Annual Plan, therefore, does not describe resale or recapture guidelines that ensure the affordability of units acquired with HOME funds as required in 92.254 (a)(4).

Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:

The City is not proposing to use HOME funds to refinance existing debt secured by multifamily housing rehabilitated with HOME funds. Thus, since the City does not propose to undertake refinancing, the City is not required to discuss its financing guidelines required under 24 CFR 92.206(b).

2025-2029 ORANGE COUNTY REGIONAL ASSESSMENT OF FAIR HOUSING

Orange County Regional Assessment of Fair Housing 2025-2029

Acknowledgements

Special thanks to all individuals and organizations that contributed to the planning process, including, but not limited to, the following:

The individuals and organizations (including Equus Workforce Solutions, Project Hope Alliance, Alianza Translatinx, Human Options, Illumination Foundation, The Eli Home, The Cambodian Family, and Orange County Families Forward) who attended the in-person and virtual community meetings.

The organizations that participated in the stakeholder interviews and focus groups, including Fair Housing Council of Orange County, Fair Housing Foundation, Orange County Families Forward, Orange County United Way, Family Assistance Ministry, The HUB OC, National Core, NeighborWorks Orange County, Thomas House Family Shelter, Domus Development, Dayle McIntosh Center, CalOptima, and Assistance League of Orange County.

Staff from all jurisdictions that participated in the planning effort, with additional thanks to staff from:

- The Cities of Costa Mesa, La Habra, and Santa Ana, for hosting in-person community meetings.
- The County of Orange and the Cities of Anaheim, Aliso Viejo, Buena Park, Fountain Valley, Fullerton, Irvine, Laguna Niguel, Mission Viejo, San Clemente, Santa Ana, and Rancho Santa Margarita for advertising the in-person and virtual community meetings through various channels.
- The City of Santa Ana, which served as lead agency responsible for coordinating the development of this report.

Cover Photo Credit

The cover photograph for this report was provided courtesy of C&C Development. The photograph features *Terraces at Santiago* in the City of Santa Ana's Station District. *Terraces at Santiago* is an award-winning 36-unit urban infill transit-oriented multifamily affordable rental housing development featuring a mix of two-, three-, and five-bedroom apartments. In keeping with surrounding neighborhoods, this property was designed with Spanish/Santa Barbara architectural influences. Exterior detailing accents include wrought iron, decorative gables, wall sconces, decorative arches, decorative wood rafter rails, decorative painted wood shutters, and recessed stucco elements with wrought iron lattice. The building is LEED Gold Certified.

I. Executive Summary

The Assessment of Fair Housing (AFH) provides communities an opportunity to assess their progress toward the goals of eliminating housing discrimination and promoting access to housing opportunity for both current and future residents. Jurisdictions that receive funding from the U.S. Department of Housing and Urban Development (HUD), including Community Development Block Grant (CDBG), HOME Investment Partnerships Program (HOME), and Emergency Solutions Grant (ESG) funds, complete an AFH at least once every five years, consistent with the Consolidated Plan cycle, as part of their obligations under the Housing and Community Development Act of 1974 and the Cranston-Gonzalez National Affordable Housing Act.

As a fair housing planning document, the AFH facilitates HUD grantee compliance with statutory and regulatory requirements to affirmatively further fair housing. Affirmatively furthering fair housing entails taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. The duty to affirmatively further fair housing applies to all activities and programs within a jurisdiction related to housing and urban development.

This AFH is a collaborative effort among the following jurisdictions:

- Orange County and the Urban County Program participating cities of Brea, Cypress, Dana Point, La Palma, Laguna Beach, Laguna Hills, Laguna Woods, Los Alamitos, Placentia, San Juan Capistrano, Seal Beach, Stanton, Villa Park, and Yorba Linda.
- The HUD Entitlement Cities of Aliso Viejo, Anaheim, Buena Park, Costa Mesa, Fountain Valley, Fullerton, Garden Grove, Huntington Beach, Irvine, La Habra, Laguna Niguel, Lake Forest, Mission Viejo, Newport Beach, City of Orange, Rancho Santa Margarita, San Clemente, Santa Ana, Tustin, Westminster.

To prepare the AFH, jurisdictions first must identify fair housing issues. A fair housing issue refers to a condition within a specific geographic area that restricts fair housing choice or limits access to opportunity. Fair housing issues may include ongoing local or regional segregation/concentration or lack of integration, racially or ethnically concentrated areas of poverty, disparities in access to opportunity, disproportionate housing needs, and evidence of discrimination or violations of civil rights law or regulations related to housing. To identify fair housing issues, HUD recommends that jurisdictions gather and analyze data. For this AFH, the jurisdictions analyzed data on the following topics:

- Demographics
- Segregation or Concentration/Integration
- Racially and/or Ethnically Concentrated Areas of Poverty
- Disparities in Access to Opportunity

- Housing Needs
- Discrimination Complaints

The data utilized in the analysis are from the U.S. Census Bureau American Community Survey (ACS), HUD's AFFH Data and Mapping Tool, the California Department of Housing and Community Development (HCD) AFFH Data Viewer 2.0, housing discrimination complaint data provided by HUD's Office of Fair Housing and Equal Opportunity (FHEO), and information gathered through the community participation process (described below). The ACS data utilized in the assessment are from the 2018-2022 five-year estimates, which were the most current data across all participating jurisdictions at the time the analysis was conducted.

After analyzing the data and identifying fair housing issues, jurisdictions then must identify contributing factors. A contributing factor is any condition that creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. For each fair housing issue and its contributing factors, jurisdictions must then develop fair housing goals. A fair housing goal is a specific, meaningful action that can reasonably be expected to create meaningful positive change that affirmatively furthers fair housing by increasing fair housing choice or reducing disparities in access to opportunity.

For the contributing factors and fair housing goals in this AFH, the jurisdictions built upon the extensive work they have already done preparing their most recent Housing Elements, which cover an eight-year planning period. As part of the state-mandated Housing Element, California jurisdictions must conduct a fair housing assessment that includes an analysis of fair housing issues, identification of factors that create and/or contribute to those issues, and development of goals and meaningful actions to affirmatively further fair housing. Progress toward reaching the goals identified in the Housing Element must then be periodically reported to the state.

A summary of the fair housing issues, significant contributing factors, and fair housing goals for each jurisdiction can be found in **Section IV** of this AFH.

II. Community Participation Process

To develop the AFH, information was also gathered from residents, housing professionals, and service providers. Incorporating information from these sources is important for ensuring that the AFH reflects community needs and knowledge that may not be discernible from other data sources. The community participation process for this AFH involved the following efforts:

A. Stakeholder Consultation

Four one-on-one interviews, and two focus groups were conducted during January and February 2025 with organizations that provide fair housing services and/or housing and services to protected class groups throughout the County. The interviews and focus group sessions discussed the fair housing issues frequently encountered by the organizations, the underlying causes for those issues, and ongoing efforts currently to address them. Participants also discussed additional actions their organizations would recommend. Invitations to participate in the stakeholder consultation activities were sent to approximately 78 organizations identified by the jurisdictions involved in the planning process. Fourteen organizations, as well as staff from two of the participating jurisdictions, participated in these consultations, including: Fair Housing Council of Orange County, Fair Housing Foundation, Orange County Families Forward, Orange County United Way, Family Assistance Ministry, The HUB OC, National Core, NeighborWorks Orange County, Thomas House Family Shelter, Domus Development, City of Garden Grove, City of Lake Forest, Dayle McIntosh Center, CalOptima, and Assistance League of Orange County. Information gathered through these consultations is incorporated throughout this report.

B. Community Meetings

A total of six community meetings were held in March 2025 to gather public input on the fair housing issues impacting residents of Orange County, and the factors that create, contribute to, perpetuate, or increase the severity of those issues. These meetings included two virtual meetings and four in-person meetings held at the dates, times, and locations listed below.

In-person community meetings:

- March 5, 2025, from 10:30 a.m. 11:30 a.m. at Santa Ana City Council Chamber, 22 Civic Center Plaza, Santa Ana, CA 92701
- March 5, 2025, from 6:30 p.m. 7:30 p.m. at Santa Ana City Council Chamber, 22 Civic Center Plaza, Santa Ana, CA 92701
- March 6, 2025, from 10:30 a.m. 11:30 a.m. at La Habra City Hall, Festival Room, 110
 E. La Habra Boulevard, La Habra, CA 90631

March 6, 2025, from 6:30 p.m. – 7:30 p.m. at Costa Mesa City Hall, Community Room,
 77 Fair Drive, Costa Mesa, CA 92626

Virtual community meetings:

- March 7, 2025, at 6:00 p.m., via Microsoft Teams
- March 13, 2025, at 1:00 p.m., via Microsoft Teams

Outreach to advertise the community meetings included the following efforts:

- City of Anaheim notified the 250 members of their Homeless Collaborative and community stakeholders.
- City of Aliso Viejo posted a copy of the notice to their City website and shared on social media and city newsletters.
- City of Buena Park posted the public notice on the City website and City Hall bulletin board.
- City of Fountain Valley posted the public notice on the City website
- City of Fullerton published the public notice in the Fullerton Observer newspaper, placed the notice on the City of Fullerton website, and placed copies of the notice at various public facilities and libraries as well as over 25 affordable housing sites.
- City of Irvine sent copies of the notice to subrecipient partners and other interested parties.
- City of Laguna Niguel posted the public notice on the City website and social media channels.
- City of Mission Viejo posted the public notice on the City website.
- City of San Clemente posted the public notice on the City website.
- City of Santa Ana published the public notice for the public meetings in six languages (English, Spanish, Vietnamese, Korean, Chinese, and Arabic) including the following publications: Orange County Register, La Opinion, Nguoi Viet Daily News, Korea Times, World Journal, and Beirut Times.
- City of Rancho Santa Margarita posted the public notice on bulletin boards outside
 City Hall, OCFA Station 45, and Trabuco Canyon Water District.
- County of Orange sent information regarding the virtual community meetings to community centers in the unincorporated areas of the County.

A total of fifteen individuals participated in these meetings to share their knowledge on fair housing issues and contributing factors in Orange County. These included representatives from the following organizations: Equus Workforce Solutions, Project Hope Alliance, Alianza Translatinx, Human Options, Illumination Foundation, The Eli Home, The Cambodian Family, Orange County Families Forward, City of Fountain Valley, and City of Buena Park. Information gathered through these meetings is incorporated throughout this report.

III. Fair Housing Analysis

A. Demographic and Housing Summary

Table 1 – Demographics, shows demographic information for the population of Orange County overall, the Orange County Urban County jurisdictions¹, the participating HUD Entitlement Cities, and the region². These data are from the Census Bureau's 2018-2022 American Community Survey 5-year Estimates. Table 2 – Demographic Trends, shows similar data over time, dating back to 1990. These tables indicate the following:

Population

Orange County has a population of 3,175,227. The largest cities in the County are Anaheim (population 347,111), Santa Ana (population 311,379), and Irvine (population 304,527). The Urban County population is 585,178.

Race/Ethnicity

Orange County's population is majority-minority; however, the largest population group is White (38.46%). Hispanic residents comprise the second largest population group (33.93%), followed by Asian American and Pacific Islanders (AAPI), who make up 21.77% of the County population. African Americans account for 1.54% of the County population.

Compared to the region, Orange County has a higher proportion of White and AAPI residents, and a smaller proportion of Hispanic and Black residents.

Among the participating HUD Entitlement Cities, in comparison to the County overall:

- The Urban County, Aliso Viejo, Costa Mesa, Huntington Beach, Laguna Niguel, Lake Forest, Mission Viejo, Newport Beach, Rancho Santa Margarita, and San Clemente have a significantly higher.³ proportion of White residents.
- Anaheim, La Habra, and Santa Ana have a significantly higher proportion of Hispanic residents.
- Buena Park, Fountain Valley, Garden Grove, Irvine, and Westminster have a higher proportion of AAPI residents.

Since 1990, the County population has become more diverse, transitioning from a White majority in 1990 to a majority-minority population today. The number of White residents in

_

¹ The Orange County Urban County comprises the County unincorporated area, twelve (12) cities with populations under 50,000 (participating cities) and two (2) cities, Placentia and Yorba Linda, with populations over 50,000 (metropolitan cities).

²The region is defined by HUD as the Los Angeles-Long Beach-Anaheim Metropolitan Statistical Area (MSA), which comprises Los Angeles and Orange counties.

³ For this analysis, "significantly higher" means that the percentage of residents of a particular race/ethnicity in a city is at least 10% higher than the percentage of residents of the same race/ethnicity in the County overall.

the County declined each decade, while the number of Hispanic and AAPI residents grew. The number of Black residents increased between 1990-2010 but declined over the past decade. These same trends are generally shared with the region and across the Urban County and HUD Entitlement Cities, with the following exceptions:

- In the region, the Black population has been declining since 2000.
- In Aliso Viejo, the population of all racial/ethnic groups, including White, has increased in each decade.
- In Costa Mesa, Garden Grove, Huntington Beach, and Newport Beach, the AAPI population has declined over the last decade.
- In Fountain Valley and Garden Grove, the Black population has been declining since 2000.
- In Irvine, the White and Black populations have been increasing since 2000, in addition to growing Hispanic and AAPI populations.
- In La Habra, the Black population continued to grow after 2010.
- In Laguna Niguel and Lake Forest, the White population increased during the 1990s before declining over the subsequent decades, and the Black population has continued to grow over the last decade.
- In Rancho Santa Margarita, the White population increased during the 1990s before declining over the last two decades.
- In San Clemente, the White population grew between 1990-2010, before shrinking slightly over the last decade; and the AAPI population fell over the last decade.
- In Santa Ana, the Black population has been falling since 1990, and the Hispanic population has been declining since 2000.
- In Tustin, the Black population has been declining since 1990.

National Origin

Orange County has a foreign-born population of 937,254 (29.52% of the total population.⁴). The primary countries of origin for the foreign-born population are Mexico (9.17%) and Vietnam (4.69%).

In the region, 32.52% of the population is foreign born, which is slightly higher than in Orange County.

Among the participating HUD Entitlement Cities, in comparison to the County overall:

 Huntington Beach, Laguna Niguel, Newport Beach, Orange, and San Clemente have significantly lower percentages of foreign-born residents.

Orange County 7 25-29 Regional AFH

⁴ Source: U.S Census Bureau, 2018-2022 American Community Survey 5-Year Estimates, Table B05006

- Garden Grove, Irvine, Santa Ana, and Westminster have significantly higher percentages of foreign-born residents. In these cities, the main countries of origin for the foreign-born population are:
 - Garden Grove: Vietnam and Mexico
 - o Irvine: China (excluding Taiwan), Korea, and India
 - Santa Ana: Mexico and Vietnam
 - Westminster: Vietnam and Mexico

Since 1990, the County's foreign-born population has increased in each decade, with the most dramatic increase occurring during the 1990s. In comparison,

- The foreign-born population in the region grew between 1990-2010 and has been declining since 2010.
- The foreign-born population has declined in the following jurisdictions:
 - The Urban County, Anaheim, La Habra, Orange, and San Clemente, where the foreign-born population has been declining since 2010.
 - Costa Mesa and Santa Ana, where the foreign-born population has been declining since 2000. However, in Santa Ana, foreign-born residents still make up approximately half of the total population.
- In Irvine, the foreign-born population has continued to grow rapidly, nearly doubling since 2010.

Limited English Proficiency

Individuals who have Limited English Proficiency (LEP) are those who primarily speak a language other than English and speak English "less than very well." In Orange County, there are 539,484 LEP individuals⁵, which is equal to approximately 16.99% of the population. The primary languages spoken by the LEP population in the County are Spanish (11.72%) and Vietnamese (3.45%).

In the region, 21.95% of the population is LEP, which is slightly higher than in Orange County.

Among the participating HUD Entitlement Cities, in comparison to the County overall:

- Aliso Viejo, Newport Beach, and San Clemente, have significantly lower percentages of LEP residents.
- Anaheim, Buena Park, Garden Grove, Santa Ana, and Westminster have significantly higher percentages of LEP residents. In these cities, the primary languages spoken by the LEP population are:
 - o Anaheim: Spanish and Vietnamese

⁵ Source: U.S Census Bureau, 2018-2022 American Community Survey 5-Year Estimates, Table S1601

- o Buena Park: Spanish and Korean
- o Garden Grove: Vietnamese and Spanish
- Santa Ana: Spanish and Vietnamese
- Westminster: Vietnamese and Spanish

Between 1990-2010, the County's LEP population increased. Since 2010, the County's LEP population has declined, though it remains well above the 1990 LEP population. In comparison:

- The LEP population in the region grew during the 1990s but has been declining since 2000.
- The LEP population has grown each decade since 1990, including since 2010, in the Urban County jurisdictions, Aliso Viejo, Fountain Valley, Irvine, Laguna Niguel, Lake Forest, Mission Viejo, Rancho Santa Margarita, and Westminster.
- The LEP population has been declining since 2000 in Anaheim, Costa Mesa, Huntington Beach, and Santa Ana.
- In Garden Grove, Newport Beach, and San Clemente, the LEP population declined between 2000-2010, but has increased since 2010.

Age

Approximately 63.2% of the Orange County population is between the ages of 18 and 64; 15.38% are aged 65 and older, and 21.42% are younger than 18. The age distribution of the population in the region is similar. In comparison to the County overall, the Urban County, Laguna Niguel, Mission Viejo, and Newport Beach all have slightly older populations, with over one-fifth of their population aged 65 and older.

Since 1990, the County's population has been getting older. Currently, the County's population has a smaller proportion of the population (when compared to 1990) in both the "Under 18" and "18-64" year-old age categories, and a higher proportion of the population in the "65+" age category. The same general trend is evident in the region and all other jurisdictions, except for Aliso Viejo, where the percentage of the population under age 18 has increased, and the percentage of the population aged 65 and older has decreased, since 1990.

Families with Children

In Orange County, approximately 41.56% of families have children. This is slightly higher than the region, where 40.02% of families have children. Among the participating HUD Entitlement Cities, in comparison to the County overall:

 Aliso Viejo and Tustin have significantly higher percentages of families with children (52.06% and 52.64%, respectively), and in Irvine, over half (50.45%) of families have children. Laguna Niguel, Huntington Beach, Newport Beach, and Westminster have the lowest percentages of families with children, although the percentages are not significantly lower than those for the County overall.

The percentage of families with children in the County is lower today than it was in 1990, when 48.04% of families had children. This is also true in the region and the other jurisdictions, with the following exceptions:

• Aliso Viejo, Newport Beach, and Tustin, where the current percentage of families with children is higher than it was in 1990.

Note 1: All % represent a share of the total population within the jurisdiction or region, except family type, which is out of total families.

Note 2: 10 most populous places of birth and languages at the jurisdiction level may not be the same as the 10 most populous at the the Region level, and are thus labeled separately.

Note 3: Data Sources: U.S. Census Bureau, 2018-2022 American Community Survey-S'vear Estimates; HIOD AFFH TOD, Table 2, Version AFFHT0006, Released July 10, 2020.

Note 4: Refer to the Data Documentation for details (www.hudexchange.info/resource/4848/affh-data-documentation).

Note 1: All % represent a share of the total population within the jurisdiction or region, except family type, which is out of total families.

Note 2: 10 most populous places of birth and languages at the jurisdiction level may not be the same as the 10 most populous at the the Region level, and are thus labeled separately.

Note 3: Data Sources: U.S. Census Bureau, 2018-2022 American Community Survey-S'vear Estimates; HIOD AFFH TOD, Table 2, Version AFFHT0006, Released July 10, 2020.

Note 4: Refer to the Data Documentation for details (www.hudexchange.info/resource/4848/affh-data-documentation).

Note 1: All % represent a share of the total population within the jurisdiction or region, except family type, which is out of total families.

Note 2: 10 most populous places of birth and languages at the jurisdiction level may not be the same as the 10 most populous at the the Region level, and are thus labeled separately.

Note 3: Data Sources: U.S. Census Bureau, 2018-2022 American Community Survey-S'vear Estimates; HIOD AFFH TOD, Table 2, Version AFFHT0006, Released July 10, 2020.

Note 4: Refer to the Data Documentation for details (www.hudexchange.info/resource/4848/affh-data-documentation).

The following paragraphs describe housing patterns, including tenure, cost burden, and the location of renters and owners.

Tenure

Table 3 - Housing Tenure, shows data on housing tenure for the region, Orange County, the Orange County Urban County jurisdictions, and each HUD Entitlement City. These data are from the 2018-2022 American Community Survey 5-Year Estimates. This table indicates the following:

In Orange County overall, the homeownership rate is 56.5%. This is higher than the homeownership for the region, which is 48.7%. Among the jurisdictions,

- The following have a comparable homeownership rate (within five percentage points of the County's rate)
 - o Aliso Viejo
 - Buena Park
 - Fullerton
 - o Garden Grove
 - Huntington Beach
 - La Habra
 - Newport Beach
 - o Orange
 - Westminster
- The following jurisdictions have a homeownership rate that is **lower** than the homeownership rate for the County overall by at least five percentage points, indicating a higher percentage of households are renters:
 - Anaheim
 - o Costa Mesa
 - o Irvine
 - o Santa Ana
 - Tustin
- The following jurisdictions have a homeownership rate that is **higher** than the County overall by at least five percentage points:
 - The Urban County jurisdictions
 - Fountain Valley
 - Laguna Niguel
 - Lake Forest
 - o Mission Viejo
 - o Rancho Santa Margarita
 - o San Clemente

Cost Burden

Table 4 – Cost Burden shows data on housing cost burden for the region, Orange County, the Orange County Urban County, and each HUD Entitlement City. These data are from the 2018-2022 American Community Survey 5-Year Estimates. Cost burden is defined as spending more than 30% of monthly gross income on housing-related costs. This table presents the following:

In Orange County overall, over half (53.2%) of all renters are cost burdened. The rate is significantly lower for homeowners (30.3%). These rates are comparable to the experience of owners and renters across the region. Among the jurisdictions,

- The following have a comparable rate of cost burdened renters (within five percentage points of the County's rate)
 - The Urban County jurisdictions
 - Aliso Viejo
 - Buena Park
 - o Costa Mesa
 - Fullerton
 - o Garden Grove
 - Huntington Beach
 - o Irvine
 - Laguna Niguel
 - o La Habra
 - Mission Viejo
 - Orange
 - Rancho Santa Margarita
 - o Santa Ana
 - Westminster
- The following jurisdictions have a renter cost-burden rate that is **lower** than the rate for the County overall by at least five percentage points:
 - Newport Beach
 - San Clemente
- The following jurisdictions have a renter cost-burden rate that is higher than the rate
 for the County overall, by at least five percentage points, meaning a higher
 percentage of renters in these jurisdictions are cost burdened compared to the
 County overall:
 - Anaheim
 - Fountain Valley
 - Lake Forest
 - o Tustin

Location of Renters and Owners

Map 1 – Housing Tenure. is a series of maps showing the distribution of renter households in the region, and in northern, central, and southern Orange County. These maps were produced by California HCD to facilitate the fair housing planning process. On the maps, the darker shaded areas have a higher proportion of renter households. These maps reflect the following:

• In Orange County overall, renters are concentrated in the north, west, and central parts of the County. Moving east and south from the border with Los Angeles County, a higher percentage of housing units are owner-occupied.

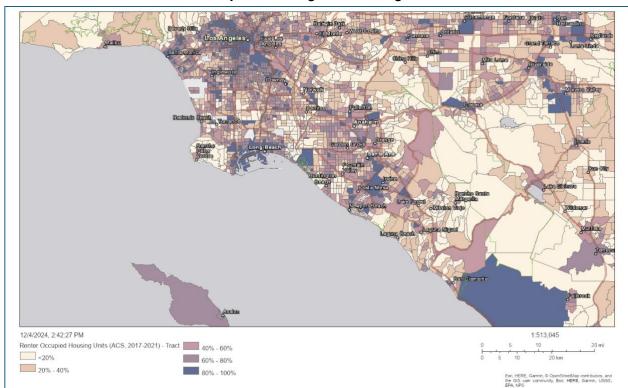

Within the participating jurisdictions, there are concentrations of renter-occupied and owner-occupied housing in the following areas:

- In the Orange County Urban County jurisdictions there are relatively few areas with a high percentage of renter households, with the exceptions of Placentia, which has high concentrations of renter households in the southwest corner of the city and in parts of the city near CSU-Fullerton; and Los Alamitos, which has a high concentration of renters in the neighborhood north of Joint Forces Training Base Los Alamitos and west of Lexington Drive. Conversely, there are various parts of the Urban County jurisdictions with relatively high concentrations of owner households, including Yorba Linda and the unincorporated area to the east of Yorba Linda, North Tustin, Seal Beach (outside the Naval Weapons Station), Rossmoor, Villa Park, Orange Park Acres, and Northwest Brea.
- In Aliso Viejo there is a relatively high percentage of renter households south of SR-73 between Aliso Viejo Parkway and Woodfield Park, and a relatively high percentage of owner households along the southern and western edges of city, south of SR-73 and west of Pacific Park Drive and Wood Canyon Drive.
- In Anaheim there are relatively high percentages of renter households in the Census Tracts north of SR-91 in Northeast Anaheim; between the Convention Center and I-5, and around Angel Stadium, in the southeastern part of the city; and in the Census Tract south of I-5 bounded by Lincoln Avenue and Brookhurst Street, in the northwestern part of the city. There is a relatively high percentage of owner households in Anaheim Hills.
- In Buena Park there is a relatively high percentage of renters in the Census Tracts just north of I-5.

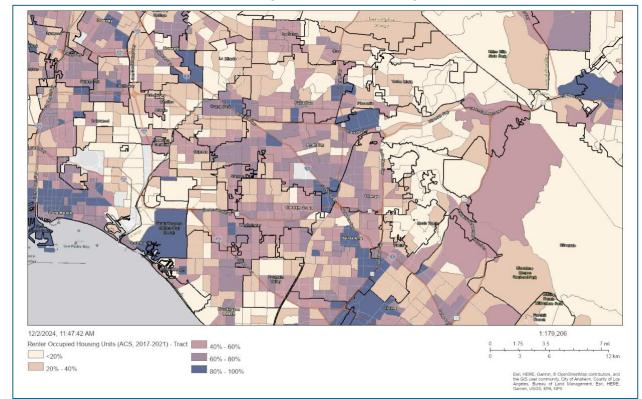

⁶ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

- In Costa Mesa there are relatively high concentrations of renter households north of SR-55 in the downtown area, and west of Orange Coast College; and there is a relatively high percentage of owner households north of Adams Avenue.
- In Fountain Valley there are relatively high percentages of owner households in the neighborhoods south of Talbert Avenue and west of Brookhurst Street, and in the neighborhood just to the west of Mile Square Regional Park.
- In Fullerton there are relatively high percentages of renter households in and around CSU Fullerton and along Highland Ave between SR-91 and Orangethorpe Avenue (adjacent to the Fullerton Metrocenter shopping mall); and there are relatively high percentages of owner households in Census Tracts between CSU Fullerton and Brea Boulevard, and between Harbor Boulevard and the Robert E. Ward Nature Preserve.
- In Garden Grove, there is a relatively high percentage of owner households in West Garden Grove, compared to the rest of the city.
- In Huntington Beach there are high percentages of owner households in the eastern half of the city, as well as in the area surrounding the Huntington Club country club.
- In Irvine there are relatively high percentages of renter households in the southwestern part of the city—specifically in the Census Tracts west of Harvard Ave, around San Remo Park, and north of UC Irvine in University Town Center; and near the I-5/I-405 interchange—specifically in the Census Tracts encompassing the Irvine Medical and Science Complex, the Irvine Spectrum Center, and East Irvine.
- In La Habra there are a relatively high percentage of owner households in the neighborhoods south of SR-90 and west of Euclid St.
- In Laguna Niguel there are relatively high percentages of owner households in the southeast corner of the city (bordering San Juan Capistrano and Dana Point), adjacent to the El Niguel County Club, and in the neighborhoods between Crown Valley Pkwy and Alicia Pkwy.
- In Lake Forest there are relatively high percentages of owner households in the northeast of the city (to the north of SR-24) and in the southwest of the city (south of Trabuco Rd and west of Ridge Route Dr).
- In Mission Viejo there are relatively high percentages of owner households throughout the city, with some renters located in the southern part of the city.
- In Newport Beach there is a relatively high percentage of owner households in the Newport Coast community, and a relatively high percentage of renters around the Newport Beach Country Club.
- In the City of Orange there are relatively high percentages of renter households in the southwestern corner of the city, west of SR-57 and I-5, and relatively high percentages of owner households in the eastern half of the city.
- In Rancho Santa Margarita there is a relatively high percentage of owner households throughout the city, with some renters located in the neighborhoods just to the east of SR-241 between Antonio Pkwy and Santa Margarita Pkwy.

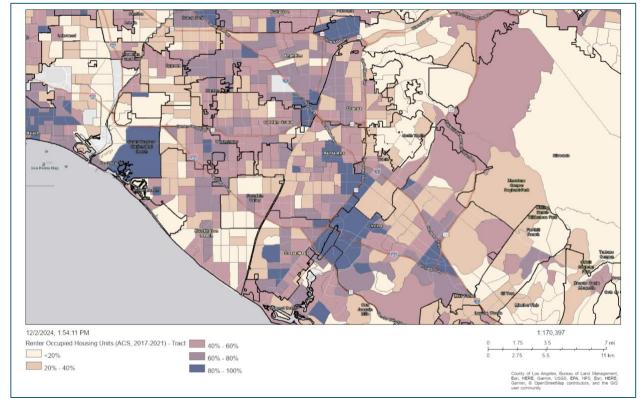

- In San Clemente there is a relatively high percentage of renter households in the neighborhoods south of Max Berg Plaza Park, and relatively high percentages of homeowners in a number of neighborhoods to the north and northwest.
- In Santa Ana there are relatively high percentages of renter households in the downtown area and in the neighborhoods southeast of downtown.
- In Tustin there are relatively high percentages of renter households in the neighborhoods adjacent to SR-55 south of I-5, and relatively high percentages of owner households in the northeast part of the city.
- In Westminster there are relatively high percentages of renters in the neighborhoods just north and south of Westminster Blvd between Hoover St. and Beach Blvd.

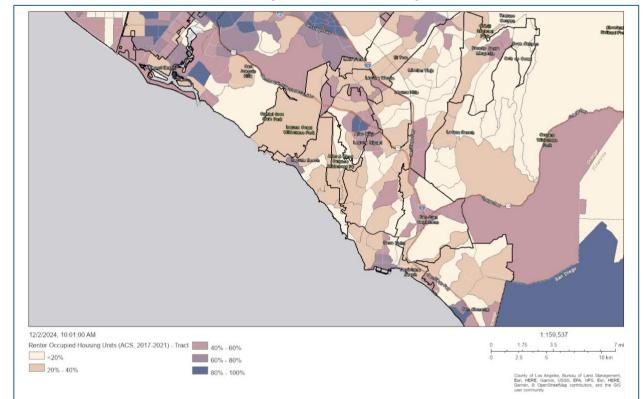

Map 1 - Housing Tenure - Region

Map 1 – Housing Tenure – North Orange County

Map 1 – Housing Tenure – Central Orange County

Map 1 – Housing Tenure – South Orange County

The following analysis describes the demographics of residents of publicly supported housing.

Table 5 – Publicly Supported Households by Race/Ethnicity, provides the demographics of residents of different types of publicly support housing programs, including Public Housing, Project-Based Section 8, Other Multifamily, and the Housing Choice Voucher (HCV) Program. This table shows that, in Orange County:

- The majority of publicly supported housing is provided through the HCV Program (over 20,000 households with HCVs countywide). Additionally, there are approximately 4,000 units in Project-based Section 8 properties and approximately 100 units in Other Multifamily properties. There are no Public Housing units in the County.
- A significant portion of households with HCVs are headed by an AAPI individual (41.16%), followed by households headed by a White individual (25.32%), then Hispanic-headed households (21.12%), and then Black households (7.06%).
- Project-based Section 8 units have a similar racial composition to the HCV Program overall; however, the percentages of households headed by AAPI and White individuals are higher (47.11% and 33.06% respectively), and households headed by Hispanic and Black individuals are lower (15.19% and 1.77% respectively).

Within the participating jurisdictions, the racial/ethnic composition of publicly supported housing units varies:

- In the Orange County Urban County jurisdictions, the racial/ethnic composition of households in the HCV Program and in Project-based Section 8 units matches the County overall, with the one exception being that the number of AAPI and White households in Project-based Section 8 units are equal (each comprise 36.75% of those units).
- In Aliso Viejo, the only publicly supported housing available is through the HCV Program. Two-thirds of households using HCVs in the city are White.
- In Anaheim, there are Project-based Section 8 developments in addition to households using HCVs. In the Project-based Section 8 units, the majority of households are AAPI. In the HCV Program, Hispanic households make up the largest single group of voucher recipients, followed by AAPI and White households.
- In Buena Park, the overwhelming majority of households in Project-based Section 8
 units are AAPI. In the HCV Program, approximately one-third of households are
 Hispanic, 25% AAPI, 25% White, and nearly one-fifth of households are Black.
- In Costa Mesa, the majority of households in both Project-based Section 8 housing and the HCV Program are White, and there are no Black households in Project-based Section 8 units.

- In Fountain Valley, the majority of households in both Project-based Section 8 housing and the HCV Program are AAPI, and there are no Black households in Project-based Section 8 units.
- In Fullerton, nearly all of the households in Project-based Section 8 units are AAPI
 and the majority of households in Other Multifamily program units are White. In the
 HCV Program, White and Hispanic families each make up approximately one-third
 of households, and Black and AAPI families each make up approximately 14% of
 households.
- In Garden Grove, a large majority of households in both Project-based Section 8 housing and the HCV Program are AAPI (over 80% in each program).
- In Huntington Beach, over 50% of households in Project-based Section 8 units are AAPI and around one-third are White. In the HCV Program, over 40% of households are White and around one-third are AAPI.
- In Irvine, White households are the majority in Project-based Section 8 and Other Multifamily program units and are the largest share of households in the HCV Program (46.76%). In the HCV Program, Black households are the second largest racial/ethnic group, comprising approximately one-fifth of households.
- In La Habra, Hispanic households are the majority of HCV Program participants. The second largest racial/ethnic group is White households, who comprise 25% of households in the program. In Project-based Section 8 units, Hispanic, White, and AAPI each comprise approximately one-third of households.
- In Laguna Niguel, the majority of households in both Project-based Section 8 housing and the HCV Program are White.
- In Lake Forest, the majority of households in the HCV Program are White. There are no other types of publicly supported housing in the city.
- In Mission Viejo, the majority of households in the HCV Program are White. There are no other types of publicly supported housing included in the HUD-provided data. (However, per the City's Housing Element and other local sources, there are various publicly supported housing developments in the city.)
- In Newport Beach, the majority of households in both Project-based Section 8 housing and the HCV Program are White.
- In Orange, White and Hispanic households each comprise a slightly more than 40% of households in Project-based Section 8 units, and approximately one-third of households in the HCV Program. AAPI households make up around 25% of households in the HCV Program.
- In Rancho Santa Margarita, the majority of households in the HCV Program are White. There are no other types of publicly supported housing in the city.
- In San Clemente, the majority of households in both Project-based Section 8 housing and the HCV Program are White.

- In Santa Ana, the majority of households in Project-based Section 8 units and in the HCV Program are AAPI. The second largest racial/ethnic group in each of these programs is Hispanic households.
- In Tustin, the majority of households in Project-based Section 8 units are AAPI (over 70%) and approximately one-fifth are White. In the HCV Program, Hispanic households are the largest group (38%), followed by White households (33%).
- In Westminster, AAPI households are the majority in both Project-based Section 8 units and in the HCV Program.

B. Segregation/Concentration and Integration

The following analysis describes segregation/concentration levels, identifies the racial/ethnic groups that experience the highest levels of segregation/concentration, and explains how these levels and patterns have changed over time.

Table 6 – Racial/Ethnic Dissimilarity Trends, displays how segregated/concentrated or integrated various racial/ethnic groups are in the region, the Orange County Urban County, and the HUD Entitlement Cities using a Dissimilarity Index, which is calculated using data from the 2010 Decennial Census. The Dissimilarity Index measures the degree to which two groups are evenly distributed across a geographic area and is commonly used for assessing residential segregation/integration between two groups. Dissimilarity index values indicate the following:

- Values between 0 and 39 generally indicate high integration (low segregation/concentration)
- Values between 40 and 54 generally indicate moderate segregation/concentration
- Values between 55 and 100 generally indicate a high level of segregation/concentration

Please note two key shortcomings of these data:

- The data only measure segregation between Black and White, Hispanic, and White, and AAPI and White residents. As a result, no conclusions can be drawn regarding segregation among Black, Hispanic, and AAPI residents.
- 2. The data measure segregation only within each jurisdiction and do provide insights into racial/ethnic segregation across jurisdictional boundaries.

Table 6 shows that, in the region, there are high levels of segregation between Black and White residents and between Hispanic and White residents, and there is moderate segregation between AAPI and White residents. Since 1990, segregation between Black and White residents has declined, while segregation between Hispanic/White and AAPI/White has increased.

In Orange County the following jurisdictions are highly integrated, indicating low levels of segregation/concentration among the groups analyzed:

- The Urban County jurisdictions While segregation levels are higher compared to 1990, they have trended downward since 2000 for Black/White and Hispanic/White residents.
- Aliso Viejo Since 1990, concentrations of Hispanic and AAPI residents have been increasing but remain low.

- Anaheim Segregation levels between Black/White and AAPI/White have been increasing since 1990. Segregation level between Hispanic/White were high in 2000 but have since declined.
- Buena Park Segregation levels have increased since 1990 but remain low.
- Fountain Valley Since 1990, segregation levels between Hispanic/White and between AAPI/White have been increasing but remain low.
- Fullerton Segregation level between AAPI/White is increasing but remains low.
- Garden Grove Segregation levels have increased since 1990 but remain low.
- Huntington Beach Segregation level between Black/White increased between 2000-2010 but remains low.
- Irvine Segregation levels between the groups analyzed decreased between 2000-2010.
- La Habra Since 1990, segregation between Black/White residents has increased, though remains low, and segregation between Hispanic/White and between AAPI/White has decreased.
- Laguna Niguel Between 1990-2010, concentrations of Black and Hispanic residents increased, though remain low.
- Lake Forest Between 1990-2010, segregation between Hispanic/White and between AAPI/White increased, though remains low.
- Mission Viejo Between 1990-2010, concentration of Hispanic residents increased, though remains low.
- Newport Beach Between 1990-2010, segregation between Hispanic/White and between AAPI/White increased, though remains low.
- Orange Between 1990-2010, segregation between AAPI/White increased, though remains low.
- Rancho Santa Margarita Concentration by race/ethnic group has increased since 1990 but remains low.
- Westminster Segregation levels have increased since 1990 but remain low.

In Orange County the following jurisdictions have moderate levels of segregation between at least two of the racial groups analyzed (no jurisdictions in the County have high levels of segregation):

- Costa Mesa There is moderate segregation between Hispanic and White residents. Segregation levels declined slightly between 2000-2010 but remain moderate.
- Santa Ana There is moderate segregation between Hispanic and White residents, and between AAPI and White. Segregation levels between Hispanic/White residents declined slightly between 2000-2010 but remain moderate. Since 1990, segregation between AAPI/White residents has increased.
- Tustin There is moderate segregation between Hispanic and White residents. Segregation levels declined between 2000-2010 but remain moderate.

The following analysis identifies areas with relatively high segregation/concentration and integration and indicates the predominant groups living in each area.

Race/Ethnicity

Map 2 – Racial/Ethnic Concentration, is a series of maps showing racial/ethnic concentrations in the region, and in northern, central, and southern Orange County. These maps are published by California HCD using methodology from the Othering & Belonging Institute, which combines various measures of segregation and integration (including a dissimilarity index), and uses data from 2020. On these maps, dark red indicates areas where people of color (POC) experience high levels of segregation/concentration; green indicates areas where White residents experience high levels of segregation/concentration; yellow indicates areas that are racially/ethnically integrated.

Map 3 – Predominant Population by Race/Ethnicity, is a series of maps showing the predominant racial/ethnic group by Census Tract in the region, and in northern, central, and southern Orange County. The colors indicate different racial/ethnic groups, and the relative strength of the shading indicates the extent to which one group is dominant over the next most populous group (with darker shading indicating a higher concentration of that racial/ethnic group). These maps were created by California HCD using 2017-2021 ACS data, to facilitate fair housing planning.⁷

Collectively, the maps illustrate that in Orange County overall, there are areas of high POC segregation/concentration in the central and northern parts of the County (including the cities of Santa Ana, Westminster, Garden Grove, Anaheim, and Fullerton), and there are areas of high White segregation/concentration along the entire coast (including Seal Beach, Huntington Beach, Newport Beach, Laguna Beach, Dana Paint, Capistrano Beach, and San Clemente) and in the southern part of the County (including Mission Viejo, Aliso Viejo, Laguna Niguel, and Rancho Santa Margarita).

Within each participating jurisdiction, there are areas of high segregation/integration in the following locations:

- In the Orange County Urban County jurisdictions,
 - There are areas of high White segregation in Dana Point, Laguna Beach, Laguna Hills, Laguna Woods, the unincorporated areas east of Rancho Santa Margarita, North Tustin, Seal Beach, Yorba Linda, northern Placentia, Villa Park, and Orange Park Acres.
 - There are areas of high POC segregation in Stanton (which are predominantly Hispanic or AAPI), Cypress (which are predominantly AAPI), northern Yorba

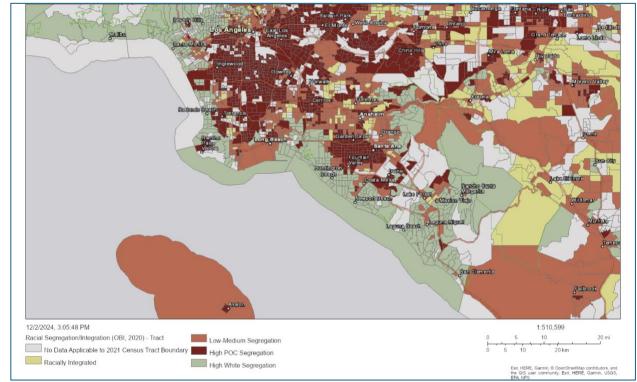

_

⁷ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

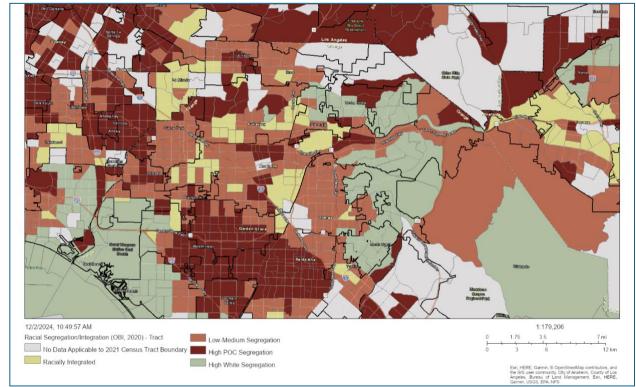

- Linda (which are predominantly AAPI), La Palma (which are predominantly AAPI), and San Juan Capistrano (which is predominantly Hispanic).
- There are areas of integration including the Atwood neighborhood in Placentia, which is predominantly Hispanic; Brea just northwest of the SR-90/SR-57 interchange, which is a predominantly Hispanic area; and in Los Alamitos, in the neighborhood north of Joint Forces Training Base Los Alamitos and west of Lexington Drive, which is predominantly Hispanic.
- In Aliso Viejo, most of the city is considered an area of high White concentration, with the exception of a few neighborhoods with low-medium concentration (which are predominantly White) in the northern and eastern parts of the city.
- In Anaheim, the map shows integrated areas in Southeast Anaheim (where Hispanic residents are the predominant group), in western Anaheim west of Brookhurst Street (where Hispanic residents are the predominant group in many neighborhoods, and AAPI residents are the predominant group in a few others), and in the neighborhoods between Modjeska Park and Palm Lane Park in the Hermosa Village community (where Hispanic residents are the predominant group). The map shows another integrated area in Northeast Anaheim, to the north of SR-91. However, this is primarily an industrial/commercial area. The city also has neighborhoods of high POC segregation, including the neighborhoods north of downtown and along SR-91, and neighborhoods south of downtown and adjacent to Disneyland. These areas are predominantly Hispanic. The Anaheim Hills area demonstrates a high White segregation.
- In Buena Park, most of the city is considered an area of low-medium segregation with the exception of the following areas: the northeast corner of the city is considered an area of high POC segregation and is predominantly AAPI; the neighborhood between I-5, Artesia Boulevard, Beach Boulevard, and the Los Angeles County border is also considered an area of high POC segregation, and is predominantly Hispanic; and the neighborhoods south of Boisseranc Park between Dale Street and the nurseries, is considered a racially integrated area.
- In Costa Mesa, the neighborhoods between downtown and the Costa Mesa Country Club are areas of high POC segregation, with a predominantly Hispanic population. The neighborhoods in East Side Costa Mesa (east of SR-55 and south of Mesa Drive) are all areas of high White segregation, as are the neighborhoods north of the Country Club and the neighborhoods between Estancia High School and Canyon Park.
- In Fountain Valley, the majority of Census Tracts are considered areas of high POC segregation, and many have a predominantly AAPI population (particularly north of Warner Avenue). The neighborhoods surrounding the intersection of Magnolia Street and Ellis Avenue in the city's southwest, and between Brookhurst Street and Ward Street south of I-405, are considered areas of high White segregation.

- In Fullerton, there are various neighborhoods that are considered racially integrated, including in the area around CSU Fullerton and extending west to Fullerton College, and in the southwest area of the city. There are also areas considered to have high POC segregation, including most of the neighborhoods west of Harbor Boulevard and north of Malvern Avenue, which are predominantly AAPI areas.
- In Garden Grove, the majority of the city is considered an area of high POC segregation except for West Garden Grove. In West Garden Grove, the residential neighborhoods west of Knott Street are considered areas of high White segregation. East of Knott Street is primarily industrial and commercial land uses. In the high POC segregation areas, AAPI residents are the predominant group west of 9th Street and Hispanic residents are the predominant group east of there.
- In Huntington Beach, most of the city's neighborhoods are predominantly White, with the exception of one Census Tract in the center of the city that is predominantly Hispanic.
- In Irvine, there are a number of Census Tracts considered to be areas of high POC segregation, some of which are predominantly AAPI and others are predominantly White. These areas include the neighborhoods between I-405 and UC Irvine, the Westpark community north of I-405, the neighborhoods between Como Channel and I-5, and the Northwood community north of I-5. There are also areas of high White segregation in Irvine, including the neighborhood bounded by Turtle Rock Drive the area surrounding the Strawberry Farms Golf Club, the Woodbridge community north of I-405, and the neighborhood west of the Oak Creek Golf Club. Please note that data was unavailable for many parts of the city, as indicated by the grey shading.
- In La Habra, there are various neighborhoods considered to have high POC segregation, including neighborhoods in the center of the city north of Guadalupe Park and between Idaho Street to the west and Sonora High School to the east. These neighborhoods are predominantly Hispanic. The city also has two racially integrated areas, one that extends across its border to the west (between SR-90 and the railroad tracks) and another that extends across its border to the south (south of SR-90 and east of Euclid St).
- In Laguna Niguel, most of the city is considered an area of high White concentration, with the exception of a few neighborhoods with low-medium concentration (which are predominantly White) in the northeastern and eastern parts of the city.
- In Lake Forest, most of the city's neighborhoods have a predominantly White population. There are predominantly Hispanic neighborhoods in the southeast corner of the city, along El Toro Road, and the northwest corner of the city is predominantly AAPI.
- In Mission Viejo, most of the city is considered an area of high White concentration, with the exception of a few neighborhoods with low-medium concentration in the southern, northern, and western parts of the city.

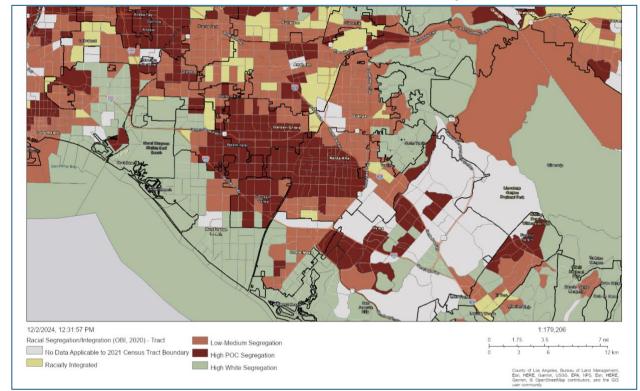

- In Newport Beach, the entire city is classified as an area of high White segregation.
- In Orange, most of the city to the north and east of Villa Park is considered an area of high White segregation, and most of the city to the south and west of Villa Park is considered an area of low-medium POC segregation. In the low-medium segregation areas, the neighborhoods are predominantly Hispanic west of Glassel Street with a high concentration of Hispanic residents in the neighborhoods north of Walnut Avenue. The neighborhoods between Glassel Street and SR-55 are predominantly White, and the neighborhoods east of SR-55 and south of Villa Park are predominantly Hispanic. There is one area in the city that is considered integrated. This area lies to the south of Villa Park and runs south along Santiago Creek and east along the northside of Chapman Avenue toward El Modena.
- In Rancho Santa Margarita, most of the city is considered an area of high White concentration, with the exception of a few neighborhoods with low-medium concentration (which are predominantly White) in the neighborhoods east of SR-241 between Antonio Parkway and Santa Margarita Parkway.
- In San Clemente, the majority of the city is considered an area of high White concentration, with the exception of one Census Tract encompassing neighborhoods north and east of Max Berg Plaza Park, which is classified as low-medium concentration with a predominantly White population.
- In Santa Ana, the majority of the city is considered an area of high POC segregation and has a predominantly Hispanic population except for the Riverview West community which is predominantly AAPI. There are some areas of low-medium POC segregation in the city, including the neighborhoods north of I-5, Floral Park, West Floral Park, Fisher Park, Morrison/Eldridge Park, Riverglen, Casa de Santiago, and neighborhoods south of Warner Avenue. There is one integrated area in the southern part of the city between Segerstrom High School and the Bristol Place Shopping Mall, where White residents are the predominant group.
- In Tustin, there are racially integrated neighborhoods just to the north of I-5. These are surrounded by neighborhoods of low-medium segregation that are a mix of predominantly White, Hispanic, and AAPI.
- In Westminster, the majority of the city is considered an area of high POC segregation and has a predominantly AAPI population with a few exceptions. The northwestern corner of the city, between I-405 and Bolsa Chica Road is an area of high White segregation. Across I-405 from those neighborhoods is an integrated area with a predominantly Hispanic population (west of Edwards Avenue). This area includes mobile home parks near the intersections of SR-22 and I-405.

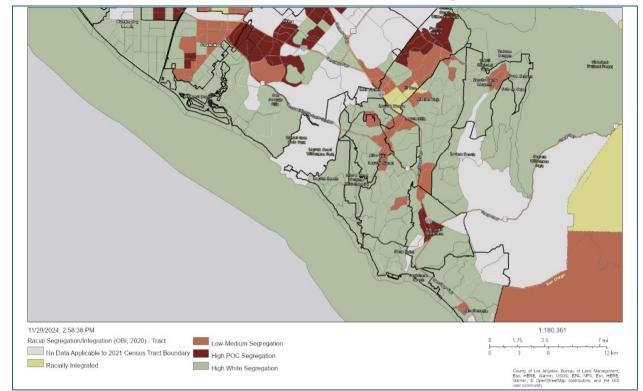

Map 2 - Racial/Ethnic Concentration - Region

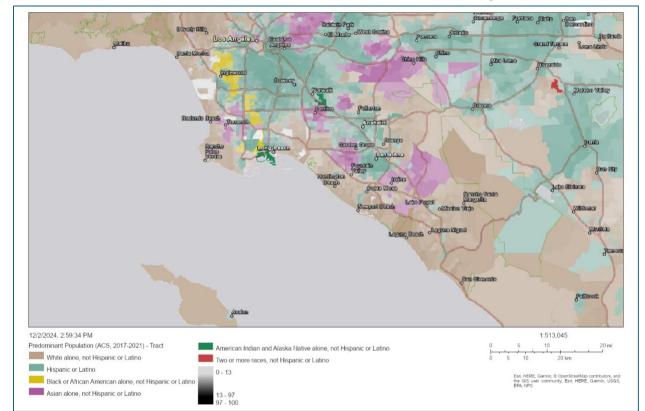

Map 2 - Racial/Ethnic Concentration - North Orange County

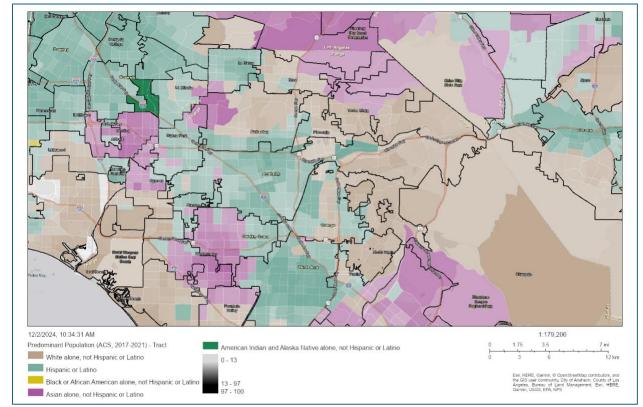

Map 2 - Racial/Ethnic Concentration - Central Orange County

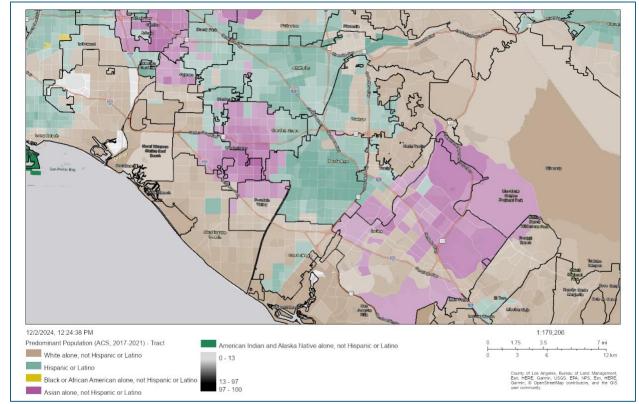

Map 2 - Racial/Ethnic Concentration - South Orange County

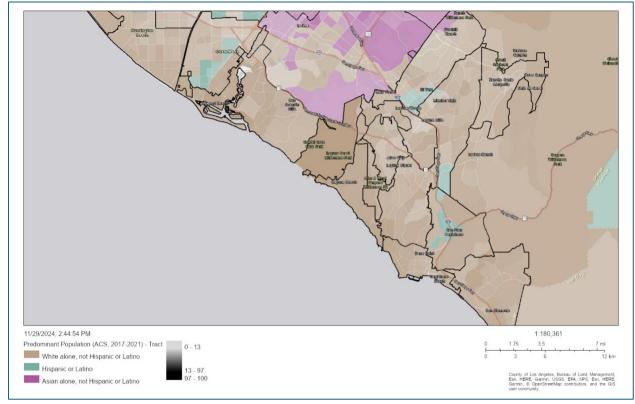

Map 3 - Predominant Population by Race/Ethnicity - Region

Map 3 – Predominant Population by Race/Ethnicity – North Orange County

Map 3 - Predominant Population by Race/Ethnicity - Central Orange County

Map 3 - Predominant Population by Race/Ethnicity - South Orange County

The following analysis compares the locations of publicly supported housing with the areas of concentration.

Map 4 - Publicly Supported Housing, is a series of maps showing the location of federal-and state-subsidized housing in the region, and in northern, central, and southern Orange County. These maps were created by California HCD to facilitate fair housing planning, using data from California Housing Partnership⁸. On the maps, the size of each dot correlates to the number of publicly-supported housing units in an area—larger dots indicate higher numbers of units. The shading of the Census Tracts indicates the percentage of renter occupied housing units in that Tract that are supported by a HCV, including both tenant-based and project-based vouchers. The darker shading indicates higher percentages of vouchers.

The locations of publicly supported housing on these maps align with the areas of segregation and integration on Map 2 (Racial/Ethnic Segregation/Integration), in the following places:

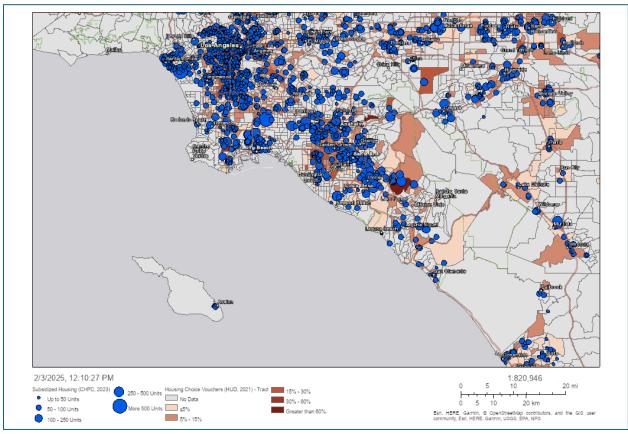

_

⁸ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

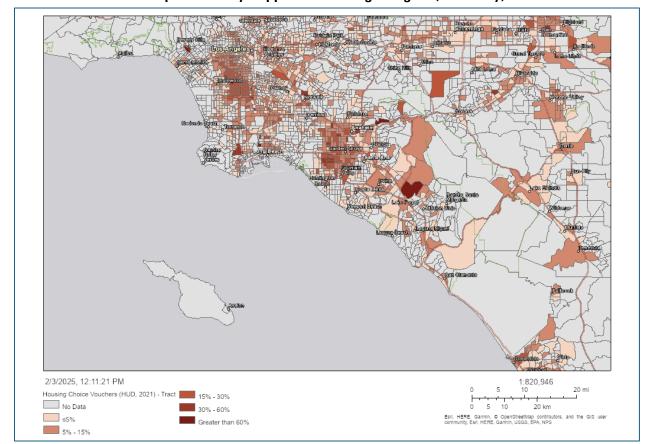

- In the Orange County Urban County jurisdictions,
 - There is overlap between the location of publicly supported housing, including a high rate of voucher use, and areas of high POC segregation in the following places:
 - Cypress in the neighborhood around King Elementary School, in the north of the city.
 - Placentia in the southwest corner of the city
 - Stanton throughout the city
 - San Juan Capistrano in the Census Tract that encompasses the interchange between I-5 and the Ortega Highway (SR-74)
 - There is overlap between areas without any publicly supported housing and either low HCV use or no data on HCV use, and areas of high White segregation, the following places:
 - Rossmoor, Seal Beach, North Tustin, Villa Park, Orange Park Acres,
 North Laguna Hills, Laguna Woods, and Dana Point
 - In Aliso Viejo, there are publicly supported units and higher percentages of units with vouchers in the south of city, which is an area of high White concentration.
 - In Anaheim, there are multiple publicly supported housing developments downtown and north of downtown, which are high POC segregation areas. The map also shows a concentration of vouchers in the high POC segregation area between Santa Ana River and Orangethorpe Avenue, east of Anaheim Canyon Metrolink station and west of Imperial Highway (SR-90). However, this is largely a commercial/industrial area with few housing units. In the western part of the city, around Western High School, there is also a cluster of publicly supported housing developments in a racially integrated area.
 - In Buena Park, most publicly supported housing units are located in between I-5 and the Artesia Freeway (SR-91), which is a low-medium segregation area like most of the city.
 - In Costa Mesa, the largest number of publicly supported housing units and the highest concentration of vouchers is in high POC segregation area located downtown and west of downtown.
 - In Fountain Valley, the location of publicly supported housing units and highest concentrations of vouchers mirrors the high POC segregation areas.
 - In Fullerton, publicly supported housing units are mostly clustered in the center of the city, which is a low-medium segregation area.
 - In Garden Grove, there are lots of publicly supported housing units in the center
 of city along Garden Grove Boulevard, which is a high POC segregation area.
 There are no publicly supported housing units in West Garden Grove, which is an
 area of high White segregation.

- In Huntington Beach, the map shows publicly supported housing units located in the center of the city. Local data identify affordable housing projects distributed broadly across the city.
- In Irvine, the high POC segregation areas north of I-405 overlap with the location of publicly supported housing units. In other parts of the city where there is high voucher use and multiple publicly supported housing developments, there is no segregation data available.
- In La Habra, publicly supported housing units are located in the city's center and north neighborhoods, which are all low-medium or high POC segregation areas.
- In Laguna Niguel, the map shows one public supported housing development (near the intersection of Pacific Park Drive and La Paz Road) and a small concentration of voucher use in northwest part of city, which is a low-medium concentration area. City staff report that another development in the western part of the City also receives vouchers.
- In Lake Forest, there are publicly supported housing units in the northwest, near the intersection of SR-241 and Alton Parkway. There are a smaller number of units in the south of the city, along ElToro Road.
- In Mission Viejo, the map shows two publicly supported housing developments in the southern part of the city. One of these developments, in the southeast, aligns with a low-medium concentration area. City staff report that there are additional publicly supported housing developments that are not reflected in the HUD-provided data.
- In Newport Beach, there are two publicly supported housing developments (one east and one west of Newport Center), both of which are in high White segregation areas.
- In Orange, all publicly supported housing units and households with vouchers are located to the west and south of Villa Park (which are low-medium segregation areas). There are no units or vouchers in use to the east of Villa Park, where it is a high White segregation area. The largest publicly supported housing development (biggest blue dot) is in the integrated area to the south of Villa Park, running south along Santiago Creek and east along the northside of Chapman Avenue towards El Modena.
- In Rancho Santa Margarita, there are no publicly supported housing units. There are some vouchers in use in the northeast part of the city that is a low-medium concentration area
- In San Clemente, there is a cluster of publicly supported housing units in the low-medium concentration area north and east of Max Berg Plaza Park.
- In Santa Ana, a significant number of publicly supported housing units are located downtown and southeast of downtown, both of which are high POC segregation areas. There is a higher concentration of vouchers, as well as some publicly

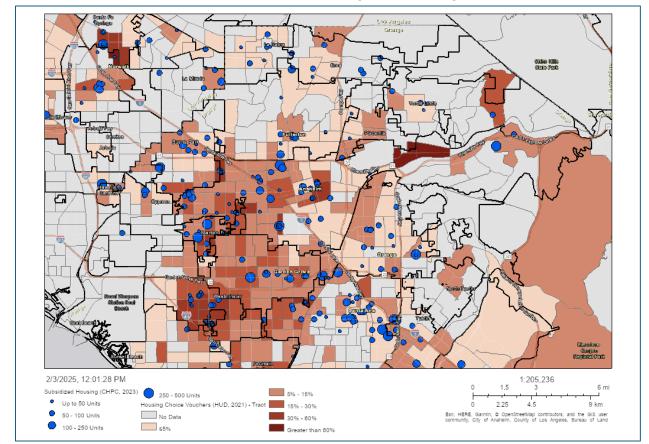

- supported housing units, west of the Santa Ana River, which is also a high POC segregation area.
- In Tustin, there is a large concentration of publicly supported housing units in the south. Segregation data for this area are unavailable; however, according to Map 3 (Predominant Population by Race/Ethnicity) the population is predominantly AAPI.
- In Westminster, the location of publicly supported housing units and areas with highest concentration of vouchers aligns with the high POC segregation areas in the central part of the city. There are no publicly supported housing units, and fewer vouchers in use, in the western parts of the city that are high White segregation, racially integrated, and low-medium segregation areas.

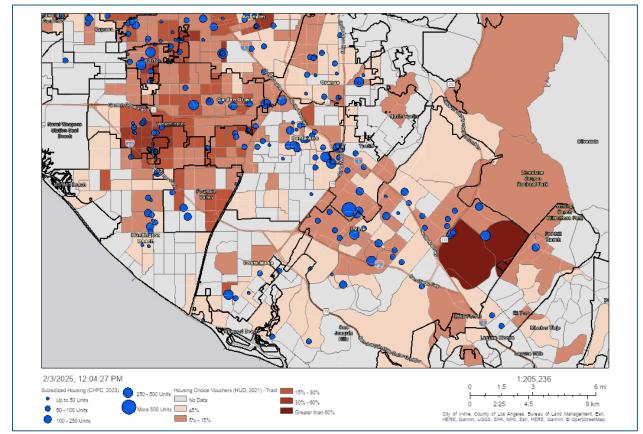

Map 4 - Publicly Supported Housing - Region

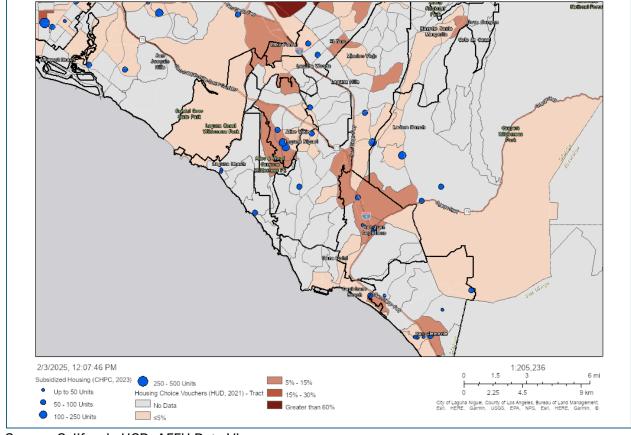

Map 4 - Publicly Supported Housing - Region (HCV Only)

Map 4 - Publicly Supported Housing - North Orange County

Map 4 - Publicly Supported Housing - Central Orange County

Map 4 - Publicly Supported Housing - South Orange County

The following analysis describes the public or private policies or practices, demographic shifts, economic trends, or other factors that may have caused or contributed to the patterns described above (including siting decisions of private or publicly supported housing or the location of residents using Housing Choice Vouchers).

Broadly speaking, the patterns of residential segregation/concentration by race – both between and within jurisdictions in Orange County and across the United States – are due, in part, to:

- Historic practices of redlining and legal racial segregation, which created many of the residential patterns that still exist today.
- Local land use and zoning laws that have perpetuated patterns of racial segregation, some of which remain in place, while others which have been removed but continue to have lasting effects.
- Market factors, including the high cost of land and existing housing throughout Orange County, constrain the development of new affordable housing and limit access for families to existing housing.

- Discrimination in the private housing market, including source-of-income discrimination, driven in part by a lack of knowledge of state and federal fair housing laws and regulations, which in turn limits housing mobility.
- There are numerous ethnic enclaves of Hispanic, Vietnamese, Chinese, and other groups throughout Orange County. These enclaves provide a sense of community and a social network that may help newcomers preserve their cultural identities. However, these active choices should not obscure the significant impact of structural barriers to fair housing choice and discrimination.

Through the stakeholder consultations and community meetings, it was also reported that segregation/concentration patterns in the County are due to:

- In addition to landlord resistance to renting to HCV Program participants, the gap between HCV subsidy amounts and housing costs further inhibits HCV Program participants from accessing housing in higher cost (and higher opportunity) areas.
- Lack of housing mobility for some minority groups based on a lack of credit history coupled with high demand for affordable housing across the County, which permits landlords and property management companies to prioritize applicants based on credit history.

Detailed lists of the public or private policies or practices, demographic shifts, economic trends, and other factors that have caused or contributed to segregation/concentration in each of the jurisdictions are included in Section IV.

C. Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs)

The following analysis identifies R/ECAPs and/or groupings of R/ECAP tracts.

HUD defines racially or ethnically concentrated areas of poverty (R/ECAPs) as Census Tracts that meet both of the following criteria:

- a non-White population of 50 percent or more, and
- a poverty rate that exceeds 40% or a poverty rate that is three or more times the average Tract poverty rate for the metropolitan area, whichever threshold is lower.

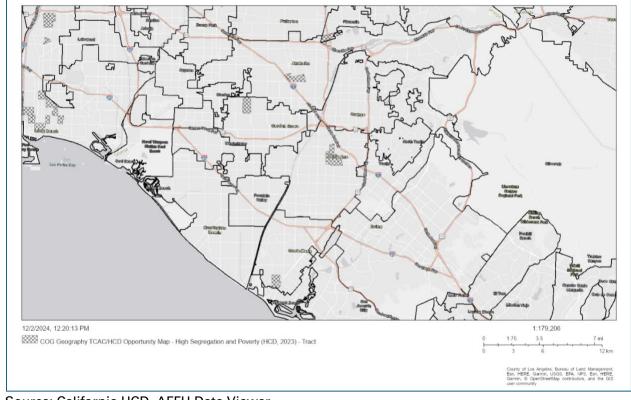

The analysis in this report uses a measure of segregation and concentrated poverty created by the California Tax Credit Allocation Committee (TCAC) and California HCD. The TCAC/HCD Opportunity Map's poverty concentration and racial segregation filter aligns with HUD's R/ECAP methodology but is designed to more effectively reflect the level of racial and ethnic diversity in many parts of California. This measure uses the following criteria to define Census Tracts as "High Segregation and Poverty" areas:

 Tracts and rural block groups where at least 30 percent of the population is living below the poverty level (note that college and graduate students are removed from

- the poverty calculation in the filter in Census Tracts where they comprise at least 25% of the population); and
- Tracts that have a Location Quotient (LQ) higher than 1.25 for Black, Hispanic, Asian, or all people of color. The LQ measures relative segregation by calculating how much more segregated a Census Tract is relative to a larger area (in this case, the County). Compared to the measure used by HUD (which is an absolute threshold of non-White population in a Census Tract), this measure better captures inequality operating on individuals at the neighborhood level.

Map 5 – High Segregation and Poverty Areas, indicates racially or ethnically concentrated areas of poverty in Orange County (note that the only R/ECAP areas are located in the central part of the County). This map was created by California HCD to facilitate fair housing planning, using the TCAC/HCD Opportunity Map data. This map shows R/ECAPs in the following areas:

- Placentia in the southwestern corner of the city, south of Orangethorpe Avenue
- Anaheim northeast of Disneyland, along Ball Road and I-5
- Garden Grove in the northern part of the city to between Brookhurst Street and Gilbert Street, north of Chapman Avenue
- Santa Ana covering multiple Census Tracts in the downtown
- Costa Mesa on the west side of downtown and the area southwest of downtown (between Newport Avenue (SR-55) and Placentia Avenue, south of 19th Street).

Map 5 – High Segregation and Poverty Areas – Central Orange County

The following analysis describes and identifies the predominant protected classes residing in R/ECAPs, and how these demographics compare with the overall demographics of the area.

To identify the predominant protected classes residing in R/ECAPs and compare them to the overall demographics of the surrounding areas, we look at the areas designated as "High Segregation and Poverty" on Map 5 (High Segregation and Poverty Areas) in relation to the demographic information on Map 3 (Predominant Population by Race/Ethnicity). The analysis finds that R/ECAPs in Orange County are predominantly Hispanic. Specifically,

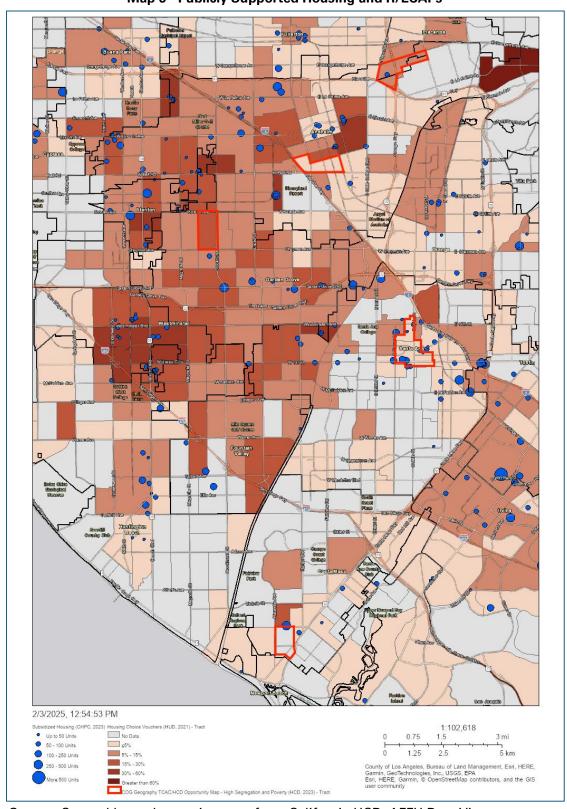

- In Placentia, the R/ECAPTract is predominantly Hispanic, as are the neighborhoods to the west and south in Fullerton and Anaheim. The neighborhoods to the east are predominantly White.
- In Anaheim, the R/ECAPTract is predominantly Hispanic, as are all the surrounding neighborhoods.
- In Costa Mesa, the R/ECAP area is predominantly Hispanic, as are the adjacent neighborhoods to the north and west. The Census Tracts to the east, across Newport Avenue, are all predominantly White.
- In Garden Grove, the R/ECAP Tract is predominantly Hispanic and is surrounded by Census Tracts that are predominantly AAPI.

• In Santa Ana, the R/ECAP Tracts are predominantly Hispanic, as are all the surrounding neighborhoods.

The following analysis describes how R/ECAPs align with the location of publicly supported housing.

Map 6 - Publicly Supported Housing and R/ECAPs, shows the location of public-supported housing in Orange County in comparison to the location of the R/ECAPs (outlined in red). This map shows no overarching patterns between the location of publicly supported housing and R/ECAPs.

- In Placentia, the R/ECAP area is home to one public housing development of 50-100 units, and between 5-15% of renter-occupied units in the Tract utilize a voucher—which is similar to other Tracts in the city.
- In Anaheim, there are no publicly supported housing units in the R/ECAPTract, and fewer than 5% of renter-occupied units in the R/ECAPTract utilize a voucher.
- In Costa Mesa, the largest publicly supported housing development in the city is located on the northern boundary of the R/ECAP area. There is no data on voucher usage in the Tract.
- In Garden Grove, 15-30% of renter-occupied units in the R/ECAP tract utilize a voucher, which is similar to a number of other non-R/ECAPTracts in the city. There are no publicly supported housing developments in the R/ECAPTract.
- In Santa Ana, fewer than 5% of renter-occupied housing units in the R/ECAP areas utilize a voucher; however, there are various publicly supported housing developments within the boundaries of the R/ECAP area.

Map 6 - Publicly Supported Housing and R/ECAPs

Source: Created by authors using map from California HCD, AFFH Data Viewer

The following analysis describes the public or private policies or practices, demographic shifts, economic trends, or other factors that may have caused or contributed to the patterns described above.

In the most recent Housing Elements prepared and adopted by each jurisdiction, the following factors were identified that contribute to the existence of R/ECAPs in these jurisdictions.

In Placentia:

- Lack of affordable housing, which limits housing mobility.
- Limited participation in the Housing Choice Voucher Program.
- Land use and development practices that constrain affordable housing development.
- Private discrimination in housing, due in part to a lack of fair housing knowledge and enforcement.

In Anaheim:

Historic practices of redlining and legal racial segregation have created many of the
residential patterns that still exist today. Additionally, the high cost of land and
existing housing in Anaheim (and throughout Orange County) are significant
constraints to the development of new affordable housing and access for families to
existing housing.

In Costa Mesa:

- Housing discrimination, which limits mobility for families.
- Lack of affordable housing due to both governmental and market constraints.

In Garden Grove:

- Lack of affordable, accessible housing in a range of unit sizes, due to high land and development costs in the region, public opposition to new development, and land use and zoning laws.
- Housing discrimination, which limits mobility for families.
- Limited access to financial services.
- Lack of meaningful language access for individuals with limited English proficiency.
- Lack of private investment in specific neighborhoods.

In Santa Ana:

- Lack of fair housing education and outreach.
- · Lack of affordable housing.

D. Disparities in Access to Opportunity

The following paragraphs analyze disparities in access to opportunity for education, employment, transportation, poverty, environmentally healthy neighborhoods, disability and access, and patterns in any disparities to access to opportunity.

1. Education

Table 6 – Opportunity Indicators by Race/Ethnicity (below), includes a <u>School Proficiency Index</u>, which measures the proximity various racial/ethnic groups have, based on where they live, to neighborhoods with high-performing schools. School proficiency is measured using school-level data on the performance of 4th grade students on state exams. The index is based on a range of 0 to 100, with higher scores indicating better proximity to high-performing schools.

Table 6 shows the following disparities in access to neighborhoods with high-performing schools in each of the participating jurisdictions:

- In the region, there are significant disparities in access to neighborhoods with high performing schools. Access is lowest for Black and Hispanic residents, and highest for White and AAPI residents. Access is especially low for Black residents living below the Federal Poverty Level (FPL).
- In the Orange County Urban County jurisdictions, Hispanic residents have the least
 access to neighborhoods with high-performing schools, and this disparity is even
 more pronounced for Hispanic residents living below the FPL. Compared to the
 region, access is better across all groups and there are smaller disparities between
 groups.
- In Aliso Viejo, access to neighborhoods with high-performing schools is high for all groups and there is little disparity between race/ethnic groups.
- In Anaheim, access to neighborhoods with high-performing schools is relatively low
 for all groups in the city and there are significant racial/ethnic disparities. Hispanic
 residents have the least access, followed by Native American and Black residents.
 Access also tends to be worse for residents living below the FPL, with Hispanic
 residents living below the FPL having the least access to neighborhoods with highperforming schools.
- In Buena Park, Hispanic and Black residents have less access to neighborhoods with high-performing schools than other groups, and this disparity is even greater for Hispanic residents living below the FPL. Residents in the city have better access to neighborhoods with high-performing schools than their counterparts regionwide, and there are fewer disparities in access by race/ethnicity when compared to the region.
- In Costa Mesa, Hispanic residents have less access to neighborhoods with highperforming schools than other groups, and this disparity is even greater for Hispanic

residents living below the FPL. Generally, residents in the city have better access to neighborhoods with high-performing schools than their counterparts regionwide, and there are fewer disparities in access by race/ethnicity when compared to the region.

- In Fountain Valley, access to neighborhoods with high-performing schools is high for all groups, with little disparity between race/ethnic groups, except for Native Americans living below the FPL, who have relatively poor access.
- In Fullerton, access to neighborhoods with high performing schools is comparable
 to the region, with relatively low access and evidence of racial/ethnic disparities.
 Hispanic residents have the least access, followed by Native American and Black
 residents.
- In Garden Grove, Hispanic residents have less access than other groups to neighborhoods with high-performing schools, though these disparities are less pronounced than in the region as a whole.
- In Huntington Beach, Hispanic and Black residents have less access than other groups to neighborhoods with high-performing schools, and these disparities are more pronounced for residents living below the FPL.
- In Irvine, access to neighborhoods with high-performing schools is high for all groups.
- In La Habra, access to neighborhoods with high-performing schools is relatively low for all groups and there is little disparity between race/ethnic groups.
- In Laguna Niguel, access to neighborhoods with high-performing schools is high for all groups.
- In Lake Forest, access to neighborhoods with high-performing schools is moderately
 high for all groups, though residents living below the federal FPL have less access
 to these types of neighborhoods. Hispanic residents living below the federal FPL, in
 particular, have the least access compared to other groups.
- In Mission Viejo, access to neighborhoods with high-performing schools is moderately high for all groups and there is little disparity between groups.
- In Newport Beach, access to neighborhoods with high-performing schools is high for all groups.
- In Orange, there are some disparities in access to neighborhoods with highperforming schools, with Black and Hispanic residents having less access than other groups. These disparities are less pronounced than in the region overall—this is because, Hispanic, Black, and Native American residents of Orange have better access to these kinds of neighborhoods than their counterparts in the region overall, while White and AAPI residents of Orange have less access.
- In Rancho Santa Margarita, access to neighborhoods with high-performing schools is high for all groups.

- In San Clemente, access to neighborhoods with high-performing schools is moderately high for all groups with few disparities between groups.
- In Santa Ana, access to neighborhoods with high-performing schools is relatively low for all groups and there are significant disparities between race/ethnic groups. Hispanic and Native American residents have the least access to neighborhoods with high-performing schools.
- In Tustin, Hispanic and Native American residents living below the FPL have significantly less access to neighborhoods with high-performing schools than other groups.
- In Westminster, access to neighborhoods with high-performing schools is moderately high for all groups and there is little disparity between groups.

Table 6 - Opportunity Indicators by Race/Ethnicity

	Lavy Davients	School Proficiency	Lahar Markat	Tuomoit	Low	Jobs	Environmental
Los Angeles-Long Beach-Anaheim, CA MSA	Low Poverty Index	Index	Labor Market Index	Transit Index	Transportation Cost Index	Proximity Index	Health Index
Total Population	index	index	inuex	index	Cost index	index	nealth index
White, Non-Hispanic	65.19	68.03	67.43	77.63	73.13	54.59	21.35
Black, Non-Hispanic	36.07	33.82	35.34	87.25	79.02	40.72	11.92

By comparing the School Proficiency Index in Table 6 to the demographic data in Table 1 (Demographics), a pattern emerges showing that cities where all residents have access to neighborhoods with high-performing schools, have a lower percentage of Hispanic residents than the County overall. In other words, Hispanic residents are concentrated in cities with fewer high-performing schools. Specifically, in the following cities, the School Proficiency Index is 70 or higher for every racial/ethnic group, and the percentage of the population that is Hispanic is lower than the countywide percentage of 33.93%:

12, Version AFFHT0006, Released July 10, 2020.

- Aliso Viejo, where the School Proficiency Index is over 83 for all groups, and 20.02% of the population is Hispanic.
- Fountain Valley, where the School Proficiency Index is over 73 for all groups, and 17.08% of the population is Hispanic.
- Irvine, where the School Proficiency Index is over 90 for all groups, and 11.24% of the population is Hispanic.
- Laguna Niguel, where the School Proficiency Index is over 77 for all groups, and 16.10% of the population is Hispanic.
- Mission Viejo, where the School Proficiency Index is over 72 for all groups, and 19.67% of the population is Hispanic.

- Newport Beach, where the School Proficiency Index is over 88 for all groups, and 10.47% of the population is Hispanic.
- Rancho Santa Margarita, where the School Proficiency Index is over 80 for all groups, and 20.41% of the population is Hispanic.

Map 7 – Education Score, is a series of maps showing the TCAC/HCD Opportunity Map's Education Composite Score for north, central, and south Orange County, and the region. These maps were created by California HCD to facilitate fair housing planning, using the TCAC/HCD Opportunity Map data⁹. The Education Composite Score for a particular Census Tract is based on four indicators, all of which are based on enrollment-weighted averages of the three schools closest to the tract's center point.¹⁰:

- Math and Reading Proficiency, where "Proficiency" is the percentage of students performing at grade-level in the 4th grade.
- High School Graduation Rate, which is calculated using California Department of Education data on the percent of students who graduate in four years.
- <u>Student Poverty</u>, which is measured as the percentage of students that do not receive free and reduced-price lunch.

A tract's composite score is determined by whether it falls above or below the median (50th percentile) tract or block group value within each region. Each indicator that falls above the regional median adds one point to the final score. On the maps, the categories equal the following scores:

Highest: >3-4
 High: >2-3
 Moderate: >1-2
 Low: 0-1

These maps, along with Map 3 showing the predominant race/ethnicity in each area, show the following relationship between residency patterns and proximity to proficient schools by race/ethnicity:

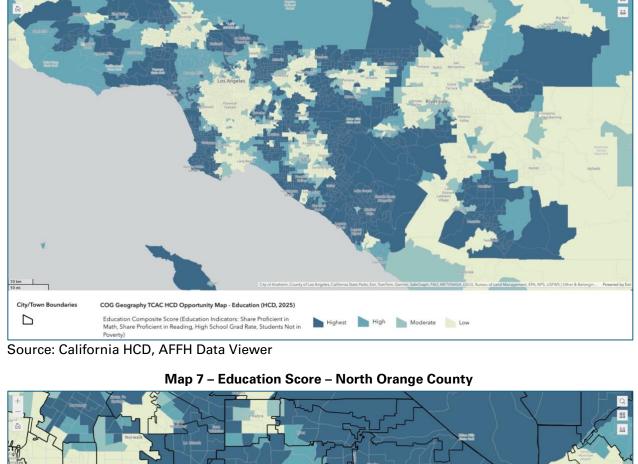

- In the County overall,
 - Cities in the central County have the lowest education scores, indicating that residents in these areas are less likely to live near high quality schools. Areas in the southern County, along the coast, and in the unincorporated areas in the north and east parts of the County, have the highest education scores.

⁹ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing ¹⁰ Detailed descriptions of the methodology used to measure each indicator can be found on the CTAC website, https://www.treasurer.ca.gov/ctcac/opportunity.asp

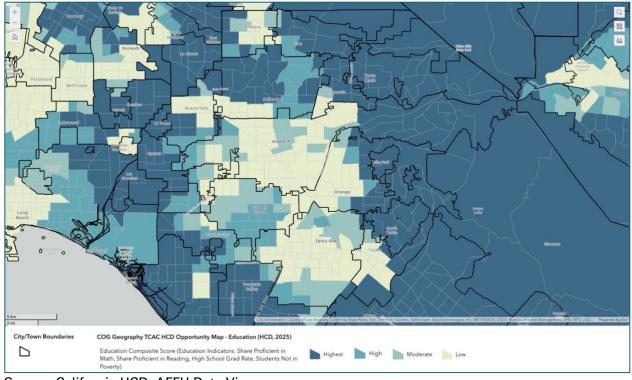

Low education score areas generally correspond to areas where the population is predominantly Hispanic.

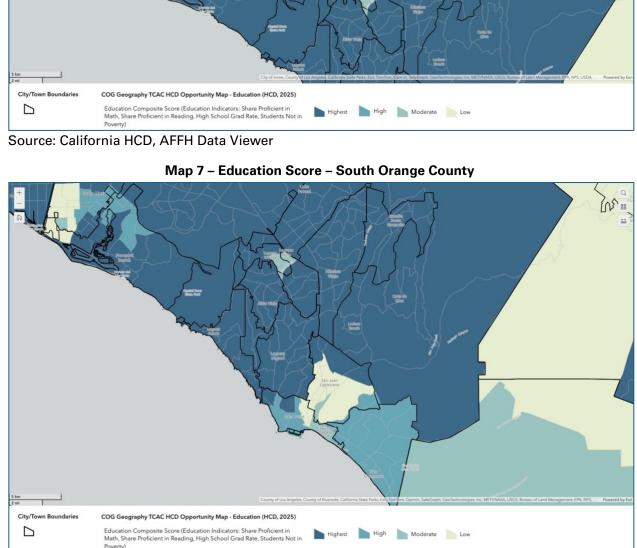

- In the Orange County Urban County jurisdictions,
 - Brea and Los Alamitos have high education scores and are predominantly White in most but not all areas.
 - Cypress has high education scores and a predominantly AAPI and White population.
 - La Palma has high education scores and a predominantly AAPI population
 - Yorba Linda, Villa Park, Orange Park Acres, North Tustin, unincorporated areas of the County, Laguna Woods, Laguna Beach, and Laguna Hills, all have the highest education scores and are predominantly White.
 - o Dana Point has a mix of education scores, all areas are predominantly White.
 - Placentia has low education scores in the southeast, which align with the predominantly Hispanic neighborhoods.
 - San Juan Capistrano has low education score areas that are a mix of predominantly Hispanic and predominantly White neighborhoods.
- In Aliso Viejo, all neighborhoods in the city have the highest education score and are predominantly White.
- In Anaheim, most of the city's neighborhoods have low education scores and are predominantly Hispanic. The exception is Anaheim Hills, which is both predominantly White, and has the highest education scores.
- In Buena Park, there are neighborhoods with low education scores in the city's center and southeast, which are also areas of predominant Hispanic population.
- In Costa Mesa, the southwest quarter of the city has low education scores. This area
 is a mix of predominantly Hispanic neighborhoods in and around downtown, and
 predominantly White neighborhoods to the west.
- In Fountain Valley, almost all of the city's neighborhoods have high education scores. These neighborhoods are a mix of predominantly White and AAPI.
- In Fullerton, neighborhoods in the south of the city have low education scores and are also the areas with the highest concentrations of Hispanic residents.
- In Garden Grove, the neighborhoods with low education score areas in the east are predominantly Hispanic, and the neighborhoods with low education scores in the northwest are predominantly Hispanic and AAPI.
- In Huntington Beach, the neighborhoods with the highest education scores correlate
 to areas that are predominantly White, which is most of the city. One area of the city
 with low education scores has a predominantly Hispanic population.
- In Irvine, neighborhoods across the city have the highest education score. These neighborhoods are a mix of predominantly White and AAPI.

- In La Habra, neighborhoods with low education scores are located in the center and eastern part of the city, which are also the areas with the highest concentrations of Hispanic residents.
- In Laguna Niguel, all neighborhoods have high education scores and are predominantly White.
- In Lake Forest, all neighborhoods have high education scores and most are predominantly White, except in the southeastern corner of the city, along El Toro Road, which is predominantly Hispanic.
- In Mission Viejo, all neighborhoods have high education scores, and most are predominantly White except in the southern part of the city.
- In Newport Beach, all neighborhoods have high education scores and are predominantly White.
- In Orange, neighborhoods in the western half of the city have low education scores and are predominantly Hispanic. The neighborhoods with the highest education scores are in the eastern half of the city. The high education score areas north and west of Villa Park are predominantly White, and the high education score areas south and west of Villa Park are predominantly Hispanic.
- In Rancho Santa Margarita, all neighborhoods have high education scores and are predominantly White.
- In San Clemente, all neighborhoods have high education scores and are predominantly White.
- In Santa Ana, neighborhoods with low education score areas comprise most of the city, and are areas where population is predominantly Hispanic.
- In Tustin, the neighborhoods with low education scores are predominantly Hispanic and White, and the neighborhoods with the highest education scores are predominantly AAPI.
- In Westminster, there is a mix of moderate, high, and highest education score areas. There is one part of the city with low education scores, in the north. This area is predominantly Hispanic.

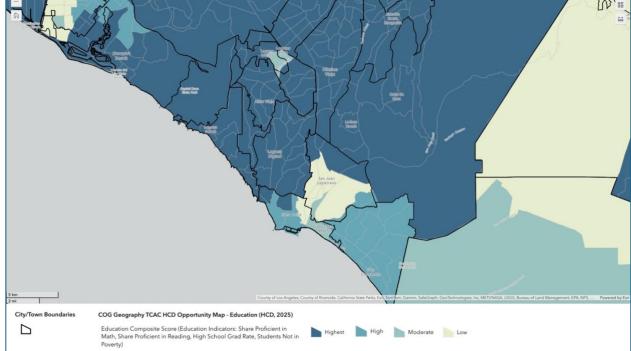

Map 7 – Education Score – Region

Map 7 - Education Score - Central Orange County

2. Employment

Table 6 includes a Jobs Proximity Index, which measures the physical distance between where residents of different races/ethnicities live and the location of jobs. A higher index value indicates better access to employment opportunities. Table 6 also includes a Labor Market Index, which measures the unemployment rate, labor-force participation rate, and percentage of the population aged 25 and above with at least a bachelor's degree, by neighborhood. A higher index value indicates that residents live in a neighborhood with higher labor force participation and human capital.

Table 6 shows the following regarding disparities in access to neighborhoods close to jobs and with high labor force participation and human capital in each of the participating jurisdictions:

- In the region, there are significant disparities in both the Jobs Proximity and the Labor Market Index. The Jobs Proximity Index is the lowest for Black residents, especially those living below FPL. It is also low for Hispanic residents. White residents are most likely to live in neighborhoods close to jobs. The Labor Market Index is lowest for Black and Hispanic residents, especially those living below FPL, and highest for White residents. Generally, the Labor Market Index is lower for individuals living below FPL.
- In the Orange County Urban County jurisdictions, there is relatively low access to neighborhoods close to jobs for all races/ethnicities, with no large disparities between groups. Compared to the region, residents of all races/ethnicities have better access to neighborhoods with high labor force participation and human capital. However, there are disparities between racial/ethnic groups, with Hispanic residents having significantly less access than other groups, and White residents having more access.
- In Aliso Viejo, access to neighborhoods with high labor force participation and human capital is high for all races/ethnicities, with no large disparities between groups. This is also true for access to neighborhoods close to jobs. On both indices, the city performs significantly better than the region overall.
- In Anaheim, there are significant disparities in access to neighborhoods close to jobs, and with high labor force participation and human capital. Hispanic residents have the least access to neighborhoods with high labor force participation and human capital. Black and AAPI residents have the least access to neighborhoods close to jobs. On both indices, the city is comparable to the region overall, with low-to-moderate scores and significant disparities between groups.
- In Buena Park, there is relatively low access to neighborhoods close to jobs for all races/ethnicities, with no large disparities between groups. Compared to the region, residents of all races/ethnicities have less access to neighborhoods close to jobs. There is moderate access to neighborhoods with high labor force participation and

- human capital, with slight disparities between races/ethnicities—Hispanic residents have the least access to these neighborhoods. Compared to the region, access is higher for Hispanic and Black residents in the city.
- In Costa Mesa, access to neighborhoods close to jobs is high for all races/ethnicities, with only slight disparities—Hispanic residents have the least access. Access to neighborhoods with high labor force participation and human capital is also high for all races/ethnicities, but with significant disparities between races/ethnicities—again Hispanic residents have the least access. On both indices, the city performs better than the region overall for all racial/ethnic groups.
- In Fountain Valley, access to neighborhoods close to jobs, and with high labor force participation and human capital, is relatively high for all groups except for Native American residents living below the FPL, who have very low index values for each measure.
- In Fullerton, all race/ethnicities have moderate access to neighborhoods close to
 jobs, with slight disparities between groups—AAPI residents have the least access
 of any group. Regarding access to neighborhoods with high labor force participation
 and human capital, there are some disparities between groups (with Hispanic
 residents having the least access), and index values for Hispanic, Black, and AAPI
 residents are higher than their counterparts regionwide.
- In Garden Grove, access to neighborhoods close to jobs is low for all groups, with some disparities between groups—AAPI residents have the least access. Compared to the region, all groups in Garden Grove have less access. Access to neighborhoods with high labor force participation and human capital is also relatively low for all groups in the city, with slight disparities between races/ethnicities. Access is lowest for Hispanic and AAPI residents. Compared to the region, the Labor Market Index in the city is higher for Black and Hispanic residents, and lower for all others.
- In Huntington Beach, access to neighborhoods close to jobs is relatively low for all groups, with few disparities between races/ethnicities. Overall, groups in the city have better access to neighborhoods with high labor force participation and human capital; however, there are large disparities between groups. Hispanic residents, and especially those living below the FPL, have the least access to these neighborhoods.
- In Irvine, access to neighborhoods close to jobs and with high labor force participation and human capital is high for all groups (and higher than the region). The only significant disparities are for Black residents living below FPL, who have less access to neighborhoods close to jobs, and Native American residents living below FPL, who have less access to neighborhoods with high labor force participation and human capital.
- In La Habra, access to neighborhoods close to jobs is very low for all groups, with no disparities between groups. There are disparities, however, in access to neighborhoods with high labor force participation and human capital. Hispanic

- residents and Native American residents living below FPL have the least access of all groups. Compared to region, Hispanic, Black and AAPI residents in the city have more access, while White residents have less access.
- In Laguna Niguel, access to neighborhoods close to jobs is lower than the region for all groups, with little disparity between groups. Access to neighborhoods with high labor force participation and human capital is high for all groups, with little disparity between groups.
- In Lake Forest, access to neighborhoods close to jobs is relatively high, and higher than region, for all groups. There is very little disparity between groups, except for Black residents below FPL, who have very low access to neighborhoods close to jobs. Access to neighborhoods with high labor force participation and human capital is higher than in the region for all groups, with little disparity except for Hispanic, AAPI, and Native American residents living below FPL, all of whom have significantly less access.
- In Mission Viejo, access to neighborhoods close to jobs is low for all groups, with no disparities between groups. Access to neighborhoods with high labor force participation and human capital is high for all groups, with little disparity except for Hispanics living below FPL, for whom access is relatively low compared to other city residents but is still higher than in the region.
- In Newport Beach, access to neighborhoods close to jobs, and neighborhoods with high labor force participation and human capital, is high for all groups, with very little disparity between groups.
- In Orange, access to neighborhoods close to jobs is higher than the region, but there
 are some disparities—access is lowest for AAPI and White residents. There are also
 disparities in access to neighborhoods with high labor force participation and
 human capital. Black and Hispanic residents overall, and Black and AAPI residents
 living below FPL have the least access. However, access is higher for all groups
 (except White residents), in comparison to the region.
- In Rancho Santa Margarita, access to neighborhoods close to jobs is very low for all groups, with no disparities between groups. Access to neighborhoods with high labor force participation and human capital is high for all groups, with some disparities—Hispanic residents living below FPL have the least access.
- In San Clemente, access to neighborhoods close to jobs is low for all groups, with very little disparity between groups. Access to neighborhoods with high labor force participation and human capital is high for all groups (and higher than in the region), with some disparity—namely, Hispanic residents living below FPL have less access.
- In Santa Ana, access to neighborhoods close to jobs is higher for all groups than in region, with some disparities—access is lowest for AAPI residents, especially those living below FPL. Access to neighborhoods with high labor force participation and human capital is lower than in the region for all groups except Black residents, and

- there are significant disparities in access—Hispanic residents have the least access, and access is also lower for individuals living below FPL in each racial/ethnic group.
- In Tustin, access to neighborhoods close to jobs is higher for all groups than in region, with some disparities between races/ethnicities—White residents have the least access. Access to neighborhoods with high labor force participation and human capital is higher than in the region, with some disparities—Hispanic residents have the least access, and access is also lower for individuals living below FPL in each racial/ethnic group.
- In Westminster, there are disparities in access to neighborhoods close to jobs by race/ethnicity. Native American residents living below FPL, and AAPI residents, have the least access. There are some disparities in access to neighborhoods with high labor force participation and human capital by race/ethnicity—Native American residents living below FPL and Hispanic and AAPI residents overall, have less access. Compared to the region, access in the city is slightly better for Black and Hispanic residents, worse for all other groups.

The following analysis describes how a person's place of residence affects their ability to obtain a job.

Map 8 – Economic Score, is a series of maps showing the TCAC/HCD Opportunity Map's Economic Composite Score for north, central, and south Orange County, and the region. These maps were created by California HCD to facilitate fair housing planning, using the TCAC/HCD Opportunity Map data.¹¹. The Economic Composite Score for a particular Census Tract is based on four indicators.¹²:

- Poverty Rate Measured as the percentage of the Tract residents who live above 200
 percent of the FPL (the 200 percent threshold is used to account for the higher cost
 of living in California compared to other regions of the United States).
- Adult Education Rate Measured as the percentage of adults aged 25 years and older in each Tract, who have earned at least a bachelor's degree.
- <u>Employment Rate</u>- Measured as the percentage of individuals in each Tract ages 20 to 64 who are employed in either the civilian labor force or the armed forces.
- <u>Home Value</u> Measured as the median home value (dollars) of owner-occupied housing units in each tract.

_

The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing
 Detailed descriptions of the methodology used to measure each indicator can be found on the CTAC website, https://www.treasurer.ca.gov/ctcac/opportunity.asp

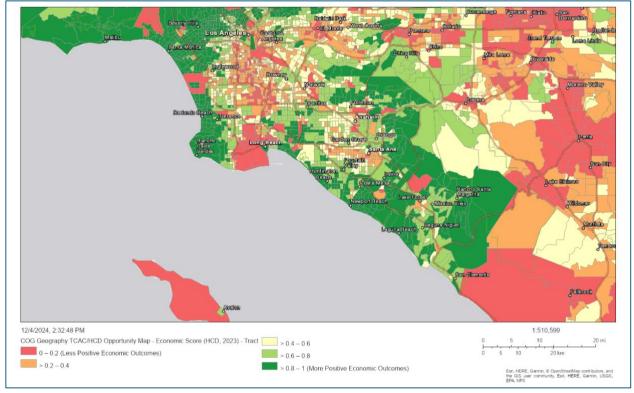

The composite score for each Tract is determined by whether it falls above or below the median (50th percentile) tract or block group value within each region. On the map, a higher numerical score indicates more positive economic outcomes.

These maps show the following relationship between residency patterns and economic outcomes, including employment:

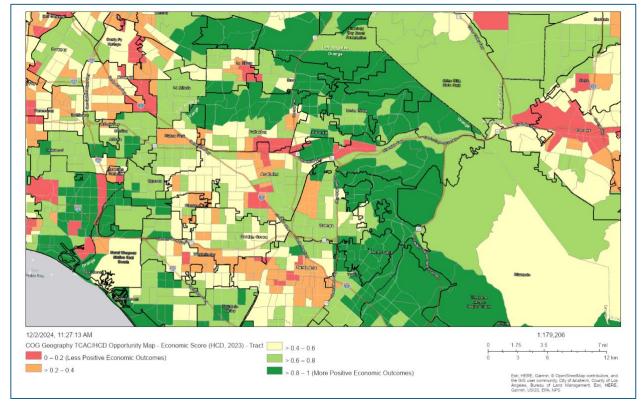

- Countywide, there is a similar pattern to the education scores, with cities in the
 central County tending to have lower economic scores than cities and
 unincorporated areas along the coast and in the southern, northern, and eastern
 parts of the County. Low score areas generally correspond to areas where the
 population is predominantly Hispanic of AAPI, whereas the high score areas
 correspond to predominantly White areas.
- In the Orange County Urban County jurisdictions,
 - There are generally good economic outcomes in Cypress, Yorba Linda, North Tustin, La Palma, Los Alamitos, unincorporated areas east of Yorba Linda, Brea, North Tustin, Orange Park Acres, Villa Park, Seal Beach (except for the Tract where Leisure World, a retirement community, is located), Rossmoor, Laguna Beach, Dana Point, Ladera Ranch, and Capistrano Beach.
 - o There is a mix of economic outcomes in the following places:
 - Placentia, where there are lower economic scores in the southwest corner of the city, which is predominantly Hispanic.
 - Laguna Woods and North Laguna Hills, which are predominantly White and have lower economic scores.
 - San Juan Capistrano, where there are lower economic scores in the Census Tract that encompasses the interchange between I-5 and the Ortega Highway (SR-74), which is also a high POC segregation area and predominantly Hispanic.
- In Aliso Viejo, neighborhoods across the city have high economic scores, are predominantly White, and are mostly areas of high White concentration.
- In Anaheim, neighborhoods with lower economic scores include neighborhoods considered to be areas of high POC segregation, including those north of downtown and along SR-91, and south of downtown and adjacent to Disneyland. These areas are predominantly Hispanic. Conversely, Anaheim Hills has high economic scores and is predominantly White.
- In Buena Park, the neighborhoods between I-5 and SR-91 have the lowest economic scores in the city. These areas are predominantly Hispanic. The northeastern corner of the city, which is predominantly AAPI, has the highest economic scores in the city.
- In Costa Mesa, the neighborhoods in and surrounding downtown, on the west side
 of Newport Boulevard have the lowest economic scores. These are also areas that
 are predominantly Hispanic.

- In Fountain Valley, neighborhoods across the city have high economic scores.
- In Fullerton, there is a general north/south divide between areas with higher and lower economic scores. The southeastern neighborhoods, which are predominantly Hispanic, have the lowest economic scores, while the northern half of the city, predominantly White and AAPI neighborhoods, have the highest economic scores.
- In Garden Grove, economic scores are moderate north of Garden Grove Freeway (SR-22) and are higher in West Garden Grove. Economic scores are generally lower south of SR-22.
- In Huntington Beach, neighborhoods across the city have high economic scores.
- In Irvine, neighborhoods across the city have high economic scores except in the area surrounding UC Irvine, and in the neighborhoods east of the intersections of SR-133 and I-5—these are predominantly AAPI.
- In La Habra, the areas with the lowest economic scores are the same areas with high POC segregation, including the neighborhoods in the center of the city north of Guadalupe Park and between Idaho Street to the west and Sonora High School to the east. These neighborhoods are predominantly Hispanic.
- In Laguna Niguel, neighborhoods across the city have high economic scores, are predominantly White, and are mostly areas of high White concentration.
- In Lake Forest, neighborhoods across the city have high economic scores except for in the southeastern corner, which is a predominantly Hispanic area.
- In Mission Viejo, neighborhoods across the city have high economic scores, are predominantly White, and are primarily areas of high White concentration.
- In Newport Beach, neighborhoods across the city have high economic scores, are predominantly White, and are all areas of high White segregation.
- In Orange, neighborhoods across the city have good economic scores. The best economic scores are in the neighborhoods north and east of Villa Park, where the population is predominantly White and classified as an area of high White segregation. The neighborhoods with lower economic scores are located west of Glassel Street and north of Walnut Avenue, which is a predominantly Hispanic area.
- In Rancho Santa Margarita, neighborhoods across the city have high economic scores, are predominantly White, and are generally areas of high White concentration.
- In San Clemente, neighborhoods across the city have high economic scores, are predominantly White, and are primarily areas of high White concentration.
- In Santa Ana, there are neighborhoods with low economic scores in much of the
 central and western parts of the city, which correspond to the areas of high POC
 segregation and are predominantly Hispanic, except for the Riverview West
 community, which is predominantly AAPI. Neighborhoods with higher economic
 scores are in the northern and southern parts of the city, which are areas of lowmedium segregation.

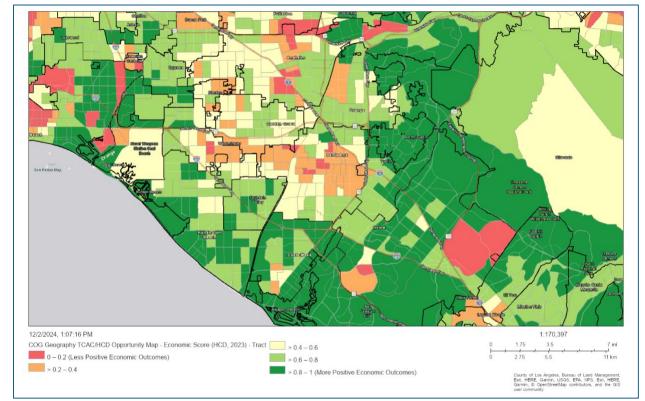

- In Tustin, all neighborhoods have good economic scores except for one neighborhood south of I-5 and west of SR-55, adjacent to Santa Ana. This is also a predominantly Hispanic area and is classified as an area of high POC segregation.
- In Westminster, economic scores are lowest in the central part of the city, in the neighborhoods south of Westminster Boulevard, east of Hoover Street, and north of Bolsa Avenue. These are all areas of predominantly AAPI population.

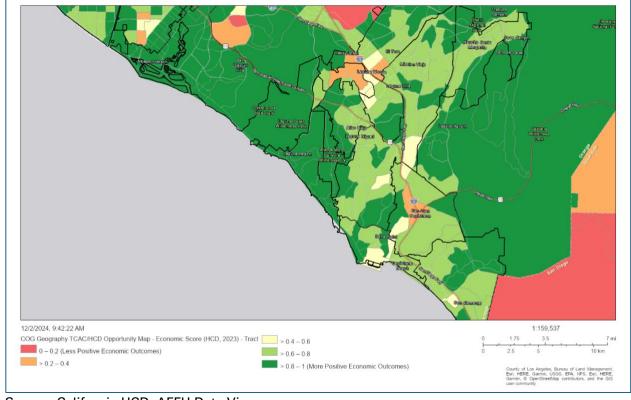

Map 8 - Economic Score - Region

Map 8 – Economic Score – North Orange County

Map 8 – Economic Score – Central Orange County

Map 8 - Economic Score - South Orange County

The following analysis describes the groups that are least successful in accessing employment.

Table 7 - Labor Force Participation and Unemployment, shows 2018-2022 ACS data on labor force participation rates and unemployment rates in the region and Orange County, for the overall population and by race/ethnicity, disability status, and sex. The table shows that:

- Orange County has lower unemployment rates than the region for every group measured in the table, except for Pacific Islanders.
- Labor force participation rates are generally higher in Orange County than the region, except for White individuals (lower in the County than the region) and Asian individuals (same rate in County and region).
- Similar to the region overall, Black individuals have the highest unemployment rate in Orange County. In the County, Pacific Islanders have the second highest unemployment rate.

3. Transportation

This analysis describes any disparities in access to transportation related to costs and access to public transit by protected class groups.

Table 6 includes a <u>Transit Index</u>, which measures the likelihood that residents will utilize public transportation. Higher index values indicate better access to public transit in a neighborhood. Table 6 also includes a <u>Low Transportation Cost Index</u>, which measures the cost of transportation in a neighborhood. Higher index values indicate lower transportation costs. Transportation costs may be low in a neighborhood due to better access to public transportation, or to the density of housing, services, and employment, or contributing factors.

Table 6 shows the following regarding disparities in access to transit and to neighborhoods with low transportation costs in each of the participating jurisdictions:

- In the region, access to transit and access to neighborhoods with low transportation costs are relatively high for all groups, though there are significant disparities between racial/ethnic groups. Both indices are lowest for White residents and highest for Black residents and are higher across all groups for individuals living below the FPL.
- In the Orange County Urban County jurisdictions, access to transit is slightly lower for all groups compared to the region but is still relatively high. There are also significant disparities, with AAPI residents having the best access, and White residents having the least access. Access is slightly higher across groups for people living below the FPL. Access to neighborhoods with low transportation costs is lower for all groups compared to the region overall but is still relatively high. There are some disparities between groups, with Hispanic residents having the best access, and White residents having the least access. Access is slightly higher across groups for people living below the FPL, except for Hispanic residents living below the FPL who have similar access to the overall Hispanic population.
- In Aliso Viejo, access to transit is low for all groups, and lowest for Black and Native American residents living below the FPL. Access to neighborhoods with low transportation costs is relatively high for all groups, with small disparities between groups—access is lowest for Black and Native American residents living below the FPL.
- In Anaheim, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Buena Park, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Costa Mesa, access to transit and access to neighborhoods with low transportation costs are high for all groups.

- In Fountain Valley, access to transit and access to neighborhoods with low transportation costs are high for all groups. Black residents living below the FPL have the highest access to neighborhoods with low transportation costs.
- In Fullerton, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Garden Grove, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Huntington Beach, access to transit and access to neighborhoods with low transportation costs are high for all groups. Native American residents living below the FPL have relatively low access to neighborhoods with low transportation costs, compared to other groups in city and the region.
- In Irvine, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In La Habra, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Laguna Niguel, access to transit is low for all groups. Access to neighborhoods
 with low transportation costs is slightly lower for residents of the city in comparison
 to the region.
- In Lake Forest, access to transit is low for all groups, and lowest for Black and Hispanic residents living below the FPL. Access to neighborhoods with low transportation costs is slightly lower for residents of the city in comparison to the region.
- In Mission Viejo, access to transit is low for all groups. Access to neighborhoods with low transportation costs is slightly lower for residents of the city in comparison to the region.
- In Newport Beach, access to transit is high for all groups. Access to neighborhoods
 with low transportation costs is comparable to the region for most groups, except
 for AAPI residents in the city, who have less access than other groups and compared
 to the region.
- In Orange, access to transit is high for all groups and slightly better than access in the region. Access to neighborhoods with low transportation costs is relatively high for all groups and is comparable to the region as a whole.
- In Rancho Santa Margarita, access to transit is low for all groups. Access to neighborhoods with low transportation costs is also lower in the city compared to the region, and there are significant racial/ethnic disparities. AAPI residents living below the FPL have significantly lower access than other groups.
- In San Clemente, access to transit is low for all groups, and access to neighborhoods
 with low transportation costs is also lower in the city compared to the region. There
 are some racial/ethnic disparities in access to neighborhoods with low

- transportation costs—Native American residents living below the FPL line, and AAPI residents of all income levels, have less access compared to other groups.
- In Santa Ana, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Tustin, access to transit and access to neighborhoods with low transportation costs are high for all groups.
- In Westminster, access to transit and access to neighborhoods with low transportation costs are high for all groups.

The following analysis describes how a person's place of residence affects their access to transportation.

Map 9 – High Quality Transit Areas, is a series of maps showing the areas of north, central, and south Orange County, and the region, that have access to "high quality" public transit, defined as having scheduled frequencies of 15 minutes or less. These maps were created by California HCD to facilitate fair housing planning, using data from the California Department of Transportation (Caltrans).¹³. On the maps, the outlined areas are those within half a mile of a transit stop that is served by public transit with scheduled frequencies of 15 minutes or less.

These maps show the following relationship between a person's place of residence and access to transportation:

- Countywide, high quality transit areas (HQTAs) are concentrated in central County cities, and there are no HQTAs in the southern or northeast parts of the County.
- In the Orange County Urban County jurisdictions, there are HQTAs in the following places
 - o In Brea, there is a HQTA in the center of city, overlapping with the racially integrated Census Tract that has a predominantly Hispanic population.
 - o In Cypress, there is a HQTA on the southern edge of the city.
 - In Stanton, HQTAs cover the entire city.
 - In Seal Beach, there are HQTAs along Seal Beach Boulevard north of US-1.
 - In Rossmoor, the southeastern corner of the city is a HQTA, along Seal Beach Boulevard.
 - o In Los Alamitos, the northern edge of the city is part of an HQTA.
 - In Laguna Woods, the eastern half of the city is a HQTA, along ElToro Rd.
 - In Laguna Hills, the part of the city adjacent to the HQTAs in Laguna Woods and Lake Forest is a HQTA.

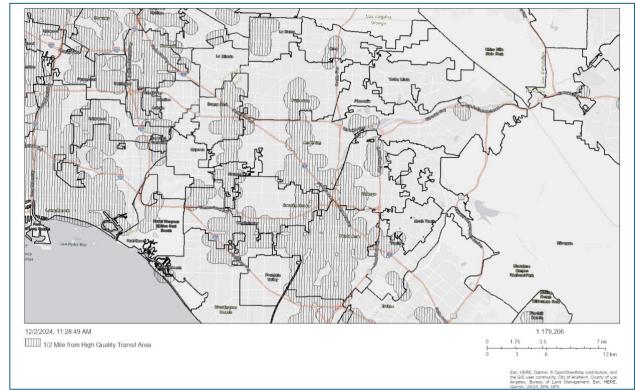

¹³ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

- The following areas have no HQTAs: Placentia, Yorba Linda, unincorporated areas east of Yorba Linda, La Palma, Villa Park, Orange Park Acres, El Modena, North Tustin, Laguna Beach, Dana Point, Capistrano Beach, San Juan Capistrano, Ladera Ranch, and North Laguna Hills
- In Aliso Viejo, there are no HQTAs
- In Anaheim, there are HQTAs in the western part of city along Beach Boulevard; in the central and southern part of city along Harbor Boulevard and Katella Avenue, including the Anaheim Regional Transportation Intermodal Center near Angel Stadium; and in the eastern part of the city near the Anaheim Canyon Metrolink station. These areas overlap with both high POC segregation areas and racially integrated areas.
- In Buena Park, there are HQTAs in the eastern half of city, along Beach Boulevard and La Palma Avenue.
- In Costa Mesa, HQTAs cover most of the city's area except for the high White segregation areas in the northwest (the neighborhoods north and west of the Country Club) and in East Side Costa Mesa (east of SR-55 and south of Mesa Drive), which do not have HQTAs.
- In Fountain Valley, there are no HQTAs
- In Fullerton, there are HQTAs in downtown Fullerton and up to Fullerton College, including the area around the Metrolink station.
- In Garden Grove, there are HQTAs south of SR-22, in West Garden Grove, and in the eastern part of the city. There are no HQTAs in the city's north-central area.
- In Huntington Beach, most of the city is not a HQTA. There is one HQTA around the intersection of Main Street and Pacific Coast Highway (US-1).
- In Irvine, there are HQTAs located near UC Irvine and John Wayne Airport, and the Irvine Medical and Science Complex. The majority of the city does not have HQTAs.
- In La Habra, the western half of the city is a HQTA. In the eastern half of the city, which is a high POC segregation area and has a concentration of predominantly Hispanic neighborhoods, there are no HQTAs
- In Laguna Niguel, there are no HQTAs except in a small area in the northeast corner along Crown Valley Parkway, adjacent to Mission Viejo.
- In Lake Forest, most of the city is not a HQTA. There are two HQTAs in the city: one in Foothill Ranch, north of SR-241(around Towne Center); and the other in the city's southeastern corner along El Toro Rd (which is a predominantly Hispanic area).
- In Mission Viejo, most of the city does not have HQTAs. There are two HQTAs in the
 city: one in the southern part, along Crown Valley Parkway (which is a low-medium
 concentration area with a predominantly Hispanic population); and the other in the
 northern part of the city, around the intersections of Santa Margarita Parkway with
 Los Alisos Boulevard and Marguerite Parkway (which are low-medium
 concentration areas with predominantly White populations)

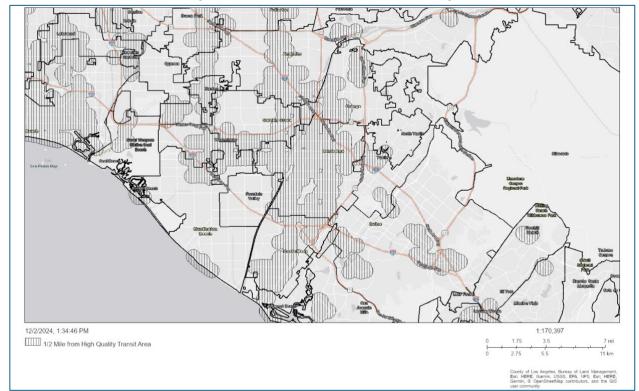

- In Newport Beach, there are HQTAs just south of Costa Mesa and around the Civic Center. Much of the city does not have HQTAs.
- In Orange, there are HQTAs downtown, in the neighborhoods west and northwest of downtown, and along the westside of Costa Mesa Freeway (SR-55) north of Katella Avenue. There are no HQTAs east of the Costa Mesa Freeway.
- In Rancho Santa Margarita, there are no HQTAs
- In San Clemente, there are no HQTAs
- In Santa Ana, most of the city is covered by HQTAs, except for northeast and southeast corners.
- InTustin, most of the city does not have HQTAs. There are two HQTAs in the following areas: one HQTA is in the racially integrated neighborhoods just to the north of I-5, in and around downtown; the other HQTA is in SouthTustin, around the Metrolink train station.
- In Westminster, most of the city is considered a HQTA, with the exception of the western and southeastern areas.

Map 9 - High Quality Transit Areas - Central Orange County

Map 9 - High Quality Transit Areas - South Orange County

4. Access to Low Poverty Neighborhoods

The following analysis describes any disparities in exposure to poverty by protected class groups.

Table 6 includes a *Low Poverty Index*, which measures the level of poverty in a neighborhood. Higher index values indicate less exposure to poverty in a neighborhood.

Table 6 shows the following regarding disparities in access to low-poverty neighborhoods in each of the participating jurisdictions:

- In the region, there are significant disparities in access to low-poverty neighborhoods. Hispanic and Black residents have the least access, and White residents have the most access. Individuals living below the FPL also have less access to low-poverty neighborhoods, compared to the overall population.
- In the Orange County Urban County jurisdictions, access to low-poverty neighborhoods is higher for all groups compared to the region, including for individuals living below the FPL. However, there are significant disparities in access. Hispanic residents have the least access. White residents have the most access. Individuals living below the FPL also have less access to low-poverty neighborhoods, compared to the overall population.

- In Aliso Viejo, access to low-poverty neighborhoods is higher for all groups compared to the region, including for individuals living below the FPL, and there are no major disparities by race/ethnicity.
- In Anaheim, there are significant disparities in access to low-poverty neighborhoods.
 Hispanic residents have the least access. White residents have the most access.
 Individuals living below the FPL also have less access to low-poverty neighborhoods, compared to the overall population. Compared to the region, White, AAPI, and Native American residents of the city have less access to low-poverty neighborhoods; and Black residents of the city have better access.
- In Buena Park, there are similar disparities in access to low-poverty neighborhoods as in the region, though at a smaller scale because Hispanic, Black, and Native American residents in the city have better access than their counterparts in the region. Access in the city is lowest for Hispanic and Black residents, and highest for White residents. Individuals living below the FPL have less access across all groups, except for Native American residents.
- In Costa Mesa, there are similar disparities in access to low-poverty neighborhoods as in the region, though at a smaller scale due to the fact that all groups, except for White residents, in the city have better access than their counterparts in the region as a whole. Access in the city is lowest for Hispanic residents and highest for AAPI residents. Individuals living below the FPL have less access across all groups, except for Black residents
- In Fountain Valley, all residents have relatively good access to low-poverty neighborhoods compared to the region. There are some disparities by race/ethnicity, with Hispanic residents, and Native American residents living below the FPL, having the least access.
- In Fullerton, all residents have relatively good access to low-poverty neighborhoods compared to the region. There are some disparities by race/ethnicity, with Hispanic residents, including those living below the FPL, and Black residents living below the FPL, having the least access.
- In Garden Grove, there are significant disparities in access to low-poverty neighborhoods. AAPI and Hispanic residents have the least access. White residents have the best access. The population living below the FPL has less access across all groups. Compared to the region, disparities in the city are less pronounced due to lower index values for White and AAPI residents in the city, and higher index values for all other groups in the city, as compared to values in the region.
- In Huntington Beach, all residents have relatively good access to low-poverty neighborhoods compared to the region. There are some disparities by race/ethnicity, with Hispanic residents having the least access and White residents having the most access. Individuals living below the FPL have less access across all groups, except for Native American residents.

- In Irvine, access to low-poverty neighborhoods is higher for all groups compared to the region, including for individuals living below the FPL, and there are no major disparities by race/ethnicity.
- In La Habra, access to low-poverty neighborhoods is higher for all groups compared
 to the region, except for White residents. There are significant disparities in access
 to low-poverty neighborhoods by race/ethnicity. Hispanic residents have the least
 access. AAPI residents overall have the most access, however, the AAPI population
 living below the FPL has significantly less access compared to the overall AAPI
 population in the city.
- In Laguna Niguel, access to low-poverty neighborhoods is higher for all groups compared to the region, including for individuals living below the FPL, and there are no major disparities by race/ethnicity.
- In Lake Forest, access to low-poverty neighborhoods is higher for all groups compared to the region. However, some racial/ethnic disparities exist, with Hispanic residents having the least access. For the population living below the FPL, access is much lower for Native American residents compared to any other group, access is lower for AAPI residents compared to the overall AAPI population, and access is higher for Black residents compared to the overall Black population.
- In Mission Viejo, access to low-poverty neighborhoods is higher for all groups compared to the region. However, some disparities exist for individuals living below the FPL, with Black residents living below the FPL having less access than other groups in the city (though still with better access compared to the region).
- In Newport Beach, access to low-poverty neighborhoods is higher for all groups compared to the region, including for individuals living below the FPL, and there are no major disparities by race/ethnicity.
- In Orange, there are similar disparities in access to low-poverty neighborhoods as in the region, though at a smaller scale because all groups, except for White residents, in the city have better access than their counterparts in the region as a whole. Hispanic residents in the city have the least access to low-poverty neighborhoods. Additionally, Black residents living below the FPL have significantly lower access.
- In Rancho Santa Margarita, access to low-poverty neighborhoods is higher for all groups compared to the region, and there is little racial/ethnic disparity. For the population living below the FPL, racial/ethnic disparities are larger, mainly because the AAPI population below the FPL has the most access to low-poverty neighborhoods of any group in the city.
- In San Clemente, access to low-poverty neighborhoods is higher for all groups compared to the region. However, some racial/ethnic disparities exist, with Hispanic residents experiencing the least access. Disparities are larger for the population

- living below the FPL, with Black residents living below the FPL having the least access in the city.
- In Santa Ana, there are significant disparities in access to low-poverty neighborhoods. Hispanic residents have the least access overall, and White residents have the most access overall. For the population living below the FPL, access is lower across all groups. Compared to the region, all groups in the city have less access to low-poverty neighborhoods, except for Black residents, who have access comparable to the region overall.
- In Tustin, there are similar disparities in access to low-poverty neighborhoods as in the region, though at a smaller scale due to the fact that Hispanic, Black, and Native American residents in the city have higher access relative to the region, and White and AAPI residents have lower access relative to region. In the city, Hispanic residents have the lowest access. For the population living below the FPL, there are also significant disparities. Access to low-poverty neighborhoods is lowest for Native American and Hispanic residents living below the FPL, and access for White residents living below the FPL is significantly lower than access for the overall White population.
- In Westminster, access to low poverty neighborhoods is lower than in the region for all groups, except for Black residents, and there are significant racial/ethnic disparities. Hispanic and AAPI residents have the least access, overall. For the population living below the FPL, access is lower across all groups and is lowest for AAPI residents.

Map 10 – Poverty Status, is a series of maps showing the percent of households, by Census Tract, living below the FPL in north, central, and south Orange County, and in the region. These maps were created by California HCD to facilitate fair housing planning, using data from the U.S. Census Bureau American Community Survey, 2017-2021 5-Year Estimates.¹⁴.

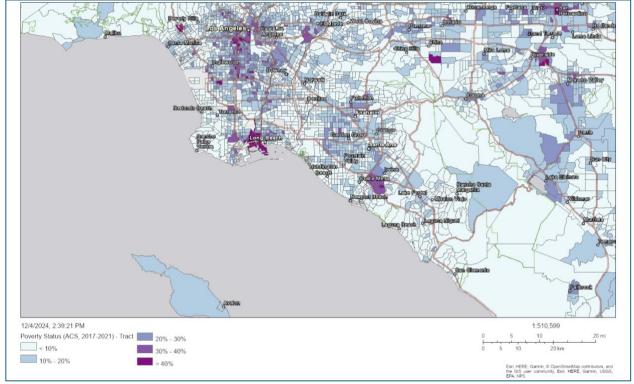

These maps show the following relationship between an individual's place of residence and their exposure to poverty:

- Countywide, higher poverty areas are in the central County cities, whereas the areas along the coast, in the south, and in the northeast are low poverty areas.
- In the Orange County Urban County jurisdictions, there are high poverty areas (i.e., with poverty rates above 20%) in the following places:
 - In Placentia, in the southwest corner of the city, which is a high POC segregation area that is predominantly Hispanic.
 - In Stanton, in the neighborhoods on the south side of Katella Avenue and on the eastside of Beach Boulevard north of Katella Avenue.

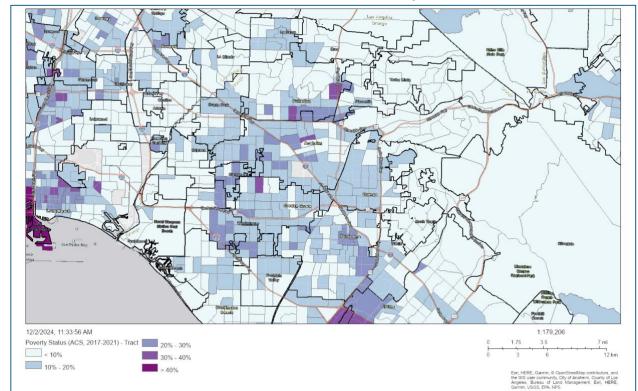

¹⁴ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

- In San Juan Capistrano, there is one tract between Camino Del Avion, Del Obispo Street, and Alipaz Street, which has a poverty rate over 20% and is predominantly Hispanic.
- In Aliso Viejo, all Census Tracts have a poverty rate below 20%.
- In Anaheim, the highest poverty area is located downtown north of Lincoln Avenue (in a predominantly Hispanic area). There are other areas of concentrated poverty south and west of downtown, which are also predominantly Hispanic. The areas of lowest poverty are downtown south of Lincoln Avenue, east of downtown (including the racially integrated areas), in Northeast Anaheim, and in Anaheim Hills.
- In Buena Park, all Census Tracts have a poverty rate below 20%.
- In Costa Mesa, all Census Tracts have a poverty rate below 20%.
- In Fountain Valley, all Census Tracts have a poverty rate below 20%.
- In Fullerton, there are high poverty areas in the southeast (predominantly Hispanic, low-medium segregation areas) and surrounding CSU Fullerton (likely due to the presence of college students).
- In Garden Grove, there are high poverty areas in the industrial area in West Garden Grove, in the Census Tract between Brookhurst Street and Gilbert Street north of Chapman Avenue (a low-medium segregation area that is predominantly Hispanic), and in the Census Tract in between SR-22 and Garden Grove Boulevard west of Gilbert Street (a high POC segregation area that is predominantly AAPI).
- In Huntington Beach, all Census Tracts have a poverty rate below 20%.
- In Irvine, the highest poverty area is surrounding UC Irvine (likely due to the presence of college students). There is also a high poverty area west of San Diego Creek north of I-405. This is primarily an industrial/commercial area encompassing the Irvine Business Complex.
- In La Habra, all Census Tracts have a poverty rate below 20%.
- In Laguna Niguel, all Census Tracts have a poverty rate below 20%.
- In Lake Forest, all Census Tracts have a poverty rate below 20%.
- In Mission Viejo, all Census Tracts have a poverty rate below 20%.
- In Newport Beach, all Census Tracts have a poverty rate below 20%.
- In Orange, all Census Tracts have a poverty rate below 20%, and all neighborhoods east of Villa Park have poverty rates below 10%.
- In Rancho Santa Margarita, all Census Tracts have a poverty rate below 20%.
- In San Clemente, all Census Tracts have a poverty rate below 20%.
- In Santa Ana, high poverty areas are concentrated in downtown and southeast of downtown where land use is primarily industrial and commercial, and in western Santa Ana, specifically the Census Tract northwest of the intersection of McFadden Avenue and Harbor Boulevard, where Kona Kai Mobile Home Park is located. All of these areas are high POC segregation areas with predominantly Hispanic populations.

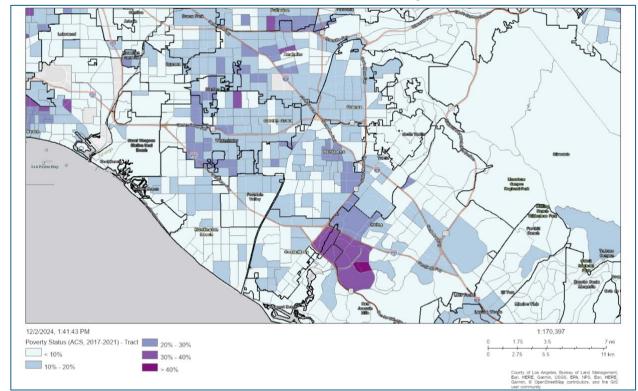

- In Tustin, all Census Tracts have a poverty rate below 20%.
- In Westminster, there are high poverty areas between Edwards Street and Beach Boulevard along Westminster Boulevard, and south of Bolsa Avenue west of Bushard Street. These areas are high POC segregation areas with predominantly AAPI populations.

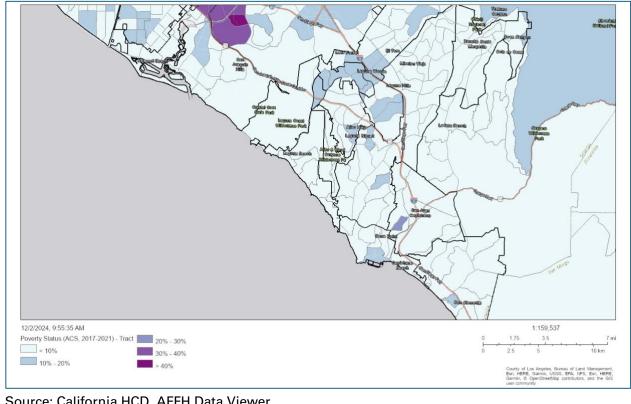

Map 10 - Poverty Status - Region

Map 10 – Poverty Status – North Orange County

Map 10 - Poverty Status - Central Orange County

Map 10 - Poverty Status - South Orange County

Table 8 - Poverty by Race/Ethnicity and National Origin, shows data from the 2018-2022 ACS on poverty rates by race/ethnicity and national origin, for the region, Orange County, the Urban County jurisdictions, and the HUD Entitlement Cities. The table shows the following:

- Countywide, the poverty rate is lower than region for all groups except AAPI residents (who have a poverty rate comparable to the region). There are significant racial/ethnic disparities. The Black poverty rate is highest and is nearly double the White poverty rate, and the foreign-born population is more likely to live below poverty than the native-born population.
- In the Orange County Urban County jurisdictions, the poverty rate is lower than the County overall. Similar to the County overall, the Black poverty rate is highest and is nearly double the White poverty rate, and the foreign-born population is more likely to live below poverty than the native-born population.
- In Aliso Viejo, the overall poverty rate is lower than the County. Similar to the County, the foreign-born population is more likely to live below poverty than the native-born population. (Note that the Black and Native American populations may be too small for the sample data to be accurate.)
- In Anaheim, the overall poverty rate is higher than the County and is comparable to the region poverty rate. Black and Hispanic residents have the highest poverty rates.

- Similar to the County overall, the foreign-born population is more likely to live below poverty than the native-born population.
- In Buena Park, the overall poverty rate is lower than in the County. Similar to the County overall, Black residents have the highest poverty rate.
- In Costa Mesa, the overall poverty rate is similar to the County and there are much larger racial/ethnic disparities. The Black poverty rate in the city is over 20%, which is nearly three times as high as the White poverty rate and double the AAPI poverty rate. Similar to the County overall, the foreign-born population is more likely to live below poverty than the native-born population.
- In Fountain Valley, the overall poverty rate is lower than the County. Similar to the County, the foreign-born population is more likely to live below poverty than the native-born population. (Note that the Black and Native American populations may be too small for the sample data to be accurate.)
- In Fullerton, the overall poverty rate is higher than the County and is comparable to the region poverty rate, and there are much larger racial/ethnic disparities than in the County overall. The Black poverty rate is over 22%, which is almost three times higher than the White and AAPI poverty rates. The Hispanic poverty rate is above 17%, which is more than double the White and AAPI rates. Similar to the County overall, the foreign-born population is more likely to live below poverty than the native-born population. (Note that the Native American population may be too small for the sample data to be accurate.)
- In Garden Grove, the overall poverty rate is higher than the County and is comparable to the region poverty rate. There are relatively small disparities by race/ethnicity, with Black residents experiencing the highest poverty rates, and foreign-born residents more likely to live below the FPL than native-born residents.
- In Huntington Beach, the overall poverty rate is lower than the County and the foreign-born population is much more likely to live below poverty than the nativeborn population. (Note that the Native American population may be too small for the sample data to be accurate.)
- In Irvine, the overall poverty rate is higher than the County and is comparable to the
 region poverty rate. Black, Hispanic, and AAPI residents experience similar poverty
 rates, which are all higher than the poverty rate for White residents. Foreign-born
 residents are more likely to live below the FPL than native-born residents.
- In La Habra, the overall poverty rate is similar to the County. Foreign-born residents
 more likely to live below the FPL than native-born residents, and Hispanic residents
 have a higher poverty rate than other groups. (Note that the Black and Native
 American populations may be too small for the sample data to be accurate.)
- In Laguna Niguel, the overall poverty rate is lower than the County. However, there are disparities between groups. Hispanic residents have the highest poverty rate in

- the city, and foreign-born residents are more likely to live below the FPL than nativeborn residents.
- In Lake Forest, the overall poverty rate is lower than in the County. However, there
 are disparities between groups. Hispanic residents have the highest poverty rate in
 the city, and foreign-born residents are more likely to live below the FPL than nativeborn residents.
- In Mission Viejo, the overall poverty rate is lower than the County. The data show the Black poverty rate to be much higher than other racial/ethnic groups, however the population size may be too small for the data to be accurate.
- In Newport Beach, the overall poverty rate is lower than the County. Unlike the
 County overall, foreign-born residents in the city are less likely to live below the FPL
 than native-born residents. Poverty rates for Black, AAPI, and Native American
 residents are the highest. However, note that the Black and Native American
 populations may be too small for the sample data to be accurate.
- In Orange, the overall poverty rate is similar to the County. In the city, Native American and Hispanic residents have the highest poverty rates, and foreign-born residents are more likely to live below the FPL than native-born residents.
- In Rancho Santa Margarita, the overall poverty rate is lower than the County. The
 data show the Native American poverty rate to be much higher than other
 racial/ethnic groups, however the population size may be too small for the data to
 be accurate.
- In San Clemente, the overall poverty rate is lower than the County and foreign-born residents are more likely to live below the FPL than native-born residents. The data show the Black poverty rate to be much higher than other racial/ethnic groups, however the population size may be too small for the data to be accurate.
- In Santa Ana, the overall poverty rate is higher than the County but lower than the region poverty rate. Black residents have the highest poverty rate (nearly 20%).
- In Tustin, the overall poverty rate is higher than the County but lower than the region poverty rate. Hispanic residents have the highest poverty rate (nearly double the White poverty rate), and foreign-born residents are more likely to live below the FPL than native-born residents.
- In Westminster, the overall poverty rate is higher than the County and the region. The Black poverty rate is over 20% and more than double the White poverty rate. The AAPI poverty rate is over 18% and is also more than double the White poverty rate. Foreign-born residents are more likely to live below the FPL than native-born residents. (Note that the Native American population may be too small for the sample data to be accurate.)

5. Access to Environmentally Healthy Neighborhoods

The following analysis describes any disparities in access to environmentally healthy neighborhoods by protected class groups.

Table 6 includes an *Environmental Health Index*, which captures the potential exposure to harmful toxins in a neighborhood. Higher index values indicate less exposure to harmful toxins, and therefore better environmental quality, in a neighborhood.

Table 6 shows the following regarding disparities in access to environmentally healthy neighborhoods in each of the participating jurisdictions:

- In the region, there is relatively low access to environmentally healthy neighborhoods for all groups, and racial/ethnic disparities exist. Access to environmentally healthy neighborhoods is highest access for White residents, and lowest for Black residents followed by Hispanic and AAPI residents. Access is lower for all groups living below the FPL, with the least access experienced by Hispanic residents living below the FPL.
- In the Orange County Urban County jurisdictions, there is relatively low access to
 environmentally healthy neighborhoods for all groups, and racial/ethnic disparities
 exist. Access to environmentally healthy neighborhoods is highest access for White
 residents, and lowest for AAPI residents followed by Black and Hispanic residents.
 Access is lower for all groups living below the FPL, except for White residents who
 have comparable access to the overall population.
- In Aliso Viejo, there is relatively high access to environmentally health neighborhoods for all groups compared to the region, and no racial/ethnic disparities.
- In Anaheim, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Buena Park, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Costa Mesa, residents have better access to environmentally healthy neighborhoods than residents of the region, but access is still low. There are some racial/ethnic disparities in access. Overall, AAPI residents have the least access to environmentally healthy neighborhoods, and Hispanic residents have the best access. For the population living below the FPL, Black and Native American residents have the least access.
- In Fountain Valley, there is very poor access to environmentally friendly neighborhoods for all residents compared to the region. There are small disparities in access for the population living below the FPL. Specifically, Black residents living below the FPL have the least access.

- In Fullerton, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Garden Grove, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Huntington Beach, residents have better access to environmentally healthy neighborhoods than residents of the region overall, but access is still fairly low and there are some racial/ethnic disparities. Access to environmentally healthy neighborhoods is lowest for Hispanic residents, and even more so for Hispanic residents living below the FPL.
- In Irvine, residents have better access to environmentally healthy neighborhoods than those of the region, but access is still low for all groups regardless of race/ethnicity.
- In La Habra, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Laguna Niguel, residents have better access to environmentally healthy neighborhoods than residents of the region overall, but access is still limited for all groups regardless of race/ethnicity.
- In Lake Forest, residents have better access to environmentally healthy neighborhoods than residents of the region overall, but access is still limited and there are some disparities among the population living below the FPL—specifically, Native American residents living below the FPL have the least access.
- In Mission Viejo, residents have better access to environmentally healthy neighborhoods than residents of the region overall, but access is still limited for all groups regardless of race/ethnicity
- In Newport Beach, residents have better access to environmentally healthy neighborhoods than residents of the region overall, but access is still limited for all groups regardless of race/ethnicity
- In Orange, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Rancho Santa Margarita, there is relatively high access to environmentally health neighborhoods for all groups compared to the region and other jurisdictions in Orange County, and no racial/ethnic disparities.
- In San Clemente, there is relatively high access to environmentally health neighborhoods for all groups compared to the region and other jurisdictions in Orange County, and no racial/ethnic disparities.
- In Santa Ana, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.
- In Tustin, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.

• In Westminster, there is very poor access to environmentally friendly neighborhoods for all residents, regardless of race/ethnicity.

Map 11 – Environmental Health, is a series of maps showing data from the California Office of Environmental Health Hazard Assessment (OEHHA) California Communities Environmental Health Screening Tool (CalEnviroScreen 4.0). These maps were created by California HCD to facilitate fair housing planning, using CalEnviroScreen data from OEHHA¹⁵.

The CalEnviroScreen tool is designed to identify communities most affected by pollution, and those where residents may be especially vulnerable to its effects. To do this, it uses a composite score based on 13 different indicators of pollution burden – such as exposure indicators (e.g., diesel particulate matter levels and lead risk from housing and environmental effect indicators (e.g., location of solid waste facilities) - as well as eight indicators of population characteristics including sensitive population indicators (e.g., asthma rates) and socioeconomic factor factors (e.g., poverty and linguistic isolation). More detailed information on the mapping methodology is available on the OEHHA website. On these maps, green areas represent regions with more positive environmental factors, while red areas indicate regions with more negative environmental factors.

These maps show the following relationship between an individual's place of residence and their access to environmentally healthy neighborhoods:

- Countywide, the areas with more positive environmental factors are along the coast, in the south, and northeast. The areas with more negative environmental factors are in the central parts of the County north of I-405 and west of the Costa Mesa Freeway (SR-55).
- In the Orange County Urban County jurisdictions, most neighborhoods have primarily positive environmental factors. The areas with more negative environmental factors are located in the following places:
 - o Stanton.
 - Southwest Placentia, next to Fullerton, which is an area of high POC segregation and is predominantly Hispanic.
 - San Juan Capistrano, in the Census Tract that encompasses the interchange between I-5 and the Ortega Highway (SR-74), which is a high POC segregation area and is predominantly Hispanic.
- In Aliso Viejo, all neighborhoods in the city have positive environmental factors.

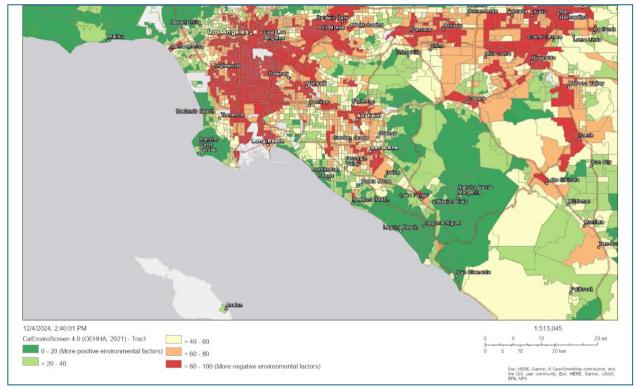

¹⁵ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

¹⁶ https://oehha.ca.gov/calenviroscreen

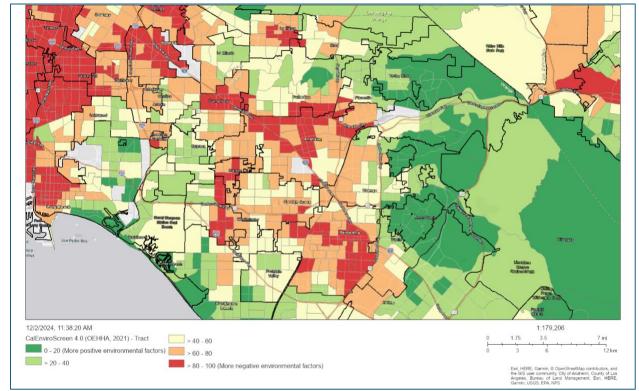

- In Anaheim, Anaheim Hills (a high White segregation area), has positive environmental factors. Much of the rest of the city is affected by negative environmental factors, with the severe environmental factors located in and around downtown, along I-5 cutting across the city, and along Riverside Freeway (SR-91) on the northern edge of the city.
- In Buena Park, there is one Census Tract with a score lower than 40 (indicating more
 positive environmental factors). This area is between La Palma Avenue and Crescent
 Avenue, on either side of Knott Avenue. Areas of the city with more negative
 environmental factors include the neighborhoods north of the Artesia Freeway (SR91) and adjacent to I-5, and the western part of the city, which includes numerous
 warehouses and distribution facilities.
- In Costa Mesa, areas with more positive environmental factors include neighborhoods east of Newport Boulevard (SR-55), which are high White segregation areas, as well as neighborhoods along the western edge of the city and north of I-405, which are also predominantly White. The areas with more negative environmental factors include neighborhoods downtown, which are predominantly Hispanic.
- In Fountain Valley, areas with more positive environmental factors include the neighborhoods in the southwest corner of city, which have a high concentration of White residents, and those surrounding Mile Square Regional Park, a high POC segregation area that is predominantly AAPI. The rest of the city experiences moderate environmental factors.
- In Fullerton, areas with more positive environmental factors include the neighborhoods near the Panorama Nature Preserve in the city's northeast. Areas with more negative environmental factors include the neighborhoods in the southeast part of the city, which are predominantly Hispanic—this area includes the commercial/industrial area along the Riverside Freeway (SR-91); and neighborhoods in the southwest part of the city, around Fullerton Municipal Airport and to the south, which are also predominantly Hispanic.
- In Garden Grove, residential neighborhoods in West Garden Grove, west of Knott Street have more positive environmental factors and are areas of high White segregation. The rest of the city experiences less positive environmental factors, with the most negative factors located in West Garden Grove, east of Knott Street an industrial and commercial area, and along Garden Grove Freeway (SR-22), in the city's southeast.
- In Huntington Beach, most of the city particularly along the coast and in the southeastern region – has more positive environmental factors. However, an area with less positive environmental factors is in the industrial/commercial area between Beach Boulevard (SR-39) and Gothard Street, spanning from Talbert

- Avenue to Edinger Avenue. This area overlaps with the one predominantly Hispanic Census Tract.
- In Irvine, most of the neighborhoods in the city have positive environmental factors.
 The few places with more negative environmental factors include the area west of San Diego Creek north of I-405 (which is primarily comprised of industrial and commercial land uses, including the Irvine Business Complex), the area between UC Irvine and I-405 (which is a high POC segregation area and is predominantly AAPI), and the eastern part of city along I-5 near Lake Forest, where Irvine Industrial Complex East and Irvine Technology Center are located.
- In La Habra, most of the city is affected by negative environmental factors, with the
 most negative factors concentrated in the central and southeast areas of the city/
 This is likely due to the proximity to warehouses, distribution centers, and Imperial
 Highway (SR-90). These areas overlap with the high POC segregation areas, which
 are predominantly Hispanic.
- In Laguna Niguel, all neighborhoods in the city have positive environmental factors.
- In Lake Forest, most neighborhoods in the city have positive environmental factors, except for those south of Serrano Creek, which experience more negative environmental factors.
- In Mission Viejo, all neighborhoods in the city have positive environmental factors.
- In Newport Beach, all neighborhoods in the city have positive environmental factors.
- In Orange, the neighborhoods east of Villa Park, which haver high White segregation, experience more positive environmental factors. Neighborhoods west of Glassel Street, which are predominantly Hispanic, are affected by more negative environmental factors.
- In Rancho Santa Margarita, all neighborhoods in the city have positive environmental factors.
- In San Clemente, most neighborhoods in the city have positive environmental factors, except for one area with moderate environmental factors. This area encompasses the neighborhoods north and east of Max Berg Plaza Park, and is classified as a low-medium concentration area with a predominantly White population.
- In Santa Ana, most of the city has negative environmental factors, with the most negative factors located in the east and southeast side of the city along the Costa Mesa Freeway (SR-55), where many of the commercial/industrial land uses are located. Other highly impacted areas include downtown and neighborhoods west of downtown. These are all areas of high POC segregation, and most are predominantly Hispanic, except for one of the Tracts to the far west of downtown, which is predominantly AAPI. There is one Census Tract with positive environmental factors located in the southern part of the city, within a racially integrated area between

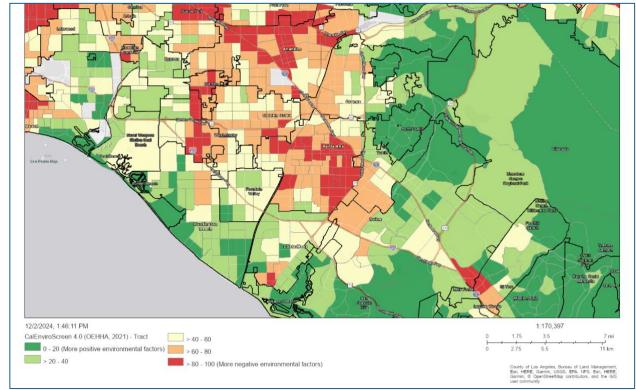

- Segerstrom High School and the Bristol Place Shopping Mall, where White residents are the predominant group.
- In Tustin, neighborhoods north of I-5 have more positive environmental factors, and neighborhoods south of I-5 have more negative environmental factors.
- In Westminster, most of the city has negative environmental factors, with the most negative factors located in the central neighborhoods, from I-405 north, between Beach Boulevard and Edwards Street.

6. Disability and Access

The following analysis describes the barriers that deny individuals with disabilities access to opportunity and community assets.

Table 7 – Disability by Type, presents the percentage of residents with various disabilities living in the region, Orange County, the Orange County Urban County jurisdictions, and in HUD Entitlement City. In the region and Orange County overall, the most prevalent form of disability is ambulatory difficulty, followed by independent living difficulty. Ambulatory difficulty is also the most prevalent form of disability in the Urban County jurisdictions and all HUD Entitlement Cities except for Aliso Viejo and Rancho Santa Margarita, where cognitive difficulty is most prevalent, and Irvine, where independent living difficulty is most prevalent.

Table 7 - Disability by Type

Note 2: Data Sources: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

According to data from HUD, in Orange County, a total of 398 housing discrimination cases were opened between January 2019 and November 2024 (when this report was prepared). As shown in Table 8, below, the majority (65.33%) of cases alleged discrimination based on disability. (Please note, the total number of cases in the table below equal more than 398, and the percentages equal more than 100% because one case can involve allegations of discrimination based on multiple protected classes). Table 9 shows the number of cases by jurisdiction, and the number and percentage of cases that included allegations of discrimination based on disability status. As the table shows, in nearly all jurisdictions, discrimination based (in whole or in part) on disability status comprises most cases.

Source: HUD FHEO

The fair housing challenges facing individuals with a disability were described during the stakeholder consultations and community meetings. Participants in these meetings reported the following barriers that deny individuals with disabilities access to opportunity and community assets:

- Individuals with disabilities often seek affordable housing in older buildings that may not meet accessibility standards, creating additional barriers.
- Affordable housing options are concentrated in areas of Santa Ana and Anaheim, with fewer options in higher opportunity areas of the County.
- Individuals with disabilities often face barriers in accessing necessary modifications in housing. Tenants must provide a doctor's letter to request modifications, yet landlords are often resistant to approving accommodation requests. In many cases, tenants are responsible for covering modification costs, unless the property is government-owned. Additionally, low-income individuals with disabilities struggle to afford the necessary modifications.

7. Patterns in Disparities in Access to Opportunity

The following analysis identifies and discusses any overarching patterns of access to opportunity and exposure to adverse community factors, including how these patterns compare to patterns of segregation, integration, and R/ECAPs. The analysis also identifies areas that experience: (a) high access; and (b) low access across multiple indicators.

In Orange County, there is a general pattern of disparities in access to opportunity between the cities in the central part of the County, and the cities and unincorporated areas along the coast and in the southern and northeastern parts of the County. Cities in central Orange County tend to have higher poverty areas, lower educational scores, lower economic scores, and worse environmental health factors. These cities are also comprised of many areas of high POC segregation, with predominantly Hispanic populations. Except for Garden Grove and Westminster, which have neighborhoods with predominantly AAPI populations. Conversely, the cities and unincorporated areas along the coast and in the south and northeast experience lower poverty rates, higher educational scores, higher economic scores, and better environmental health factors. These areas correspond to areas of high White segregation and predominantly White populations.

In the Orange County Urban County jurisdictions,

- The following racial/ethnic groups experience disparities in access across multiple indicators:
 - Hispanic residents, and particularly those living below the Federal Poverty Level (FPL), have the least access to low poverty neighborhoods, neighborhoods in close proximity to high performing schools, and neighborhoods with high labor force participation and human capital.

- The following areas experience low access across multiple indicators:
 - Southwest Placentia neighborhoods have low access to environmental health, high poverty, low economic scores, and are not located in a highquality transit area. This part of the city is a high POC segregation area that is predominantly Hispanic.
 - Stanton residents experience low access to environmentally healthy neighborhoods and high exposure to poverty on the south side of Katella Avenue and on the east side of Beach Boulevard north of Katella Avenue.
 - In San Juan Capistrano, the neighborhoods surrounding the I-5 and the Ortega Highway (SR-74) interchange experience poor environmental health and have low economic scores. This is a high POC segregation area and is predominantly Hispanic.
- Apart from the areas above, the rest of the Urban County jurisdictions experience high environmental quality and have relatively low poverty. In addition, the following areas have access to educational and economic opportunities, as reflected in high education and economic scores on the maps analyzed above:
 - Brea, Cypress, La Palma, Laguna Beach, Los Alamitos, North Tustin, Orange Park Acres, Villa Park, Yorba Linda, and the unincorporated areas east of Yorba Linda

In Aliso Viejo, residents have high access across multiple opportunities, including high education scores, high economic scores, high environmental quality, and low exposure to poverty. However, residents generally do not have good access to transit and neighborhoods with low transportation costs.

In Anaheim, Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, neighborhoods near the downtown have low environmental health, low education scores, low economic scores; but good access to HQTAs. Conversely, Anaheim Hills, which is a predominantly White area, has the best access to environmentally healthy neighborhoods with low poverty rates, high education scores, and high economic scores.

In Buena Park, Hispanic and Black residents have less access than other groups to neighborhoods with low poverty rates and high performing schools. Geographically, the neighborhoods in the center of the city, between I-5 and the Artesia Freeway (SR-91), have poor environmental health, lower educational scores, and lower economic scores.

In Costa Mesa, Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, neighborhoods downtown and west of downtown are less environmentally healthy and have lower education and economic

scores. These are also predominantly Hispanic neighborhoods. Conversely, neighborhoods east of Newport Boulevard (SR-55), which are predominantly White, have higher education and economic scores, are more environmentally healthy, and have lower poverty rates.

In Fountain Valley, neighborhoods across the city have relatively high economic and educational scores, and relatively low poverty rates. White or AAPI residents comprise the predominant population in all neighborhoods.

In Fullerton, Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, neighborhoods in southeast Fullerton (which are predominantly Hispanic), have relatively low economic and education scores, poor environmental quality, and relatively high poverty rates. Conversely, neighborhoods in the northern part of the city, which are predominantly White or AAPI, have higher education and economic scores, better environmental health, and lower poverty.

In Garden Grove, Hispanic and AAPI residents have the least access to low poverty neighborhoods and neighborhoods with high labor force participation and human capital. Additionally, Hispanic residents also have the least access to neighborhoods with high performing schools. Geographically, the neighborhoods with access to the most opportunities are in West Garden Grove, where education and economic scores are high, environmental quality is high, and poverty is low. West Garden Grove is a predominantly White area.

In Huntington Beach, Hispanic residents have relatively low access to neighborhoods with good environmental health, low poverty, high education scores, and high economic scores. Overall, access to opportunities in the city is high compared to the region.

In Irvine, residents across the city have relatively high access to opportunities. Geographically, the neighborhoods surrounding UC Irvine have relatively low economic scores and relatively high poverty rates, but this is most likely due to the concentration of college students in this area.

In La Habra, neighborhoods in the city's center and southeast of the center have poor environmental quality, low education scores, and low economic scores. These neighborhoods are also predominantly Hispanic.

In Laguna Niguel, residents have high access across multiple opportunities, including high education scores, high economic scores, high environmental quality, and low exposure to poverty. However, residents generally do not have good access to transit and neighborhoods with low transportation costs.

In Lake Forest, residents overall have relatively good access to opportunities, compared to the region. However, residents living below the FPL in the city generally have less access to opportunities than the rest of the population.

In Mission Viejo, residents across the city have relatively high access to opportunities (apart from transit and low-cost transportation). Most of the city's neighborhoods are predominantly White, except in the south.

In Newport Beach, residents across the city have relatively high access to opportunities. All of the city's neighborhoods are predominantly White.

In Orange, Hispanic, and Black residents (especially Black residents living below the FPL) have relatively low access to neighborhoods close to high performing schools, and to neighborhoods with high labor force participation and human capital. Geographically, neighborhoods west of Glassel Street (which are predominantly Hispanic), have lower education and economic scores, and worse environmental quality. Conversely, neighborhoods to the north and east of Villa Park (predominantly White), have high education and economic scores, and good environmental quality.

In Rancho Santa Margarita, residents across the city have relatively high access to opportunities. All of the city's neighborhoods are predominantly White.

In San Clemente, residents have relatively high access to opportunities compared to the region. Geographically, compared to the rest of the city, neighborhoods north and east of Max Berg Plaza Park have lower environmental quality, lower economic scores, and slightly higher poverty rates.

In Santa Ana, Hispanic residents are more likely than other groups to be exposed to poverty in their neighborhoods and are less likely than other groups to live in close proximity to high performing schools, or in neighborhoods with high labor force participation and human capital. Geographically, neighborhoods downtown, west of downtown, and southeast of downtown have low economic scores, low education scores, high poverty rates, and poor environmental quality. Neighborhoods in the north and south of the city have better economic and education scores.

In Tustin, Hispanic residents (especially those below FPL) are less likely than other groups to live in close proximity to high performing schools, or in neighborhoods with high labor force participation and human capital; and are more likely to be exposed to poverty in their neighborhoods.

In Westminster, AAPI residents are more likely than other groups to be exposed to poverty in their neighborhoods and are less likely than other groups to live in close proximity to high performing schools or jobs. Native American residents living below the FPL are also less likely to live in close proximity to high performing schools or jobs.

This section describes the public or private policies or practices, demographic shifts, economic trends, or other factors that may have caused or contributed to the patterns described above.

Broadly speaking, disparities in access to opportunities between and within jurisdictions in Orange County are due, in part, to:

- Lack of affordable (market or publicly subsidized) housing in high opportunity areas, due to market factors, governmental constraints, and community opposition to high density zoning.
- Lack of public and private investment in low-opportunity neighborhoods.
- Displacement of residents is due to rising housing costs.

Through the stakeholder consultations and community meetings, it was also reported that disparities in access to opportunities in the County are due to:

- In addition to landlord resistance to renting to HCV Program participants, the gap between HCV subsidy amounts and housing costs further inhibits HCV Program participants from accessing housing in higher cost (and higher opportunity areas).
- Many seniors are on fixed incomes and cannot keep up with the rising cost of housing.
- The high cost of land, which makes it hard to build new affordable housing in high opportunity areas.
- The California Coastal Act, which limits development in high opportunity areas along the coast.
- Lack of accessible housing for individuals with disabilities.

Detailed lists of the public or private policies or practices, demographic shifts, economic trends, and other factors that have caused or contributed to disparities in access to opportunities in each of the jurisdictions are included in Section IV.

E. Disproportionate Housing Needs

The following analysis describes which groups experience higher rates of housing cost burden, severe housing cost burden, overcrowding, or substandard housing when compared to other groups.

Housing Problems

Table 10 – Disproportionate Housing Problems, shows 2017-2021 Comprehensive Housing Affordability Strategy (CHAS) data on the percentage of households experiencing at least one of the following four housing problems, organized by race/ethnicity:

- Lacks complete kitchen facilities: Household lacks a sink with piped water, a range or stove, or a refrigerator.
- Lacks complete plumbing facilities: Household lacks hot and cold piped water, a flush toilet, and a bathtub or shower.
- Overcrowding: A household is considered overcrowded if there are more than 1.01 individuals per room.
- Cost burden: A household is considered cost burdened if the household spends more than 30% of its total gross income for housing costs. For renters, housing costs include rent paid by the tenant, plus utilities. For owners, housing costs include mortgage payment, taxes, insurance, and utilities.

A disproportionately greater need exists when members of a racial or ethnic group in a certain income range experience housing problems at a rate that is least 10 percentage points higher than the rate experienced by all households within that income level. Table 10 reports the following:

- American Indian or Alaska Native households, and Pacific Islander households have disproportionate housing needs within the 80%-100% AMI range.
- It is also worth noting that Hispanic households in the 30% AMI and below range experience housing needs at a much higher rate than the overall population in that income range, though the rate is slightly less than 10 percentage points.

Table 10 - Disproportionate Housing Problems, Orange County

Percent of households experiencing at least one housing burden, by income range							
Race/Ethnicity	Less than 30% AMI	30%-50% AMI	50%-80% AMI	80%-100% AMI			
Orange County as a whole	79.8%	78.9%	63.3%	42.6%			
White	77.4%	72.4%	61.6%	43.8%			
Black/African American	81.5%	85.9%	70.9%	37.5%			
Asian	72.5%	78.5%	61.7%	44.1%			
American Indian or Alaska Native	59.7%	60.7%	56.5%	54.2%			
Pacific Islander	78.1%	76.5%	71.7%	55.1%			
Hispanic	89.5%	86.0%	65.4%	39.3%			

Source: CHAS 2017-2021

Severe Housing Problems

Table 11 – Disproportionate Severe Housing Problems, shows 2017-2021 CHAS data on the percentage of households experiencing at least one of the following four severe housing problems, organized by race/ethnicity:

- Lacks complete kitchen facilities: Household does not have a stove/oven and refrigerator.
- Lacks complete plumbing facilities: Household does not have running water or modern toilets.
- Severe overcrowding: A household is considered severely overcrowded if there are more than 1.5 individuals per room.
- Severe cost burden: A household is considered severely cost burdened if the household spends more than 50% of its total income for housing costs. For renters, housing costs include rent paid by the tenant, plus utilities. For owners, housing costs include mortgage payment, taxes, insurance, and utilities.

According to Table 11, the following groups experience disproportionate need as defined above:

- Hispanic households have disproportionate severe housing needs within the 0%-30% AMI range.
- American Indian or Alaska Native households, and Pacific Islander households have disproportionate severe housing needs within the 50%-80% AMI range.
- American Indian or Alaska Native households have disproportionate severe housing needs within the 80%-100% AMI range.

Table 11 - Disproportionate Severe Housing Problems, Orange County

	Percent of households experiencing at least one severe housing burden, by income range						
Race/Ethnicity	Less than 30% AMI	30%-50% AMI	50%-80% AMI	80%-100% AMI			
Orange County as a whole	71.2%	55.5%	28.0%	14.8%			
White	68.7%	52.5%	22.9%	10.5%			
Black/African American	72.9%	55.5%	25.2%	4.3%

The following analysis identifies which areas experience the greatest housing burdens and describes which of these areas align with segregated areas, integrated areas, or R/ECAPs, and the predominant race/ethnicity or national origin groups in such areas.

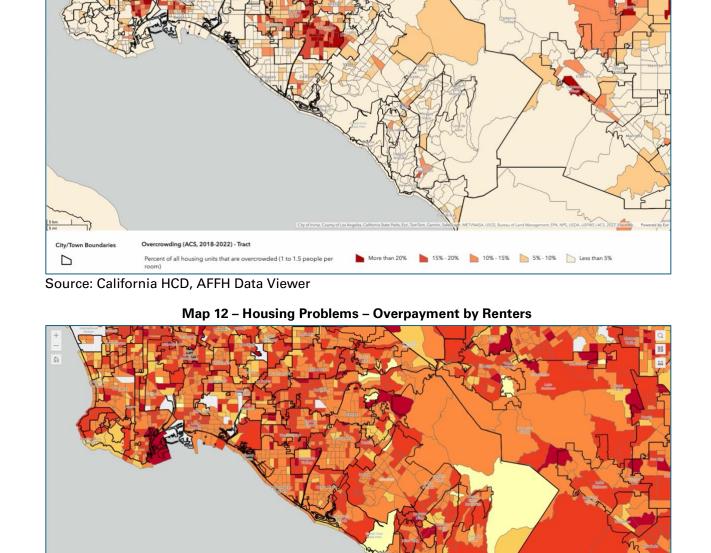

Map 12 – Housing Problems, is a series of maps illustrating concentrations of households experiencing housing burdens in Orange County. These maps were created by California HCD to facilitate fair housing planning, using data from the U.S. Census Bureau American Community Survey, 2018-2022 5-Year Estimates¹⁷. On these maps, areas with darker shading have a higher percentage of households experiencing a particular housing problem (i.e., cost burden, overcrowding, incomplete plumbing, and incomplete kitchen facilities.

The maps show that the areas experiencing the greatest housing burdens are the following:

- Overcrowding is an issue that is generally only experienced by the residents of cities
 in the central and northern parts of the County. Overcrowding is not a significant
 concern in the coastal areas, the areas south and east of Irvine, or the northeastern
 region, including Yorba Linda and the unincorporated areas to the east Conversely,
 more than 20% of all units are overcrowded in the following areas:
 - In Santa Ana, in most of the city, which are also areas of high POC segregation and are predominantly Hispanic.
 - In Garden Grove, in the eastern and southeastern neighborhoods, which are areas of high POC segregation and are predominantly Hispanic in the east.

¹⁷ The maps were downloaded from the AFFH Data Viewer, which can be accessed at https://www.hcd.ca.gov/planning-and-community-development/affirmatively-furthering-fair-housing

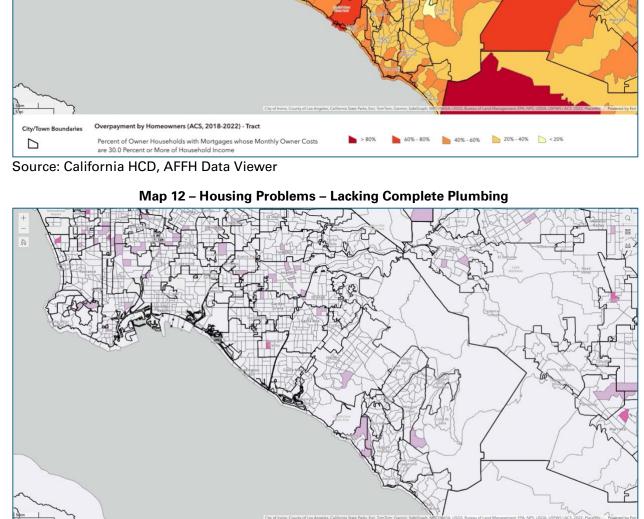

- In Anaheim, in the neighborhoods north and south of downtown, and around Disneyland. These are also areas of high POC segregation and are predominantly Hispanic.
- o In Fullerton, in the neighborhoods south of downtown, which are predominantly Hispanic.
- Overpayment by renters is an issue everywhere in the County. In most neighborhoods in the County, over 40% of renter households are struggling with overpayment.
- Overpayment by owners is less of an issue than overpayment by renters but is also widespread throughout the County. In many neighborhoods, 20-40% of homeowner households struggle with overpayment. There are only a few areas where more than 60% or fewer than 20% of homeowner households struggle with overpayment.
- Incomplete plumbing is not a significant concern in the County, as fewer than 2% of homes experience this issue. However, one exception is Fountain Valley, where 5-10% of housing units are affected. This area includes the neighborhood surrounding Fountain Valley High School and north to Warner Avenue, which is an area of high POC segregation.
- Incomplete kitchen facilities are also not a significant concern in the County. In most of the County less than 10% of homes experience this issue. The areas where more than 10% of homes experience this issue are:
 - In Anaheim, in the western neighborhoods, which are racially integrated and predominantly Hispanic, except for one Census Tract that is predominantly AAPI.
 - In Orange, in the predominantly Hispanic area west of Glassel Street and north of Walnut Avenue.
 - o In La Habra, in one Census Tract in the north central part of the city.
 - In Irvine, near UC Irvine (which may reflect a concentration of student housing).

The following analysis describes the differences in rates of renter and owner-occupied housing by race/ethnicity.

Table 12 – Housing Tenure by Race/Ethnicity, shows the percentages of households that are renters and homeowners by race/ethnicity, based on data from the 2018-2022 American Community Survey. The table shows that,

- Countywide, the homeownership rate is 56.5%, which is higher than the homeownership rate in the region. There are large disparities in homeownership by race/ethnicity. Black households have the lowest homeownership rate (32.4%). Less than 40% of Hispanic households own their home, and approximately 42% of Native households own their home. White and AAPI households have the highest homeownership rates.
- In the Orange County Urban County jurisdictions, homeownership rates are higher overall and for each group compared to the County. The same disparities in homeownership by race/ethnicity exist as in the County.
- In Aliso Viejo, homeownership rates for AAPI, Black, and Hispanic households are higher than in the County overall, and homeownership rates for White households are lower.
- In Anaheim, homeownership rates are lower for all groups compared to the County, and similar racial/ethnic disparities exist.

- In Buena Park, homeownership rates and racial/ethnic disparities are similar to the County overall; however, the disparities are even larger due to a higher homeownership rate for White households compared to the County, and a lower rate for Black households compared to the County.
- In Costa Mesa, homeownership rates are lower for all groups compared to the County, and similar racial/ethnic disparities exist.
- In Fountain Valley, homeownership rates are higher compared to the County for all groups, except Black households. However, it is important to note that the small sample size for Black households may affect the accuracy of the data is not accurate.
- In Fullerton, homeownership rates are lower for all groups than the County overall, except for AAPI households. Racial/ethnic disparities exist, with Native American households the least likely to own their home, and AAPI households most likely.
- In Garden Grove, the Black and Hispanic homeownership rate is half the White homeownership rate. The AAPI homeownership rate in the city is lower than the AAPI homeownership countywide.
- In Huntington Beach, homeownership rates are lower for White, Black, and Hispanic households compared to the County overall, and higher for AAPI and Native American households. Similar racial/ethnic disparities exist in the city as in the County.
- In Irvine, homeownership rates are lower for all groups compared to the County overall, and racial/ethnic disparities are similar to the County, with Black and Hispanic households experiencing the lowest homeownership rates (15.7% and 18% respectively)
- In La Habra, homeownership rates are higher for all groups compared to the County, and similar racial/ethnic disparities exist as in the County.
- In Laguna Niguel, homeownership rates are higher for all groups compared to the County, and racial/ethnic disparities exist—the Hispanic homeownership rate is the lowest, followed by the Black homeownership rate. The AAPI homeownership rate is the highest, followed by the White homeownership rate.
- In Lake Forest, homeownership rates are higher for all groups compared to the County, except Native American households. Racial/Ethnic disparities exist, with AAPI and White homeownership higher than Black and Hispanic homeownership rates.
- In Mission Viejo, homeownership rates across all groups are much higher than in the County overall, though racial/ethnic disparities still exist. The Black homeownership rate is the lowest in the city, though it is above 60%.
- In Newport Beach, homeownership rates are lower for all groups compared to the County overall, except for AAPI households, who have slightly higher homeownership rate in the city. The Black and Native American homeownership

- rates are very low in the city. However, due to the small sample sizes for these groups, the data may not be entirely accurate.
- In Orange, homeownership rates are comparable to the County overall, and similar disparities exist. However, the disparities are slightly larger in the city than in the County, as White, AAPI, and Hispanic homeownership rates are higher than in the County overall, while the Black homeownership rate is lower.
- In Rancho Santa Margarita, homeownership rates are higher for all groups when compared to the County. However, there are still racial/ethnic disparities. Hispanic households have the lowest homeownership rate, and it is 20 percentage points lower than the AAPI homeownership rate, which is the highest rate in the city.
- In San Clemente, homeownership rates are higher for White, AAPI, and Hispanic households compared to the County overall, while rates are lower for Black and Native American households. Due to the small sample size for Black and Native American households, the data may not be accurate. This causes the racial/ethnic disparities in homeownership rates to be larger than at the County level.
- In Santa Ana, racial/ethnic disparities in homeownership rates are similar to the County overall, but less pronounced. This is because homeownership rates in the city are lower for White and AAPI households, and higher for Black, Hispanic, and Native American households compared to the County overall.
- In Tustin, homeownership rates are very low for Black and Hispanic households, equaling less than half of the homeownership rate for AAPI and White households.
 The AAPI homeownership rate is higher in the city than in the County overall, and the White homeownership rate is lower in the city than in the County overall.
- In Westminster, there are large racial/ethnic disparities in homeownership. Black, Hispanic, and Native American households have the lowest rates (30%), and these rates are less than half the homeownership rate for White households, which is the highest in the city. The AAPI homeownership rate in the city is lower than in the County overall and is nearly 20 percentage points lower than the White homeownership rate in the city.

Note 2: Data Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

Charts 1 and 2, below, show denial rates for home purchase loans by race/ethnicity in Orange County and California between 2010-2021. In both Orange County and California, denial rates are highest for Black loan applicants, followed by Hispanic then Asian applicants. White applicants have the lowest denial rates. Denial rates are lower in Orange County for all groups compared to the state, except for Hispanic applicants who have the same denial rate in both geographies. Since the Great Recession, denial rates have fallen for all groups.

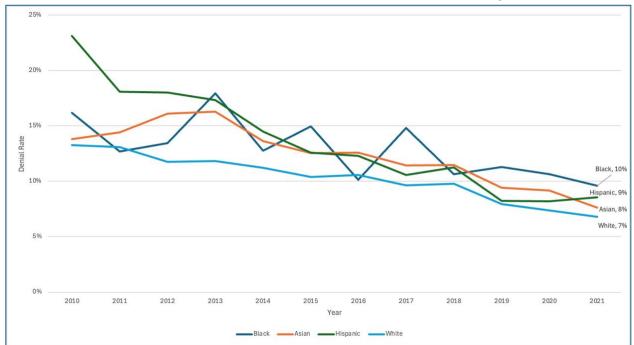

Chart 1: Home Purchase Loan Denial Rates by Race/Ethnicity, Orange County

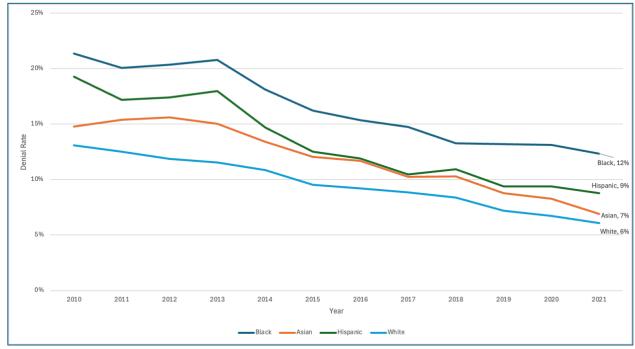

Chart 2: Home Purchase Loan Denial Rates by Race/Ethnicity, California

Source: Analysis of Home Mortgage Disclosure Act (HMDA) data by the Federal Reserve Banks of Philadelphia and Cleveland.

This section describes the public or private policies or practices, demographic shifts, economic trends, or other factors that may have caused or contributed to the patterns described above.

Broadly speaking, disproportionate housing needs across and within jurisdictions in Orange County are influenced by several factors, including:

- The age of housing stock in some neighborhoods, and the high cost of home repairs/rehabilitation relative to incomes.
- Insufficient number of Housing Choice Vouchers or other types of publicly subsidized housing
- Land use and zoning laws that have led to the dominance of single-family housing, which is typically more expensive than multifamily housing.

Through stakeholder consultations and community meetings, it was also reported that disproportionate housing needs in the County are due to:

Eviction notices have a particularly adverse impact on tenants, especially on families
who are fleeing or those with a history of domestic violence. While the judicial
system is making efforts to address these issues, barriers such as language and
understanding legal terminology continue to pose challenges.

- Lack of adequate shelter for individuals experiencing homelessness, particularly for the most vulnerable groups such as trans women.
- Insufficient homebuyer education for minority homebuyers.
- Lack of resources for organizations providing education and services to protected class groups.
- Language and digital literacy barriers that make it hard for LEP populations to locate and access housing resources.

Detailed lists of the public or private policies or practices, demographic shifts, economic trends, and other factors that have caused or contributed to disproportionate housing needs in each of the jurisdictions are included in Section IV.

F. Local and State Policies and Practices Impacting Fair Housing

The following analysis describes how local laws, policies, ordinances, and other practices impede or promote fair housing (including how they impede or promote the siting or location of affordable housing in well-resourced neighborhoods, and equitable access to homeownership and other asset building and economic opportunities).

In general, land use and zoning laws across Orange County have led to the dominance of single-family housing, which is typically more expensive than multifamily housing and has contributed in various ways to reinforcing longstanding patterns of segregation, concentration of poverty, and disparities in access to opportunities. Through the Housing Element process mandated by the State of California, each jurisdiction has identified various public and/or private policies and practices that have contributed to the fair housing issues identified in this AFH, as well as efforts they are making to promote fair housing. These items are detailed in Section IV.

This section describes any state or local fair housing laws and the characteristics protected under each law.

In the State of California, the Fair Employment and Housing Act (FEHA) and the Unruh Civil Rights Act prohibit discrimination in housing based on the following characteristics:

- Race
- Color
- National origin (including language use restrictions)
- Religion
- Sex
- Familial status (including children under the age of 18 living with parents or legal custodians; pregnant women and people securing custody of children under 18)
- Handicap (disability)
- Age
- Ancestry

- Citizenship
- Gender Identity and Gender Expression
- Genetic Information
- Immigration Status
- Marital Status
- Primary Language
- Sexual Orientation
- Source of Income
- Military or veteran status

This section describes efforts to increase fair housing compliance and enforcement capacity, and to ensure compliance with existing fair housing and civil rights laws and regulations.

Orange County jurisdictions rely on the state and local nonprofit fair housing providers to ensure fair housing compliance and enforcement, including the following organizations:

California Civil Rights Department

The California Civil Rights Department (CRD), formerly known as the Department of Fair Employment and Housing (DFEH), is responsible for enforcing state fair housing laws that make it illegal to discriminate against or harass someone because of a protected characteristic, that require reasonable accommodations for disabilities, and that prohibit retaliation against someone for exercising their rights. The CRD receives and investigates complaints and provides mediation and conflict resolution services throughout the state.

Fair Housing Council of Orange County

The Fair Housing Council of Orange County (FHCOC) is a nonprofit with a mission of ensuring access to housing and preserving human rights. FHCOC provides a variety of services in multiple languages, including community outreach and education, homebuyer education, mortgage default counseling, landlord-tenant mediation, and limited low-cost advocacy. In addition to these client services, FHCOC investigates claims of housing discrimination and assists with referrals to the state. FHCOC currently works in Anaheim, Santa Ana, Fountain Valley, Lake Forest, Laguna Niguel, Rancho Santa Margarita, the City of Orange, and Orange County.

Fair Housing Foundation

The Fair Housing Foundation (FHF) serves parts of Los Angeles County and several cities in Orange County, including Aliso Viejo, Buena Park, Costa Mesa, Fullerton, Garden Grove, Huntington Beach, Irvine, La Habra, Mission Viejo, Newport Beach, Orange, San Clemente, Tustin, and Westminster. FHF provides landlord-tenant counseling and mediation, rental housing counseling, and community outreach and education. In addition, the FHF screens

fair housing complaints, investigates through testing, and either engages in conciliation or mediation efforts or refers the complaints to the appropriate administrative agencies.

This section describes the status of any unresolved findings, lawsuits, enforcement actions, settlements, or judgments in which the program participant has been a party related to fair housing or other civil rights laws in the jurisdiction.

There are no unresolved findings, lawsuits, enforcement actions, settlements, or judgments in which the program participants have been a party related to fair housing or other civil rights laws in the jurisdictions.

IV. Fair Housing Issues and Action Plan

For each participating jurisdiction, this section outlines (1) the issues identified in the preceding analysis; (2) the factors that create, contribute to, perpetuate, or increase the severity of each fair housing issue; and (3) the actions each jurisdiction has taken or will take to address those contributing factors in order to Affirmatively Further Fair Housing. The actions listed below are included in the most recently approved and adopted Housing Element for each jurisdiction, and include actions taken to affirmatively further fair housing since the adoption of the Orange County Analysis of Impediments to Fair Housing Choice in 2020.

A. Orange County Urban County

Across the Urban County jurisdictions, the preceding analysis identified the following fair housing issues:

- Disparities in Access to Opportunities: Hispanic residents, and particularly those living below the FPL, have the least access to low poverty neighborhoods, neighborhoods in close proximity to high performing schools, and neighborhoods with high labor force participation and human capital.
- Disproportionate Housing Needs: Housing cost burden is an issue for renters across
 Orange County, including in the Urban County jurisdictions. Additionally, there are
 racial/ethnic disparities in homeownership. Specifically, Black, Latino, and Native
 American households have low homeownership rates compared to White and AAPI
 households. The Black homeownership rate, the lowest among all groups, is
 approximately half the White homeownership rate, which is the highest.

Within the jurisdictions that make up the Urban County, the following additional fair housing issues were identified:

- Unincorporated Orange County
 - Segregation: There are areas of high White segregation in the unincorporated areas east of Rancho Santa Margarita, in North Tustin, in Orange Park Acres, and in Rossmoor.
- Brea
 - Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.
- Cypress
 - Segregation: There are areas of high POC segregation (which are predominantly AAPI neighborhoods), and there is overlap between the location of publicly supported housing, including a high rate of voucher use,

- and areas of high POC segregation in the neighborhood near King Elementary School, in the north of the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Dana Point

- Segregation: There are areas of high White segregation in the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

• La Palma

 Segregation: There are areas of high POC segregation in the city, which are predominantly AAPI neighborhoods.

Laguna Beach

- o Segregation: There are areas of high White segregation in the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Laguna Hills

- Segregation: There are areas of high White segregation in the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Laguna Woods

- Segregation: There are areas of high White segregation in the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Placentia

- Segregation and R/ECAPs: There are areas of high White segregation in the north of the city, and high POC segregation areas in the southwest corner of the city. The high POC segregation area also has several publicly supported housing units, including a high rate of voucher use. Additionally, in this part of the city, the neighborhoods south of Orangethorpe Avenue are a R/ECAP. The R/ECAPTract is predominantly Hispanic, as are the neighborhoods to the west and south in Fullerton and Anaheim.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing. Geographically, southwestern Placentia neighborhoods have low access to environmental health, high poverty, low

economic scores, and are not located in a high-quality transit area. As noted above, this part of the city is a high POC segregation area that is predominantly Hispanic.

San Juan Capistrano

- Segregation: There is a high POC segregation area that is predominantly Hispanic. There is overlap between the location of publicly supported housing, including a high rate of voucher use, and the areas of high POC segregation in the Census Tract that encompasses the interchange between I-5 and the Ortega Highway (SR-74).
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing. Geographically, the neighborhoods around the I-5 and the Ortega Highway (SR-74) interchange experience poor environmental health and have low economic scores. This is a high POC segregation area and is predominantly Hispanic.

Seal Beach

- Segregation: There are areas of high White segregation in the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Stanton

- Segregation: There are areas of high POC segregation in the city, which are predominantly Hispanic or AAPI neighborhoods. There are overlaps between the location of publicly supported housing, including a high rate of voucher use, and areas of high POC segregation throughout the city.
- Disparities in Access to Opportunity: Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing. Additionally, all Stanton residents experience low access to environmentally healthy neighborhoods, and residents in the neighborhoods on the south side of Katella Avenue and on the eastside of Beach Boulevard north of Katella Avenue also experience high exposure to poverty.

Villa Park

Segregation: There are areas of high White segregation in the city.

Yorba Linda

 Segregation: There are areas of high POC segregation in the northern area of the city, which is predominantly AAPI, and areas of high White segregation elsewhere

The contributing factors to each of the fair housing issues listed above, along with each jurisdictions' fair housing goals and actions, are outlined as follows:

1. Unincorporated Orange County

Issue: Segregation and R/ECAPs

Contributing Factors:

- 1. Lack of investment in certain neighborhoods, including lack of community revitalization strategies, lack of private investment, and lack of public investment, including in services and amenities.
- 2. Limited quantity of affordable housing due to community opposition, land use and zoning laws, and occupancy codes and restrictions.
- 3. Private discrimination, including source of income discrimination.
- 4. Limited knowledge of fair housing laws due to: limited resources to pay for outreach; increasingly fewer people rely on newspapers to receive information, and public notices or printed flyers are costly and ineffective means to reach the community at large; unknown language barriers and resource barriers to accessing information.

Act	tions:	Timeframe:
	cilitate Affordable Housing Development through the following ions:	
1.	Create a Housing Opportunities Overlay Map and webpage providing information about the Housing Opportunities Overlay and identify areas where higher density projects would be permitted with expedited processing, and which may be eligible for density bonuses.	Within 18-months of adoption/certification of the Housing Element.
2.	Develop informational materials on the County's website regarding the County's lot consolidation incentives and density bonus program.	Within 18-months of adoption/certification of the Housing Element.
3.	Update the "Orange County Housing Opportunities Manual" and will also create and distribute promotional materials explaining the County's expedited permit processing and incentives for affordable housing to be provided to developers in the region.	Within one year of adoption and certification of the Housing Element.
4.	Publish and review the Affordable Housing Rental List.	Annually
5.	Review the County Housing Authority's participation in the Housing Choice Voucher Section 8 Rental Assistance Program and pursue additional vouchers/funding when available.	Annually
6.	Work with applicants who propose for-rent residential projects to encourage four-bedroom units for large families as part of the proposed developments.	As proposals are received (ongoing)
7.	Meet with Developers and DPRC to identify potential constraints to the development of affordable housing and housing for those with special needs in the County's zoning regulations.	Within one year of adoption. Address within six months.
	ordination with Affordable Housing Stakeholders through the owing actions:	
8.	Provide letters of support to affordable housing developers' applications to local, State, and federal agencies for funding,	Initiate by January 2025

Orange County 149 25-29 Regional AFH

provided the proposed projects are consistent with the goals and policies of the <i>General Plan</i> .	
9. Work with cities and LAFCO to ensure that new planned communities in sphere of influence areas provide adequate sites at appropriate densities for affordable housing.	Annually
10. Conduct meetings with stakeholders, including the development community and property owners to facilitate housing development.	Annually
11. Attend and promote development incentives at the monthly Housing Opportunities Committee meeting and the bi-monthly OC Housing Finance Trust meetings.	Twice annually
12. Meet with owners of the religious properties identified in the inventory of sites and provide information on regulatory changes, development standards and affordability requirements and incentives and/or assistance available through the County for development of housing on religious institution properties.	By January 2025
13. Meet with nonprofit developers and housing organizations to evaluate projects for acquisition and rehabilitation/new construction of new shelters, and long-term affordable housing, including senior housing.	Annually
Increase knowledge and enforcement of fair housing laws through the following actions:	
14. Implement Restrictive Covenant Modification Plan (RCM) including Phase III, examination of remaining handwritten documents for unlawful languages and process.	By July 2027
15. Continue to work under contract with the FHCOC and/or other qualified fair housing service providers to provide fair housing services for all segments of the community. Evaluate and adjust the scope of services to ensure the County addresses any emerging trends in fair housing.	Annually
16. Provide federal/state/local information regarding discrimination to residents, including applicable Fair Housing Information and Discrimination Complaint Forms.	Annually
17. Maintain bilingual staff to assist non-English speaking families and ensure handicap accessible offices.	Annually
18. Work with the fair housing agencies to provide information regarding housing discrimination and intervention to resolve complaints.	Annually
19. Use non-traditional media (e.g., social media, County website) in outreach and education efforts in addition to print media and notices.	Annually

Orange County 150 25-29 Regional AFH

20. Update the Affordable Housing Rental List (translated in multiple languages) on the County website.	Annually
21. Inform community members of the existence of the Orange County Fair Housing Council (FHCOC) and its oversight of fair housing practices by posting on the County's website and at the Planning counter.	By December 2025
22. The County shall work with local resource agencies to implement an outreach program informing families within the County of housing and services available for individuals with developmental disabilities.	Annually
Amend the zoning code and other local ordinances to facilitate new housing opportunities and increase housing mobility, including:	
23. Allow emergency shelters without a Use Permit or other discretionary permit in the commercial and industrial portions of the Housing Opportunities Overlay Zone.	By October 2024
24. Remove the Site Development Permit requirement for multifamily developments of one to four units and any developments with 20% affordable units and allow by-right. Amend the Site Development Permit requirements for objective findings for developments of units or more.	By October 2024
25. Adopt Objective Design Standards (ODS).	By October 2024

Issue: Disparities in Access to Opportunities

Contributing Factors:

- 1. Unaffordable rents and sales prices in a range of sizes.
- 2. Displacement of residents due to economic pressures.
- 3. Lack of private and public investment in specific neighborhoods.

Actions:		Timeframe:
	accessible and affordable housing opportunities for persons abilities through the following actions:	
flexil cond appr cons	ew Definition of Single Housekeeping Unit. To promote bility to accommodate residents with different living ditions, the County will review and adopt revisions as copriate to its zoning code to provide greater flexibility in sideration of accommodating a variety of household ations for related and unrelated individuals living together.	By December 2026.
ordir and f	County will review and revise its group home and zoning nances as needed to ensure ongoing compliance with state federal fair housing laws. For example, the ordinance will be ewed to ensure that a group home that operates as a single	By December 31, 2025.

	housekeeping unit is permitted in any zoning district in the same manner as other residential uses in that zone (e.g., multifamily, single family). The definition of single housekeeping unit as to group homes will be revised to eliminate (1) the reference to residential activities that do not occur on a nonprofit basis and, (2) the requirement that the residents share lease agreements or ownership. In addition, the standards for group homes shall be objective and not unnecessarily constrain approval of group homes in that zoning district.	
3.	Seek State and Federal monies, as funding becomes available, for permanent supportive housing construction and rehabilitation targeted for persons with disabilities, including persons with developmental disabilities.	Annually.
4.	Develop a program /ordinance to provide regulatory incentives, such as expedited permit processing and fee waiver, to projects targeted for persons with disabilities, including persons with developmental disabilities.	Within 2 years of adoption of the Housing Element.
5.	On an ongoing basis, enforce building code provisions requiring accessible design.	Annually.
6.	On an ongoing basis, implement reasonable accommodation ordinance.	Ongoing.
7.	On an ongoing basis, ensure the permitting requirements for group homes and care facilities for seven or more persons are consistent with State law and fair housing requirements.	Ongoing.
	rease affordable housing opportunities in high opportunity areas ough the following actions:	
8.	Sites Rezoning – Amend the HOO to accommodate a higher density of development, establish a minimum density for R2, R3, R4, RP, and MX zones, rezone C1, C2, CC, CH, CN, RP to MX, and expand the HOO.	Adopted by the Board of Supervisors on June 25, 2024.
9.	No Net Loss – Identify and make available additional adequate sites to accommodate the share of housing need by income level.	By end of 2024, if required.
10.	Review incentives for density bonuses, expedited permit processing procedures, development standards, tax-exempt conduit financing, infrastructure financing assistance, and direct financial assistance.	Every two years.

11. Review with DPRC members the existing and proposed codes, procedures, and fees to ensure that they do not unreasonably hinder housing production.	Within 1 FY of approval.
12. Review funding opportunities and aggressively pursue, as the County has been, all state and federal housing grant funds for which the County is eligible	Bimonthly.
13. Approve affordable housing projects in Rancho Mission Viejo administratively.	Ongoing.
14. Coordinate with the City of Newport Beach for development and shared RHNA credit of the identified parcels on the County-owned Coyote Canyon site.	By November 2024.
15. Implement an informational program to disseminate information about developing ADUs.	By end of 2025; annually thereafter.
16. Prepare pre-approved ADU plans.	July 2024.
17. Implement the Affordable ADU Loan Program Policy Manual.	Within 2 years of adoption.
18. Initiate consideration of an Inclusionary Housing Program/Policy.	By December 2026.
19. Leverage available funding sources, such as Homekey funds, to purchase or rehabilitate housing, including hotels, motels, vacant apartment buildings, and other buildings and convert them into interim or permanent, long-term housing.	Annually.

Issue: Disproportionate Housing Needs

Contributing Factors:

- 1. Unaffordable rents and sales prices in a range of sizes.
- 2. Shortage of subsidized housing units.
- 3. Cost of repairs and rehabilitation.
- 4. Dominance of single-family housing, which is typically more expensive than multifamily.

Actions:		Timeframe:
Re	habilitate and Preserve Existing Residential Units through the following actions:	
1.	Use available housing funding to finance housing rehabilitation, focusing in Central and North County.	Annually.
2.	Implement and review the County's code enforcement and graffiti removal programs.	Ongoing.
3.	Provide infrastructure maintenance in existing residential neighborhoods, including through the Capital Improvement Program (CIP), focusing in Central and North County.	Annually.
4.	Participate in the CDBG, HOME and related programs as a means of providing passthrough funding to affordable housing projects and efforts to rehabilitate existing affordable units or projects, focusing in Central and North County.	Annually.
5.	Site Replacement – Comply with site replacement requirement pursuant to Government Code Section 65583.2(g)(3). Replace sites identified in the inventory that currently have residential uses, or within the past five years have had residential uses that have been vacated or demolished, and: a. Were subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of low or very low-income; or b. Subject to any other form of rent or price control through a public entity's valid exercise of its police power; or c. Occupied by low or very low-income households for the purpose of this program "previous five years" is based on the date the application for development was submitted.	As necessary (ongoing).
6.	Monitor projects with expiring affordability covenants and take appropriate action to preserve these affordable units whenever possible. Promote funding and other opportunities to owners considering conversion of units through existing outreach programs and the County's website.	Annually.
7.	Enforce the provisions of the County's condominium and mobile home park conversion ordinance.	Annually.
	ake neighborhood improvements in low opportunity areas in Central and North unty, including the following:	

Orange County 154 25-29 Regional AFH

 8. Implement the County CIP plan including ADA, roadway, and infrastructure improvements in the Unincorporated County. Improvements may include: a. Curb ramp, sidewalk, and driveway upgrades and improvements to satisfy current ADA standards and requirements. b. Parkway, sidewalk, and intersection improvements. 	Annually.
 Facilitate the development or improvement of parks and open space under the County's CIP plan or other implementation plan benefiting residents of Unincorporated communities, particularly communities with reduced access to environmental opportunities. Projects may include: Development of Mile Square Regional Park in Fountain Valley Santa Ana River Trail Ted Craig Regional Park improvements Yorba Regional Park improvements 	By 2029.
Increase housing opportunities, with a focus in Central County, for persons experiencing homelessness through the following actions:	
10. Facilitate the development of one interim or permanent, long-term housing project using available funding sources, such as Homekey funds (provided it is made available through the State), during the planning period which is anticipated to assist 50 persons experiencing homelessness annually.	Annually.

2. Brea

Issue: Disparities in Access to Opportunity and Disproportionate Housing Needs

- 1. Lack of community revitalization strategies.
- 2. Lack of public investments in specific neighborhoods, including services and amenities.
- 3. High cost of housing rehabilitation and repairs.
- 4. High levels of overpayment create displacement risk.
- 5. Limited availability of affordable housing in all areas of the city, including those where rents and sales prices have become exclusive.
- 6. Community concern about housing densities.
- 7. Lack of knowledge of fair housing laws.

Ac	tions:	Timeframe:
Increase knowledge of fair housing laws through the following actions:		
1.	By the end of 2022, post additional fair housing information at the Family Resource and Senior Centers and on their digital platforms. Starting in 2022, conduct an informational workshop at these locations once every two years.	By the end of 2022
2.	In 2023, conduct a fair housing information session for the City Council. Invite local nonprofits (including the Orange County Human Relations Commission, the Kennedy Commission, and People for Housing O.C.) to attend.	By the end of 2023
3.	Publish Fair Housing information, including any community meetings in Brea Line (city newsletter), as well as non-traditional media, such as Instagram and Facebook, and conduct targeted outreach to tenants, mobile home park residents, and other lower-income populations.	Annually
4.	Increase the distribution of fair housing materials by at least 25 percent to increase awareness of fair housing options among residents, including special needs groups and low-income residents. Seek to increase the number of Brea residents counseled through the Fair Housing Council of Orange County from an average of 70 to 75 annually.	Annually, between 2021-2029
	crease quality of affordable housing and access to opportunities in low portunity areas through the following actions:	
5.	Include information about rehabilitation resources in City newsletters and on the City website, including the availability of funds for accessibility improvements. Include translated information when feasible. Seek to assist 12-15 households annually. Starting in 2023, conduct targeted outreach in identified Low and Moderate Resource	Annually

	Census Tracts, utilizing the Housing Conditions Survey and Code Enforcement information to further target assistance.	
6.	Identify apartments in need of rehabilitation and cooperate with nonprofit providers to acquire and rehabilitate units and provide as long-term affordable housing. Seek to complete at least two projects, including the 47-unit Walnut Village in partnership with Jamboree Housing.	Between 2021-2029
7.	Continue to improve access to individuals with disabilities through ADA improvements to streets, sidewalks, and public facilities. Dedicate or seek funding, including annual CDBG allocations, to prioritize infrastructure and accessibility improvements in Low and Moderate Resource opportunity areas.	Ongoing
8.	Increased public and private investment in Low and Moderate Resource Census Tracts, including \$2,000,000 allocated for a variety of ADA, park facilities, transportation, water, and sewer line improvements in these Census Tracts during 2021-2029.	2021-2029
	rease housing opportunities in high opportunity areas through the owing actions:	
9.	Starting in 2023, work with the FHCOC to contact landlords of affordable multifamily complexes every two years and provide fair housing information and assistance. This outreach will focus on promoting the Section 8 voucher program to landlords who have not previously participated in the program and should include multi-lingual materials. Through landlord outreach in coordination with the FHCOC and housing mobility programs through the Orange County Housing Authority, the City's goal will be to increase Housing Choice Vouchers by 10%, from 114 to 125 vouchers, including a 10% increase in high resource neighborhoods.	Every two years; 2021-2029
10.	Rezone sufficient parcels to provide geographically dispersed sites for over 1,100 lower-income units, fostering a more inclusive community.	2022
11.	Provide significant new housing opportunities in Highest Resource eastern Brea through development of a diverse mix of 1,100 new units in the Brea 265 project, including an estimated 76 deed restricted affordable units as required through the City's inclusionary ordinance. Pursue the introduction of workforce housing on Amazon's 31-acre warehouse site in eastern Brea.	2021-2029
12.	Update Brea's Affordable Housing Ordinance in 2022 to integrate low- and moderate-income units in market rate projects throughout the community	2022

Orange County 157 25-29 Regional AFH

13. Coordinate with the Orange County Housing Authority (OCHA) in 2023 to utilize the mobility counseling program. This OCHA program informs Housing Choice Voucher holders about their residential options in higher opportunity areas and provides holistic support to voucher holders seeking to move to higher opportunity areas.	2023-2029
14. Initiate a marketing program for homeowners on the benefits of ADUs and the availability of funds to support development through the City's Newsletter and posting of the ADU application checklist on the City website, thereby expanding housing opportunities in areas traditionally limited to single-family ownership. Promote and support the development of ADUs and seek to issue permits for 16 units annually throughout Brea.	Annually, starting in 2022
15. Adopt an Ordinance by 2022 to expand the housing supply in High Resource single-family zones by allowing for lot splits and duplexes under the parameters of SB 9. In coordination with research being conducted at the State level, pursue opportunities to incentivize and provide funding assistance for homeowners to provide affordable units under SB 9.	2022-2025
16. Require affordable developers receiving public funds to prepare an affirmative marketing plan and encourage private developers with affordable units in their projects to prepare an affirmative marketing plan. The affirmative marketing plan shall ensure marketing materials for new developments are designed to attract renters and buyers of diverse demographics, including individuals of any race, ethnicity, sex, handicap, and familial status.	Ongoing
Prevent displacement through the following actions:	
17. Continue anti-displacement programs including limits on rent increases and prohibiting evictions without just cause for tenants that have resided in their units for more than 12 months; relocation assistance where public funds are utilized; and replacement requirements when affordable units are removed.	Ongoing
18. Assist mobile home park resident organizations interested in purchasing their parks to access funds through the state HCD Mobile Home Park Resident Ownership Program (MPROP). Provide available local funds for leverage and assist with the subdivision map waiver process consistent with the Subdivision Map Act.	Ongoing

3. Cypress

Issue: Segregation and Disparities in Access to Opportunity

- 1. Lack of City-specific data on fair housing inquiries/complaints.
- 2. Lack of effective outreach strategies.
- 3. Concentration of lower- and moderate-income households.
- 4. Limited understanding of regulations surrounding acceptance of HCV tenants.

Actions:		Timeframe:
1.	Advocate to receive reports from the Orange County Fair Housing Council that include data specific to the City of Cypress to allow the City to better assess fair housing issues within the community.	Ongoing
2.	Create an updated webpage on the City's website with information on fair housing rights and resources by 2023.	2023
3.	Publish information about fair housing resources in the City's quarterly newsletter.	Ongoing
4.	Implement requirements for developers to submit an Affirmative Action Marketing Plan for density bonus projects by 2023.	2023, ongoing thereafter
5.	Expand outreach and education of Source of Income Protection laws (SB 329 and SB 222), which include HCVs and other public assistance as legitimate sources of income for housing.	Ongoing
6.	Provide information on Source of Income Protection laws in ADU informational packets.	Ongoing
7.	Increase affordable housing stock in high opportunities through the following actions:	
	a. Promote key lower income housing opportunity sites for affordable housing development as a means to bring new housing opportunities to high resource areas.	Ongoing
	 b. Conduct a feasibility study on the implementation of an inclusionary housing ordinance by 2024. 	2024
	 Support funding applications by nonprofit developers for affordable housing in high resource areas. 	Ongoing

Issue: Disproportionate Housing Needs

Contributing Factors:

- 1. Presence of a higher proportion of older multi-family rental units.
- 2. Limited income available for home repairs/maintenance.
- 3. Older single family housing stock.

Actions:	Timeframe:
 Implementation of a Neighborhood Preservation Pilot Program to identify and address code violations and needed right of way improvements. 	Ongoing
 Expand outreach and education efforts to neighborhood residents on resources available to address code violations and property maintenance issues. 	Ongoing

Orange County 160 25-29 Regional AFH

4. Dana Point

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- 1. Low rates of HCV use. Despite high rates of overpayment for rental households, the use of housing vouchers is low. This may be due to stigma associated with the use of Housing Vouchers, both by property owners and tenants.
- School performance. Disadvantaged students at schools serving Dana Point residents may be falling behind other students in the school and compared to those across the state. Both elementary schools in Dana Point are ranked much lower compared to other elementary schools that serve Dana Point residents.
- 3. Income and Diversity. The City lacks a substantial number of suitable housing sites in moderate / high / highest opportunity areas; many of these areas are largely built out with single-family homes. The majority of available housing sites are in Census Tracts that already have a higher concentration of low-income residents.
- 4. Lack of regional coordination and lack of public/private investment. Dana Point and surrounding cities generally address the need and solutions for affordable housing and homeless shelters in an independent manner, which causes them to compete against one another for funds and eliminates opportunities to pool resources.
- 5. Potential community opposition. While there is little community opposition to a proposed affordable project (e.g., there was community support for Silver Lantern), additional regional collaboration can help to mitigate community opposition that may arise in the future (whether an affordable housing project or homeless shelter).

Actions:	Timeframe:
Increase knowledge and enforcement of fair housing laws through the following actions:	
1. Educate the community about fair-housing and equal housing opportunities, providing housing counseling services and family resource information and referral. Topics include, but are not limited to tenant rights, legal resources, rehabilitation grants and loans, first-time homebuyer programs, and Section 8 programs. Distribute materials in English and Spanish through City Hall, City libraries, City websites, and the Fair Housing Council website.	Ongoing
2. Track fair housing issues and identify patterns in the City, including meeting annually to check on the status of active cases.	Annually
3. Promote fair housing opportunities through various financial assistance initiatives and affordable housing/neighborhood revitalization programs.	Ongoing

4. Actively recruit residents from neighborhoods in low resource areas to serve or participate on boards, committees, and other local government bodies.	Ongoing
5. As part of the City's Housing Element Annual Report, continue to annually monitor zoning regulations to ensure compliance with fair housing laws.	Ongoing
Increase use of Housing Choice Vouchers through the following actions:	
6. Coordinate with OCHA to generate a detailed understanding of where overpayment rates and displacement risks are highest in the city (as of latest available Census data), where vouchers are and are not used, and how many tenants could potentially qualify at each multifamily property in target areas.	2022
7. Coordinate with Orange County United Way on the WelcomeHomeOC program to identify opportunities to assist Dana Point residents.	2022
8. Apply affirmative advertising policy to income-restricted units to be built in the Victoria Apartments development in the Doheny Village area. Apply the policy to all future income-restricted projects, as permitted by state and/or federal funding programs.	2022
9. Coordinate with OCHA to develop an outreach plan and materials to communicate the benefits of vouchers and tenant rights regarding just cause evictions, limitations on rent increases, and replacement housing requirements if any existing residential units would be removed, based on state law.	2023
10. Complete study of options to augment/adjust current in-lieu fee program for possible application of funds for those overpaying and/or at risk of displacement; evaluate how the City can prioritize or facilitate mixed- income housing through potential use of in-lieu fees or other resources (e.g., determine which federal and state grant or loan programs are structured to score mixed-income projects as more competitive compared to 100 percent lower income developments).	2024
11. Distribute outreach materials through means that reach target populations (e.g., those receiving subsidized school lunches). Conduct direct outreach to 10 properties (tenants and owners) in Census Tracts illustrating high rates of rental overpayment and conduct mailer outreach to all renter occupied units and rental	

property owners in the Town Center and Doheny Village Census Tracts.	
12. Bring forth appropriate in-lieu fee provisions for adoption.	2024
13. Establish strategies to use City resources (technical support and/or in-lieu fees as appropriate) to encourage mixed-income housing developments.	2024
Improve educational outcomes for lower income and underserved students at schools in or serving Dana Point, through the following actions:	
14. Continue annual assessment of effectiveness of Sparkpoint OC with Orange County United Way.	Annually
15. Negotiate with the Victoria Apartments property owner to dedicate substantial funds toward schools in Dana Point, specifically Dana Hills High School (which serves residents in the low resource areas).	2024
16. Coordinate with United Way to continue and or expand Sparkpoint effort on annual basis, with modifications to provide better or more effective assistance and/or to reach more families.	Annually
17. Coordinate with United Way to expand Sparkpoint effort to Palisades Elementary School.	2025
Increase affordable housing opportunities through the city, and especially in moderate, high, and highest resource areas, through the following actions:	
18. Adopt a pre-approval review process for ADUs.	2023
19. Initiate a general plan update with an explicit objective to identify additional housing opportunities in moderate, high, and highest resource areas, with additional emphasis on Census Tracts that can help improve patterns of greater diversity, promote a broader distribution of households with a range of incomes, and lowers displacement risk.	2023
20. Coordinate with the OCHA to inform Housing Choice Voucher holders about their residential options in moderate, high, and highest resource areas.	Annually
21. In coordination with research being conducted at the state level, pursue opportunities to incentivize and provide funding assistance	Ongoing

for homeowners to provide affordable units under SB 9 provisions (adopted by ordinance in February 2022).	
22. Coordinate through the Orange County Housing Finance Trust (OCHFT) on the use of funding sources (e.g., REAP) and potential to apply for additional funding.	Ongoing
23. Coordinate through OCHFT on year two notice of funding availability (NOFA), and subsequent NOFAs for years three, four, and five; advocate for the use of funds in Dana Point as appropriate and in surrounding jurisdictions when such location would yield better benefits (more units, deeper level of subsidy, more target populations, etc.).	Ongoing
24. Assist in the update of the OCHFT five-year strategic plan.	2024

5. La Palma

Issue: Segregation, Disparities in Access to Opportunity and Disproportionate Housing Needs

- Some residents who are in need of fair housing resources, including low-income households, individuals with disabilities, racial/ethnic minorities and other protected classes, may be unaware of the fair housing resources that are available. Although information about fair housing services is posted on the City website and in public offices, more could be done to make this information available.
- Lack of access to opportunity due to high housing costs is a significant contributing factor to
 fair housing throughout the region. All areas of La Palma are classified as high opportunity.
 Increasing housing availability in areas with good opportunity make it easier for lower-income
 households to access the types of services and amenities that further economic and social
 mobility.

Actions:	Timeframe:
1. Expand fair housing outreach through the following actions:	
 Continue directing fair housing inquiries to the Fair Householders Council of Orange County. 	using Ongoing
 Post and update information annually regarding fair hor and request FHCOC to conduct a presentation every two about services available. 	
c. Contact all apartment complexes annually to preducation and materials about the Section 8/Housing C Voucher program including multi-lingual material coordinate to develop an outreach plan and material communicate the benefits of vouchers and tenant regarding just cause evictions, limitations on rent increand replacement housing requirements. Conduct of outreach to 30 properties (tenants and owners) in Contracts with LMI concentrations by December 2026.	hoice erials. als to rights eases, direct
 d. Publish and update links to fair housing information o City website and via social media annually. 	n the Annually
2. Improve Access to Opportunity and Mobility through the folloactions:	owing
 a. Conduct fee study annually and adopt City planning reductions for new deed-restricted low-income hop projects and fee waivers for lot consolidation by June 20 	using reductions adopted
b. Update Municipal Code for large residential care facilities remove any unreasonable conditions of approval or	_ =

T		
	requirements by establishing objective development standards to eliminate subjective components of the discretionary CUP process and ensure barrier free housing choices for individuals with disabilities by December 2024.	
C.	Continue to support the provision of housing for individuals with disabilities through updates to zoning regulations in compliance with fair housing law by December 2023.	December 2023
d.	Encourage and facilitate housing development commensurate with the City's identified housing need in the RHNA allocation on a continuous basis.	Ongoing
e.	Apply for CDBG funding through the County of Orange Urban County program and seek third-party grant writing assistance for City's Meals on Wheels senior program and ADA improvements for streets and sidewalks by October 2025.	October 2025
f.	Establish Economic Development/Land Use Committee by February 2024 to implement the following programs: i. Review City-owned properties annually and identify any surplus land that could be made available for affordable housing development by June 2024. ii. Explore options to allow and incentivize missing middle and special needs residential uses in the R-3 as part of the development standards amendments for increased story count, parking, and lot coverage by December 2024. iii. Pursue strategies to facilitate housing development of at least 10 housing units on religious, institutional, and quasi-institutional lands, and adaptive reuse of underutilized properties for affordable housing by December 2024. Include potential residential development and conduct targeted outreach to interested parties for City-owned parcel on 5062 La Palma Avenue and conduct outreach to the three large churches within La Palma. Evaluate opportunities for adaptive reuse as part of outreach to Centerpointe property owners by December 2024. iv. Report back to City Council on findings, recommendations and provide update on program implementation by December 2024. By 2027, implement short term and midterm programs identified in the Strategic Plan.	Report to Council by December 2024. Implement short and midterm programs in Plan by 2027.

Orange County 166 25-29 Regional AFH

cre	ork cooperatively with the County of Orange and cities to ate a regional housing bond program to help fund ordable housing and permanent supportive housing.	Ongoing
Dev risk low La affo	ork with Orange County Housing & Community velopment to conserve existing affordable housing units attack of converting to market rate. Contact owners of the City's v-income apartment complexes (Camden Place, Seasons at Palma, and Casa La Palma) and offer funding from the City's ordable housing asset fund toward rental rehabilitation of east 20 units during the planning period.	2021-2029
firs pro	ork with the Fair Housing Council to expand knowledge of t-time homebuyer programs, and promote available ograms on the City's website, newsletters and through social idia.	Ongoing
pro affi The reg dev div	irmative Marketing and Regional Registries: Require, ovide incentives, and utilize other strategies to promote rmative marketing plans in all new housing developments. It is affirmative marketing plans will consider regional housing platries and ensure marketing materials for new relopments are designed to attract renters and buyers of erse demographics, including individuals of any race, nicity, income, disability, and familial status.	Ongoing
	collaboration with OCHA, expand the use of housing choice achers in high resource areas through the following actions: i. Develop an outreach plan and materials with targeted outreach to Census Blocks of LMI concentrations to communicate the benefits of vouchers and tenant rights regarding just cause evictions, limitations on rent increases, and replacement housing requirements if any existing residential units would be removed, based on state law. ii. Gain a better understanding of where overpayment and overcrowding rates are highest in the city, where vouchers are and are not used, and how many tenants could potentially qualify at each multifamily property in target areas in order to develop strategies to expand use of vouchers with the goal of increasing voucher use (63 vouchers in 2023) by at least two per year in La Palma.	Ongoing
	iii. Inform voucher holders about their residential options in high-resource areas by developing a Housing	

Orange County 167 25-29 Regional AFH

	Resources Directory available on the City's website and updated annually.	
I.	Expand production of accessory dwelling units in high-resource single family neighborhoods and address potential overcrowding by promoting the City's ADU ordinance, application, look-up tool, preapproved plans, and educational resources through the Housing SoCal page by June 2024. Target direct outreach to areas of LMI concentration and Census Tracts south of La Palma Avenue with promotional materials annually. Increase ADU production by two units per year for a total of at least 30 units during the planning period.	2021-2029
m.	Enhance City's existing proactive code enforcement program by targeting areas of concentrated owner rehabilitation needs, resulting in repairs to minimize displacement and relocation impacts. Re-initiate volunteer home painting/repair program with local churches and home improvement stores, which was successful in the last planning period. Provide owner rehabilitation assistance to at least a total of 16 residential units rehabilitated within areas of LMI concentration during the planning period.	2021-2029
n.	Distribute direct mailers and applications to apartment complexes for La Palma Citizens' Academy to recruit residents from areas of concentrated lower income and renters to serve on boards, committees, and other local government decision-making bodies annually.	Annually
0.	Initiate joint use agreement between City and Centralia Elementary School District to create a public playground at Miller Elementary School and Edison Right-of-Way to benefit the LMI concentration in the eastern portion of the City. Seek grant funding opportunities by December 2026.	December 2026
p.	Continue place-based strategies toward community revitalization including: i. Invest and prioritize City beautification projects, including 3.85 miles of street medians, trees, and drought-tolerant landscaping, along corridors of areas with LMI concentrations (La Palma Avenue, Moody Street, and Walker Avenue) by June 2025. ii. Complete water infrastructure projects related to four (4) water main interconnections to provide emergency and contingency water supply to 4,270 units; and	2024-2025

Orange County 168 25-29 Regional AFH

replacement of large water meters for 36 residential units by June 2024. iii. Seek grant funding for the La Palma Avenue Slurry Seal Project, which includes sidewalk ADA improvements from west to east City limits, centralized in area of higher percentage (10-20%) of population with a disability by December 2024.	
q. In cooperation with the Orange County Transportation Authority, provide community education regarding transport services for individuals with disabilities. Partner with OCTA, OC Health Care Agency, and local school districts to implement OC Safe Routes to Schools Program in its Countywide initiatives through participation in Next STEP (ATP and REAP 2.0 funding) by December 2027.	December 2027

6. Laguna Beach

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

Contributing Factors:

- 1. Lack of knowledge and enforcement of fair housing laws due to the following:
 - a. Insufficient fair housing monitoring and limited outreach capacity.
 - b. Lack of a variety of media inputs.
 - c. Lack of marketing community meetings.
 - d. Lack of regional coordination.
- 2. Lack of affordable housing in high opportunity areas due to the following:
 - a. Historical land use development patterns and zoning, and lack of vacant land limit opportunities for larger and higher density project types.
 - b. Past national, state, and regional racial/ethnic discriminatory practices.
 - c. Current high cost of housing limits access to lower income households of all races/ethnicities.
 - d. Lack of affordable housing and need for greater access to opportunities.
 - e. Regional coordination affects transit services, funding sources, and allocation of housing resources including vouchers.

Ac	tions:		Timeframe:
1.	Increas actions	se fair housing knowledge and enforcement through the following s:	
	a.	Ensure that all laws, programs, and activities affirmatively further fair housing in accordance with state law. As the General Plan and Zoning Code are updated or amended, review and revise policies and code provisions to promote an inclusive community.	Ongoing
	b.	When considering specific plan or rezoning proposals, evaluate whether the change in zoning will help achieve fair housing goals.	Ongoing
	C.	Include fair housing information on the City's website, including up-to-date fair housing laws, FHCOC services, and information on filing discrimination complaints. Proactive announcement of fair housing resources on Community Newsletter (weekly text messaging system).	Provide link to services on City website by 2023 and make service announcements at least annually.
	d.	Continue to publish a Housing Assistance Guide informing community members of the Orange County Fair Housing Council (FHCOC) and its oversight of fair housing practices, for availability on the City's website and at the Planning counter.	Update annually

Orange County 170 25-29 Regional AFH

e.	Develop interest list for update on fair housing and affordable housing projects.	By the end of 2022 and updated
f.	Update the City website with affordable housing projects.	Update website semi- annually.
g.	Utilize non-traditional media (i.e., social media, City website, Community Newsletter) in outreach and education efforts in addition to print media and notices.	Beginning in 2023; ongoing thereafter
h.	As a participating City in the County of Orange Community Development Block Grant (CDBG) program, continue to support the annual contribution of CDBG funds to the Orange County Fair Housing Council (FHCOC).	Annually
i.	Participate in regional efforts to address fair housing issues and monitor emerging trends/issues in the housing market. Attend quarterly OCHA Housing Advisory Committee meetings.	Quarterly
j.	Petition to Orange County, administrator of the City's CDBG program, for the fair housing provider (FHCOC) to expand landlord education on source of income discrimination and voucher programs.	Beginning in 2023.
k.	Expand outreach and education on recent state laws (SB 329 and SB 222) supporting source of income protection for publicly assisted low-income households (HCVs).	Begin in 2023
	se affordable housing in high opportunity areas through the ing actions:	
a.	Establish a new Housing Program Coordinator planner position to oversee and expedite Housing Element program implementation.	Beginning in 2023.
b.	Create a comprehensive ADU Handbook with tools to facilitate ADU production.	12/1/2022.
C.	Require that 25% of the total number of units or lots, whichever is greater, in new subdivisions of two or more residential units or lots and 25% of new development of three or more units on existing building sites be affordable to extremely-low-, very-low-, low- or moderate-income households or individuals.	Initiate inclusionary housing policy update in 2023 with a market
d.	Update inclusionary housing policy to enhance feasibility and production of affordable housing.	feasible study.

	residential use limitations to assist in the development of housing	
	neighborhood improvements to increase access to opportunity, eserve housing affordability, through the following actions:	
a.	Pursue the development of an amnesty program for unpermitted residential units.	By 2023
b.	Laguna Canyon Road (SR-133) Improvements: place overhead utilities underground; active transportation improvements; reconstruct drainage channel; add dam to control storm flows.	By end of 2025
C.	Coast Highway ADA South Improvements (Moss Street to Fifth Avenue): add new sidewalks; widen existing sidewalk; reconstruct existing curb ramps and driveways to meet current ADA standards; add audible pedestrian crossing systems; repair, resurface, and restripe roadway.	By end of 2025
d.	Laguna Canyon Road Median Landscaping: Replant the landscaped median along Laguna Canyon Road between Forest Avenue and east of Canyon Acres Drive.	2023-2024
e.	Continue to provide Senior Housing Repair program.	Ongoing
f.	Monitor implementation of the Short-Term Lodging Ordinance. Restrictions to short-term lodging are intended to help preserve rental housing stock by limiting their use for vacation rental purposes.	Annually
g.	Continue to support aging in place through amortization and abatement agreements which allow residents to remain on the property under specified conditions to improve the property.	Ongoing
h.	Where safety concerns can be addressed, allow residents to remain in unpermitted spaces while they are adapted to meet work/live code If funding is available, develop incentives and funding programs to assist building owners and tenants to make the building modifications necessary to conform with work/live ordinances.	By 2023

Orange County 173 25-29 Regional AFH

7. Laguna Hills

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- 1. Concentration of more affordable housing (e.g., multifamily, mobile home park) in north Laguna Hills and the Via Lomas neighborhood.
- 2. Neighborhoods in south Laguna Hills are more desirable, therefore more costly, than neighborhoods in central and north Laguna Hills.
- 3. Availability of affordable units in a range of sizes.
- 4. Cost of rehabilitation or repair.
- 5. Availability of rentals that accept Housing Choice Vouchers.
- 6. Linguistic isolation of non-English speaking households.
- 7. Availability of high-ranked elementary schools to serve north Laguna Hills and the Via Lomas neighborhood.
- 8. Housing shortages regionally in Orange County.
- 9. Unaffordable rents and home prices.
- 10. Lack of partnerships with affordable housing developers
- 11. Concentrated areas of poverty in low-resource areas.

Actions:	Timeframe:
 Coordinate local housing efforts with federal, state, regional, and local government and/or agencies and cooperate in implementation of intergovernmental housing programs; including the following actions: 	Ongoing
 Submit CDBG applications to assist in preserving existing affordable housing stock; 	Annually
 b. Continue to publicize programs, such as energy-efficiency programs and state and federal funding programs; 	Ongoing
c. Encourage local housing advocates to make presentations to local builders and developers, Chamber of Commerce, civic groups, and the local community re: affordable and multifamily/higher density development.	Biannually
 Encourage the development of ADUs throughout the City to expand housing opportunities for all income levels within existing neighborhoods, particularly for lower-income seniors, single individuals, individuals with disabilities, and small households; through the following actions: 	Ongoing
a. Update the City's current ADU Ordinance	2023
b. Promote development of ADUs through City websitec. and informational material	2023

d.	Identify and implement potential incentives to encourage production of affordable ADUs.	Ongoing
e.	Monitor the production and affordability of ADUs annually to ensure the City will meet the assumption of 18 ADUs during the planning period.	Annually
f.	Explore funding options to create an ADU forgivable Loan Program.	2024
	se affordable housing in high opportunity areas through the ng actions:	
a.	Establish objective design standards for residential development and analyze opportunities to permit multifamily residential in an existing commercial center.	By August 2024
b.	Analyze opportunities to permit multifamily residential in an existing commercial center in north Laguna Hills.	2024
C.	Mitigate regulatory constraints on the production of housing through the following actions.	
	 i. Consider adaptive reuse ordinance by June 2024 and implement, if appropriate, by June 2025. 	2024-2025
	 Consider inclusionary housing ordinance and present findings to City Council by June 2024 and implement, if appropriate, by June 2025. 	2024-2025
	 Consider congregational overlay by June 2024 and implement, if appropriate, by June 2025. 	2024-2025
	 iv. Conduct initial review of development standards and permitting requirements by June 2025 and update Zoning Ordinance as needed. 	2025
	v. Amend the General Plan and Zoning Code, as needed, to provide adequate sites for 413 lower-income units.	2024
d.	Provide incentives (e.g., expedited processing, fee waivers, and density bonuses) to facilitate set-asides for planned low-income units, and for mixed-use development.	Ongoing
e.	Promote lower-income housing development incentives on the City website.	Ongoing
f.	Enact new measures that will raise local funding for construction of affordable and other needed housing types.	June 2025

Orange County 175 25-29 Regional AFH

Develop and implement strategies to encourage and facilitate lot consolidation and phasing of residential and mixed-use developments on large sites.	Ongoing
Explore the potential to partner with a nonprofit organization to offer a program based on the Community Land Trust model.	2025
Work with stakeholders to identify nongovernmental constraints that may impede the construction of housing.	Ongoing
 Increase participation in the Housing Choice Voucher Program through the following actions:	
 i. Provide referral services and information to City residents on HCV program. 	Ongoing
 Study the feasibility of a landlord incentive program for landlords that choose to accept voucher holding tenants. 	2024
e housing opportunities for special needs populations the following actions:	
Pursue homeless assistance grants through the Continuum of Care.	Annually
Assist public and private nonprofit housing developers in preparation of funding applications for special-needs populations.	Annually
Conduct outreach to service providers to discuss ways the City can assist in the development of housing for lower income households.	Annually
Work with local organizations that provide assistance to individuals with disabilities to implement an outreach program that informs individuals with disabilities and their families about housing and available services.	Ongoing
Prepare and distribute informational material on the reasonable accommodation ordinance, that will direct people to service information on the City website.	2024
Encourage developers to provide universal design features in housing developments.	Ongoing

Orange County 176 25-29 Regional AFH

g. Provide fair housing education and information to apartment managers and homeowners associations on why denial or reasonable modifications/ accommodations is unlawful. 5. Promote development opportunities in the Urban Village Specifications.	of
Plan (UVSP) area, encouraging affordable housing developmenthrough the following actions:	
 a. Add promotional material re: UVSP housing opportunities of the City's website. 	on 2023
b. Meet with prospective developers to encourage incorporating housing for multiple income levels.	ge Annual
c. Consider amending UVSP to incorporate inclusional housing requirements.	ry 2024
d. Provide regulatory incentives on a case-by-case bas consistent with Chapter 9-72 of the Zoning Ordinance.	is Ongoing
6. Preserve existing affordable housing through the following actions	:
 a. Cooperate with owners of existing affordable units to secur appropriate federal funding necessary to maintain existin affordability. 	•
b. Enforce the Municipal Code and address matters related a property maintenance that pose threat to public healt safety, or welfare.	
c. Develop informational materials to help educate proper owners on available funding programs to assist wit rehabilitation.	=
 d. Notify the State Franchise Tax Board if substandard rent housing is identified. 	al Ongoing
e. Work with Orange County Housing and Community Service Department to receive rehabilitation loans and grants for loand moderate-income homeowners and rental proper owners; Use CDBG funds as funding becomes available an pursue other funding sources;	w ty
f. Prepare and distribute informational material advertising the rehabilitation program	ne 2024
g. Continue to pursue the extension of affordability controls for 51 units that are set to expire in 2032; prepare a "Ris	

Orange County 177 25-29 Regional AFH

	Assessment" report provided by the California Housing Partnership Corporation		
h.	Provide technical assistance to preserve at-risk units;	Ongoing	
i.	Apply for state or federal funding on behalf of interested non- profit entities, if necessary, to protect the affordability of rental units	Ongoing	
j.	Provide foreclosure information on City website	2023, annually	update
k.	Refer residents to external agencies to assist in reducing incidents of foreclosures	Ongoing	
I.	Require replacement housing units subject to the requirements of SB 330 on sites identified in the sites inventory when any new development occurs on a site that has been occupied by or restricted for the use of lower-income households at any time during the previous five years;	Ongoing	
m.	Prevent tenant displacement by considering the feasibility of a local Just Cause Eviction ordinance, a Local Rent Stabilization ordinance, and a multi-lingual Right to Counsel program;	2024	
7. Increas	se services to special needs populations through the following s:		
a.	Allocate CDBG funds to nonprofits providing shelter for the homeless	Annually	
b.	Contract with Mercy House or other housing services providers to help residents experiencing homelessness obtain services.	Annually	

8. Laguna Woods

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- Lack of affordable housing. The availability and price of land represents a significant market constraint to housing production in Laguna Woods, where there is very little residentially designated vacant land.
- 2. Displacement risk for existing lower-income residents due to economic pressures/motivators on property owners/managers
- 3. Limited access to opportunities for individuals with disabilities and other special needs due to underimproved housing stock potentially resultant of financial or physical challenges.

Ac	Timeframe:	
1.	Conduct a market study and then amend the existing inclusionary housing ordinance to modify the minimum percentages of new housing units that must be deed-restricted for extremely low, very low, and low-income households, as feasible and advantageous to promote the development of affordable housing.	
2.	Investigate potential incentives for property owners to extend and/or expand existing affordability covenants beyond the planned expiration date and/or current number of housing units, with an emphasis on incentivizing (i) affordability covenants for extremely low and very low-income housing units, and (ii) affordability covenants that apply to housing units in a range of sizes. If feasible and economical, adopt such incentives.	
3.	Adopt an ordinance waiving or reducing City building permit fees for improvements to the home of a person at least 60 years of age with a qualifying disability that are made to accommodate that disability, as provided for by California Health and Safety Code Section 17951.7. Consider including provisions allowing for similar building permit fee waivers or reductions for improvements to the home of a person with a qualifying disability that are made to accommodate that disability, regardless of age. Prepare and maintain a flyer with related information. Conduct annual outreach to nonprofit organizations known to provide medical or social services to residents with disabilities. Conduct biennial outreach to residents residing in Census Tracts 626.22 and 626.48 due to their comparatively lower economic domain scores from the TCAC/HCD Opportunity Map.	
4.	Provide opportunities for reimbursements, grants, or other forms of financial assistance to support home improvements that increase accessibility or functionality for individuals with special needs. Conduct annual outreach to nonprofit organizations known to provide medical or social services to residents with special needs. Conduct biennial outreach to residents residing	

	in Census Tracts 626.22 and 626.48 due to their comparatively lower economic domain scores from the TCAC/HCD Opportunity Map.	
5.	Formalize a proactive code enforcement program that focuses on housing-related rehabilitation needs, results in repairs, and seeks to mitigate potential cost, displacement, and relocation impacts on residents.	
6.	Improve pedestrian accessibility on sidewalks, curb ramps, crosswalks, and other public property connecting housing with transit stops, public buildings, businesses, and educational institutions. Prioritize improvements based on factors including: a. The California Office of Environmental Health Hazard Assessment's California Communities Environmental Health Screening Tool ("CalEnviroScreen") scores for individual Census Tracts, with an emphasis on undertaking improvements in and around Census Tract 626.47 due to its comparatively higher CalEnviroScreen score, as feasible and economical; and b. Education domain scores from the California Tax Credit Allocation Committee ("TCAC")/HCD Opportunity Map, with an emphasis on undertaking improvements in and around Census Tract 626.22 due to its comparatively lower scores, as feasible and economical.	
7.	Pursue partnerships and seek funding to provide Laguna Woods-based housing mobility counseling services. If feasible and economical, implement such services.	
8.	Adopt an ordinance waiving or reducing City building permit fees, or providing other incentives, for housing projects that prepare and implement an affirmative marketing plan designed to attract renters or buyers of diverse demographics, including individuals of any race, color, religion, sex, handicap, familial status, or national origin. Prioritize incentives based on factors including racial concentrations from U.S. Census Bureau data products, with an emphasis on avoiding the creation of geographically discernable patterns of segregation or racially concentrated areas of poverty.	
9.	Prepare and maintain a webpage with information on housing mediation, foreclosure assistance, tenant legal counseling services, and vocational counseling services. Train City staff to make referrals using the webpage.	
10.	Pursue partnerships and seek funding to provide Laguna Woods-based housing mediation, foreclosure assistance, and multilingual tenant legal counseling services. If feasible and economical, implement such services.	
11.	Investigate potential hazard mitigation measures that would reduce or eliminate the long-term risk of residential displacement as a result of future disasters. If feasible and economical, implement such hazard mitigation measures. Prioritize improvements based on factors including economic	

domain scores from the TCAC/HCD Opportunity Map for individual Census Tracts, with an emphasis on undertaking improvements in and around Census Tracts 626.22 and 626.48 due to their comparatively lower scores, as feasible and economical.	
12. Investigate potential incentives for property owners of apartment and cooperative housing units for which tenants pay usage-based energy costs to make energy efficiency improvements that exceed the minimum requirements set forth in the California Building Energy Efficiency Standards. If feasible and economical, implement such incentives. Prioritize incentives for residents residing in Census Tracts 626.46 and 626.47 due to those areas being identified in this Housing Element as susceptible to displacement and having the highest renter vulnerability indices, as feasible and economical.	
13. Investigate opportunities to provide rental relief for residents at risk of homelessness. If feasible and economical, implement such opportunities. Prioritize rental relief for residents residing in CensusTracts 626.46 and 626.47 due to those areas being identified as susceptible to displacement and having the highest renter vulnerability indices, as feasible and economical.	

9. Los Alamitos

Issue: Disparities in Access to Opportunity and Disproportionate Housing Needs

- 1. Lack of housing for special needs population.
- 2. Lack of knowledge of fair housing laws.
- 3. Local land use and zoning laws.

Ac	tions:		Timeframe:
1.	Encou	rage development of housing for special needs populations	Establish incentive
	throug	h the following actions:	program and
	a.	The City shall encourage and facilitate development of housing	publish on City
		for families and large households, the elderly, farmworkers,	website by June
		individuals experiencing homelessness and individuals with	30, 2023.
		disabilities, including physical and developmental disabilities.	
	b.	The City will assist developers in identifying outside funding	
		sources and support efforts to pursue those opportunities—	
		either as group homes or in single family homes, when	
		appropriate and feasible.	
	C.	The City will develop a menu to offer incentives such as density	
		bonuses, regulatory concessions, and expedited processing.	
	d.	The City will develop and disseminate informational materials	
		annually to developers regarding the incentive program and	
		identified funding sources to potentially assist 5 special needs	
		residents annually through the planning period.	
2.	Increas	se fair housing knowledge and enforcement through the following	Ongoing
	actions	S:	
	a.	The City shall continue to provide referrals to the Fair Housing	
		Council of Orange County for fair housing services including	
		counseling services for tenant-landlord disputes and cases of	
		alleged discrimination.	
	b.	The City shall continue to publicize fair housing and complaint	
		referral information at local community centers and in the	
		Recreation & Community Services Schedule of Classes. The City	
		will also provide information at City Hall and on the City's	
	_	website.	
	C.	The City shall work with government agencies (e.g., Fair Housing	
		Council of Orange County) and nonprofit groups (e.g., Habitat for Humanity) on anti-discrimination during housing processes for	
		residents in protected classes, such as those with disabilities and	
		families with children. Advertise workshops and events held by	
		these organizations on anti-discrimination on the City's email	
		newsletter and Housing Element webpage.	
		nowolotto, and floading Element Webpage.	

3.	Collaborate and coordinate with government agencies and nonprofit groups such as the Fair Housing Council of Orange County to support outreach and expansion of lending programs for homeownership among minority populations.	Annually
4.	The City currently requires a Conditional Use Permit (CUP) application for a residential care facility for seven or more individuals in the R-3 zone. To remove any potential constraint to housing for individuals with disabilities, the City shall remove the CUP requirement for the R-3 Zone or allow residential care facility for seven or more individuals by right in another zone as appropriate.	By December 2022
5.	The City will annually review its policies and zoning laws relating to fair housing and reach out to the community through surveys and workshops as appropriate. The outreach efforts will be advertised via multiple channels, such as City email newsletter, posting at City website, print material at City Hall, local community centers, and social media.	Annually

10. Placentia

Issue: Segregation and R/ECAPs

- 1. Lack of affordable housing limits housing mobility
- 2. Limited participation in Housing Choice Voucher Program
- 3. Land use and development practices
- 4. Lack of fair housing knowledge and enforcement

Ac	tions:	Timeframe:
1.	Disseminate information on the City's website and conduct community outreach meeting with local stakeholders and affordable housing developers to promote affordable housing development throughout the city and discuss other Cityincentives to create affordable housing.	Annually beginning in August 2024.
2.	Conduct marketing to increase participation in the Housing Choice Voucher Program.	Ongoing
3.	Collaborate with developers to develop a mechanism to develop affordable housing in highest-opportunity areas.	Annually
4.	Annually review existing policies and programs for potential restrictive practices that would limit diversity within racially concentrated areas of affluence (RCAAs). If restrictive practices are identified, address prior to adoption of the new policies and programs or within six months for existing policies and programs.	Annually
5.	Establish incentives for affordable developments (including ADUs and JADUs) in RCAA and high opportunity areas.	By March 31, 2025
6.	Establish specific incentives for the development of affordable units the RCAAs and high opportunity areas.	By June 2025
7.	Conduct Affirmative marketing to increase diversity within RCAAs. This may include, but is not limited to, noticing of affordable units/projects through direct mail targeted outreach to lower income Census Tracts, publishing advertising materials in multiple language, informing service agencies, outreach to community organizations or places of worship.	Every 2 years, beginning in August 2024.
8.	Facilitate the development and/or legalization of over 84 ADUs during the planning period by a variety of methods, including but not limited to:	2021-2029

 a. Annually pursuing funding to adopt permit-ready ADU plans to minimize design costs, expedite permit processing, and provide development certainty. b. Developing an ADU Manual guiding applicants through the construction of an ADU by December 2024. c. Developing an ADU webpage informing the community on ADU related codes, processes, and incentives December 2024. d. Developing and implementing a public awareness campaign for construction of ADUs and the City's incentives utilizing all forms of media and outreach distribution December 2024. e. Establishing incentives for ADUs, with an emphasis on 	
affordable ADUs by December 2024.	
9. Research and establish home sharing program(s) and/or policies.	2025
10. Coordinate with local organizations to assist with matching tenants with existing homeowners. The City will assist with outreach, facilitate annual presentations, and conduct outreach to eligible and potential homeowners.	Annually
11. Facilitate the development of at least 30 units on publicly- owned properties, with an emphasis on areas with relatively higher opportunity, higher median income and RCAAs.	2021-2029
12. Increase fair housing knowledge and enforcement through the following actions:	
a. In partnership the city's fair housing provider, conduct multi-faceted fair housing outreach to tenants, landlords, property owners, realtors, and property management companies. Methods of outreach should include workshops, informational booths, presentations to civic leaders and community groups, staff training, and distribution of multi- lingual fair housing literature.	Ongoing
b. Provide general counseling and referrals to address tenant-landlord issues and provide periodic tenant-landlord walk-in clinics at City Halls and other community locations.	Ongoing
c. Include testing/audits within the scope of work for each city's fair housing provider.	Annually

Orange County 185 25-29 Regional AFH

d.	, , ,	Ongoing
	fair housing litigation.	
e.	Provide and maintain multi-lingual informational materials on tenant legal counseling and resources.	Develop by August 2024; disseminate annually; update as needed.
f.	Work collaboratively with local housing authorities to ensure affirmative fair marketing plans and deconcentration policies are implemented.	Ongoing

Issue: Disparities in Access to Opportunity and Disproportionate Housing Needs

- 1. High cost of housing in high opportunity areas
- 2. Limited accessible housing opportunities for individuals with disabilities
- 3. High cost of housing repairs/rehabilitation
- 4. Displacement of residents due to economic factors
- 5. Lack of public investment in lower opportunity areas

Actions:	Timeframe:
The City will seek to improve access to opportunity for lower-income households and other protected classes through the following actions:	
a. Providing adequate sites for affordable housing development	Update candidate sites list annually
b. Reduce governmental constraints to encourage the production of ADUs	Review ADU procedures annually and revise as needed to reduce cost and time and comply with state law.
c. Facilitating the production of housing for individuals with special needs by providing technical assistance to developers proposing affordable housing.	Ongoing
d. Work with federal, state, and local agencies to try to identify and secure funding for homeowners who are interested in building an ADU and are willing to offer it as an affordable rental.	Annually
2. Increase community integration for individuals with disabilities.	Ongoing

3.	Continue to help develop housing projects for special needs households by providing technical assistance with tax credit applications, tax-exempt bond financing and other public funds, including ESG, CDBG, and HOME.	Ongoing
4.	Review reasonable accommodation standards and procedures annually and update within 6 months of annual review if not compliant with state or federal law. If not compliant, the City will process reasonable accommodations in compliance with state or federal law in the interim.	Annually
5.	Enhance the proactive code enforcement program that targets areas of concentrated rehabilitation needs, resulting in repairs and mitigating potential costs, displacement and relocation impacts on residents.	Review and revise annually
6.	The City shall develop a program to collaborate with non-profit housing providers and develop a preservation strategy. The preservation strategy will allow the City to act quickly if, and when, it receives notice of conversion. As part of the strategy, the City shall ensure compliance with noticing requirements; conduct tenant education and pursue funding to preserve the units.	Develop strategy by 2024, apply for funding annually thereafter.
7.	Explore anti-gentrification policies and regulations to combat displacement, which especially affects low-income residents and communities of color. These may include, but are not limited to foreclosure assistance, community land trusts, and housing trust funds.	Report to Council by October 2025.
8.	Provide housing mobility counseling either directly or through referrals. This counseling may include, but is not limited to, information on opportunity areas, housing search skills and tools, workshops, search assistance, referrals, structured support for a time after a move to the City, landlord-tenant mediation, and retention counseling.	Ongoing
9.	Engage community health workers to conduct ground level site visits and meetings within areas of lower income to better understand resident and business barriers, resources, and needs.	Ongoing
10.	Seek funding and will review Capital Improvement Program in order to prioritize projects in areas of lower income, to improve living environments and reduce the risk of displacement. Examples of projects include street	Annually

improvements, multi- modal investments, safe routes to school, parks, community facilities and amenities, infrastructure, and other investment toward community revitalization.	
11. The City will continue to encourage and emphasize public art in areas of lower income and diversity.	Ongoing

11. San Juan Capistrano

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

Contributing Factors:

- 1. Limited local private fair housing outreach and enforcement
- 2. Overcrowding in Capistrano Villas
- 3. Limited affordable and accessible low-income housing
- 4. Inability to afford and take advantage of local educational, recreational activities
- 5. Private discrimination against protected classes (in violation of federal Housing Law) directly limits housing choice and mobility.
- 6. Zoning standards that limit the ability to achieve the maximum permitted density.
- 7. Lower and moderate households may face displacement pressures as rents rise due to high overall housing costs.

Ac	Timeframe:	
1.	Contract directly with a fair housing services provider to provide specific services for San Juan Capistrano residents	Annually
2.	Continue increased bilingual translation and interpretation services as well as alternative events and workshops times, locations, and formats to enable and facilitate meaningful participation from the Community of Focus	Ongoing
3.	Provide tenant/landlord training about fair housing laws, requirements, services, and resources.	Annually
4.	Pursue development of a program to increase maintenance and necessary repairs and safety of overcrowded rental units through voluntary owner certifications and randomized inspections in a manner that does not rely on tenant complaints or lead to increased threat of retribution or displacement.	Ongoing
5.	Update Density Bonus Ordinance	Ongoing
6.	Continue to coordinate and support community-based organizations that support after school programs, self-help training, food-assistance and counseling and access to other resources.	Annually
7.	As part of the Capital Improvement Plan, coordinate with Public Works to prioritize Environmental Justice / Community of Focus areas for actions and capital improvements.	Annually
8.	Rezoning to permit high density residential development in higher resource areas,	Ongoing
9.	Increase housing choices through removal of regulatory and procedural barriers to higher density housing; increased incentives and requirements for construction of affordable housing,	Ongoing

Orange County 189 25-29 Regional AFH

10. Amend the Inclusionary Housing Ordinance to increase the minimum percentage of lower-income affordable housing units (or in-lieu fees) to the extent feasible based on current economic analysis.	2023 ongoing	and
11. Review Architectural Control process to ensure objective design standards.	2024	
12. Continue Housing Rehabilitation Grant Program.	Ongoing	
13. Continue to implement the mobile home park rent increase limits ordinance and the senior mobile home park overlay,	Ongoing	
14. Consider new forms of rent stabilization and price control for older multifamily units to ensure existing residents are not priced out of their homes.	2024	
15. Ensure compliance with and education regarding the Tenant Protection Act of 2019 (AB 1482), including maximum annual rent increases, just cause evictions, and financial compensation requirements to stabilize residents living in areas at risk of displacement.	Ongoing	

12. Seal Beach

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs **Contributing Factors:** Lack of affordable housing in high opportunity areas due to local land use and zoning laws. Actions: Timeframe: 1. The City will process zoning and General Plan 2025 amendments for sufficient sites with appropriate densities as identified in the City's Housing Element, to fully accommodate the City's remaining housing need. 2025 2. Create a mixed-use zone that meets state requirements for RHNA site designation, specifically to facilitate housing for lower income households. The zoning code update process will accommodate all relevant state requirements regarding density and affordability and will engage with all relevant stakeholders to ensure the development standards can result in the development of the maximum number of units allowed and facilitate the inclusion of affordable units. 3. Make information on available incentives and concessions Ongoing available and evaluate their efficacy regularly. 4. Provide a streamlined and understandable process for the Revise ordinance development of ADUs and JADUs, supported by September 2024 and adopt incentives and resources as they may be available. Adopt pre-approved plans by June pre-approved plans. Permit 10 ADUs during the planning 2025. period. 5. Reduce barriers to housing development by streamlining By January 2024 permit processing consistent with SB 35. 6. Implement SB 9 requirements - Reduce barriers to housing Process 2 SB 9 projects development through simplified processing and creating between 2021-2029. incentives to make units created affordable. 7. Amend the Zoning Code to allow employee housing August 2025 consistent with Health and Safety Code §17021.5 and 17021.6. 8. Allow housing at select locations in the Main Street By October 2025 Specific Plan. Permit two residential units in the Main Street Specific Plan during the planning period.

Reduce minimum unit size constraints to housing development, especially to promote affordable housing.	By August 2025
10. Allow SROs as uses allowed by-right in the RHD Zone.	By December 2026
11. Reduce Parking Requirements for Studios and 1-Bedroom Units.	By December 2026

13. Stanton

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- 1. Lack of resources for fair housing agencies and organizations.
- 2. Displacement of residents due to economic pressures.
- 3. Location and type of affordable housing, including availability of affordable units in a range of sizes.
- 4. Lack of access to opportunity due to high housing costs.
- 5. Quality of affordable housing information programs.
- 6. Access to transportation for individuals with disabilities.

Ac	Timeframe:	
1.	Support fair housing services provider and efforts to minimize discriminatory housing practices.	Ongoing
2.	Maintain and monitor the residential sites inventory to ensure sufficient sites remain to accommodate the RHNA allocation throughout the planning period. Receive and process development applications for residential projects.	2021-2029
3.	Maintain adequate capacity to accommodate the City's RHNA obligations at all income levels throughout the planning period. Report as required through the HCD annual report process.	2021-2029
4.	Collaborate with the development community annually, including affordable housing developers, to evaluate the viability of developing city-owned land as affordable housing.	Annually
5.	For all project applications, identify the need for replacement of affordable housing units and ensure replacement, if required, occurs.	Ongoing
6.	Monitor the City's existing affordable housing stock and support affordable housing developers in their efforts to develop new affordable units in Stanton. Monitor the City's options for special needs housing and likewise support special needs housing developers.	2021-2029
7.	Understand the potential for market-force economic displacement and consider programs to address the issue, if necessary.	2021-2029
8.	Ensure that the City's parking standards for residential uses are adequate while not unduly constraining housing development.	2021-2029

14. Villa Park

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- Lack of local private fair housing outreach and enforcement may be a significant contributing
 factor to fair housing issues in Orange County. Although Orange County is served by two highquality private, nonprofit fair housing organizations, they are underfunded and understaffed
 in comparison to the total need for their services. Victims of discrimination would be more
 able to exercise their rights, thus deterring future discrimination, if the capacity of existing
 organizations grew to meet the scale of the problem.
- 2. Lack of local public fair housing outreach and enforcement may also be a significant contributing factor to fair housing issues in Orange County. There are no local public entities that conduct fair housing outreach and enforcement, with the California Department of Fair Employment and Housing and HUD constituting the only public enforcement bodies that operate in Orange County. Advocates across Orange County and the state of California have reported issues with the timeline of the California Department of Fair Employment and Housing's investigations and the standards that it applies in making probable cause determinations. A local public enforcement agency, if created, would have the potential to be more responsive to victims of discrimination in Orange County than either the state or HUD.
- Lack of access to opportunity due to high housing costs may be a significant contributing
 factor to fair housing issues in Orange County. Increasing housing affordability would make it
 easier for low-income households to access the types of services and amenities that further
 social mobility.
- 4. General lack of a range of affordable housing opportunities, including limited affordable housing options for families
- 5. Limited opportunity for residential development in sites accommodating multiple family development.

Actions:	Timeframe:
1. The City will continue to disseminate information regarding fair housir	ng Ongoing
in a variety of locations including City Hall, the City website and the	he
library, and conduct ongoing, proactive outreach to engage members	of
all socio-economic groups and recruit members of underrepresente	ed
groups to participate in City meetings. The City will continue to see	ek
funding to support the Fair Housing Council of Orange County (FHCOC	C),
which provides community education, individual counselin	ıg,
mediation, and low-cost advocacy with the expressed goal	of
eliminating housing discrimination and guaranteeing the rights of a	all
people to freely choose the housing for which they qualify in the are	ea
they desire. The City will invite FHCOC to conduct annual fair housir	ng
outreach targeted to Villa Park residents and landlords.	
2. The City will seek to improve access to opportunity for lower-incom	ne
households and other protected classes by providing adequate sites f	
affordable housing development, encouraging the production of ADU	JS,

	and facilitating the production of housing for individuals with special needs.	
3.	Recruit at least five landlords to become a participating voucher property during three-year period.	2021-2024
4.	Coordinate with the County to assist with improving voucher mobility at local level by:	
	 a. Identifying local staff to commit to 25% administrative function to support voucher mobility programs. 	June 2024
	 Establishing a customer service framework including dedicated phone number, email and contact information. 	June 2024
	c. Establishing an annual monitoring program to evaluate the success of voucher mobility program. Provide for annual program amendments, as necessary.	By June 2024, annually thereafter
5.	Annually review the Sites Inventory and the location of new, affordable housing development to ensure equal and fair housing development practices throughout the whole City.	Annually
6.	Annual meetings with developers to explore affordable housing and non-traditional single-family housing opportunities.	Annually

15. Yorba Linda

Issue: Segregation, Disparities in Access to Opportunity, and Disproportionate Housing Needs

- 1. Lack of effective fair housing outreach to seniors due to digital divide
- 2. Private discrimination
- 3. Lack of knowledge of existing resources among the public
- 4. Low number of HCVs in the City compared to the County overall
- 5. Lack of affordable housing opportunities throughout the city, including in areas where rent and sale prices have become exclusive, and for special needs groups such as persons with disabilities and female-headed households
- 6. Need for more public investment in infrastructure and accessibility improvements in moderate resource opportunity areas
- 7. Challenges for housing/property upkeep due to financial/physical constraints and age of housing stock.

Ac	Actions:	
1.	 Increase the distribution of fair housing materials and increase awareness of fair housing options among residents, including special needs groups and low-income residents, through the following actions: 	
	 a. By the end of 2022 have additional fair housing information posted at the Yorba Linda Senior Center site and on their digital platforms. Hold an informational workshop in 2023 and 2025 	2022-2025
	 By December 2022, conduct a fair housing information session for the City Council. Invite local nonprofits (including the Orange County Human Relations Commission, the Kennedy Commission, Making Housing Happen and People for Housing O.C.) to attend 	2022
	c. Publish Fair Housing information, including any community meetings, on non-traditional media such as Facebook or Instagram, and conduct targeted outreach to tenants, mobile home park residents and other lower income populations.	Annually
2.	Increase public and private investment in areas of Yorba Linda that have been identified as moderate resource areas and portions of the City with higher percentages of special needs groups, through the following actions:	
	a. Starting in 2022, work with the FHCOC to contact landlords of affordable multifamily complexes every two years and provide fair housing information and assistance. This outreach will focus on promoting the Section 8 voucher program to landlords who have not previously participated in the program and should include multi- lingual materials.	Every 2 years

		_	
b.	Adopt an ordinance to expand the housing supply in High Resource single-family zones by allowing for lot splits and duplexes under the parameters of SB 9. In coordination with research being conducted at the State level, evaluate opportunities to incentivize and provide funding assistance for homeowners to provide affordable units under SB 9.	Completed 2023	in
c.	Continue to improve access to persons with disabilities through ADA improvement to streets, sidewalks and public facilities. Dedicate or seek funding, including annual CDBG allocations, to prioritize infrastructure and accessibility improvements in the moderate resource opportunity areas	Annually	
d.	Coordinate with the Orange County Housing Authority in 2023 about utilizing the mobility counseling program in Yorba Linda. This OCHA program informs Housing Choice Voucher holders about their residential options in higher opportunity areas and provides holistic support to voucher holders seeking to move to higher opportunity areas.	2023	
	se affordable housing options throughout the city through the ing actions:		
a.	Adopt the Affordable Housing Overlay, Commercial Mixed-Use Overlay and Congregational Land Overlay, providing geographically dispersed sites for over 600 lower income units which foster a more inclusive community. Initiate rezoning and the Measure B election in 2024 and pay for all costs associated with the ballot measure.	Completed 2024	in
b.	Increase the allocation of units in Savi Ranch from 200 to 790 high density units, creating a better geographic distribution of development between the eastern and western areas of the community.	Completed 2024	in
C.	Promote and support the development of Accessory Dwelling Units (ADUs), including pursuing funding for rent-restricted ADUs, and seek to issue permits for over 50 units annually throughout Yorba Linda	Ongoing	
d.	Expand information available on affordable housing in Yorba Linda, including any community meetings on non-traditional media such as Facebook and Instagram.	Ongoing	
e.	Require affordable developers receiving public funds to prepare an affirmative marketing plan and encourage private developers with affordable units in their projects to prepare an affirmative marketing plan. The affirmative marketing plan shall ensure marketing materials	Ongoing	

Orange County 197 25-29 Regional AFH

		for new developments are designed to attract renters and buyers of diverse demographics, including persons of any race, ethnicity, sex, handicap, and familial status.		
	f.	During the public hearing processes for the Affordable Housing Overlay, Mixed-Use Housing Overlay, and Congregational Land Overlay, as well as the outreach process for the Measure B election (in November 2024), utilize tools such as the "Myths and Facts About Affordable & High-Density Housing" currently on the City's website to show what affordable housing means and who it benefits. Contact Kennedy Commission, Making Housing Happen and People for Housing O.C. for potential input. Conduct at least five educational events for the public in locations throughout the community.	Completed 2024	in
	g.	By the end of 2022, research the development of a program that would provide low interest loans to single-family homeowners and grants to homeowners with household incomes of up to 80% of the Area Median Income to develop accessory dwelling units with affordability restrictions on their property. This research should also explore outside funds. If funding is available, establish a pilot program by December 2023 with a goal of achieving at least two deed-restricted ADUs annually; evaluate the program by the end of 2025.	2022-2025	
4. Pre	ser	ve the existing housing stock through the following actions:		
	a.	Include information about rehab and maintenance resources (including the Residential Rehabilitation Program and Community Preservation Program) in City newsletters and on the website. Include translated information when feasible. Seek to assist 10 households annually. Starting in 2022, conduct targeted outreach through annual mailings to Census Tracts 218.20 and 218.26. about available rehabilitation assistance.	Annually	

Orange County 198 25-29 Regional AFH

B. Aliso Viejo

Issue: Concentration

Most of the city is considered an area of high White concentration, except for a few neighborhoods with low-medium concentration (which are predominantly White) in the northern and eastern parts of the city. Since 1990, levels of concentration have been increasing but remain low.

Contributing Factors:

- 1. Location and type of affordable housing.
- 2. Limited access to opportunity due to high housing costs.
- 3. Insufficient fair housing outreach and enforcement.
- 4. Availability of affordable housing.
- 5. Availability of affordable units in a range of sizes.
- 6. Insufficient Housing Choice Vouchers.
- 7. Displacement of residents due to economic pressures.

Expand access to opportunity for all protected classes through the following actions: 1. Identify sites in high opportunity areas for new hous ing development. 2. Review policies and programs that increase the sup ply. 3. Conduct a landlord/tenant education campaign on fair housing laws. 4. Encourage development of a range of affordable housing types. 5. Encourage the development of ADUs. 6. Promote Housing Choice Vouchers. 7. Educate renters about their rights.

Issue: Disparities in Access to Opportunities

Based on analysis of fair housing complaint data, individuals with disabilities may disproportionately experience discrimination in housing.

- 1. Lack of outreach and education regarding supportive services for individuals with disabilities.
- 2. Lack of education regarding resources available in the City and County, such as schools, transportation, and other in-home or community resources, for individuals with disabilities and single female-headed households.

Actions:	Timeframe:
Bring existing resources to protected classes through	
the following actions:	

1. Review and amend (if necessary) Reasonable Accommodation regulations and procedures.

Review and amend regulations and procedures by the end of FY 25/26.

 Provide information on supportive services for individuals with disabilities, single female-headed households, and homeless individuals via the OC Social Services Agency. Conduct annually by Dec. 31st of each year.

3. Partner with OCTA and publish public transit program info (OC Flex, OC ACCESS Service, and youth rider free pass).

Conduct bi-annually by Dec. 31st of each year.

Issue: Disproportionate Housing Needs

The City's 2021-2029 Housing Element identified substandard housing conditions for low-income households as an issue facing low-income residents in the city. Additionally, housing cost burden is an issue for renters throughout Orange County.

Contributing Factors:

Substandard housing conditions due to:

- 1. Insufficient affordable and healthy homes for very-low incomes.
- 2. Lack of insufficient outreach and education on code enforcement.
- 3. Insufficient funding for repairs or rehabilitation.
- 4. Via Iglesia neighborhood has homes in need of repairs

Actions: Reduce existence of substandard housing conditions through the following actions:	Timeframe:
Add information about the City's Code Enforcement service on the City's website for renters and owners.	Information added on City's website to be completed by the end of FY 25/26. Annually, conduct one informational campaign on Code Enforcement services with the goal of reaching at least 10 renters and 10 owners.
2. Create educational materials about healthy homes, and post information on the City's website.	Educational materials to be completed by the end of FY 25/26 and posted to the City's website annually.

C. Anaheim

Issue: Segregation, including R/ECAPs; and Disproportionate Housing Needs.

While segregation levels overall in Anaheim are low, the city has neighborhoods considered to be areas of high POC segregation north of downtown and along SR-91, and south of downtown and adjacent to Disneyland. These areas are predominantly Hispanic. The neighborhoods north and south of downtown also have a higher percentage of overcrowded units than other neighborhoods in the city, and the areas north of downtown are home to multiple publicly supported housing developments. Additionally, housing cost burden is an issue for renters throughout Orange County. Anaheim also has one R/ECAP to the northeast of Disneyland, along Ball Rd and I-5. This Census Tract is predominantly Hispanic, as are all the surrounding neighborhoods. Additionally, Anaheim Hills is considered an area of high White segregation.

Contributing Factors:

Historic practices of redlining and legal racial segregation have created many of the residential patterns that still exist today. Additionally, the high cost of land and existing housing in Anaheim (and throughout Orange County) are significant constraints to the development of new affordable housing and access for families to existing housing.

Actions:	Timeframe:
Increase the supply of affordable housing in high	
Opportunity areas through the following actions:	
 Disseminate on the City's website, information material to promote and facilitate implementation of state and City regulations and incentives to create affordable housing. Develop and maintain a database of affordable housing developers working in California; and hold an annual workshop to engage and collaborate with affordable housing developers on these topics. 	candidate site list, and developer database and hold first annual workshop by October 2024. Update housing element candidate site list annually in conjunction with Housing Element Annual Progress Report
 Disseminate on the City's website, information material to promote and facilitate AMC 18.38.215 Residential Uses of Motels, Commercial, and Office Structures. Develop and maintain a database of existing motels, commercial, and office structures for 	participate in annual affordable housing workshop by October 2025.
which conversion could be feasible. 5. Encourage the production of ADUs.	Continue to refine existing review process for
6. Continue to seek opportunities to defray costs	ADUs not using pre-approved plans.
associated with construction to homeowners.	Abos not using pre-approved plans.

 Develop, subject to funding availability, a program to facilitate the construction of deedrestricted ADUs. Continue to refine existing review process for ADUs using pre-approved plans and expand pre-approved plan catalog.

Continue to support and promote programs such as the Orange County Housing Finance Trust's Affordable ADU Loan Program, when offered.

Continue to seek potential local, state, and/or federal funds to establish an Anaheim Housing Authority affordable ADU grant/loan program.

In conjunction with Annual Progress Report, identify and track ADU construction in high and highest resource areas/Racially Concentrated Areas of Affluence (RCAAs). Conduct review by October 2025, and if ADU construction is disproportional to the number of units, develop targeted outreach with a goal of improving the ADU/overall dwelling unit metric for the areas relative to other residential areas in the City.

- Continue to regularly monitor deedrestricted, affordable housing units that exist citywide.
- Collaborate with nonprofit housing providers and develop a preservation strategy to meet the City's Quantified Objective for preserving 60 At-Risk Units (30 Very Low- and 30 Low-Income).

Continue monitoring all deed-restricted affordable housing units annually and add new properties as applicable.

Develop preservation strategy for 60 units converting in 2027 – 2031.

Issue: Disparities in Access to Opportunities

Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, neighborhoods near the downtown have low environmental health, low education scores, low economic scores; but good access to HQTAs. Conversely, Anaheim Hills, which is a predominantly White area, has the best access to environmentally healthy neighborhoods with low poverty rates, high education scores, and high economic scores. Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Contributing Factors:

A lack of affordable housing in high opportunity areas (due to the factors discussed above) contributes to the disparities in access to opportunities. Additionally, specific groups in the city face the unique housing challenges that impact access to opportunity, including:

- Seniors:
 - Having limited and fixed incomes.
 - Disproportionately higher healthcare costs, adding monthly living costs.
 - o Require customized housing features due to mobility and self-care limitations.
 - Transit dependency.
 - Limited in-home support, due to living alone.
- Individuals with physical and developmental disabilities:
 - Need for specialized housing to accommodate disabilities.
 - o Higher incidence of dependent living needs.
 - o High incidence of unemployment and having fixed income.
 - Need for supportive services.
- Large person households:
 - o Lack of affordable housing with sufficient bedroom counts.
 - o Options for larger bedroom counts in rental units.
 - o Higher monthly cost burden.
 - o Affordable options for large family households.
 - o Childcare needs for working families.
- Single parent households
 - Affordable housing options.
 - Rental and for sale housing options.
 - Higher monthly cost burdens with single-income families.
 - o Childcare needs for working families.
- Farmworker households
 - o Affordable housing options.
 - Higher incidents of cost burden for housing.
 - Rental and for sale housing options.
- Extremely Low-Income households:
 - Need for increased affordable housing options.
 - o Markedly higher incidents of cost burden for housing.
 - Need for smaller housing unit options such as SRO's.
 - Rental assistance.
 - o Higher incidents of homelessness.
 - Higher likelihood for transitional and supportive housing.
- Residents experiencing homelessness:
 - Need for increased affordable housing options.
 - Need for smaller housing unit options such as SRO's.
 - o Rental assistance.
 - Higher likelihood for transitional and supportive housing.
 - Need for emergency shelters.
 - Need for stable health care.

Actions:	Timeframe:
The city will ensure equal access to housing, expand access to opportunity for all protected class groups, and increase community integration for individuals with disabilities through the following actions:	
 Continue to provide an estimated 6,500 Section 8 Rental Assistance Vouchers annually, subject to federal funding availability, to qualified tenants. Develop and maintain a database of existing housing in high and highest resource areas/Racially Concentrated Areas of Affluence (RCAAs) which has the potential to provide voucher-based unit(s), including ADUs. Develop a targeted outreach program to recruit potential additional landlords in these areas. 	Continue to award all funded Section 8 Rental Assistance Vouchers annually. Develop database and conduct first annual outreach program by October 2025. Target and increase the portion of Section 8 Rental Assistance Vouchers leased in high and highest resource areas/Racially Concentrated Areas of Affluence (RCAAs) in planning period.
4. In partnership with the Fair Housing Council of OC, disseminate and display for public viewing information regarding fair housing law applicable to landlords, tenants, sellers, buyers, real estate professionals and others in the housing industry at City Community Centers / Family Resource Centers/Youth Centers.	Include in Scope of Services for Fair Housing Council of OC no later than October 2026.
 5. Continue to implement the Homelessness Action Plan, including the four overarching principles: Housing First: The City of Anaheim commits to following nationally recognized best practices in addressing homelessness including Housing First practices and the belief that housing and housing support services are the solutions to homelessness. Person-Centered: All programs funded by the City strive to be person- centered, including prioritizing trauma-informed care and acknowledging that people experiencing homelessness understand best what services and supports are needed to help them gain and keep housing that will resolve their homelessness. Equity: The City commits to incorporating equity into service delivery systems and using data to evaluate gaps in service and identify areas of improvement so that every household in City- funded programs receives 	Ongoing with update to the Homeless Action Plan for July 2024 – June 2028. The Homeless Action Plan has the following metrics: Decrease unsheltered homelessness by 70% and overall homelessness by 50%.

- relevant and affirming support from the City's network of providers.
- Data-Driven Solutions: The City commits to the utilization of data to drive funding decisions and solutions to homelessness. This includes evaluating the efficacy of programs and continual monitoring of the City's portfolio of interventions to ensure collective efforts are meeting the needs of the community while making gains against agreed upon community goals. The Plan identifies Unsheltered Households, Chronically Homeless Individual Households, Families, Veterans, Transition-Aged Youth, and Seniors as unique populations experiencing homelessness within the City.

 Increase community integration for individuals with disabilities by continuing to assist in the development of housing projects for special needs households by providing technical assistance with tax credit applications, tax-exempt bond financing and other public funds, including, ESG, CDBG, and HOME. On-going, with annual review and adjustments, if adjustments are required and applicable.

7. The City shall continue to monitor to ensure the effectiveness of reasonable accommodation standards and procedures and maintain compliance with federal and state housing laws.

On-going, with annual review and adjustments, if adjustments are required and applicable.

8. In partnership with the Fair Housing Council of OC, provide and maintain multi-lingual informational materials on tenant legal counseling and resources with the goal of eliminating housing discrimination and guaranteeing the rights of all people irrespective of race religion, sex, marital status, ancestry, national origin, color, age, family size or disability to freely choose the housing for which they qualify in the area they desire. Continue to provide estimated annual allocation of \$100,000, based on program funding availability.

9. Continue to participate in City of Anaheim Neighborhood Services Mobile Family Resource Centers as well as agencies and associations who specialize in supporting disabled tenants including those with hearing, vision, cognitive, ambulatory, self- care, and independent living difficulties consistent with data from Anaheim residents reporting a disability. effectiveness and adjust Scope of Services as appropriate and based on available funding.

Annually evaluate program

Target an increase in the number of households served per funding dollar.

D. Buena Park

Issue: Segregation

Segregation levels in the city have increased since 1990 but remain low overall. However, the following areas in the city are considered to have high POC segregation: the northeast corner of the city, which is predominantly AAPI; and the neighborhood between I-5, Artesia Blvd, Beach Blvd, and the LA County line, which is predominantly Hispanic.

- 1. Concentration of Hispanics/Latinos of any race and non-Hispanic Asian groups experiencing limitation to housing opportunities.
- 2. Barriers to mobility.
- 3. Lack of opportunities for residents to obtain housing in higher opportunity areas.
- 4. Housing Choice Vouchers.

Actions:		Timeframe
The city will increase affordable housing opportunities in high opportunity areas through the following actions:		
1.	Amend the city's Zoning Ordinance to establish provisions for Low Barrier Navigation Centers (LBNC) consistent with state law.	By the end of 2023
2.	Continue to annually monitor and facilitate the preservation of at-risk affordable housing units throughout the community. Facilitate new housing developments accessible to the elderly and disabled individuals throughout the community. Through these steps, the city's goal will be to preserve 130 units considered to be "at-risk" of market-rate conversion.	Ongoing
3.	Facilitate new housing developments accessible to the elderly and disabled individuals throughout the community, with efforts targeting Census Tracts 086801, 086803, 110201, 110202, 110302, and 110500. Through this step, the city's goal will be to increase the supply of accessible units by at least 25 percent.	
4.	Continue to administer city-operated programs to assist households with disabilities with architectural modifications to their homes and continue to implement the provisions of the Americans with Disabilities Act (ADA).	
5.	Provide information in public places regarding the city's reasonable accommodation ordinance and make information available on this program more widely available.	
6.	Continue to facilitate/process Reasonable Accommodation requests to ensure equal housing opportunities. Through this step, the city's goal is to ensure approval of 100 percent of the reasonable accommodation applications submitted.	
7.	Support Infill, Site Recycling and ADU construction throughout the community. Through this step, the city's goal will be to reach its RHNA obligation to meet the community's needs.	

8. Continue to provide outreach and education to housing providers and potentially qualified residents regarding Housing Choice Voucher program, with efforts targeting Census Tracts 086801, 110110, 110116, 110201, 110202, 110303, 110401, 110402, 110500, 110603, and 110606. Through these steps, the City's goal will be increasing participation in the voucher program by 20 percent.

Issue: Disparities in Access to Opportunities, including Homeownership.

Hispanic and Black residents have less access than other groups to neighborhoods with low poverty rates and high performing schools. Geographically, the neighborhoods in the center of the city, between I-5 and the Artesia Freeway (SR-91), have poor environmental health, lower educational scores, and lower economic scores.

Large disparities in homeownership rates exist between White households, who have the highest rate, and Black households, who are least likely to own their own home. Additionally, housing cost burden is an issue for renters throughout Orange County.

- 1. Lack of affordable housing in a range of sizes.
- 2. Land use and zoning laws.

Act	tions:	Timeframe:
The city will increase affordable housing opportunities in high opportunity areas through the following actions:		
1.	Amend the zoning code to enable and promote residential development through use of the mixed-use overlay zones, religious congregation and fraternal site overlay zones, and housing opportunity overlay zones, among other planning tools. These initiatives provide new opportunities for a variety of residential development types and prices and includes areas where residential development was previously not allowed.	By end of 2024
2.	Prepare educational material, develop pre- approved site/floor plans, and establish a monitoring program to ensure city is on track to meeting ADU construction goals. Through these steps, they will be to facilitate construction of at least 16 ADUs throughout the community.	By early 2025
 3. 4. 	Provide technical and financial (subject to availability) assistance for single-family residential additions to eliminate overcrowding conditions, with efforts targeting CensusTracts 110402, 110603, and 110606. Through these steps, it will be the city's goal to provide residential rehabilitation assistance to approximately 160 units. Continue to promote use of the state Density Bonus Law through website	Ongoing
5.	materials and counter assistance. Promote, increase, maintain homeownership for LMI households, as well as residential rehabilitation assistance for senior and down payment assistance	

- programs for young families with assistance throughout the community, with efforts targeting Census Tracts 086803, 110201, 110202, 110302, 110401, 110402, 110500, 110603, 110607). Through these steps, the city's goal will be to increase assistance to eligible residents by 25 percent.
- 6. Continue to enforce city codes to eliminate and prevent unsightly or hazardous conditions in residential areas throughout the community, with efforts targeting CensusTracts 110603, 110500, 110301, 110302, and 110401 located adjacent to limited access freeways. Through these steps, the city's goal will be to reduce blighted conditions by 20 percent.
- 7. Continue to participate in Orange County assessments and programs as a participating city in the Analysis of Impediments to Fair Housing.
- 8. Continue to promote fair housing among all income categories throughout the community.

E. Costa Mesa

Issue: Segregation and R/ECAPs

There is moderate segregation between Hispanic and White residents in the city, though these levels declined slightly between 2000-2010. Geographically, the neighborhoods between downtown and the Costa Mesa Country Club are areas of high POC segregation, with a predominantly Hispanic population. The largest number of publicly supported housing units and the highest concentration of vouchers in the city is in this area. The city's one R/ECAP is also located here, in the neighborhood between Newport Avenue and Placentia Avenue, south of 19th Street. The neighborhoods in East Side Costa Mesa (east of SR-55 and south of Mesa Drive) are all areas of high White segregation, as are the neighborhoods north of the Country Club and the neighborhoods between Estancia High School and Canyon Park.

- 1. Housing discrimination.
- 2. Lack of affordable housing due to governmental and market constraints.

Actions:	Timeframe:
The City will take the following meaningful actions, in addition to resisting discrimination, to overcome patterns of segregation based on protected characteristic, as defined by California law:	
 Continue to contract with the Fair Housing Foundation or other fair housing service provider and provide information regarding the Public Law Center to address Housing Discrimination and unfair lending, including promoting mediation services, foreclosure assistance and/or multilingual tenant legal counseling services. Promote available services on the City's webpage. 	Ongoing
2. Continue to enforce the City's Inclusionary Housing Ordinance, which was approved on August 6, 2024, and became effective on September 6, 2024.	Ongoing
 3. Support the development of affordable housing through the following efforts: Continue to evaluate programs and incentives to encourage the development of affordable housing. Make materials available to applicants regarding the City's affordable housing ordinance. Develop additional incentives and materials as state legislation provides additional incentives. Continue to pursue funding and partnerships with affordable housing builders. 	Ongoing

4.	Amend the City's Zoning Code to meet requirement set forth in the California Health and Safety Code Sections 17021.5 and 17021.6, which requires the City to permit farmworker housing by-right, without a conditional use permit, in single-family zones for six or fewer individuals and in agricultural zones with no more than 12 units or 36 beds. Until the zoning code is updated, the City will process any proposed farmworker housing by-right in single-family zones pursuant to State Law.	Revise Zoning Code in 2025
5.	Review and update the Zoning Code to comply with the State Density Bonus Law as part of the City's rezone program. In the meantime, continue to process State Density Bonus Law requests and project in compliance with state law.	Revise Zoning Code in 2025
6.	Review planning application fees to avoid creating a constraint to the development of affordable housing, as part of the City's rezone program.	Revise Zoning Code in 2025
	 Reduce barriers to construction of housing for extremely low and lower-income households through the following actions: Subsidize up to 100 percent of the City's application processing fees for qualifying developments where all units are affordable to 80 percent AMI or lower, as funding is available. Annually promote the benefits of this program to the development community by posting information on its webpage and creating a handout to be distributed with land development applications regarding development opportunities and incentives. Proactively reach out to developers at least once annually to identify and promote development opportunities. Adopt priority processing and streamlined review for developments with units affordable to lower income households. Support funding development applications throughout the planning period for projects proposing units affordable to lower income households. 	Ongoing
8.	Review and revise the Zoning Code's requirements for residential off-street parking for multi-family projects to facilitate the development of multi-family housing, and specifically affordable housing.	Revise Zoning Code in 2025
9.	Promote the development of ADUs through the following actions:	Complete the update to ADU regulations in municipal code by April

Orange County 210 25-29 Regional AFH

- Review and revise the City's ADU ordinance as necessary to comply with state law.
- Maintain a dedicated web page that promotes ADU development.

2025. Maintain web page on ongoing basis.

Issue: Disparities in Access to Opportunities

Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, the neighborhoods downtown and west of downtown are less environmentally healthy and have lower education and economic scores. These are also predominantly Hispanic neighborhoods. Conversely, neighborhoods east of Newport Boulevard (SR-55), which are predominantly White, have higher education and economic scores, are more environmentally healthy, and have lower poverty rates. Additionally, Black, Hispanic, and Native American residents are less likely to own their home than White and AAPI residents.

Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Contributing Factors:

- 1. Unfair lending practices
- 2. Approximately 86 percent of housing units were built prior to 1989 before the Fair Housing Act and state laws regarding accessibility requirements for individuals with disabilities were adopted.

Actions: The City will take the following meaningful actions, in addition to resisting discrimination, to foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristic, as defined by California law:	Timeframe:
1. Continue to contract with the Fair Housing Foundation or other fair housing service provider and provide information regarding the Public Law Center to address Housing Discrimination and unfair lending, including promoting mediation services, foreclosure assistance and/or multilingual tenant legal counseling services. Promote available services on the City's webpage.	Ongoing
2. Continue operating the Owner-Occupied Housing Rehabilitation Program, which may be used to assist qualified property owners in improving single-family residential properties, including health and safety repairs such as mechanical plumbing, electrical, roofing, security, medical emergency requirements,	On an annual basis, provide informational materials on the Owner-Occupied Housing Rehabilitation program; encourage the participation of seniors, veterans, and disabled residents in

Meet with local organizations and developers to promote access to housing for individuals with disabilities and address potential constraints. 4. Increase the availability of transitional and supportive Revise Zoning Code in 2025. Other efforts are ongoing. housing through the following actions: Amend the Zoning Code to include transitional and permanent supportive housing within the City's land use matrix in compliance with Senate Bill 2 and Government Code Section 65651. Monitor the inventory of sites appropriate to accommodate transitional and supportive housing. Proactively engage relevant organizations to meet the needs of individuals experiencing low-income homelessness and extremely residents, including the Costa Mesa Network for Homeless Solutions, which aims to provide a comprehensive system programs and services for residents experiencing homelessness and those at risk of homelessness. 5. Review and revise the City's Zoning Code and The City is currently in the process application procedures applicable to group homes to of reviewing its Group Homes promote objectivity and greater approval certainty procedures and anticipates

bringing any recommendations to Planning Commission and City

Council in 2025.

similar to other residential uses.

F. Fountain Valley

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters throughout Orange County, including Fountain Valley.

Contributing Factors:

- Stigma associated with Housing Vouchers: A large percentage of rental households in Fountain Valley spend more than 30 and 50 percent of household income on monthly rent and utilities. While this may be due in part to residents being willing to pay more for access to high performing school districts, there may also be a stigma associated with the use of Housing Vouchers, both by property owners and tenants.
- Lack of additional housing options. The City's housing supply has not increased at a rate
 commensurate with regional demand, driving costs higher and limit housing choices for
 existing residents looking to remain in Fountain Valley (adult children eager to move out of
 their parent's house and older adults looking to downsize) and potential new residents looking
 for more affordable options in Fountain Valley.

Actions:	Timeframe:
Expand voucher use by 50 tenants by 2028, and extend affordability term of	f 70
units in the Guadalupe Manor an additional 20-30 years by 2029, through	the
following actions:	
1. Coordinate with OCHA to generate a detailed understanding of who verpayment rates are highest in the city (as of latest available Census dawhere vouchers are and are not used, and how many tenants could potentially qualify at each multifamily property in target areas.	nta),
2. Update Development Code consistent with state law and produce residen project flow-chart and/or informational sheets, consistent with SB 35 and 330.	
3. Coordinate with OCHA and FHCOC to develop an outreach plan and mater to communicate the benefits of vouchers.	ials By 2026
4. Complete study of options to augment/adjust affordable housing preservat program for possible application of funds for those overpaying.	tion By 2026
5. Distribute outreach materials through means that reach target population (e.g., those receiving subsidized school lunches). Conduct direct outreach five properties (tenants and owners) in Census Tracts illustrating high rates rental overpayment.	n to
6. Secure extended affordability for Guadalupe Manor through at least 2058.	By 2029

Orange County 213 25-29 Regional AFH

Increase supply of affordable housing through the following efforts:		
1.	Evaluate options to apply affirmative advertising requirements to income- restricted units in the Slater Avenue project.	By 2026
2.	Adopt Inclusionary Housing Ordinance.	By 2024
3.	Establish procedures and requirements that will ensure affirmative advertising requirements are applied to and conducted for all future income-restricted housing developments.	By 2026
4.	Adopt 2045 General Plan.	By 2024
5.	Adopt appropriate pre-vetted ADU site plans, with the goal of permitting 100 ADUs affordable to lower income households in high and highest resources areas by 2026 (as measured from June 30, 2021).	By 2026

G. Fullerton

Issue: Segregation

Areas of the city considered to have high POC segregation include most of the neighborhoods west of Harbor Blvd and north of Malvern Ave, which have predominantly AAPI populations.

- 1. Lack of resources for fair housing agencies to conduct more rigorous testing and audits, outreach, training, public education campaigns.
- 2. Lack of language access.

Actions:		Timeframe:
1.	Provide informational seminars to area residential real estate agents and brokers on fair housing laws and regulations.	Provide training to at least 15 real estate agents and brokers annually.
2.	Work with tenants, tenant advocates to identify violations of fair housing federal and state fair housing laws and support prospective and existing tenants who are experiencing discrimination.	Annually
3.	Provide trainings for property owners/managers on the requirements of federal and state fair housing laws to prevent discrimination.	Provide training to at least 15 property owners and managers annually.
4.	With the Fair Housing Foundation, support an annual Fair Housing Audit Report that assesses typical or timely market-based suspected areas of discrimination.	Review methodology for a Fair Housing Audit by January 2025
5.	Affordable Rental Housing Counseling Services: Provide funding for information and referral services that direct families and individuals with financial resources for housing rental or purchase, locating suitable housing, and obtaining housing with special needs facilities such as disabled-accessible units.	Hold at least four informational events between 2025-2029; assist at least 50 residents and landlords annually.
6.	Create a Language Access Plan based on HUD guidelines and publish on the City's website: The goal of the Language Access Plan is to survey, maintain and publish a list of multi-lingual staff capacity at City Hall so that staff may respond to the needs of Limited English Proficiency households.	Create a Language Access Plan by January 2025. Maintain multilingual staff capacity at City Hall on an ongoing basis.
7.	Ensure that local housing programs respond to the needs of a culturally diverse community that includes multi-generational families, a variety of living arrangements, and Limited English Proficiency households. Collaborate with community groups, including faith-based and nonprofit organizations, to provide	Review the existing fair housing marketing plan every two years to ensure compliance with current City policy to Affirmatively Further Fair Housing and

	outreach on housing resources to all types of households and those households with Limited English Proficiency.	make necessary changes within six months.
8.	Add information on fair housing laws and resources on the City's website regarding housing programs in several languages.	By January 2025
9.	Seek opportunities to expand outreach and public education strategies on available tenant protection, fair housing services, and homeownership education to reach vulnerable households by offering information in multiple languages, targeted social media efforts, combining information with other assistance programs, distributing resources through local schools and colleges, and partnering with community-based organizations.	2021-2029

Issue: Disparities in Access to Opportunities

Hispanic residents have the least access to low-poverty neighborhoods, neighborhoods close to high performing schools, and neighborhoods with high labor force participation and human capital. Geographically, neighborhoods in southeast Fullerton (which are predominantly Hispanic), have relatively low economic and education scores, poor environmental quality, and relatively high poverty rates. Conversely, neighborhoods in the northern part of the city, which are predominantly White or AAPI, have higher education and economic scores, better environmental health, and lower poverty. Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

- 1. Location, type, and supply of affordable housing.
- 2. Land use and zoning laws.
- 3. The availability, type, frequency, and reliability of public transportation.
- 4. Location of environmental health hazards
- 5. Lack of investment in community-based infrastructure and services
- 6. Lack of access to housing mobility

Actions:	Timeframe:
1. Implement changes to the in-lieu fee	Complete a feasibility study on in-lieu

affordable units or deeper levels of	
affordability.	

2. Facilitate the development of housing for Develop 25 housing units for special needs individuals with disabilities (including households between 2021-2029. developmental disabilities) through incentives affordable for housing development with services, resources, and assistance. 3. Provide financial support to organizations Assist at least 10 foster youth with that provide supportive housing supportive housing between 2021-2029. emancipated foster youth (ages 18-21) who are homeless or at immediate risk of becoming homeless. 4. In compliance with recent updates to the Annually, assess the list of surplus sites and Surplus Land Act (AB 1255, 2019-Rivas; AB solicit development via a competitive RFP 1486, 2019-Ting), identify City-owned land for process or other forms of partnership such the development of affordable housing. If as land lease agreements. surplus properties are identified, pursue development via a competitive Request for Proposals or other processes. 5. Acquire funds from local, state, and federal Partner with at least one nonprofit housing grant opportunities, including the HCD Infill developer biennially throughout the planning Infrastructure Grant Program, to support the period and support the entitlement of at least development of affordable housing, housing 400 subsidized housing units affordable to for special needs, and support service extremely low-, very low-, and low-income projects. When a critical mass of state households in the city during the planning (various HCD programs) and/or federal period. (CDBG, HOME) funding is available, the City will issue a competitive Notice of Funding Availability with objective criteria to transparently identify the best non-profit affordable housing developer to partner with on new affordable housing developments in the city. 6. Partner with Orange County Housing Finance Conduct feasibility study for an affordable Trust to secure funding for affordable housing trust fund by January 2027. housing in Fullerton. 7. Develop a web-based Housing Development Publish Housing Development Toolkit on Toolkit that outlines a step-by-step process City's website by December 2026. residential development, including identifying steps in the entitlement and building permit process, detailed information on development incentives, and funding

programs and resources for affordable housing development.

8. Review the General Plan, applicable Specific Plans, and Zoning Code and Zoning Map to evaluate opportunities for removing barriers to housing production such as adding housing capacity and accommodating a greater mix of dwelling types and sizes in High and Highest Resource areas identified by the California Tax Credit Allocation Committee (TCAC), focusing efforts in northeastern and northwestern Fullerton. Recommend amendments, as necessary, to accommodate added housing capacity in these areas. Additionally, review the Zoning Code to identify opportunities to increase and encourage a greater mix of dwelling types and sizes, specifically housing types that may accommodate moderate-income households triplexes, (e.g., duplexes, fourplexes, townhouses, courtyard buildings), in lowerdensity residential areas and mixed-use zones citywide and amend the Zoning Code as needed (i.e., implementation of LTD).

Review the General Plan, applicable Specific Plan, and Zoning Code and Zoning Map by June 2025 and implement any changes by January 2026. Following adoption of zoning code changes, monitor at least 1,801 moderate-income units and 2,238 lowerincome units to be constructed annually in High and Highest Resource areas as designated by TCAC. Permit the development of at least 150 moderateincome dwelling types in the neighborhoods of E Las Palmas Dr/N Sunnywood Dr, Craig Park, Sunny Hills, Bastanchury Rd/Fairway Isles Dr, Acacia Park, and Byerrum Park (Racially Concentrated Areas of Affluence) by the end of 2029.

 Identify and advertise housing opportunity sites within one-quarter mile of public transit stops in northern Fullerton. Educate developers on the Transit Oriented Development (TOD) Housing Program, and/or pursue funding to increase transit infrastructure in northern Fullerton. On an ongoing basis, consult with interested developers on the TOD Housing Program. Conduct a study with OCTA to identify capital projects to increase transit infrastructure by 2026. Apply for TOD Housing Program funds as NOFA becomes available.

10. Monitor lot splits and two-unit developments under SB 9, provide technical assistance to homeowners, and develop or adjust development standards as needed. Provide easily accessible information and resources about SB 9 on the City website. Conduct outreach to homeowners' associations in the neighborhoods of E Las Palmas Dr/N Sunnywood Dr, Craig Park, Sunny Hills, Bastanchury Rd/Fairway Isles Dr, Acacia Park, and Byerrum Park, and the neighborhoods in

Beginning in 2025, meet with at least one homeowners' association annually in the areas of northwest Fullerton and the neighborhoods of E Las Palmas Dr/N Sunnywood Dr, Craig Park, Sunny Hills, Bastanchury Rd/Fairway Isles Dr, Acacia Park, and Byerrum Park to provide education on SB 9 implementation. Amend the Zoning Code to comply with SB 9 by December 2025.

northwest Fullerton, and provide information on SB 9.

11. Conduct outreach to religious institutions and provide technical assistance for interested parties to develop affordable housing on sites zoned religious institution. Starting in 2025, annually mail or email resources on developing affordable housing to all religious institutions in the city with underutilized land. Conduct follow up calls with institutions with sites that hold the most potential based on location and size, prioritizing potential sites in the neighborhoods of E Las Palmas Dr/N Sunnywood Dr, Craig Park, Sunny Hills, Bastanchury Rd/Fairway Isles Dr, Acacia Park, and Byerrum Park since they are Racially Concentrated Areas of Affluence. By December 2026, present information during at least one meeting with the board and/or members of OC United. By the end of 2027, provide technical assistance for the potential development of at least one affordable housing development on a religious institution site.

12. Conduct outreach to people experiencing homelessness with the Illumination Foundation and the OC Health Care Agency, focusing efforts in areas where there is a high concentration of homeless individuals in the neighborhoods of Independence Park, Santa Fe District/SoCo, and Gilbert Park, and along arterial boulevards and commercial centers. Provide resources to connect individuals with shelter space in Fullerton and as needed, to services in surrounding cities.

Annually allocate funding and City resources to support outreach efforts in coordination with the Illumination Foundation and the OC Health Care Agency to provide information and resources to those experiencing homelessness. Annually fund the Fullerton Police Department's Homeless Liaison Officer Unit, and as funding is available and based on need, increase the number of officers to provide services for residents experiencing homelessness.

13. Adopt an ordinance for new development standards to allow additional ADUs that meet basic setbacks and square footage requirements on properties exceeding one acre in the R-1 and R-2 zoning districts. The ordinance shall allow at least two ADUs on qualifying properties if such properties can safely accommodate two ADUs (e.g., that the properties have adequate sewer/septic and water capacity, can construct the ADUs in

Adopt the ordinance by July 2025.

compliance with all building code and fire prevention requirements, and can meet parking requirements).

14. Reduce minimum unit sizes and update the Zoning Code, as necessary, to accommodate alternative housing types such as housing cooperatives, Single-Room Occupancy (SROs), dormitories, tiny homes, and collective home ownership models in more areas of the city, including religious sites and publicly owned land. Stakeholder outreach shall include discussions with for-profit and non-profit housing developers.

Amend the Zoning Code by July 2025.
Conduct stakeholder outreach with
developers and community groups and
service providers on alternative housing at
least once by January 2026, with the goal of
achieving 30 units of alternative housing
types by the end of 2029, with at least half of
those units in the neighborhoods of E Las
Palmas Dr/N Sunnywood Dr, Craig park,
Sunny Hills, Bastanchury Rd/Fairway Isles Dr,
Acacia Park, and Byerrum Park since they are
Racially Concentrated Areas of Affluence.

15. Encourage the development of both smaller rental and owner units (studio and onebedroom) and larger rental units (3 to 4bedroom units) in residential and mixed-use development. In consultation with developers, identify and provide incentives and reduction of constraints to encourage the construction of these housing types and develop a work plan to implement any proposed changes to development standards, City programs, and so forth.

Develop incentives and mitigations to constraints by July 2025. Starting in 2025, hold an annual workshop with developers and provide education about technical assistance and incentives for larger and smaller rental units, with a goal of supporting the development of 50 large (3-4-bedroom) units and 100 studio/1-bedroom units by December 2029. At least 50 percent of large and small rental units should be in neighborhoods of greater degrees of overcrowding, including Woodcrest Park, Artesia Blvd/N Gilbert St, Valencia Park, W Oak Ave/Lambert Dr, E Wilshire Ave/N Raymond Ave, Rancho La Paz.

16. Prioritize public health, education, economic, and safety programs in lower resource areas as defined by TCAC in coordination with area public health entities, school districts, workforce development groups, and the police department. Identify addresses and compile mailing list and email addresses to focus outreach to neighborhoods with higher concentrations of low-income and minority residents to prioritize services in these areas.

Increase participation in the City's first-time homebuyer seminars and owner-occupied housing rehabilitation grant program 5 percent annually from lower income and minority concentration areas between 2021-2029 (data collection via surveys conducted at the seminars).

17. Assess potential preference policy for affordable housing opportunities, land use, transportation, urban design, public facilities and services, and economic development strategies. The City will seek involvement from community organizations and advocates, business councils, and residents to further refine the program scope.

Establish a community working group that meets annually to prioritize funding for community investments.

18. Apply for funding and coordinate with the OCTA Safe Routes to School program to establish at least one partnership in the city for active transportation projects and/or safety education campaign, prioritizing school routes within and from the neighborhood of E Imperial Highway and N Harbor Boulevard.

Establish partnership for Safe Routes to School and apply for grant funding by the end of 2025. Initiate at least one project or campaign by the end of the planning period.

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in Fullerton. More than 20% of all units are overcrowded in the neighborhoods south of downtown, which are predominantly Hispanic.

Contributing Factors:

- 1. Displacement of residents due to economic pressures.
- 2. Location, type, and supply of affordable housing
- 3. Land use and zoning laws

Actions:

1. Develop an outreach strategy in multiple languages for property owners who own fewer than 10 residential units (either in single-family or multi-family rental housing) to assess needs and connect them with resources, such as housing unit rehabilitation and financing programs. The intent of this program is to preserve Naturally Occurring Affordable Housing (i.e., not currently regulated with affordability restrictions), particularly in the neighborhoods of Woodcrest Park and Rancho La Paz. The program will seek to prioritize communities vulnerable to displacement, generally in the

Timeframe:

Develop an outreach strategy for "mom and pop" property owners by January 2026.

After the strategy is adopted, conduct outreach to at least 15 property owners with less than 10 units and assist at least 5 property owners with a combined total of 20 units or more by December 2029.

southern areas of the city, a focus on neighborhoods with lower median income.

2. Review the City's Tenant-Based Rental Assistance program with input from tenants and property owners/managers, ensuring representation across the economic spectrum, and update as appropriate. Outreach to be conducted to all vulnerable communities during the update process and after final adoption in 2027. Fill any gaps between Section 8 assistance and rent, or to aid those who may not qualify for Section 8 but need one-time emergency assistance, to provide relief to tenants to avoid the displacement in vulnerable communities.

Update the City's Tenant-Based Rental Assistance program by January 2027. Prepare and present a report on recommendations for programs that would provide relief to tenants and landlords to avoid the displacement in vulnerable communities by December 2026. If a rental assistance program is approved and implemented as a result, the program will assist at least 10 lower income renter households annually.

 In consultation with fair housing service providers and community-based organizations, evaluate existing state and federal "just cause for eviction" (AB 1482; 2019-Chiu) and other similar legislation with provisions to determine if additional protections through a local ordinance is warranted. Assess if additional protections are needed by January 2026. If warranted, recommend adoption of a local tenant protection ordinance to City Council by December 2026.

4. Partner with Cal state Fullerton to develop a plan to address the need for off-campus affordable housing for students.

Develop a city-wide student housing plan by December 2029.

5. Prioritize public health, education, economic, and safety programs in lower resource areas as defined by TCAC in coordination with area public health entities, school districts, workforce development groups, and the police department. Identify addresses and compile mailing list and email addresses to focus outreach to neighborhoods with higher concentrations of low-income and minority residents to prioritize services in these areas.

Increase participation in the City's first-time homebuyer seminars and owner-occupied housing rehabilitation grant program percent annually from lower income and minority concentration areas between 2021-2029 (data collection via surveys conducted at the seminars).

Issue: Disparities in Access to Homeownership

Homeownership rates are lower for all groups than the County overall, except for AAPI households. Racial/ethnic disparities exist, with Native American households the least likely to own their home, and AAPI households most likely.

Contributing Factors:

- 1. Racial discrepancies in loan origination.
- 2. Lack of funding for consumer rights and responsibility education on Fair Lending practices and identification of predatory lending practices.

Actions:		Timeframe:
1.	Work to promote fair lending practices throughout the city, including: a. Ensure that low-income and minority residents have fair access to capital resources needed to acquire and maintain housing. b. Prevent predatory lending through information and referrals to the Fair Housing Foundation.	Annually conduct and publish third party review of City or regional HMDA data to identify areas of need regarding fair access to lending.
2.	Add information on fair housing laws and resources on the City's website regarding housing programs in several languages.	By January 2025
3.	Seek opportunities to expand outreach and public education strategies on available tenant protection, fair housing services, and homeownership education to reach vulnerable households by offering information in multiple languages, targeted social media efforts, combining information with other assistance programs, distributing resources through local schools and colleges, and partnering with community-based organizations.	2021-2029
4.	Partner with the County and/or community-based organizations to increase participation in homeownership education and assistance programs for historically underrepresented residents in the homeownership market. Organizations may include teachers' associations, school districts, and community-based service providers to increase awareness of, and access to, housing resources and financial planning services.	Facilitate homeownership workshops, counseling, and/or education campaigns by January 2025. By October 31, 2029, connect at least 30 residents to education on homeownership-related topics.
5.	Prioritize public health, education, economic, and safety programs in lower resource areas as defined by TCAC in coordination with area public health entities, school districts, workforce development groups, and the police department. Identify addresses and compile mailing list	Increase participation in the City's first-time homebuyer seminars and owner-occupied housing rehabilitation grant program 5 percent annually from

Orange County 223 25-29 Regional AFH

and email addresses to focus outreach to neighborhoods with higher concentrations of low-income and minority residents to prioritize services in these areas.

lower income and minority concentration areas between 2021-2029 (data collection via surveys conducted at the seminars).

H. Garden Grove

Issue: Segregation and R/ECAPs, Disparities in Access to Opportunities, and Disparities in Access to Homeownership

The majority of the city is considered an area of high POC segregation except for West Garden Grove. In West Garden Grove, the residential neighborhoods west of Knott St are considered areas of high White segregation. In the high POC segregation areas, AAPI residents are the predominant group west of 9th St and Hispanic residents are the predominant group east of there. Additionally, there are lots of publicly supported housing units in the center of city along Garden Grove Boulevard, which is a high POC segregation area. There are no publicly supported housing units in West Garden Grove, which is an area of high White segregation.

There is a R/ECAP in the northern part of the city to between Brookhurst St and Gilbert St, north of Chapman Ave. The R/ECAP tract is predominantly Hispanic and is surrounded by Census Tracts that are predominantly AAPI.

Hispanic and AAPI residents have the least access to low poverty neighborhoods and neighborhoods with high labor force participation and human capital. Additionally, Hispanic residents also have the least access to neighborhoods with high performing schools. Geographically, the neighborhoods with access to the most opportunities are in West Garden Grove, where education and economic scores are high, environmental quality is high, and poverty is low. West Garden Grove is a predominantly White area.

The Black and Hispanic homeownership rate in the city is half the White homeownership rate.

- 1. Lack of affordable, accessible housing in a range of unit sizes.
- 2. Inadequate supply/production of affordable housing.
- 3. Displacement of residents due to regional economic pressures.
- 4. Housing discrimination.
- 5. High land and development costs in the region.
- 6. Public opposition to new development and land use and zoning laws.
- 7. Access to financial services.
- 8. Lack of meaningful language access for individuals with limited English proficiency.
- 9. Lack of private investment in specific neighborhoods.

Actions:		Timeframe:
1.	Continue to contract with the Fair Housing Foundation to promote public	Ongoing
	awareness of federal, state, and local regulations regarding fair housing.	
	Provide information to the public about local, state, and federal housing	
	programs and fair housing law. Maintain referral information on the City's	
	website, social media, newspaper ads, and at a variety of other locations such	
	as community and senior centers, local social service offices, in City utility	
	bills, and at other public locations including City Hall and the library. Add or	

	translate resources and information in Vietnamese, Korean, and Spanish and make available to the public through communications materials and online.	
2.	Direct homebuyers and property owners with property deeds, covenants, and other real estate property documents that contain restrictions intended to limit where certain people could live or buy property, based on race, religion, or other characteristics, to the Orange County Clerk-Recorder's Office to have such discriminatory language removed at no charge.	Ongoing
3.	Continue to target dissemination of Fair Housing Outreach information and notices of available services and workshops in neighborhoods identified with disproportionate housing needs and displacement risks. Fair Housing Foundation holds regular workshops and 1-on-1 counseling sessions at the City's Senior Center and Family Resource Centers.	Ongoing
4.	Ensure that all development applications are considered, reviewed, and approved without prejudice to the proposed residents, contingent on the development application's compliance with all entitlement requirements.	Ongoing
5.	Pursue funding and target neighborhoods of concentrated poverty for investment in rehabilitation, parks, transit, active transportation, and other needs identified in the City's Environmental Justice Element. To the extent possible, ensure funding plans reflect the needs of lower-opportunity neighborhoods.	Annually
6.	Continue to implement the Analysis of Impediments to Fair Housing Choice and HUD Consolidated Plan.	Annually
7.	Annually monitor building and home sales activities in historically undermarket neighborhoods to identify any adverse trends.	Annually
8.	Investigate ways to incentivize housing developers to increase the number three-bedroom units in their developments.	Ongoing
9.	In concert with Code Enforcement, develop a proactive cooperative code compliance program that targets areas of concentrated rehabilitation needs, results in repairs, and mitigates potential cost, displacement, and relocation impacts on residents.	Ongoing
10.	Implement programs to increase housing choices and affordability (e.g., duplex, triplex, multifamily, accessory dwelling units, SB 9 housing developments, transitional and supportive housing, and group homes), with a particular focus in High Opportunity Areas. Establish a protocol to annually monitor development progress towards housing creation that increases housing choices and affordability in High Opportunity Areas. Should monitoring reveal a shortfall in development progress towards housing creation of increased housing choices and affordability, the City will commit to developing additional actions, as necessary, including, but not limited to	Ongoing

Orange County 226 25-29 Regional AFH

incentives, waivers, concessions, expedited processing, and other regulatory	
approaches, including examination of development standards) to ensure the	
City satisfies its identified housing need (RHNA).	

I. Huntington Beach

Issue: Disparities in Access to Opportunities and Disproportionate Housing Needs

In Huntington Beach, Hispanic residents have relatively low access to neighborhoods with good environmental health, low poverty, high education scores, and high economic scores. Overall, access to opportunities in the city is high compared to the region.

Housing cost burden is an issue for renters across Orange County, including in Huntington Beach.

- 1. Lack of knowledge of fair housing and associated laws.
- 2. High cost of housing limits access to lower income households of all races/ethnicities.

Actions:	Timeframe:
Promote fair housing practices through the following actions:	Ongoing
1. Continue to contract with the Fair Housing Foundation to provide fair housing services, including fair housing and discrimination investigations, tenant and landlord counseling, education and outreach activities, and affirmatively further fair housing activities.	
Preserve quality and affordability of existing housing through the following actions:	Ongoing
 Provide financial assistance to low-income households for home repairs through the Housing Rehabilitation Loan Program. Provide rental assistance to extremely low (ELI) and very low income (VLI) 	
households through the Tenant-Based Rental Assistance Program.	

J. Irvine

Issue: Segregation, Disparities in Access to Opportunities, and Disproportionate Housing Needs

There are several Census Tracts considered to be areas of high POC segregation, including the neighborhoods between I-405 and UC Irvine, the Westpark community north of I-405, the neighborhoods between Como Channel and I-5, and the Northwood community north of I-5. There are also areas of high White segregation in Irvine, including the neighborhood bounded by Turtle Rock Dr, the area surrounding the Strawberry Farms Golf Club, the Woodbridge community north of I-405, and the neighborhood west of the Oak Creek Golf Club.

Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Housing cost burden is an issue for renters across Orange County, including in Irvine. Homeownership rates are lower for all racial/ethnic groups compared to the County overall, and racial/ethnic disparities are similar to the County, with Black and Hispanic households having the lowest homeownership rates (15.7% and 18% respectively).

- 1. Shortage of affordable rental and homeownership options due to market and governmental constraints
- 2. Underutilized properties (i.e., retail centers and hotels) could provide new affordable housing opportunities for Irvine residents, but current land use and zoning laws inhibit this development
- 3. Lack of supportive housing in community-based settings
- 4. Lack of renter protections and economic uncertainty from pandemic increased risk of displacement for lower income households

Actions:	Timeframe:
 The City will continue to pursue alternative options for meeting the RHNA through preservation, legislative changes, and regional cooperation. The City will apply for all available funding to pursue acquisition/rehabilitation of affordable housing projects and preservation of at-risk housing. 	,
2. The City will incorporate changes in State law (particularly affordable housing, employee housing, emergency shelters, and transitional/supportive housing, ADUs) into the Land Use Element and Zoning Ordinance. This will involve allowing for increased densities or FAR in both residential and non- residential areas to adhere to RHNA requirements. Other General Plan elements will be updated to ensure consistency with the updated Housing and Land Use Elements, as well as the Zoning Ordinance	·
3. The City will establish zoning overlays to allow for multifamily residential in nonresidential areas (which may include properties	•

	designated for religious institutions and schools) to provide flexibility in land use and development standards, including mixed-use developments. These flexible standards shall be directed toward meeting the physical, social, and economic needs of the community. The City will adhere to the requirements of California Government Code, Section 65583.2, subdivisions (h) and (i), as part of the rezoning program, including applicable by-right provisions, and the residential overlay zones in nonresidential areas will allow for densities of 30 units/acre, allow for 100 percent residential use, and will require residential use to occupy 50 percent of floor area on mixed use projects.	
4.	The City will encourage the subdivision of sites that are 10 acres or more to provide more opportunities for development of affordable housing, which the HCD has determined is more feasible on sites between 0.5 and 10 acres in size.	City will conduct a review every 2 years
5.	The City will work with UCI to draft an agreement regarding approving, permitting, certifying occupancy, and/or reporting new units to the California State Department of Finance (DOF). The agreement will involve documentation from UCI on planned housing that has been approved to be built as well as information on the timing of the project construction and unit affordability by household income category.	By January 2022, and ongoing
6.	The City will seek to amend the fee collection process for land divisions and lot line adjustments resulting in parcel sizes that facilitate multifamily developments affordable to households with lower incomes (including extremely low income and farmworkers) in light of State, Federal, and local financing programs (i.e., 2–10 acres).	Within 12 months of Housing Element certification
7.	The City will also identify potential property owners and nonprofit developers by the end of FY 2022-23 and work with them on an annual basis to target and market the availability of sites with the best potential for development. In addition, the City will offer incentives for the development of affordable housing.	Within 12 months of Housing Element certification
8.	The City will expedite development of housing projects for seniors, people with disabilities, and lower-income people and/or households	As projects are proposed
9.	The City will review the current Development Standards and update as appropriate to encourage residential, mixed-use, and transit-oriented developments	By October 2022

Orange County 230 25-29 Regional AFH

10. To expedite the process of finding resources and incentives, the City will gather information on the available incentives/concessions for developers within a year of the City's Housing Element Update certification. The City will then develop and post an overview of the available incentives/concessions for developers on the City's website and updates will be performed on an annual basis. The goal of this program is either expedite the time it takes to obtain development approvals and/or incentives that provide cost savings on housing projects, thereby improving and increasing the financial feasibility of affordable housing projects	Within one (1) year of Housing Element certification
11. To decrease the entitlement and construction process, following the adoption of the Housing Element the City will designate a dedicated planner, plan checker, and building inspector(s) to provide expedited processing for affordable housing projects, with an emphasis on projects that include extremely low-income units. The goal of this program is to expedite the affordable housing development process to accelerate the availability of affordable housing units in the community, which also has the effect of reducing development costs	By October 2022
12. Hold one (1) outreach meeting or survey with affordable housing developers and providers each year after the state budget funding for the next fiscal year are made public (by October of each year) to discuss available funding sources (City, state and federal), sites identified in the Housing Element sites inventory that are available, developer needs and opportunities for affordable housing projects. Provide technical assistance to developers regarding City's lower income sites, funding opportunities, as well as mixed use zoning and density bonus incentives	October of each program year
13. The City will establish streamlined, ministerial review procedures and processes for qualifying multi-family residential projects consistent with SB 35	By May 2023
14. The City will update the current Zoning Ordinance to establish higher density in areas with underdeveloped/underutilized property, such as Planning Areas 32 (adjacent to the Irvine Station served by Amtrak/Metrolink passenger rail services and Orange County Transportation Authority bus services), 33, and 36 (a.k.a., Irvine Business Complex or "IBC" near John Wayne Airport). This update will maximize land utilization for residential development to accommodate RHNA requirements, including allowing residential overlays in commercial areas to allow for residential to be added to commercial areas or to allow existing underutilized commercial uses to be converted to residential (i.e., hotels)	By October 2024

Orange County 231 25-29 Regional AFH

15. Multiple State laws have been passed since 2019 establishing statewide standards for local regulations governing ADU development. State law requires that ADUs be allowed in residential and mixed-use areas despite local ordinances or homeowner's association rules and requirements. Additionally, State law requires jurisdictions to develop a plan to encourage and incentivize ADUs in an effort to address the current California housing crisis.	By January 2023
16. Assembly Bill (AB) 671 requires local agencies' Housing Elements to include a plan that incentivizes and promotes the creation of ADUs that can offer affordable rents for households with very-low-, low-, or moderate-income households. As part of the ADU ordinance update (including public outreach), the City will research feasible options to facilitate affordable housing options for ADUs	By October 2024
17. Housing Elements to include a plan that incentivizes and promotes the creation of ADUs that can offer affordable rents for households with very-low-, low-, or moderate-income households. As part of the ADU ordinance update (including public outreach), the City will research feasible options to facilitate affordable housing options for ADUs	By the end of 2022 and begin providing incentives by January 2023
18. The City will provide financial and other available assistance to affordable housing property owners to preserve units. The committed assistance may consist of both financial and non-financial, in-kind services to incentivize the preservation of affordable units. The total number of units to be preserved are seven extremely low, 517 very low and 299 low-income units	By June 30, 2025
19. The City will continue to monitor and preserve the affordability of all publicly assisted housing units, and support applications by nonprofits	Ongoing
20. The Sites Inventory includes four non- vacant sites with existing residential uses. The sites are currently combined and house an 880-unit apartment building. In considering a demolition and new construction of residential development at the site (that increases the total number of units), the City is proposing the incorporation of 465 deed- restricted units affordable to very low- and low-income households on this site, generating replacement units for any units that may be inhabited by very low- and low-income families.	As development projects are proposed (timing dependent on development community)
21. In addition to providing funding opportunities related to HUD programs on the City's website, funding opportunities will be disseminated via targeted email notifications and may also be posted	Ongoing

on all City social media accounts and include information on vacant land currently owned by the City.	
22. The City will access information from HCD and other State agencies to identify grant application opportunities for affordable housing. When grant opportunities are known, the City will reach out to affordable developer stakeholders to identify projects and/or opportunities to include on grant applications. The City will apply or support a minimum of three (3) grant application each year. The goal of this program would be to increase the amount of funding available for affordable housing projects, which require public subsidies to be built.	Timing dependent on State HCD and other departments
23. The City will retain a consultant to conduct a feasibility study on increasing the inclusionary housing requirement from 15 percent (5 percent very low, 5 percent low, and 5 percent moderate) to 20 percent (9 percent very low, 6 percent low, and 5 percent moderate). The policy changes proposed to Planning Commission and City Council, if deemed feasible in the study, will include increasing the inclusionary requirement to 20 percent with corresponding updated in-lieu fee	By October 2024
24. The City will identify and analyze local funding options for affordable housing and monitor new funding and financing resources each year. This program will also include using State and Federal funding received by the City to partner with nonprofit organizations (such as the ICLT), as the commitment of City funding can enhance the scoring of 100 percent affordable projects to secure important funding sources, such as low- income housing tax credits (LIHTCs) that have become highly competitive.	Annually
25. The City will identify and utilize State programs and/or potential public/private partnerships with major employers to acquire existing market rate housing units or develop new housing units to create moderate or workforce housing (available to households with incomes at 80 percent to 120 percent of AMI)	Ongoing
26. The City will follow all requirements of the Surplus Land Act, Article 8 (commencing with Section 54220) of Chapter 5 of Part 1 of Division 2 of Title 5, including holding a public hearing designating the properties as "surplus properties" under California Law. The City will also conduct an analysis to determine, based on market conditions, if selling or leasing the properties would maximize the development of affordable units. The City will then send a Notice of Availability to all required parties regarding the availability of County-owned land available for purchase or lease. It is the City's intent to facilitate the	Surplus Land Act activities to be completed by October 2024 and Notice of Availability by December 2025

development of 100 percent affordable housing projects on vacant or underutilized City- owned sites. The City will also coordinate with the public entities that own a site (or sites) to ensure that the legally mandated surplus property process is followed	
27. The City seeks to continue to strengthen its relationship with the ICLT to collaborate and partner on efficiently and effectively maximizing affordable housing opportunities.	As opportunities arise for acquisition, development, and legislative initiatives the City will work with ICLT. Additionally, City will meet at least quarterly with ICLT starting in November 2021 to coordinate efforts. City will document progress on these items in its Annual Progress Report.
28. The City will coordinate with public agencies to facilitate the development of affordable housing projects on vacant and underutilized sites, including sites owned by the County of Orange, the State, and the Irvine Ranch Water District. Activities could include collaboration with public agencies on master-planning and disposition efforts for large vacant and underutilized sites.	Coordination with County of Orange, the State, and the Irvine Ranch Water District and any other relevant public agencies in connection with the Land Use Element Update and Zoning Ordinance amendment from 2022 through October 2024
29. The City's Land Use Element allows for the entitlement of affordable housing units beyond the maximum unit counts established in the Zoning Ordinance, thus considered additive to the General Plan intensity thresholds, which allows additional units to be developed under the City's established land use designations.	As development projects are proposed (timing dependent on development community).
30. The City will amend the Inclusionary Housing Ordinance	By October 2024
31. Encourage and incentivize ADUs through various programs	By January 2023

	Encourage innovative design prototypes and/or construction, such as smaller units with increased energy efficiency (i.e., sustainable designs and operations), modular units or other innovative building types	On an ongoing basis
33.	Streamline permitting to encourage a diverse housing stock	On an ongoing basis
	The City will make appropriate zoning changes as part of the General Plan - Land Use Element Update and Zoning Ordinance Amendment to bring the City's Zoning Ordinance in compliance with State law changes related to parking, by right uses, and other requirements.	By October 2024.
	The City will work with UCI to draft agreement regarding approving, permitting, certifying occupancy, and/or reporting new units to the California State Department of Finance (DOF).	By January 2022 and ongoing tracking.
	The Federal Housing Choice Voucher Program extends rental subsidies to extremely low and very low-income households, including families, seniors, farmworkers, and the disabled.	Ongoing
	The City will study the benefits associated with creating an Irvine Housing Authority with the ability to allocate Federal Housing Choice Vouchers	By January 2023
	The City will analyze incentives to encourage affordable housing developers to consider extending the terms of affordability in perpetuity	By January 2023
	The City will monitor legislative changes to ensure that City policies and regulations comply with State and Federal laws	Annually
	The goal of this program is to ensure that fees (both the dollar amount and timing), incentives, development standards/review processes do not constrain the development of housing units or render housing development infeasible	Annually
	The City will develop and establish specific written procedures for requesting and granting a reasonable accommodation for housing for persons with disabilities.	6/30/2023
	The City will update the Zoning Ordinance and related policies pertaining to emergency shelters, Low- Barrier Navigation Centers (LBNCs), transitional and supportive housing, and group care facilities to conform to State requirements, as established by AB 139, AB 2162, and Senate Bill 48. Generally, this update would allow these land uses in all of the City's residential zones and with fewer conditions.	Completed by October 2024

Orange County 235 25-29 Regional AFH

43. Any funding sources have specific eligibility criteria or other requirements that may not always align with potential projects in Irvine. The City will pursue relevant State and Federal funding sources to provide additional options for developers of lower-income housing that serve veterans, individual, and families at-risk of an currently experiencing homelessness in the City. The City will ensure that such housing options will include reasonable accommodation and transitional and supportive services for people with disabilities.	released and g available. e d e s
44. The City will explore the feasibility of joining the Orange Count Housing Finance Trust (OCHFT), a joint power authority compose of many Orange County cities.	· ·
45. The City will ensure that housing options will include reasonable accommodations and supportive services for people with disabilities.	
46. The City will continue to make information about services for peoplexperiencing homelessness available on the City's website and at Cit facilities.	
47. The City will continue to provide resources for non-profits the provide transitional housing, motel vouchers, food pantre emergency rent and utility payment assistance, life-skills counseling and clothing.	/, Ongoing
48. The City will continue to provide CDBG grant funding to non-profisuch as Families Forward, South County Outreach, Human Option and Stand Up for Kids that provide these services. Information of these resources is included in the City's Affordable Housing Guid and the City's website.	s, n
49. The City will explore establishing a crisis response protocol for local service providers to render rapid crisis support, including after-houservices for people experiencing or at risk of homelessness.	
50. The City will reach out to other California cities current implementing shared housing programs that help match individua experiencing or at risk of homelessness and seniors for a mutuall beneficial living situation. Individuals in need of housing can provid needed physical assistance around the home for seniors.	y 2024
51. Compile a list of local organizations and reach out to inquire about possible collaborations. This will help the City cooperate wit community-based organizations that provide services or information about services to any special needs or linguistically isolated groups	h Ongoing

52.	The City's primary (and very effective) effort in displacement prevention is facilitating the development of affordable housing in the community, as referenced in the AFFH section of this HEU. Displacement prevention activities will also include connecting residents to resources to minimize the displacement of households with lower incomes and special needs whenever possible and where necessary to ensure that displacement is carried out in an equitable manner.	Ongoing
53.	The City will participate in the Orange County United Way's Eviction Task Force and associated study. This work includes identifying and coordinating community resources to support households facing eviction.	Ongoing
54.	The City will provide a link on its website to landlord/tenant meditation services and landlord/tenant rights and responsibilities, which may include information from service providers such as the Fair Housing Foundation. The City will also add information on the City's website and provide resources on non-profits such as Community Legal Aid SoCal and the Legal Aid Society of OC.	Annual
55.	The City will encourage homeownership through education, sharing information, and links to existing nonprofit, County, State, and Federal resources on the City's website	Ongoing basis and updated annually for accuracy
56.	This existing program provides financial assistance to lower-income Irvine homeowners for critical home improvement projects.	Ongoing basis and updated annually for accuracy
57.	The City will update its Land Use Element and amend the Zoning Ordinance	Ordinance by October 2024
58.	The City will continue implementation of its One Irvine program to revitalize individual neighborhoods through a work program uniquely developed with community input for each neighborhood.	By January 2023.
59.	The City will reach out to community organizations and collaborate with them on outreach to different communities	By January 2023.
60.	The City will provide links to Fair Housing Foundation (a nonprofit the City currently contracts with) to provide Irvine residents with information regarding fair housing law, tenant and landlord rights (including information on mediation services)	Within six months of Housing Element certification.
61.	Compile a list of local organizations and set up an annual meeting or meetings to discuss community housing needs and potential solutions. Cooperate with community-based organizations that	Within six months of Housing Element certification.

	provide services or information about services to any special needs	
	and linguistically isolated groups.	Meet annually with identified organizations starting in fiscal year 2022- 23 (meetings will be conducted by June 30 of each year).
62.	The City will connect developers of projects with affordable density bonus units and local non-profits/community organizations to coordinate efforts and determine if the units could be set aside, where feasible, for special groups including but not limited to veterans and special need adults.	Within three months of a density bonus project application.
63.	The City will provide translations or interpretation in all applicable languages to ensure access to programs, services, and materials	Ongoing
64.	The City will conduct an internal audit at a minimum of every other year to evaluate that we are addressing all language needs for the City.	Annually or as needed
65.	The City is in the process and has taken several steps to identify climate impacts, reduce pollutants and greenhouse gas emissions (GHG), and prepare for a climate resilient future	Completed by December 31, 2022
66.	Continuing to require added greenery throughout the City to reduce exposure to environmental pollution such as vehicle emissions through the City's Zoning Ordinance (Section 3-15-4)	Annually
67.	Irvine Cool City Challenge will reduce climate emissions and utility bills while building resiliency and local emergency preparedness against climate disasters such as extreme heat, floods, wildfires, and extreme storm events.	The Cool Block Challenge was initiated in January 2022 and will be 2 years in length. There will be a new team established roughly every 4.5-5 months. In year 3 of the Cool City Challenge, the City will present a game plan to the Empowerment Institute. After that, the City will work to implement the carbon

	neutrality plan.
68. Provide adequate parks and open space to all parts of the community, the City will prepare a comprehensive design strategy to include passive urban park setting for every project and include other placemaking strategies. This program, as implemented, will reduce unsustainable energy use, reduce pollutants, improve air quality, reduce extreme heat events and improve the health outcomes of residents, employees and others in the community.	By December 2024.
69. The City will contact the Irvine Unified School District to inquire about expanding access to enrollment in the district's schools for residents that may not be within the district's boundaries	Within six months of Housing Element certification.
70. The City will conduct a bi-annual survey of homeowners to obtain input on existing programs and to identify additional ways to support the City's homeowners and their unique needs	At least one survey every two years
71. The City shall strengthen its relationship with the local fair housing provider and explore ways to expand services and mutually pursue additional funding resources for that expansion.	Ongoing with check in meeting one time per year

K. La Habra

Issue: Segregation

There are various neighborhoods considered to have high POC segregation, including neighborhoods in the center of the city north of Guadalupe Park and between Idaho St to the west and Sonora High School to the east. These neighborhoods are predominantly Hispanic. Publicly supported housing units are in the city's center and north neighborhoods, which are all low-medium or high POC segregation areas.

- 1. Zoning Code regulations and land use controls that constrain/ restrict housing opportunities.
- 2. Historic limited available land for new development of multiple- family housing.
- 3. General lack of affordable housing for low-and moderate-income residents.

Actions:	Timeframe:
Increase production of affordable housing through the following actions:	ing Adopt 8 ordinances by 2024. By 2025, approval of
 Adopt streamlined ministerial approval process to expedite to development of housing. Revise density bonus ordinance and remove CUP requirement to facilitate higher density housing. 	permitting of at least 2 care facilities.
3. Remove 1-acre minimum for mixed use projects and 20 standard for multiple-family on a block.	0%
4. Adopt objective design standards to facilitate multi-family a mixed-use production.	ind
Remove the CUP neighborhood compatibility finding in t design review process.	the
6. Adjust story height and parking requirement to facility multiple-family housing production.	ate
7. Allow transitional, supportive housing, and low barr navigation centers in accordance with state law.	ier
8. Allow residential care facilities req. by state law and remo- filing fee for reasonable acc. request.	ove

Issue: Disparities in Access to Opportunities

Neighborhoods in the city's center and southeast of the center have poor environmental quality, low education scores, and low economic scores. These neighborhoods are also predominantly Hispanic.

- 1. Lower ranking schools compared to wealthier districts in the County.
- 2. Lower graduation rate among Hispanics and other groups compared to County results.
- 3. Lower incomes due to either under- employment and or unemployment.
- 4. Need to continue investments in the children and youth of La Habra.

Act	ions:	Timeframe:
1	prove access to opportunities in low resource areas through the following ions:	
1.	Operate the Child Development Division programs and assist up to 600 La Habra children from lower-income families	Ongoing
2.	Administer City workforce training and employment programs for 600 participants in the County; increase staff fourfold	Ongoing
3.	Continue to support La Habra Boys and Girls Club, serving 3,000 La Habra residents each year	Ongoing
4.	Continue to work with housing, employment, and community service partners, as needed, evaluate, and expand partnerships and resources	Quarterly or as needed
5.	Retrofit two parks or recreation facilities (e.g., El-Centro-Lions, Vista) in low-mod resource areas in central La Habra	By end of 2025
6.	Remediate landfill hazards with vapor devices underneath the Vista Grande Park	Ongoing
7.	Continue to support the children's museum, accommodating nearly 95,000 visits each year	Ongoing
8.	Update safety element to address climate change, EJ, and resiliency; implement programs to address hazards	By June 2023
9.	Operate the Hillcrest Health and Wellness Center to serve residents in need, including Central La Habra	Ongoing
10.	Ensure 25% Love La Habra projects in Central La Habra Complete NTMP projects in K, M, F Neighborhoods	Annually
11.	Expend \$2.5 million to install East Bishop storm drain	By end of 2024
12.	Apply for SR2S grants citywide for all schools; if received, develop plan, make improvements during planning period	By 2029
13.	Market services to eligible lower income residents through affirmative marketing at Hillcrest Center	By end of 2023

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in La Habra. More than 10% of homes have incomplete kitchen facilities in one Census Tract in the north central part of the city.

Contributing Factors:

- 1. High levels of overcrowding and overpayment; mismatch with housing needs.
- 2. Rising prices and rents for housing far exceed recent increases in incomes.
- 3. Several affordable housing projects remain at risk of conversion.
- 4. Age of housing stock; most homes were built more than 50 years ago.
- 5. Housing rehabilitation and repairs are expensive, especially for retirees.
- 6. Limited staff for building/ code compliance make it difficult to address needs.

Actions:	Timeframe:	
Reduce housing instability through the following actions:		
Encourage ADUs, including 20% in higher resource areas through annual publication citywide.	Permit 30 ADUs; 20% in high resource areas by the end of 2022	
Support and advertise HCV program to increase participants.	Ongoing	
3. Assist up to 200 lower-income households over the planning period with ARPA-funded bill assistance.	Assist 200 households by the end of 2023.	
4. Retain affordability and condition of mobile home parks and deed-restricted apartments affordable to lower income households.	Preserve affordability of 50% of units in the two city-owned mobile home parks between 2021-2029.	
5. Require replacement units per Gov't Code 65915 for lower income units demolished.	Ongoing, as projects are proposed	
6. Implement inclusionary housing ordinance and prioritize funding (fees) for affordable housing.	Develop all 100 inclusionary units, 25% of which are in highest income tracts, between 2021-2029.	
7. Target affirmative marketing in low resource areas at the Hillcrest Center, Boys & Girls Club, and others.	Prepare and distribute fliers on City programs by 2023.	
Improve quality of existing housing through the following actions:		
8. Hold regular Love La Habra events to assist income- qualified residents with home repairs	Annually in September	

Orange County 242 25-29 Regional AFH

Hire additional code enforcement staff to address backlog and provide capacity for proactive work	By end of 2023
10. Purchase Land Management System (LMS) to track code compliance, building and planning permits	By end of 2023
11. Issue housing rehabilitation grants/loans for 25 households over the planning period	Make 3 grants per year
12. Evaluate feasibility of rental housing inspection program and, if feasible, develop program	By end of 2023
13. Seek collaborative partnership which can assist in addressing local housing rehabilitation needs	Annually
14. Target affirmative marketing in low resource areas at the Hillcrest Center, Boys & Girls Club, and others	By end of 2023

L. Laguna Niguel

Issue: Concentration

Most of the city is considered an area of high White concentration, except for a few neighborhoods with low-medium concentration (which are predominantly White) in the northeastern and eastern parts of the city.

- 1. Historical land use development patterns and zoning, environmental constraints, and lack of vacant land limit opportunities for larger and higher density project types.
- 2. Current high cost of housing limits access to lower income households of all races/ethnicities.
- 3. Lack of affordable housing and need for greater access to opportunities.
- 4. Regional coordination affects transit services, funding sources, and allocation of housing resources including vouchers.
- 5. Community resistance to development.

Actions:		Timeframe:
Inc	rease fair housing knowledge through the following actions:	
1.	Promote Fair Housing Council programs and expand knowledge of first-time homebuyer programs on the City's website, newsletters, and through social media.	By December 2025, review annually thereafter
2.	Promote affirmative marketing plans in all new housing developments that are designed to attract renters and buyers of diverse demographic backgrounds, including race, ethnicity, income, disability, and familial status.	Ongoing
3.	Develop an outreach plan and materials to communicate the benefits of vouchers and tenant rights regarding just cause evictions, limitations on rent increases, and replacement housing requirements if any existing residential units would be removed, based on state law.	By December 2025
	rease housing opportunities in high opportunity areas through the lowing actions:	
4.	Incentivize multi-family and mixed- use development in the Gateway Specific Plan area (northeast portion of city) through the following actions:	
	a. Amend the Gateway Specific Plan to mandate that any public benefit provided to achieve a density of higher than 50 du/ac shall include a provision of affordable housing, and to encourage the production of workforce housing and missing middle housing.	By July 2025

	b.	Allocate CDBG or other available funding assistance to projects in the Gateway Specific Plan area that include multi-family units targeted for extremely-low-income households, as feasible.	Annually
	C.	Provide administrative assistance to affordable housing developers in preparing grant applications.	Ongoing
	d.	Post and maintain a current inventory of vacant sites in the Gateway Specific Plan area suitable for multi-family residential or mixed-use development on the City website.	Ongoing
	e.	Contact local developers and publicize development opportunities within the Gateway Specific Plan area at least once each year.	Annually
	f.	Assist in facilitating subdivision of large parcels where necessary to create building sites through concurrent processing and project coordination.	Ongoing
5.		ct the property owners of vacant properties to assist pment of the site for residential purposes.	Annually
6.	Contin to time	ue to implement state Density Bonus Law as amended from time e.	Ongoing
7.		e and assist developers seeking funding and/or tax credits for the uction of low- and moderate-income housing.	Annually
8.	develo	ivize affordable housing development through modified poment standards, expedited processing, or other financial ives for affordable housing projects.	Ongoing
9.		e administrative assistance to developers of low- or moderate- e projects.	Ongoing
10.	Promo	te options for assistance to developers on the City website.	Ongoing
11.	Priorit	ize funding assistance for Extremely Low-Income units.	Ongoing
12.	that co	v City-owned properties annually to identify any surplus land build be made available for affordable housing development and ute list of suitable sites to regional affordable housing opers.	Annually
13.	create	cooperatively with the County of Orange and other local cities to a regional housing bond program to help fund affordable ag and permanent supportive housing.	Ongoing, consultation with County at least annually

Issue: Disparities in Access to Opportunities

Based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Contributing Factors:

- 1. Insufficient fair housing monitoring and limited outreach capacity
- 2. Lack of resources for fair housing agencies and organizations
- 3. Limited understanding of fair housing laws

Actions:	Timeframe:
Improve fair housing education and outreach through the following actions:	
1. Direct fair housing inquiries to the Fair Housing Council of Orange County (FHCOC).	Ongoing
2. Post and update information annually regarding fair housing and request that FHCOC conduct a presentation every two years about the services available.	Annually
3. In cooperation with the FHCOC, contact all low-income apartment complexes annually to provide education and materials about the Section 8 program, including multi- lingual materials.	By July 2025 and annually thereafter
4. Publish and update fair housing information on the City website and via social media annually.	Annually

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in Laguna Niguel.

- 1. Historical land use development patterns and zoning, environmental constraints, and lack of vacant land limit opportunities for larger and higher density project types.
- 2. Current high cost of housing limits access to lower income households of all races/ethnicities.
- 3. Lack of affordable housing and need for greater access to opportunities.
- 4. Community resistance to development.
- 5. Regional coordination affects transit services, funding sources, and allocation of housing resources including vouchers.
- 6. Age of housing stock.
- 7. Cost of repairs/rehabilitation.

Actions:	Timeframe:
Encourage the development of ADUs and SB 9 units through the	
following actions:	

1.	Monitor the production and affordability of ADUs every three	Perform review in
	years to ensure the City is meeting ADU production targets and	December 2026
	act if projections are not consistent.	
2.	Conduct increased outreach and education on ADU and SB 9	Ongoing
	unit/lot split opportunities.	
3.	Continue to promote ADUs on the City's website, social media,	Ongoing
	and at City offices.	
4.	Promote SB 9 units and lot splits on the City's website, social	Ongoing
	media, and at City offices.	
5.	Expedite ADU permit processing.	Ongoing
Pro	ovide support to individuals experiencing homelessness through	
the	following actions:	
6.	Participate in meetings of the Orange County Homeless Issues	Ongoing
	Task Force as they occur	
7.	Allocate an appropriate level of CDBG funding in relation to the	Annually
	local need.	
8.	Explore and consider Project Homekey and opportunities to	Ongoing
	work with the County.	
9.	Assist applicants proposing permanent or interim supportive	Ongoing
	housing by helping to apply for funding.	
Exp	oand the use of Housing Choice Vouchers through the following	
act	ions:	
10.	Contact all low-income apartment complexes annually to	By July 2025 and annually
	provide education and materials about the Section 8 program	thereafter
	including multilingual materials.	
11.	Encourage the development of missing middle housing types	Between 2021-2029,
	and evaluate specific methods to encourage their production in	facilitate 80 "missing
	RCAAs, areas of higher density, and in the central areas of the	middle" units, with at least
	City.	20% located in targeted
		areas, including RCAAs,

		central areas of the City.
	serve existing affordable housing units and prevent	
dis	placement through the following actions:	
12.	Monitor assisted units to assess the risk of conversion to market	Annually
	rate.	

13. Offer financial incentives to encourage owners of at-risk properties to maintain their rental units as affordable housing.	Three-year, twelve-month, and six-month coordination with at-risk property owners and OCHCS.
14. Allocate a portion of CDBG funds to assist in extending affordability covenants for at-risk units.	Annually
15. Provide educational materials to tenants of properties with expiring covenants regarding options for securing other affordable housing.	Ongoing
16. Continue the City's active property maintenance program run by the Code Enforcement Division of the Community Development Department.	Conduct windshield surveys covering all properties in the City every six months.
17. Seek CDBG funding for housing rehabilitation.	Facilitate rehabilitation of 15 housing units between 2021-2029.
18. Survey older areas of the City and connect property owners to rehabilitation programs.	Six property owner contacts per year.

M. Lake Forest

Issue: Disparities in Access to Opportunities

While residents overall have relatively good access to opportunities, compared to the region, residents living below the FPL in the city generally have less access to opportunities than the rest of the population.

Contributing Factors:

- 1. Lack of opportunity due to high housing costs.
- 2. Lack of access to public transportation.

Actions:

Increase housing supply in high opportunity areas through the following actions:

- Implement Program 1: Land Use Policy, Entitlements, and Development Capacity (Shortfall Program), to rezone sites to accommodate new residential and mixed-use development at densities consistent with the City's General Plan (adopted in 2020) to meet the City's RHNA at all income levels.
- Implement Program 2: Monitor Residential Capacity (No Net Loss), to ensure that replacement sites identified to continue to accommodate the City's remaining RHNA throughout the planning period are consistent with the City's duty to affirmatively further fair housing.
- 3. On an ongoing basis, actively recruit residents from neighborhoods of concentrated poverty to serve or participate on boards, committees, and other local government bodies as positions are made available due to the regular appointment process or vacancies.

Preserve existing affordable housing opportunities and prevent displacement through the following actions:

- Implement Program 4: Replacement of Affordable Units, to ensure that affordable units that are removed from the City's housing stock are replaced in accordance with state law.
- Implement Program 5: Facilitate Affordable and Special Needs Housing Construction, to encourage the development of housing units to serve the needs of larger

Timeframe:

Between 2021-2029, the City's goal is to promote the development of 1,648 new units (including 303 lower income units and 167 moderate income units, consistent with the City's Quantified Objectives for 2021-2029) with 75% of the new units located in areas of moderate or high opportunity; rezone 158 acres to allow for the development of up to 2,965 multifamily units, with 75% of the units located in areas of moderate or high opportunity; and increase the number of applications from residents living in low or moderate resource areas for open Board and Commission positions by 20%.

Between 2021-2029, the City's goal will be to maintain at least 202 affordable housing units in the City; increase the proportion of new multifamily units that are 3 or more bedrooms by 10%; promote the develop of 70 new extremely low income housing units (consistent with the City's Quantified Objectives for 2021-

- households, including large extremely low-income households.
- 6. Implement Program 23: Economic Displacement Risk Analysis, to proactively identify potential issues related to economic displacement as a result of new development.

2029); and commit \$70,500 to implement programs and improvements serving the Southwest Lake Forest neighborhood with a focus on programs and improvements that protect existing residents from displacement.

Increase access to opportunities for individuals with disabilities through the following actions:

- 7. Implement Program 1: Land Use Policy, Entitlements, and Development Capacity (Shortfall Program), to rezone sites adjacent to transit corridors and activity centers to allow for higher density residential development, suitable for affordable and special needs housing, including new opportunities for individuals with disabilities.
- 8. Implement Program 5: Facilitate Affordable and Special Needs Housing Construction, whereby the City will proactively reach out to developers of housing for special needs populations to share details about special needs groups in Lake Forest and promote the development of housing for special needs groups in areas of moderate and high levels of opportunity.
- Implement Program 6: Monitor and Implement Changes in federal and state Housing, Planning, and Zoning Laws to proactively identify changes in federal and/or state regulations required to be implemented at the local level to improve access to opportunity for individuals with disabilities.

Between 2021-2029, the City's goal will be to rezone 158 acres to accommodate the development of up to 2,965 new units with a focus to promote the development of units affordable to lower income households in areas of moderate or high opportunity; increase the number of local individuals with disabilities taking transit by 10% by encouraging the development of new housing for individuals with disabilities to be located close to transit routes; increase the proportion of new multifamily units that are 3 or more bedrooms by 10%; and resolve 100% of reasonable accommodation requests

consistent with the

requirements of state law.

N. Mission Viejo

Issue: Concentration and Disproportionate Housing Needs

Most of the city has a high concentration of White residents, although there are neighborhoods in the southern, northern, and western parts of the city where there's more diversity. Overall, residents have good access to opportunities, though getting around on public transit or finding affordable transportation can be a challenge. Additionally, data on fair housing complaints shows that people with disabilities often face challenges when it comes to housing. Renters across Orange County, including in Mission Viejo, are also struggling with housing costs.

- 1. Limited affordable housing overall due to land use designations and zoning regulations.
- 2. Limited availability of affordable units in a range of sizes and types.
- 3. Displacement of residents due to economic pressures.
- 4. Lack of affordable, integrated housing for individuals who need supportive needs.
- 5. Regulatory barriers to providing housing and supportive services for individuals with disabilities.
- 6. Lack of private investments in specific neighborhoods.
- 7. Housing discrimination in the private market.

Ac	tions:	Timeframe:
Increase housing opportunities through the following actions:		
1.	Proactively outreach to developers about development opportunities.	Annually
2.	Actively market Site 3 and reach conclusion regarding the importation of dirt to be able to deliver a Pad-ready site to potential developers.	By July 2026
3.	For Site 3 development, establish a priority processing procedure, with fee waivers and grant other incentives and concessions as appropriate, including the need and applicability for CDBG Funding.	By July 2026
4.	Conduct an outreach and education program regarding SB 4 opportunities for religious facilities and nonprofit colleges.	By December 2025
5.	Promote funding available from Orange County Housing FinanceTrust's Affordable ADU Loan Program.	Annually
6.	Apply for funding available at the state to assist lower and moderate-income homeowners to develop ADUs.	Annually
7.	Prioritize funding for projects that set aside units for special needs populations and those with extremely low incomes.	Annually

8. Assist OCHA, FHF, and United Way in promoting the HCV program	Hold promotional workshops annually.
9. Study and pursue a home sharing program	Establish program in 2025 and begin implementation in 2026.
Improve conditions in neighborhoods through the following actions:	
10. Assess and expand MV Shuttle services and Safe Routes to School program to serve new developments and underserved neighborhoods.	Assess transit services at least every three years. Assess and expand Safe Routes to School program to align with new developments.
11. Target outreach to two neighborhoods where there are issues of housing conditions.	Annually
12. Study and develop appropriate strategies for adaptive reuse of underutilized commercial properties.	By the end of 2026.
Preserve existing affordable housing units through the following actions:	
13. Monitor status of all affordable units.	Annually
Increase fair housing education and enforcement through the following actions:	
14. Provide fair housing and tenant/landlord dispute resolution services	Annually
15. Expand promotion of housing resources, including fair housing services, via a multi-media approach, such as eNewsletter with circulation of 20,000, message boards, senior newsletter, and other social media outlets.	Annually

O. Newport Beach

Issue: Segregation and Disparities in Access to Opportunity

Residents across the city have relatively high access to opportunities, however, all of the city's neighborhoods are predominantly White and are classified as areas of high White segregation.

Homeownership rates are lower for all groups compared to the County overall, except for AAPI households, who have slightly higher homeownership rate in the city. Housing cost burden is also an issue for renters in the city.

Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Contributing Factors:

1. High cost of housing and limited supply of affordable housing.

Actions:

- Adopt and codify accessory dwelling unit (ADU)
 regulations that facilitate and incentivize ADU
 development beyond state law minimum requirements,
 create new housing development incentives and fee
 waivers, and that provide for access into areas of high
 opportunity that contribute to the following community
 development actions:
 - a. Increase residential development opportunities;
 - b. Maximize infill development in "built out" neighborhoods; and
 - c. Increase affordable housing options.
- 2. Conduct two community workshops that will accomplish the following:
 - a. Identify local issues that are influencing access to opportunity;
 - b. Identify potential solutions to address those local issues;
 - c. Identify opportunities to increase the housing supply for all income levels; and
 - d. Establish economic development priorities to help stimulate the creation of jobs and access to services.

Timeframe:

By June 2023, the City will adopt revised ADU regulations. By December 2023, the City will conduct two community workshops. The City will seek to produce 20 to 30 ADUs per calendar year within higher resource areas.

 Adopt an Inclusionary Housing Ordinance to ensure lower income units are developed in conjunction with new market-rate development equitably throughout the City and higher resource Census Tracts. By December 2026, the City will aspire to have approved between 750 and 1,000 affordable housing units or to have collected a commensurate in-lieu affordable housing fee for

use to subsidize future affordable housing projects. 4. Maintain and promote the City's Business Ambassador The City will improve upon its Program to residents to support local businesses and existing Business Ambassador Program and will seek to assist entrepreneurship. 5. Target outreach to two low-access Census Tracts via at least 35-45 individuals mailers or by other means including social media to annually with establishing their provide website information about local entrepreneurship own business opportunities. and educational opportunities. The Business Ambassador Program will be advertised within the lower-opportunity Census Tracts with a goal of reaching at least 50% of the households. 6. Continually update the City's housing-related webpages to Starting 2023, the City will ensure current available data. annually review and update its housing-related webpages. By June 2023, the City will 7. Improve access to mortgage loans through the following actions: provide information to the a. Disseminate online information to the community community about home loans about home loans and the loan application and and the loan process. By approval process. December 2023, the City will b. Conduct biannual affordable housing workshops conduct its first biannual with invited guests from the local lending industry affordable housing workshop and local affordable housing advocates. with affordable housing lenders c. Conduct annual report of loan dispositions in the and local affordable housing City and identify any trends or issues. Provide advocates. The City will seek to reach between 10,000 and findings to local lenders and financial institutions. 15,000 households with loan information and will further seek to reduce any occurrence of loan disposition discrimination, if found to be prevalent.

P. Orange

Issue: Segregation and Disparities in Access to Opportunities

Most of the city to the north and east of Villa Park is considered an area of high White segregation, and there are concentrations of predominantly Hispanic neighborhoods west of Glassel Street. Additionally, all publicly supported housing units and households with vouchers are located to the west and south of Villa Park. There are no publicly supported housing units or vouchers in use to the east of Villa Park, where it is a high White segregation area.

Geographically, the neighborhoods west of Glassel Street, have lower education and economic scores, and worse environmental quality. Conversely, neighborhoods to the north and east of Villa Park, have high education and economic scores, and good environmental quality. Related to this geographic distribution of opportunities, Hispanic and Black residents (especially Black residents living below the FPL) have relatively low access to neighborhoods close to high performing schools, and to neighborhoods with high labor force participation and human capital. Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

- 1. Lack of public investment in certain neighborhoods
- 2. Lack of sufficient affordable housing due, in part, to community opposition to affordable housing and land use and zoning regulations
- 3. Lack of fair housing knowledge

Ac	tions:	Timeframe:
lm	prove access to opportunity through the following actions:	
1.	The City will continue to utilize the Public Works and Community Services Departments for the as-needed removal of graffiti and other deferred maintenance issues on public property, including sidewalks, parks, bus shelters signs and other structures adjacent to the public right-of-way, to enhance the quality of Orange's residential neighborhoods.	Ongoing
2.	Provide public information related to housing development and how the provision of affordable housing benefits the community.	Ongoing
3.	The City will continue gathering community input on affordable housing, housing for special needs populations, and ADUs. The continued outreach will be City-wide with a focus on traditionally under-represented communities.	Ongoing
4.	Continue to follow current state Density Bonus law.	Ongoing
5.	Update the Transitional Housing Ordinance that establishes guidelines and regulations for the development and operation of transitional housing in the city.	2025

6. Prepare and adopt a Single Room Occupancy Ordinance that sets regulations for buildings designed for single room occupancy.		2025
7.	Prepare and adopt a Residential Care Facility Ordinance that establishes regulations and standards for non-medical care facilities providing care to individual requiring assistance.	2025
8.	Prepare and adopt a Farmworker and Employee Housing Ordinance that sets standards and regulations for housing provided to farmworkers by their employers.	2025
9.	Adopt a program to subsidize application processing fees for qualifying developments where all units are affordable to 80% AMI or lower when funding is available.	Ongoing
10.	Continue providing CDBG funds to the Fair Housing Foundation to provide fair housing activities to the community.	

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in the City of Orange.

	3 11 1			
1.	Lack of sufficient affordable housing			
Ac	Actions:			
1.	The City will assist in preserving at-risk units by, but not limited to, supporting non-profit applications for funding to purchase at-risk units, work with property owners to maintain affordability and develop preservation strategies, and assist with funding when available.	Ongoing		
2.	The City will continue to seek qualified non-profit organizations for acquisition, construction, and rehabilitation of affordable housing. Funds will be available annually, contingent on funding availability.	Annually		
3.	The City will continue to encourage through outreach to private and non-profit housing developers, the development of rental and for-sale housing for larger (5 or more individuals) families. The City will support developers/builders that incorporate larger bedroom counts (3 or more bedrooms) to accommodate the needs of larger families and reduce incidents of overcrowding in the existing housing stock. The City will evaluate providing regulatory incentives such as density bonuses that encourage and support the development of housing for large families on a project-by-project basis.	Ongoing		
4.	The City will develop a program to subsidize application processing fees, when funding is available, for qualifying developments where all units affordable to 80% AMI or lower. The City will also promote the benefits of this program to the	Ongoing		

development community by posting information on its webpage and creating a handout to be distributed with land development applications.

Q. Rancho Santa Margarita

Issue: Concentration

Most of the City's population is predominantly White, with greater diversity in the neighborhoods east of SR-241. There are no publicly supported housing units. Some vouchers are in use in the northeast part of the city, which is a low-medium concentration area.

- 1. Location and type of affordable housing available
- 2. Land use and zoning laws that limit affordable housing development
- 3. Limited resources for fair housing agencies and organizations.
- 4. Lack of local private fair housing outreach and enforcement.

Actions:		Timeframe:
1.	Continue to serve as a liaison between the public and appropriate agencies in matters concerning housing discrimination within the City.	Ongoing
2.	Provide annual fair housing literature to schools, libraries, and post offices. Make information available via the City's fair housing service provider. Review annually to ensure that the posters and literature being provided are up to date.	Annually
3.	3. In coordination with OCHA and fair housing services provider, conduct biennial landlord education campaign to educate property owners about state law prohibiting discrimination based on household income. Provide public information and brochures regarding fair housing/equal housing opportunity requirements, including how to file a complaint and access the investigation and enforcement activities of the state Fair Employment and Housing Commission. Make said information available on the City's website and at City Hall. Review information annually to ensure that any materials, links, and information provided are current.	
4.	In collaboration with the Orange County Housing Authority (OCHA): a. Attend quarterly OCHA Housing Advisory Committee to enhance the exchange of information regarding the availability, procedures, and policies related to the Housing Assistance Voucher program and regional housing issues. b. Support OCHA's affirmative fair marketing plan and de-concentration policies by providing five-year and annual PHA plan certifications.	Ongoing
5.	Monitor FBI data annually to determine if any hate crimes are housing-related and if the City's fair housing service provider can take action to address potential discrimination linked to the bias motivations of hate crimes.	Annually

Issue: Disparities in Access to Opportunities

Residents across the city have relatively high access to opportunities, except for access to transit. Homeownership rates in the city are higher for all groups when compared to the County. However, Hispanic households have the lowest homeownership rate, and it is 20 percentage points lower than the AAPI homeownership rate, which is the highest rate in the city.

- 1. Location of employers
- 2. Availability, type, frequency, and reliability of public transportation
- 3. Location and type of affordable housing available

Ac	tions:	Timeframe:
1.	Request the Orange County Transportation Authority explore bus route options to ensure neighborhoods with concentration of low-income or protected class populations have access to transportation services.	Ongoing
2.	Update the City's Circulation element to better facilitate multimodal transportation to/from the lower opportunity Census Tracts to goods and services.	By mid-March 2025.
3.	In cooperation with the Orange County Transportation Authority, provide community education regarding transport services for individuals with disabilities.	Ongoing

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in Rancho Santa Margarita.

- 1. Economic displacement
- 2. Environmental hazards such as wildland fires and the interface with urban areas

Ac	tions:	Timeframe:
1.	Support local eviction prevention strategies to reduce the number of homeless individuals and families (homelessness prevention services).	Annually
2.	Update the City's Local Hazard Mitigation Plan by December 2024 to ensure community resiliency from hazards.	By mid-2025
3.	Conduct outreach to landlords and support OCHA's mobility counseling program to increase Housing Choice Vouchers in the city.	Increase Housing Choice Vouchers through the Orange County Housing Authority by 5% between 2021-2029.

R. San Clemente

Issue: Concentration, Disparities in Access to Opportunity, and Disproportionate Housing Needs

The majority of the city is considered an area of high White concentration, except for one Census Tract encompassing neighborhoods north and east of Max Berg Plaza Park, which is classified as low-medium concentration. There is a cluster of publicly supported housing units in this low-medium concentration area.

Based on analysis of fair housing complaint data, individuals with disabilities may disproportionately experience discrimination in housing.

Housing cost burden is an issue for renters across Orange County, including in San Clemente.

- 1. Unaffordable rents and sales prices in a range of sizes, the location and type of affordable housing, and an overall shortage of subsidized housing units
- 2. Displacement of residents due to economic pressures
- 3. Cost of repairs or rehabilitation
- 4. Dominance of single-family housing, which is typically more expensive than multi-family housing
- 5. Lack of fair housing education and outreach

Acti	ons:	Timeframe:
1	Annually promote equal access to fair housing information for all residents. Expand outreach methods beyond traditional media (newspaper or City website) to include other social media platforms such as Facebook, Twitter, and Instagram. Focus fair housing outreach efforts in the area along the western side of Interstate 5 where racial/ethnic minorities and LMI households are concentrated.	Annually, with the goal to increase distribution of information by 20% between 2021-2029
	Continue to work under contract with the Fair Housing Foundation (FHF) and/or other qualified fair housing service providers to provide fair housing services for all segments of the community.	Serve at least 50 households each year. Annually evaluate and adjust the scope of services to ensure the City address any emerging trends in fair housing issues.
1	In coordination with OCHA and fair housing services provider, provide outreach and education to landlords and tenants regarding the state's new source of income protection (SB 329 and SB 229) that recognizes public assistance such as Housing Choice Vouchers (HCV) and Veterans Assistance Supportive Housing (VASH) as legitimate source of income for rent	Conduct outreach and education annually; increase vouchers from Orange County Housing Authority by 10% between 2021-2029.

	payments. Specifically, provide fair housing responsibility to new ADU applicants.	
4.	Help non-profits acquire and convert market-rate housing to affordable housing	Ongoing
5.	Work to preserve the City's affordable housing inventory	Ongoing
6.	Offer a variety of housing opportunities to enhance mobility among residents of all races and ethnicities by facilitating affordable housing throughout the community through the following actions:	Goal of creating 446 affordable units for lower income households between 2021 and 2029
	 Promote by-right approvals to facilitate at least one new multi-family housing project with at least 20% of units for lower income households 	2021-2029
	 b. Promote Lot Consolidation program and incentives to at least three developers. 	2021-2029
	c. Implement the City's Affordable Housing Overlay to facilitate at least one new multi-family housing project	2021-2029
	 d. Promote the City's Inclusionary Housing Program to facilitate at least one multi-family housing project with units affordable for lower income households 	2021-2029
7.	Provide rehabilitation financing assistance through the Neighborhood Revitalization Program and advertise this program to the western and southern areas of the City with older housing units and overpaying households.	Assist at least two homeowners per year
8.	Increase public outreach to at least once a year and encourage residents to learn about available housing programs.	Annually
9.	Through the City's fair housing service provider (FHF) increase materials distribution by 25% through the following actions:	
	a. Provide fair housing education and information to apartment managers and homeowner associations on why denial of reasonable modifications/ accommodations is unlawful through fair housing service contract at least once a year.	Annually
	 b. Conduct multi-faceted fair housing outreach at least once a year to tenants, landlords, property owners, realtors, and property management companies. Methods of outreach may include workshops, informational booths, presentations to community 	Annually

	groups, and distribution of multilingual fair housing literature.	
C.	Provide general fair housing counseling and referral services to address tenant landlord issues and investigate allegations of fair housing discrimination and take appropriate actions to reconcile cases or refer to appropriate authorities.	Ongoing
d.	Periodically monitor local newspapers and online media outlets to identify potentially discriminatory housing advertisements.	Annually
e.	Include testing/audits within the scope of work with fair housing provider.	Ongoing

S. Santa Ana

Issue: Segregation and R/ECAPs

There is moderate segregation between Hispanic and White residents, and between AAPI and White. The majority of the city is considered an area of high POC segregation and has a predominantly Hispanic population except for the Riverview West community which is predominantly AAPI. There are lots of publicly supported housing units downtown and southeast of downtown, which are high POC segregation areas. There is a higher concentration of vouchers, as well as some publicly supported housing units, west of the Santa Ana River, which is also a high POC segregation area.

There is a R/ECAP covering multiple Census Tracts in the downtown area. These tracts are predominantly Hispanic, as are all the surrounding neighborhoods.

- 1. Lack of fair housing education and outreach
- 2. Lack of affordable housing

Actions:	Timeframe:
Ensure all City programs and activities relating to housing and community development are administered in a manner that affirmatively furthers fair housing.	Ongoing
 Hold annual small apartment managers' workshop to train and educate property owners, HOAs, property managers, and tenants about best practices in property management, neighborhood safety, and landlord/tenant responsibilities. 	Annually
 Periodically prepare the Analysis of Impediments to Fair Housing Choice to identify, remove, and/or mitigate potential impediments to fair housing in Santa Ana. 	Every 5 years
 Partner with legal assistance organizations to provide legal clinics for tenants on tenants' rights and recourse for intimidation and unjust evictions. 	Annually

Issue: Disparities in Access to Opportunities

Hispanic residents are more likely than other groups to be exposed to poverty in their neighborhoods and are less likely than other groups to live in close proximity to high performing schools, or in neighborhoods with high labor force participation and human capital. Geographically, neighborhoods downtown, west of downtown, and southeast of downtown have low economic scores, low education scores, high poverty rates, and poor environmental quality. Neighborhoods in the north and south of the city have better economic and education scores.

- 1. Lack of affordable housing
- 2. Lack of public investment in low opportunity areas

Ac	tions:	Timeframe:
1.	Publish preapproved ADU plans and publicize ADU program through dedicated web page in various languages to facilitate ADU construction.	Facilitate construction of 723 ADUs between 2021- 2029
2.	Enforce the City's inclusionary housing ordinance, known as the Affordable Housing Opportunity & Creation Ordinance (AHOCO), to require eligible housing development projects of five or more units, including condominium conversions, to include at least 15 percent of the units as affordable to low-income households; or 10 percent of the units affordable to very low-income households; or 5 percent to extremely low-income households; or a minimum of 10 percent available affordable households with five (5)5 percent to low- income, 3 percent to very low-income, and 2 percent to extremely low-income households, for rental housing. Require 5 percent of the units as affordable to moderate-income households for for-sale housing.	Ongoing
3.	Establish guidelines as part of the Comprehensive Zoning Code Update for new housing development projects to include a variety of unit sizes, including units for large families, that are affordable to extremely low-, very low-, and low-income families.	By December 2025
4.	Annually monitor the status of at-risk housing projects, specifically the Warwick Square, Highland Manor, and other projects that may come due. Contact owners of properties at risk of conversion within one year of expiration to discuss City's desire to preserve projects as affordable housing.	Annually
5.	Assist low-income households with down payment assistance loans of up to \$120,000 and moderate-income households with loans of up to \$80,000.	Annually

6.	Create, assist, and support neighborhood associations, especially in R/ECAP and TCAC Census Tracts, to collaborate on projects and sponsor and hold annual events.	Annually
7.	Complete infrastructure improvements in residential neighborhoods consistent with the City's Capital Improvement Plan.	Ongoing
8.	Through the City's RFP process for Affordable Housing Development (see program 2), facilitate and encourage the development in the Transit Zoning Code plan area of varied housing types at a mix of affordability levels, including for lower income households using appropriate incentives, such as awarding bonus points to developers whose projects provide at least 75% or more for the units for extremely low-income families at 30% Area Median Income.	Annually

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in Santa Ana. Additionally, more than 20% of housing units are overcrowded in most of the city's neighborhoods.

- 1. High cost of housing in the private market
- 2. High cost of housing repairs/rehabilitation

Actions:	Timeframe:
 Implement the City's Rent Stabilization and Just Cause Eviction Ordinance for tenants facing housing instability, including ongoing outreach and education, a program monitor system, and a schedule of penalties that may be imposed for noncompliance. Provide tenant protections beyond state mandates. 	Annually
2. Provide housing assistance payments to eligible households participating in the Housing Choice Voucher Program and adhere to policies and procedures in the federal regulations and the Housing Choice Voucher Program Administrative Plan. Administer 100 percent of the funding provided to the Housing Authority annually for eligible households. This includes Special Purpose Vouchers including the Veterans Affairs Supportive Housing Program; Mainstream Voucher Program; Foster Youth to Independence Program; and Emergency Housing Voucher Program. The objectives are to: 1) Utilize 100 percent of the Annual Budget Authority provided by HUD for each CY; 2) Apply for new funding opportunities for additional vouchers; 3) Retain High Performer SEMAP status; 4) Communicate on a regular basis with active landlords by providing information on key program updates.	Ongoing

3.	Contract with a local nonprofit organization (currently Habitat for Humanity) to implement the City's Residential Rehabilitation Grant Program. Provide grants for the repair and rehabilitation of single-family and mobile homes, prioritizing applicants in R/ECAP and TCAC Census Tracts and low-income households.	Annually
4.	Enhance local preferences program for residents working and living in Santa Ana who are seeking affordable housing. Explore a right-of-first-refusal ordinance for mobile home parks and publicly supported multifamily residential properties to minimize tenant displacement and preserve affordable housing stock. Evaluate and pursue collective ownership models for mobile home parks as a tool to prevent displacement.	Ongoing

T. Tustin

Issue: Segregation

There is moderate segregation between Hispanic and White residents. There is a concentration of publicly supported housing units in the south, in neighborhoods that are predominantly AAPI.

Contributing Factors:

1. Lack of affordable housing opportunities.

Act	tions:	Timeframe:
1.	Engage linguistically isolated communities by translating official City announcements (i.e., community meeting, hearings, etc.) to Spanish and disseminating printed copies of information to renters, property owners, and via social media, to expand knowledge of affordable housing options in High Opportunity Areas.	Ongoing
2.	Conduct at least one community informational meeting in areas that lack affordable housing opportunities and that exhibit high segregation, on an annual basis.	Annually
3.	Improve housing conditions in segregated areas establishing a multi-family quality rental housing inspection program that focuses on high segregation areas. The City will receive at least one monthly referral from the City's Neighborhood Improvement Task Force (NITF) (NITF includes Code Enforcement, Police, Social Service/County, School District representatives, City staff form various Departments) to identify households in need of this tenant protection and anti-displacement focused program; focused on improving the quality of single family and multi-family residential dwellings by providing technical assistance and funds to repairs substandard housing conditions. The City will conduct at least five multi-family quality rental housing inspections in the program's first year and will increase the number of annual inspections by 2, each year thereafter, until 2029.	2025 through 2029

Issue: Disparities in Access to Opportunities

Hispanic residents (especially those living below the FPL) are less likely than other groups to live in close proximity to high performing schools, or in neighborhoods with high labor force participation and human capital; and are more likely to be exposed to poverty in their neighborhoods. Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

Homeownership rates are very low for Black and Hispanic households, equaling less than half of the homeownership rate for AAPI and White households.

- 1. Lack of affordable housing in high opportunity areas.
- 2. Lack of public and private investment in low-resource neighborhoods.

Ac	tions:	Timeframe:	
1.	Create an ADU/SB 9 accelerator program and focus in High Opportunity Areas within the northeast portion of the City where there are predominately single-family residences to expand housing choices. This program could include a permit fee waiver for affordable housing units, permit fast tracking, and technical assistance.	By 2025, the City will adopt a program and mail out information pertaining to the new accelerator program for ADUs and SB 9 developments, specifically to high opportunity areas.	
2.	Provide technical assistance and permit fast-tracking for new ADU/SB9 development proposals and at least six projects that include housing affordable to lower income households annually through 2029.	Fast track a minimum of 10 ADU and/or SB 9 developments in high opportunity areas on an annual basis; reduce review times by 25% compared to year 2022.	
3.	Translate the City's Tustin Housing Authority website and factsheets promoting affordable housing opportunities and ancillary support services, such as transit and childcare, into Spanish, and distribute to low resource areas.	Annually, 2023 through 2029	
4.	Tustin Legacy (Tract 744.15) is a Master Planned Community being developed. Although the tract has been identified as low resource, it has been substantially enhanced with new resources within recent years. The area comprises 1,500 acres, of which 800 acres remain for future development of a diverse housing stock, community amenities, and resources. By 2029, the City will continue to implement projects that increase assets in the Specific Plan area as proposed by developers and identified in the Tustin Legacy Backbone Infrastructure	By 2029, the City anticipates the Tustin Legacy (Tract 744.15) to be identified as a "high resource" area according to TCAC/HCD Opportunity Map criteria.	

	Program. Improvements will provide increased access to safe and decent housing, transportation, recreation, and a healthy environment.	
5.	Create a "Financial Assistance for Child Care" webpage with information and links to Children's Home Society of California (CHS) and the Orange County Department of Education (OCDE). These programs provide funding to low-income families for childcare services. The City will work with Tustin Preschool, Kiddie Academy of Tustin, or other local preschool programs within Census Tract 755.14 to advertise and promote financial assistance through pamphlets, e-blasts, and other applicable online community forums (such as Facebook and NextDoor).	By December 2022; update annually thereafter

Issue: Disproportionate Housing Needs

Housing cost burden is an issue for renters across Orange County, including in Tustin.

- 1. Lack of affordable housing.
- 2. Substandard housing in low-resource areas.
- 3. High cost of housing repairs/rehabilitation.

Ac	tions:	Timeframe:	
1.	The City will partner with a non-profit to develop and launch a CDBG funded Housing Rehabilitation Program to facilitate the repair of dilapidated housing to address lack of plumbing, kitchen facilities and repairs to provide relief of overcrowding. Program participants will be provided grants and/or loans to conduct necessary housing updates.	Starting in July 2024, the program will facilitate four (4) rehabilitation projects to assist with reducing overcrowding per year and another four (4) projects will assist with general habitability repairs, with a total of eight (8) dwellings assisted annually.	
2.	The City will amend the zoning code to require all new multi-family projects to provide at least five (5) percent large family units (3+ bedrooms) which will prevent overcrowding and further cost burden, by addressing demand for such units and increasing the large units into the local housing inventory.	Zoning code amended by January 2024. Four (4) large family units will be generated annually, and 32 total by 2029.	
3.	Improve housing conditions in segregated areas establishing a multi-family quality rental housing inspection program that focuses on high segregation areas. The City will receive at least one monthly referral	2025 through 2029	

from the City's Neighborhood Improvement Task Force (NITF) (NITF includes Code Enforcement, Police, Social Service/County, School District representatives, City staff form various Departments) to identify households in need of this tenant protection and anti-displacement focused program; focused on improving the quality of single family and multi-family residential dwellings by providing technical assistance and funds to repairs substandard housing conditions. The City will conduct at least five multi-family quality rental housing inspections in the program's first year and will increase the number of annual inspections by 2, each year thereafter, until 2029.

U. Westminster

Issue: Segregation, Disparities in Access to Opportunities, and Disproportionate Housing Needs

The majority of the city is considered an area of high POC segregation and has a predominantly AAPI population with a few exceptions. The northwestern corner of the city, between I-405 and Bolsa Chica Rd is an area of high White segregation. The location of publicly supported housing units and areas with highest concentration of vouchers aligns with the high POC segregation areas in the central part of the city. There are no publicly supported housing units, and fewer vouchers in use, in the western parts of the city that are high White segregation, racially integrated, and low-medium segregation areas.

AAPI residents are more likely than other groups to be exposed to poverty in their neighborhoods and are less likely than other groups to live in close proximity to high performing schools or jobs. Native American residents living below the FPL are also less likely to live in close proximity to high performing schools or jobs. Additionally, based on analysis of fair housing complaint data, individuals with disabilities disproportionately experience discrimination in housing.

There are large racial/ethnic disparities in homeownership. Black, Hispanic, and Native American households have the lowest rates (around 30%), and these rates are less than half the homeownership rate for White households, which is the highest in the city. The AAPI homeownership rate in the city is lower than in the County overall and is nearly 20 percentage points lower than the White homeownership rate in the city.

Housing cost burden is an issue for renters across Orange County, including in Westminster.

- 1. Lack of resources for fair housing agencies and organizations
- 2. Land use and zoning laws.
- 3. Displacement of residents due to economic pressures.
- 4. Location and type of affordable housing.
- 5. Lack of private investment in specific neighborhoods.
- 6. Lack of community revitalization strategies

Ac	tions:	Timeframe:
1.	Maintain an inventory of the available sites for residential development and post it online (with annual updates) and provide it to prospective residential developers upon request. Monitor development trends to ensure continued ability to meet the RHNA.	Ongoing
2.	Continue to perform project-by-project evaluation to determine if adequate capacity remains for the remaining RHNA.	Ongoing
3.	Adopt new mixed-use zoning districts and rezone all sites identified in the City's most recent Housing Element to accommodate shortfall housing need, consistent with the densities, acreages, and capacity	Completed

		rels identified in the Housing Element. Complete all rezoning pursuant	
		Government Code Section 65583.2, subdivisions (h) and (i).	
4.		courage and facilitate construction of ADUs through the following tions:	
	a.	Update the City's ADU Ordinance to reflect state law.	2025
	b.	Prepare pre-approved ADU design templates, tailored to meet specific zoning and building standards. Use of these design templates by a potential developer would ensure that the proposed ADU meets most, if not all, required standards at the outset of the development process, minimizing and streamlining the review process. This is expected to significantly incentivize production of ADUs by removing costs, reducing approval timeframes, and providing high application certainty.	Completed
	C.	Promote development of ADUs by continuing to provide written information at the City's planning counter and on the City's website and update it annually.	Ongoing
	d.	Monitor ADU permit applications and approvals annually through the Housing Element Annual Progress Report (APR) process; identify and implement additional incentives or other strategies including rezoning, as appropriate, to ensure adequate sites during the planning period. Should ADU production fall short of projections for three consecutive APR reporting periods then new incentives, strategies, and/or rezoning shall be implemented within six months of the third submitted APR.	Annually
	e.	Promote the City's ADU Process Guide (available on the City's website).	Ongoing
	f.	Host an annual workshop on accessory dwelling units, including guidance for development and common questions and answers.	Annually
	g.	Continue requesting information on rental rates to determine their affordability and review this information annually against the projects identified in the Housing Element.	Annually
5.		r all project applications, identify need for replacement of affordable using units and ensure replacement, if required, occurs.	Ongoing
6.		e HOME Funds and Housing Successor Funds to increase affordable using production through the following actions:	
	a.	Provide HOME Funds and Housing Successor Funds to assist development such as for the purpose of acquisition and/or	2021-2029

Orange County 273 25-29 Regional AFH

subsidizing the cost of land acquisition and off-site improvements for construction of 100 new affordable housing units.	
b. Use HOME Funds and Housing Successor Funds to acquire 16 multifamily or single-family units to be rehabilitated by a nonprofit and restricted to low-income rental housing.	2021-2029
c. Contact local service providers and developers annually and inform them of the potential partnerships with the Housing Division through paperless methods such as phone calls, email, and online postings.	Annually
7. Encourage development of affordable and special needs housing opportunities	
a. Contact affordable housing providers (including non-profit providers) annually to encourage them to develop affordable housing for low-/very-low-income households and the disabled in Westminster.	Annually
b. Maintain on the City's website an inventory of sites suitable for the development of affordable housing for low-income households and households with special needs and update it annually.	Ongoing
c. Support and prepare applications for funding annually.	Annually
d. Provide incentives and concessions to developers to assist in the development of housing for lower income households or households with special needs, such as flexible development standards, expedited processing, and support from state funding including SB 2 Planning Grants and Permanent Local Housing Allocation. The preparation of flexible development standards and expedited processing for projects including affordable units will be addressed through the City's Zoning Code Update.	2022-2025
e. Explore additional funding sources and strategies such as boomerang funds and financing districts to assist the development of housing for lower income households on a biennial basis.	Ongoing
8. Continue to make available the City's application submittal packet to provide interested builders or service providers with Density Bonus information through paperless methods such as online postings. Provide printed copies at the front counter. Meet with developers to explain the process and requirements.	Ongoing
explain the process and requirements.	

farmworker housing; and update the Zoning Code as needed to comply with future changes.	
10. If an application to convert a residential development to a condominium/stock cooperative is submitted to the City, the provisions of the City's condominium conversion ordinance shall be implemented and enforced.	Ongoing
11. Implement the mobile home park conversion ordinance by requiring applicants to (a) identify the quantity and conditions of each lower-income household/unit, and (b), upon approval of a permit to convert a mobile home park, implement mitigation measures that fully mitigate the net loss of low-income households.	Ongoing
12. Conduct a Displacement Risk Analysis Study to identify the local conditions that lead to displacement and develop and implement an action program based on the results. Identify potential partners to participate in the study that specialize in eviction-related topics related to displacement, such as the Fair Housing Foundation. Annually monitor program effectiveness.	2021-2029
13. Implement incentives that will facilitate lot consolidation and increase the overall feasibility of affordable housing projects; as part of the City's Zoning Code Update, incorporate specific development standards that support lot consolidation, such as a reduction in parking standards, shared parking arrangements in mixed-use projects, a reduction of minimum unit size, and modification of setback requirements. Apply annually for grant funding to prepare conceptual development plans on consolidated lots.	2022-2025 for code update and annually for grant funding
14. Address substandard housing through the following actions:	
a. Using the land use data generated from the General Plan Update, adopted in 2020, combined with the data generated from the 2007 Housing Conditions Survey, identify multifamily projects with the most significant level of deterioration for the purpose of providing loans for rehabilitation of multifamily units, subject to the applicable funding source requirements.	2021-2029
b. Provide funding through the Neighborhood Pride Multi-Family Rental Rehabilitation Program to bring at least 14 substandard units up to code.	2021-2029
c. Continue to conduct annual community workshops explaining code compliance issues. Prepare and distribute a Good Neighbor Guide describing how residents can maintain a healthy, safe, and appealing property.	2021-2029

Orange County 275 25-29 Regional AFH

d. Continue to utilize the Community Preservation Unit to assist with community education and neighborhood maintenance.	2021-2029
15. Increase fair housing knowledge and enforcement through the following actions:	
a. Continue to make available a program directory or list of housing resources (including resources and regulatory opportunities such as the Secondary Unit Ordinance) to the public through the City's website and in City Hall.	Ongoing
b. Continue to advertise the City's reasonable accommodations provisions using the City's website, brochures, and other forms of appropriate media. Ensure continued use of the City's reasonable accommodation provisions, by processing in a timely manner any application requesting a reasonable accommodation.	Ongoing
c. Continue the City's commitment to working with the Fair Housing Foundation and disseminating fair housing information at City Hall, public libraries, the Chamber of Commerce, and on the City's website. Include within the annual budget adequate funding to continue the contract with the Fair Housing service provider.	Annually

INTRODUCTION

The City of Huntington Beach (City) receives an annual entitlement of Community Development Block Grant (CDBG) and Home Investment Partnerships (HOME) funds from the U.S. Department of Housing and Urban Development (HUD) for housing and community development activities to assist low-income persons. In accordance with the entitlement programs, the City must create a 5Five-Year Consolidated Plan (Consolidated Plan) that addresses affordable housing and community development needs, submit an Annual Action Plan (Annual Plan) to outline spending and activities for the corresponding program years, and provide a Consolidated Annual Performance and Evaluation Report (CAPER) to evaluate the City's accomplishments and use of CDBG and HOME funds. As required by HUD regulations 24 CFR 91.105, the City must have and follow a detailed Citizen Participation Plan that specifies the city's policies and procedures for engaging citizens and encouraging them to participate in creating, evaluating, and implementing the CDBG and HOME programs and the Assessment of Fair Housing (AFH).

The 2025/26-2029/30 Citizen Participation Plan (Citizen Participation Plan) was available for public review and comment between April 4, 2025 and May 6, 2025. The City published a notice in *The Wave* (Orange County Register) on April 3, 2025 informing the public of the availability of the document for review and comment. The public had access to review the draft document at the City of Huntington Beach Community Enhancement Division and on the City's website. The public was invited to provide comments on the Citizen Participation Plan at a public hearing conducted during the regular meeting of the Huntington Beach City Council on May 6, 2025.

OBJECTIVES

The City's Citizen Participation Plan is designed to ensure equitable representation of all segments of the population and to aid communication between the City and its residents on matters pertaining to the use of all federal funding from HUD. The Citizen Participation Plan sets forth policies and procedures the City Council adopted to encourage citizen involvement regarding the use of federal funds, notably CDBG and HOME funds. The intent of the Citizen Participation Plan is to encourage those least likely to participate in the process, especially low-income persons living in distressed neighborhoods, in public and assisted housing developments, and in areas where CDBG funds are proposed to be used. This document outlines basic tenets of the citizen participation regulations and remains in effect throughout the implementation of the City's entitlement awards from the federal government or until these funds are closed out.

The Citizen Participation Plan promotes citizen participation in the following key areas:

- Preparation and review of, and comment on the:
 - ✓ Consolidated Plan, a five-year strategic plan that outlines the strategy and goals for

the City's use of the federal funding sources.

- ✓ Annual Plan, which describes projects that will be undertaken in the upcoming fiscal year with the federal funding sources.
- ✓ Substantial Amendments to a Consolidated Plan and/or Annual Plan.
- ✓ Assessment of Fair Housing (AFH).
- Provides an opportunity for residents to review and comment on the annual CAPER, which
 describes Huntington Beach's implementation of activities funded by the HUD formula
 programs, CDBG and HOME.
- Provides residents reasonable and timely access to information, meetings, and records.
- Provides assistance for non-English-speaking and Limited English Proficient (LEP) persons upon advance request provided such services are available.
- Provides reasonable accommodations for those with disabilities upon advance request.

ROLE OF CITIZENS

Citizen involvement is essential in assuring that City policies, procedures, programs and activities are well suited to local needs. It fosters transparency, accountability, and inclusiveness in local governance. The City Council addresses itself to the development, review and adoption of the following areas:

- A. The City's Consolidated Plan and Annual Plan.
- B. The submission of the City's CAPER.
- C. City improvement strategies, programs, policies and procedures.
- D. The Citizen Participation Plan.

Regular meetings of the City Council/Public Financing Authority are held on the first and third Tuesdays of each month, and typically begin on or preceding the hour of 6:00 p.m. in the Council Chambers located at 2000 Main Street, Huntington Beach, CA. A Study Session used to present information to Council for discussion purposes only with no objection being taken or Closed Session may be convened subject to the Ralph M. Brown Act, and may be scheduled prior to the main, public meeting that convenes at 6:00 p.m. in the Council Chambers. If a regularly scheduled meeting falls on a holiday, the meeting will be held on the next business day.

City Council Meeting agendum and supporting documentation is available for public review at

https://huntingtonbeach.legistar.com/Calendar.aspx no later than Thursday prior to a scheduled meeting. If a holiday occurs on the Monday or Tuesday prior to scheduled agenda packet release, delivery of packet material to Council and the public may be delayed by one additional day.

Regular City Council meetings are broadcast live on Huntington Beach Cable Channel 3 and repeated on the following Wednesday after City Council meeting at 10 a.m. and Thursday at 6 p.m. Council meetings are webcast live and also archived on the City's website.

GUIDELINES FOR CITIZEN PARTICIPATION

The citizen participation process provides citizens of Huntington Beach with a formal opportunity to take part in the development of housing and community development programs and amendments to adopted plans at a community-wide level in a public forum during a specified City Council Meeting or Citizen Participation Advisory Board meeting. Listed below are the specific guidelines governing information access, public notices, and technical assistance, among others, that the City will follow to encourage citizen participation in the preparation of the Consolidated Plan, Annual Plan, AFH, and CAPER.

Citizen Participation Advisory Board

The Citizen Participation Advisory Board (CPAB) was established in October 1996. It is comprised of seven members appointed by each of the individual City Council members. The CPAB strives to represent the diverse views on the socioeconomic issues related to low/moderate income individuals. To that end, low-income residents and members of minority groups are encouraged to apply to the City for appointment to the CPAB when vacancies arise, so that members of minority groups can be substantially represented.

The purpose of the CPAB is to provide citizen participation and coordination in the City's planning processes for HUD formula grants, principally the CDBG and HOME-Programs. Along with staff, the Board shall assess the needs of the community particularly that of low- and moderate-income households, evaluate and prioritize projects pertaining to the required plans and provide recommendations to City Council on such plans and projects, and consider alternative public involvement techniques and quantitative ways to measure efforts that encourage citizen participation.

It is the responsibility of the CPAB to review grant proposals and make recommendations to the City Council concerning federal funding, specifically for CDBG Public Services programs and activities. Committee meetings are open to the public and are held regularly during the CDBG application and deliberation period. The CPAB establishes its meeting dates by consensus. All meetings are open to the public and special meetings may be called in conformance with the Ralph M. Brown Act. The Board will hold public hearings to obtain citizen input on community needs, plans or proposals. The CPAB is encouraged to hold public meetings in areas where there is a significant concentration of low- to moderate-income persons. To ensure that all City residents have sufficient opportunity to take notice of all scheduled public hearings, all public hearing notices will include the date, time and location of the City Council Chambers located at 2000 Main

Street, Huntington Beach and notification that meeting locations are accessible to the disabled. To maximize community participation by individuals served through CDBG and HOME programs, meetings may also be held in the Oakview neighborhood, which is within an eligible low- and moderate-income area.

Consolidated Plan, Annual Plan, and Assessment to Fair Housing

As mandated by federal regulations, the City submits a Consolidated Plan and Assessment to Fair Housing every five years and an Annual Plan every year to HUD. The Consolidated Plan is a long-range plan that identifies community development and housing needs of low-income Huntington Beach residents, establishes priorities, and describes goals, objectives and strategies to address identified priorities. The Annual Plan is a document that lists specific activities for CDBG and HOME funding in the upcoming program year, as well as applications for both federal programs. An AFH Plan describes patterns of integration and segregation; racially or ethnically concentrated areas of poverty; disparities in access to opportunity; and disproportionate housing needs.

The following steps will be taken to encourage all Huntington Beach citizens, including minorities, non-English speaking or limited English proficient (LEP) persons, and persons with disabilities, to participate in the development of the Consolidated Plan, Annual Plan, and AFH and afford these citizens an opportunity to review and comment on them:

Consolidated Plan / Annual Plan

- 1. In preparation of the Consolidated Plan, the City will distribute a Community Needs Survey (and in Spanish if necessary) to local agencies, and will conduct a consultation workshop with housing, health, homeless, disabled, and other social service providers to identify key housing and community development needs and issues in the City, as well as identifying gaps in service.
- 2. The City will conduct a community workshop in English (and in Spanish if necessary) to solicit citizens' opinions regarding perceived community needs during development of the Consolidated Plan, and provide a written Community Needs Survey (in Spanish if necessary) to establish expenditure priorities of CDBG and HOME monies.
- 3. The City will distribute from time-to-time a Request for Proposals (RFP) to nonprofit organizations and City departments to carry out public service and/or housing activities.
- 4. The City will elicit comment from local and regional institutions, the Continuum of Care and other organizations (including businesses, developers, nonprofit organizations, philanthropic organizations, and community-based and faith-based organizations) when developing and implementing the Consolidated Plan.
- 5. In conjunction with consultation with public housing agencies, the City will encourage participation of residents in public and assisted housing developments while developing and implementing the Consolidated Plan, along with other low-income residents of

targeted revitalization areas in which the developments are located. The City will provide information to public housing agencies in Huntington Beach and surrounding cities about consolidated plan activities related to its developments and surrounding communities so that the PHA can make this information available at the annual public hearing required for the PHA Plan.

- 6. Prior to the development of the City's Consolidated Plan, the first of two public hearings will be held to solicit and consider any public comments (oral and written) on the use of CDBG and HOME funds. The public hearing will serve to obtain the views of citizens on housing and community development needs, including priority non-housing community development needs. To ensure that all City residents have sufficient opportunity to take notice of all scheduled public hearings, all public hearing notices, including the date, time and location, and summary of the proposed action shall be published in a local newspaper of general circulation at least fifteen (15) days prior to the date of the public hearing. This first public hearing is to be held by the CPAB at City Hall located at 2000 Main Street, Huntington Beach, CA 92648 and is accessible to the disabled.
- 7. Following the 1st public hearing, the CPAB will hold one or more meetings to allow CDBG applicants to present their request for funding and to talk about their programs. The CPAB will prioritize the eligible programs and projects and will prepare a recommendation on funding levels to be included in the Draft Annual Plan.
- 8. A summary describing the contents and purpose of the proposed Consolidated Plan and/or Annual Plan will be published in a newspaper of general circulation. The publication of the summary notice will commence a 30-day public comment period, during which citizens will have the opportunity to examine the proposed Consolidated Plan and/or Annual Plan and submit comments regarding the draft document(s) to the City's Community Development Department / Community Enhancement Division (see address below). Complete copies of the draft Consolidated Plan and/or Annual Plan will be available for review at the following locations and at https://www.huntingtonbeachca.gov/cdbg:

City of Huntington Beach Community Enhancement Division 2000 Main Street, 5th Floor Huntington Beach, CA 92648 Oak View Branch Library 17251 Oak Lane Huntington Beach, CA 92648

9. The 2nd public hearing before the City Council will be held to provide citizens a final opportunity to comment on the draft Consolidated Plan and Annual Plan before the Plans are adopted by the City Council. The public hearing will serve again to obtain the views of citizens on housing and community development needs, including priority non-housing community development needs. A summary of comments or views along with a summary of any comment or view not accepted and the reasons, therefore, shall be attached to the final Consolidated Plan / Annual Plan. To ensure that all City residents have sufficient opportunity to take notice of this public hearing, a public hearing notice, including the date, time and location, and summary of the proposed action shall be published in a local newspaper of general circulation at least fifteen (15) days prior to the date of the public

hearing. Public hearings are held at 6:00 p.m. in the City Council Chambers located at 2000 Main Street, Huntington Beach and is accessible to persons with disabilities.

Note: The City may opt to combine into one notice the public notices described in Steps 8 and 9, above. The public notice will, therefore, serve to summarize the Consolidated Plan / Annual Action Plan and notify the public of the required 30-day public comment period, and will also notify the public of the date, time, and location of the 2nd public hearing to approve the Plan(s).

Assessment to Fair Housing Plan

- 1. Huntington Beach staff will at, or as soon as feasible after, the start of the public participation process, make the HUD-provided data and any other supplemental information the jurisdiction plans to incorporate into its AFH available to its residents, public agencies, and other interested parties. Huntington Beach may make the HUD-provided data available to the public by cross-referencing to the data on the HUD's website.
- 2. A summary describing the contents and purpose of the proposed AFH will be published in a newspaper of general circulation at least thirty (30) days prior to the date of the public hearing. The public notice will also commence a 30-day public comment period, during which citizens will have the opportunity to examine the proposed AFH and submit comments regarding the draft document to the City's Community Development Department / Community Enhancement Division. The public notice will also announce the date, time, and location of the public hearing scheduled to adopt the AFH. Public hearings are held at 6:00 p.m. in the City Council Chambers located at 2000 Main Street, Huntington Beach and are accessible to persons with disabilities.
- 3. Complete copies of the draft AFH will be available for review at the following locations, as well as on the City's website at https://www.huntingtonbeachca.gov/cdbg:

City of Huntington Beach Community Enhancement Division 2000 Main Street, 5th Floor Huntington Beach, CA 92648

Oak View Branch Library 17251 Oak Lane Huntington Beach, CA 92648

4. A public hearing before the City Council will be held to provide citizens further opportunity to comment on the draft AFH, which must be adopted by the City Council. A summary of comments or views made along with a summary of any comment or view not accepted and the reasons, therefore, shall be attached to the final AFH.

Plan Amendments and Revisions

Consolidated Plan / Annual Plan Amendments

Consolidated Plans and/or Annual Plans may be revised during the program year.

• Minor Amendments. Any revisions not defined below as a Substantial Amendment constitutes a minor amendment not requiring public notification or citizen participation in advance of implementing such changes. Upon completion, the City will make the amendment public by placing the amendment to the City's website and will notify HUD that an amendment has been made. The City will submit a copy of each amendment to HUD as it occurs, or at the close of program year.

Minor changes and/or corrections may be made, so long as the changes do not constitute a substantial amendment. Minor changes, including but not limited to modifications of goal outcome indicators, will not be considered a substantial amendment and do not require public review or a public hearing.

- <u>Substantial Amendments</u>. The following changes to the City's Consolidated Plan and/or Annual Plan constitute substantial amendments requiring public notification and public review subject to the citizen participation process described at 24 CFR 91.105 and 24 CFR 91.115.
 - 1. The City makes a change in its allocation priorities or a change in the method of distribution of funds.
 - 2. An addition, modification, or elimination of a Consolidated Plan goal.
 - 3. The City carries out an activity not previously described in the Annual Plan using funds covered by the Consolidated Plan, including Program Income.
 - 4. The City proposes not to carry out an activity described in the Annual Plan and, if funded, cancel the activity in the federal Integrated Disbursement Information System (IDIS).
 - 5. There is a change in the purpose, scope, location, or beneficiaries of an activity in the Annual Plan.
 - 6. There is a cumulative change in the use of CDBG or HOME funds from one activity to another activity in the Annual Plan that exceeds 30 percent of the entitlement award for the program year. If the CDBG award, for instance, is \$1.0 million, then an activity budget(s) could be increased or decreased by up to \$300,000.

In the event that an amendment to the Consolidated Plan and/or Annual Plan qualifies as a substantial change, citizens will be given an opportunity to participate in the planning process. This opportunity will be afforded to the citizens by following these steps:

1. The City will publish a notice describing the contents and purpose of the proposed substantial amendment to the Consolidated Plan and/or Annual Plan in a newspaper of general circulation. The summary will also include a list of locations where a

- complete draft of the Amended Consolidated Plan and/or Amended Annual Plan may be obtained for review.
- 2. The publication of the summary will commence a 30-day public comment period, during which citizens will have the opportunity to examine the proposed Amended Consolidated Plan and/or Amended Annual Plan and submit comments regarding the draft document to the City's Community Development Department / Community Enhancement Division.
- 3. After the close of the 30-day public comment period, the City Council will consider approving the Substantial Amendment to the City's Consolidated Plan and/or Annual Plan. All substantial amendments to the Consolidated Plan and/or Annual Plan and all amendments to the Citizen Participation Plan will be reviewed and approved by the City Council. A summary of comments or views along with a summary of any comment or view not accepted and the reasons, therefore, will be attached to the final Amended Consolidated Plan and/or Amended Annual Plan.

Assessment to Fair Housing Plan Revisions

An AFH previously accepted by HUD must be revised and submitted to HUD for review under the following circumstances:

• A material change occurs. A material change is a change in circumstances in the jurisdiction of a program participant that affects the information on which the AFH is based to the extent that the analysis, the fair housing contributing factors, or the priorities and goals of the AFH no longer reflect actual circumstances. Examples include Presidentially declared disasters, under title IV of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), in the program participant's area that are of such a nature as to significantly impact the steps a program participant may need to take to affirmatively further fair housing; significant demographic changes; new significant contributing factors in the participant's jurisdiction; and civil rights findings, determinations, settlements (including Voluntary Compliance Agreements), or court orders.

A revised AFH under this circumstance must be submitted within 12 months of the onset of the material change, or at a later date as HUD may provide. Where the material change is the result of a Presidentially declared disaster, the revised AFH submission shall be automatically extended to the date that is two years after the date upon which the disaster declaration is made, and HUD may extend such deadline, upon request, for good cause shown.

• Upon HUD's written notification specifying a material change that requires the revision.

Under this scenario, HUD will specify a date by which the program participant must submit the revision of the AFH to HUD, taking into account the material change, the program participant's capacity, and the need for a valid AFH to guide planning activities. HUD may extend the due date upon written request by the program participant that describes the reasons the program participant is unable to make the deadline.

On or before 30 calendar days following the date of HUD's written notification under this circumstance, Huntington Beach may advise HUD in writing if it believes that a revision to the AFH is not required. The City will state with specificity the reasons for its belief that a revision is not required. HUD will respond on or before 30 calendar days following the date of the receipt of the City's correspondence and will advise the City in writing whether HUD agrees or disagrees with the City. If HUD disagrees, the program participant must proceed with the revision. HUD may establish a new due date that is later than the date specified in its original notification.

A revised AFH will consist of preparing and submitting amended analyses, assessments, priorities, and goals that take into account the material change, including any new fair housing issues and contributing factors that may arise as a result of the material change. A revision may not necessarily require the submission of an entirely new AFH. The revision need only focus on the material change and appropriate adjustments to the analyses, assessments, priorities, or goals.

Huntington Beach will follow citizen participation guidelines as outlined here for a Consolidated Plan Substantial Amendment, including publishing a public notice at least thirty (30) days in advance of a public hearing to adopt the Revised AFH and a 30-day public comment period.

Consolidated Annual Performance Evaluation Report (CAPER)

The City will prepare an annual CAPER to evaluate the progress of the Consolidated Plan and to review accomplishments for the previous program year. Upon completion of the CAPER and prior to its submission to HUD, a public notice will be published in a newspaper of general circulation announcing the availability of the CAPER for review and comment prior to a public meeting. This public review and comment period shall be for a minimum 15-day period beginning on the day of publication. During this period, citizens will have the opportunity to examine the CAPER and submit comments to the City's Community Development Department / Community Enhancement Division regarding the document. A public meeting will also serve to obtain the views of citizens about program performance. A summary of comments or views along with a summary of any comment or view not accepted and the reasons, therefore, will be attached to the CAPER.

PUBLIC COMMENT

Public comment, verbally or in writing, is accepted throughout the program year, and is particularly invited during the noticed public comment periods described above. Public hearings shall provide a major opportunity for citizen input on proposed neighborhood improvement programs, activities, policies and procedures. At a minimum, the City will conduct two separate public hearings annually — one for the purpose of soliciting comments from the public on needs and priorities for the development of the Consolidated Plan and Annual Plan, and review of program

performance, and a second for the purpose of adopting the Consolidated Plan and/or Annual Plan. Public hearings will be held at times convenient to potential and actual beneficiaries, and accessible to the disabled.

Notices of public comment periods shall be published on the first day of the public comment period, which shall conclude with the public hearing. To ensure that all City residents have sufficient opportunity to take notice of all scheduled public hearings, all public hearing notices, including the date, time and location, shall be published in a local newspaper of general circulation at least fifteen (15) days prior to the date of the public hearing and thirty (30) days for the Consolidated Plan or Annual Plan. Public notices will be published in local newspapers of general circulation when pertaining to any projects proposed citywide, such as the Consolidated Plan, Annual Plan, or CAPER.

BACK-UP PROJECTS

The Annual Plan may contain a list of projects to be funded for the given program year under one or more of the following circumstances:

- Additional funding becomes available during the program year from the close out of current projects that were completed under budget.
- More program income becomes available than originally estimated and budgeted in the Annual Plan.
- If, during the development of the Annual Plan, staff has not definitively decided which public facility or infrastructure improvement project to fund, the City may opt to categorize each option as a "back-up" project until further project and budget planning is performed. Initiation and funding of one or more of the "back-up" projects would not constitute a substantial amendment as defined in the Citizen Participation Plan. Preferential consideration will be given to those projects that demonstrate the ability to spend CDBG funds in a timely manner, consistent with the City's goal to meet CDBG timeliness rules, as well as those projects that meet the needs of the community as defined in the Consolidated Plan.

A list of "back-up" projects can include public facility and infrastructure improvement projects can be included in the Annual Plan and be approved by the City Council to serve as back-up projects. The City may activate these back-up projects at any time when funding becomes available. The City needs to receive HUD approval for these back-up projects along with the approved and funded projects as part of its approval for the Annual Plan. Initiation and funding of these projects would not constitute a substantial amendment as defined above.

ACCESS TO INFORMATION AND RECORDS

Any citizen, organization, or other interested party may submit written requests for information regarding the Consolidated Plan, Annual Plan, AFH, or CAPER, including the City's use of funds under the CDBG and HOME programs and the benefit to low- to moderate-income residents during the preceding five years. Copies of the Consolidated Plan, Annual Plan, Citizen Participation Plan, CAPER, AFH, amendments or revisions to these Plans, and documents regarding other important program requirements including contracting procedures, environmental policies, fair housing/equal opportunity requirements and relocation provisions, are available to the public during the City's regular business hours, Monday through Friday from 8:00 am – 5:00 pm, in the City's Community Development Department / Community Enhancement Division located at Huntington Beach City Hall, 2000 Main Street, 5th Floor, Huntington Beach, CA 92648. Additional information may be obtained by calling (714) 374-1626. Upon request, the City will make all information available in a format accessible to persons with disabilities.

TECHNICAL ASSISTANCE

In an effort to encourage the submission of views and proposals regarding the Consolidated Plan and Annual Plan, particularly from residents of target areas and groups representative of persons of low- and moderate-income, the City shall provide technical assistance in developing proposals for funding assistance under any of the programs covered by the Consolidated Plan or Annual Plan, if requested. Such assistance will include, but is not limited to, the provision of sample proposals, and program regulations and guidelines.

COMMENT AND COMPLAINT PROCESS

The City will consider any comments from citizens received in writing or orally at public hearings/meetings in preparing this Citizen Participation Plan, the Consolidated Plan, Annual Plan, CAPER, AFH, and/or substantial amendments to these plans. A summary of all comments will be attached and submitted to HUD.

The City will respond to written complaints received relating to the Consolidated Plan, Annual Plan, AFH, CAPER, and/or substantial amendments. Written complaints must describe the objection and provide contact information of the complainant. The City will respond to complaints within fifteen (15) business days of receiving the written complaint, acknowledging the letter and identifying a plan of action, if necessary.

Correspondence may be addressed to:

City of Huntington Beach Community Development Department Charles G. Kovac, Housing Manager 2000 Main Street, 5th Floor Huntington Beach, CA 92648 Persons wishing to contact the Los Angeles Area Field HUD Office may address correspondence to:

U.S. Department of Housing and Urban Development Arnold Sison, CPD / HUD Representative 300 North Los Angeles Street Suite 4054 Los Angeles, CA 90012

CHANGES IN FEDERAL FUNDING LEVEL

Any changes in the federal funding level after the comment period of either the Draft Consolidated Plan and/or the Draft Annual Plan has expired, the resulting effect on the distribution of funds will not be considered an amendment or a substantial amendment.

ASSURANCES

The City of Huntington Beach assures that the most diligent effort will be made to comply with the process and procedures outlined in this 2025/26-2029/30 Citizen Participation Plan.

CODE OF ETHICS / CONFLICT OF INTEREST

It shall be forbidden for any member of boards, commissions, and committees having a material interest in the outcome of decisions to participate in the review of, discussion regarding or voting upon any application on or in any way attempt to influence other members of the respective body. According to direction from the Los Angeles area office of HUD, any CPAB member with such a conflict must resign from either the board or from the position from which the conflict arises. City staff will review applications for new members and attempt to identify potential conflicts prior to appointment.

ANTI- DISPLACEMENT

The City of Huntington Beach strives to avoid and minimize the displacement of individuals as a result of HUD funded activities. Therefore, to the greatest extent possible, the City:

- Will consider the impact of displacement in the site selection, during the project planning phase.
- Will provide information to displaced individual's on available assistance and relocations benefits.

In an effort to minimize displacement of persons and to assist any persons displaced by governmental actions, the City of Huntington Beach has prepared a Residential Anti-Displacement and Relocation Assistance Plan, which is provided in this document.

RESIDENTIAL ANTI-DISPLACEMENT AND RELOCATION ASSISTANCE PLAN

This Residential Anti-Displacement and Relocation Assistance Plan (RARAP) is prepared by the City in accordance with the Housing and Community Development Act of 1974, as amended; and HUD regulations at 24 CFR 42.325 and is applicable to the City's CDBG, including the Section 108 Loan Guarantee Program, and HOME-assisted projects.

Section 104(d) of the Housing and Community Development Act of 1974, as amended (HCD Act), and HUD's CDBG program regulations provide that, as a condition for receiving assistance, as a grantee, the City must certify that it is following a RARAP, which contains two major components:

- 1. A requirement to replace all occupied and vacant occupiable low/moderate-income dwelling units that are demolished or converted to a use other than low/moderate-income housing in connection with an activity assisted under the HCD Act and 24 CFR 570.606(c)(1)); and
- 2. A requirement to provide certain relocation assistance to any lower-income person displaced as a direct result of (1) the demolition of any dwelling unit or (2) the conversion of a low/moderate-income dwelling unit to a use other than a low/moderate-income dwelling in connection with an assisted activity.

Minimize Displacement

Consistent with the goals and objectives of activities assisted under the Act, Huntington Beach will take the following steps to minimize the direct and indirect displacement of persons from their homes:

- Coordinate code enforcement with rehabilitation and housing assistance programs.
- Stage rehabilitation of apartment units to allow tenants to remain in the building complex during and after the rehabilitation, working with empty units first.
- Where feasible, give priority to rehabilitation of housing in lieu of demolition to minimize displacement.
- If feasible, demolish or convert only dwelling units that are unoccupied or vacant occupiable dwelling units, especially if units are lower-income units as defined in 24 CFR

¹ A vacant occupiable dwelling unit means a vacant dwelling unit that is in a standard condition; a vacant dwelling

42.305.

• Target only those properties deemed essential to the need or success of the project.

Relocation Assistance to Displaced Persons

The City will provide relocation assistance for lower-income tenants who, in connection with an activity assisted under the CDBG and HOME Programs, move permanently or move personal property from real property as a direct result of the demolitions of any dwelling unit or the conversion² of a lower-income dwelling unit³ in accordance with requirements of 24 CFR 42.350. A displaced person who is not a lower-income tenant will be provided relocation assistance in accordance with the Uniform Act, as amended, and implementing regulations at 49 CFR Part 24.

One-for One Replacement of Lower-Income Dwelling Units

In accordance with section 104(d) of the Housing and Community Development Act of 1974, as amended (HCD Act) (Pub. L. 93-383, 42 U.S. C. 5301 et seq) and the implementing regulations at 24 CFR 42.375, the City will fulfill its obligation of providing one-for-one replacement housing by replacing all occupied and vacant occupiable lower-income dwelling units⁴ demolished or converted to a use other than lower-income housing in connection with a project assisted with funds provided under the CDBG and HOME Programs.

To that end, the City, in fulfillment of 24 CFR 42.375, will replace all units triggering replacement-housing obligations with comparable lower-income dwelling units. Acceptable replacement units that are provided by the City or private developer will meet these requirements:

- The units will be located within the city and, to the extent feasible and consistent with other statutory priorities, located within the same neighborhood as the units replaced.
- The units must be sufficient in number and size to house no fewer than the number of occupants who could have been housed, as determined by the City's local housing occupancy codes, in the units that are demolished or converted.

17 | Page

unit that is in a substandard condition, but is suitable for rehabilitation; or a dwelling unit in any condition that has been occupied (except by a squatter) at any time within the period beginning three months before the date of execution of the agreement by the recipient covering the rehabilitation or demolition.

² The term **conversion** means altering a housing unit to either use the dwelling for non-housing purposes, continue to use a unit for housing; but it fails to meet the definition of lower-income dwelling unit; or it is used as an emergency shelter. If a housing unit continues to be used for housing after completion of the project is not considered a "conversion" insofar as the unit is owned and occupied by a person who owned and occupied the unit before the project.

³ A **lower-income dwelling unit** means a dwelling unit with a market rent (including utility costs) that does not exceed the applicable Fair Market Rent

⁴ The term **dwelling** as defined by the URA at 49 CFR 24.2(a)(10) includes transitional housing units or non-housekeeping units (SRO) commonly found in HUD programs. An emergency shelter is generally not considered a "dwelling" because such a facility is usually not a place of permanent, transitional or customary and usual residence.

- The units must be provided in standard condition.
- Replacement units must initially be made available for occupancy up to one year prior to
 the City publishing information regarding the project initiating replacement housing
 requirements and ending three years after commencing demolition or rehabilitation related
 to the conversion.
- Replacement units must remain lower-income dwelling units for a minimum of ten 10 years from the date of initial occupancy. Replacement lower-income dwelling units may include public housing or existing housing receiving Section 8 project-based assistance.

Disclosure and Reporting Requirements

Before entering into a contract committing the City to provide funds for a project that will directly result in demolition or conversion of lower-income dwelling units, the City will make public by publishing in a newspaper of general circulation and will submit to HUD the following information in writing:

- 1. A description of the proposed assisted project.
- 2. The address, number of bedrooms and location on a map of lower-income dwelling units that will be demolished or converted to a use other than as lower-income dwelling units as a result of and assisted project.
- 3. A time schedule for the commencement and completion of the demolition or conversion.
- 4. To the extent known, the address, number of lower-income dwelling units by size (number of bedrooms) and location on a map of at the replacement lower-income housing that has been or will be provided.
- 5. The source of funding and a time schedule for the provision of the replacement dwelling units.
- 6. The basis for concluding that each replacement dwelling unit will remain a lower-income dwelling unit for at least ten years from the date of initial occupancy.
- 7. Information demonstrating that any proposed replacement of lower-income dwelling units with smaller dwelling units (e.g., a two-bedroom unit with two one-bedroom units), or any proposed replacement of efficiency or single-room occupancy (SRO) units with units or a different size, is appropriate and consistent with the housing needs and priorities identified in the HUD-approved Consolidated Plan and 24 CFR 42.375(b).

To the extent that the specific location of the replacement dwelling units and other data in items four through seven are unavailable at the time of the general submission, the City will identify the general locations of such dwelling units on a map and complete the disclosure and submission requirements as soon as the specific data is available.

Replacement not Required Based on Unit Availability

Under 24 CFR 42.375(d), the City may submit a request to HUD for a determination that the one-to-one replacement requirement does not apply based on objective data that there is an adequate supply of vacant lower-income dwelling units in standard condition available on a non-discriminatory basis within the area.

DEFINITIONS

<u>Annual Action Plan.</u> A one-year (July 1 – June 30) planning document detailing approved funding allocations for specific eligible activities. The Annual Action Plan (Annual Plan) is submitted to HUD 45-days prior to the beginning of the program year.

<u>Code of Federal Regulations (CFR)</u>. The general and permanent rules and regulations published in the Federal Register by the executive departments and agencies of the U.S. government.

Community Development Block Grant (CDBG). Authorized under Title I of the Housing and Community Development Act of 1974, as amended, the CDBG Program combined multiple federal categorical grants under one regulation. The funds are a block grant that can be used to address critical and unmet community needs including those for housing rehabilitation, public facilities, infrastructure, economic development, public services, and more. The City is provided an annual grant on a formula basis as a CDBG Entitlement recipient. Funds are used to develop a viable urban community by providing decent housing and a suitable living environment, and by expanding economic opportunities, principally for low- and moderate-income persons.

<u>Consolidated Annual Performance and Evaluation Report (CAPER)</u>. The CAPER is prepared at the end of the program year to detail how funds were actually expended and the extent to which these funds were used for activities that benefitted low- and moderate-income people. The CAPER is submitted to HUD within 90-days of the program year end.

<u>Consolidated Plan</u>. The document that is submitted to HUD that serves as the comprehensive housing affordability strategy, community development plan, and submissions for funding under any of the Community Planning and Development formula grant programs (e.g., CDBG, ESG, HOME, and HOPWA), that is prepared in accordance with the process described in this part.

<u>HOME Investment Partnerships Program (HOME)</u>. HOME funds are awarded annually as formula grants to participating jurisdictions (PJs), States and localities, that are used - often in partnership with local nonprofit groups - to fund a wide range of activities including building, buying, and/or rehabilitating affordable housing for rent or homeownership or providing direct rental assistance to low-income people. HOME is the largest federal block grant to state and local governments designed exclusively to create affordable housing for low-income households.

<u>HUD</u>. U.S. Department of Housing and Urban Development is the federal agency that administers and provides guidance for the Consolidated Plan process and use the federal funds such as CDBG and HOME.

<u>Low- and Moderate-Income Persons</u>. Individuals from households with a total income that does not exceed 80 percent of the median household income for the area adjusted for family size.
