# NORTH BERM REPAIR COMPLETE

## ▶ TIMELINE

- December 31, 2019 and February 6, 2020 – ASCON identified tension cracks on the berm along Hamilton
- February – April 2020 DTSC and ASCON evaluated options to repair and alleviate slope failure.
- April 2, 2020 – Online community forum on emergency repair work
- April 10, 2020 – DTSC provided approval letter for ASCON to proceed
  - Outlined strict conditions for all repair work to mitigate any impacts to the community
- April 20, 2020 – ASCON commenced the Managed Excavation of the Hamilton Berm under oversight of DTSC
- **May 8, 2020 - Managed Excavation Completed.**

# NORTH BERM LOCATION

# CURRENT SITE ACTIVITIES

## ► Week of May 18<sup>th</sup>

- Demobilization of the North Berm repair equipment and water filled barriers on Hamilton Ave.
- The managed excavation was conducted with air quality monitoring in the work zone, at the perimeter of Ascon, and at locations in the community. There were no offsite public health impacts detected.
- Ascon continues to work with SCAQMD on permitting a pilot project on the feasibility of tenting areas of the Site during excavation work.
- Continued field activity at Ascon to maintain the Site. Including dust control, weed abatement, vector control, Stormwater protections and 24 hour site security.
- Continued Air monitoring and sampling of on-site and off-site stations with results posted on DTSC's Enviorstor and on AsconHB.org.
