

Why/Benefits

CIP Project Support

- Projects may include up to 25% of preliminary construction cost for on-call design services
 - 15% to 20% for standard projects like street rehabilitation and projects that don't require underground construction
 - 20% to 25% for complex infrastructure projects such as storm drain pump stations, sewer lift stations and facility projects where the designs are more complex and require extensive research and field investigation.
- In the last 5 years the value of CIP projects is \$238 million and conservatively 25% of \$238 million is \$60 million in fees for professional services
