REQUEST

Zoning Map Amendment

To amend the current zoning map to bring 133 inconsistently zoned parcels into conformance with their General Plan designations.

BACKGROUND

- General Plan is a comprehensive blueprint that provides a framework for the utilization and management of the City's physical and economic resources and guides decisions regarding land use in the City through 2040.
- State law requires every city to adopt a General Plan and requires the zoning ordinance to be consistent with it.
- Zoning Map and Ordinance are tools used to implement the General Plan Land Use Element.

ANALYSIS

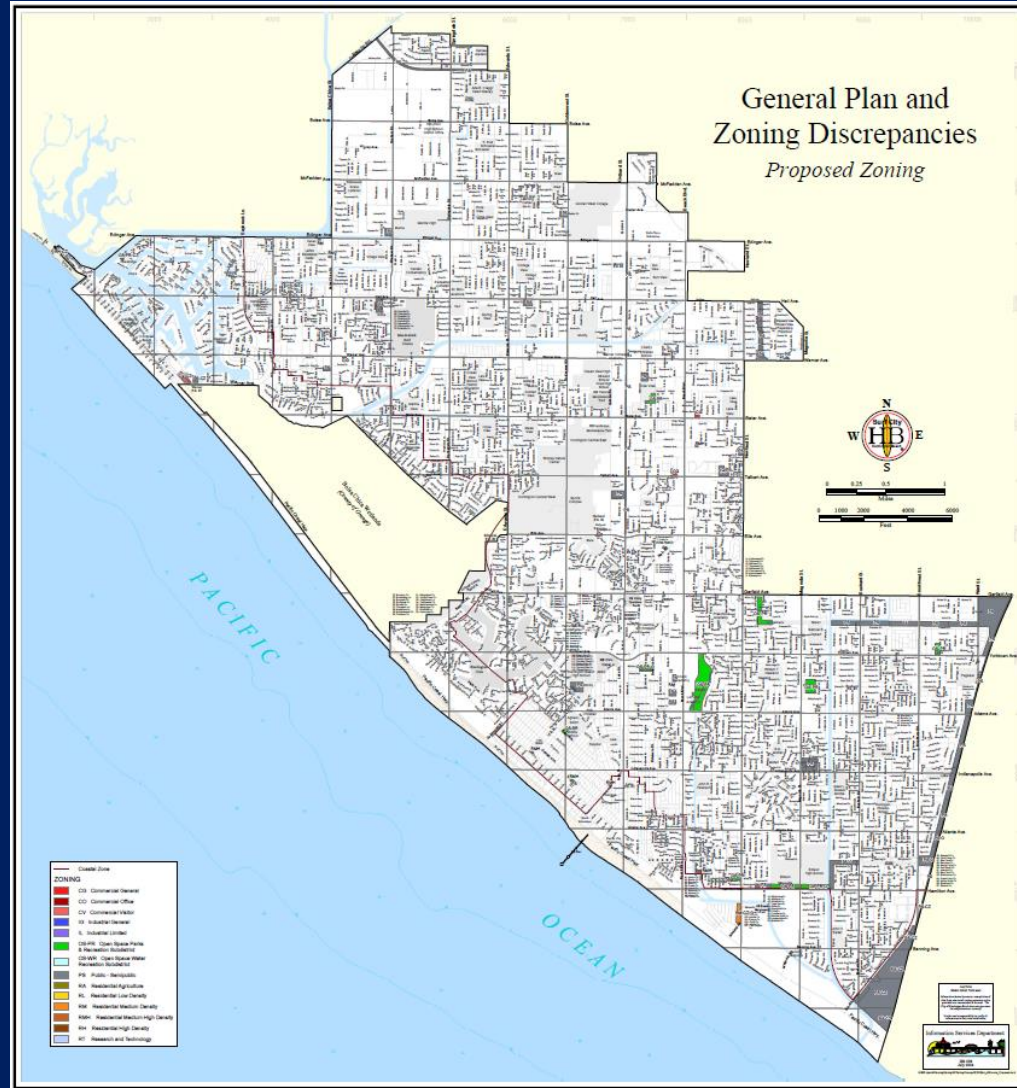

- Staff has identified 133 parcels which have zoning designations that are inconsistent with the General Plan.
- The amended designations will correspond to the pattern of existing uses on site
- No development is contemplated as part of these amendments
- The 133 parcels have been organized into 6 groups:
 - ZMA No. 23-001 – City Parks and City Owned Property
 - ZMA No. 23-002 – Churches and Schools
