Subject: Oak View Library and Community Center

Dear Council Members and others;

I see on the May 2, 2023 Agenda that you will have a study session regarding the Oak View Library and Community Center project.

Yeah!! About time that resources are directed there.

I would like to mention, if it is possible, that the street access into the new Library complex be made easier. I normally come in from Warner Ave. A week or so ago, I tried to access there from Slater Ave. and found it to be nearly impossible due to dead ends and alleys or no access from Nichols. With the current street design, it is very difficult to access that area. I hope that it is made easier in future with these new facilities.

Thank you
Dale Martinez
