<u>Market Summary</u>	<u>Federal Funds Rate</u>	<u>10-Year Treasury</u>	<u>S&P 500</u>	<u>DOW</u>

The Federal Open Market Committee (FOMC) met in December to discuss the current state of the economy and to examine potential future interest rate hikes before year-end. They concluded that the labor market has continued to strengthen and economic activity has been rising at a strong rate. They stated, “Household spending has continued to grow strongly, while growth of business fixed investment has moderated from its rapid pace earlier in the year. On a 12-month basis, both overall inflation and inflation for items other than food and energy remain near 2 percent.” The Committee will continue to monitor actual and expected inflation developments as the year progresses to determine the timing and size of future adjustments to the federal funds rate.

In view of the realized and expected labor market conditions and inflation, the Committee decided to raise the target range for the federal funds rate to 2-1/4 to 2-1/2 percent in December.

Fixed Income/Equity Markets: The yield on the 10-year U.S. Treasury finished the quarter at 2.69%, down from 3.05% from the end of the previous quarter, for a -11.80% decrease quarter over quarter. The S&P 500 and DOW decreased by 13.97% and 11.83% respectively, over the same period. Overall, the fourth quarter of 2018 brought decreases in the market with strong volatility as compared to the earlier quarters of the year.

Employment: Total nonfarm payroll employment increased by 312,000 in December, and the unemployment rate was at 3.9 percent. Over the past 3 months, job gains have averaged 254,000 per month. Average hourly earnings rose 11 cents an hour to \$27.48 for the month of December.

As of December 31, 2018

LAIF offers local agencies the opportunity to participate in a major portfolio with overnight liquidity managed by the State of California Treasurer’s Office. Please see <http://www.treasurer.ca.gov/pmia-laif/laif.asp> for more information. LAIF is currently utilized for the liquidity portion of the City’s portfolio as the yield received for overnight availability at this time is similar to or greater than that of alternative liquid investments.

Portfolio Earnings and Performance:

**Monthly Earnings
January 2018 – December 2018**

In September a slight rebalance of the portfolio was enacted in order to take advantage of the rising interest rates, as the Federal Reserve raised rates four times since the beginning of the year. This, combined with the Local Agency Investment Fund (LAIF) continuing to increase its effective monthly yield, has allowed the portfolio to earn additional interest income (as seen by the increases to the monthly earnings above for the months of October, November and December).

**Portfolio Earnings
As of December 31, 2018**

<u>Portfolio Earnings</u>	<u>Month End 12/31/18</u>	<u>FYTD 12/31/18</u>
Current Year	\$ 360,417	\$ 1,904,602

Effective Rate of Return	1.98%	1.81%
Yield to Maturity		2.05%
Benchmark*	2.42%	

*12 month moving average of interpolated 1.5-year treasury

The monthly portfolio earnings as of December 31, 2018 were \$360,417, with fiscal year-to-date earnings of \$1,904,602, a 54% and 31% increase, respectively, over the same periods in 2017. The yield to maturity as of 12/31/18 was 2.05%.

The City’s investment policy mandates are safety, liquidity and return, in this absolute order. The investment portfolio is designed with the objective of attaining a market rate of return through budgetary and economic cycles, taking into account the investment risk constraints and the liquidity requirements.

In order to take advantage of approximately \$900,000 in annual savings, the City modified the timing of the payment of the unfunded portion of the annual CalPERS liability from monthly to annually. Having made this approximately \$25 million annual prepayment in June of this year, the City’s investment return is somewhat behind that of the benchmark as these funds were utilized for this payment, hence unavailable for longer-term investment. As well, securities must mature over time in order to be reinvested at higher rates. Therefore, the portfolio return will typically lag the market.

It is anticipated that as funds become available, they will be reinvested at the higher interest rates resulting in an increased rate of return for the portfolio.
