Subject: Support CC agenda item #21 re CCE feasibility study
Attachments: Screenshot_20190804-110311.png; Screenshot_20190804-110320.png

Dear city council,

I wholeheartedly support moving forward with the CCE feasibility study process. CCE is ultimately a free market move in providing both local HB energy consumers and producers with competitive choice.

Since installing Tesla solar panels and Powerwalls batteries back in May, my SCE grid consumption is negligible. But because I had my system sized anticipation of future increase in usage, I currently export a lot excess production to SCE for non-negotiable pricing.

SCE is under extreme financial pressure, so the price they're paying me is probably low. CCE would give me the choice of getting the best price for my exported clean power.

- Mark Bixby

To: CITY COUNCIL <city.council@surfcity-hb.org>
Subject: Agenda items 21,22 for August 5 meeting

Dear Mayor Peterson and City Council Members,

I am writing to share my opposition for the following agenda items at tonight's city council meeting.

I oppose agenda item 21 because I believe that CCA's can put the city in a position of **potential financial risk** because of the enormous costs to create such programs and the liability which would fall on the taxpayers if such contracts were to go bad. Which is always possible.

Also, agenda item 21 **can't promise that it will actually add additional green energy.**

Finally, I oppose this agenda item on the basis it would **create more government and thus the potential for more utility rates.** I believe it could jeopardize tax paying citizens with too much risk. I don't believe it would benefit our city at this time if ever.

Secondly I also oppose agenda item 22 on the basis I believe it would **create less transparency in an area of our city government that** frankly needs it the most! A pre conceived work plan **would eliminate the ability for oversight and participation by the Finance commission which is in place to do just that, BE AN OVERSIGHT AND KEEP THE CITY'S FINANCES PROTECTED.**

Please continue to allow the Finance Commission to do its appointed job of helping keep the city on the right track financially.

The commissioners are citizens appointed by Council members so it makes no sense to cut off their involvement by having a system that is unable to be advised upon.

Thank you for the consideration to these two agenda items.
We appreciate your service.

Respectfully,

Nancy Buchoz

COMMENTS & ADDITIONAL NOTES

City Council Members, I am asking you to oppose item 21 on the council agenda regarding the city taking over the billing for SCE electrical use. Leave the power and associated billing to the experts. The City of HB has no business dabbling in this. All this would mean is higher cost to the citizens of HB. I am asking you to oppose this item. Thank you, Steve Farnsworth

Subject: Agenda Items 21 and 22

Dear Mayor Peterson and Council Members,

I am writing to urge that you OPPOSE Agenda Items 21 and 22 and will provide more information below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

I had hoped this item would have permanently "died" a couple years ago when, following a Study Session, it was exposed that CCA's are not only a BAD idea for cities, but frankly very dangerous. Since the time of that Study Session, I have been following this topic very closely and can report that there is yet to be even one success among cities who have attempted this massive city-government-expansion. Cities continue to expose and reject this bad idea especially knowing that the only winners in the newest cottage industry of CCA's are the Consultants, Attorneys and, of course, Southern California Edison who conveniently get out of all their bad contracts and transfers the bad-contracts to cities who adopt CCA's. At the end of the day, cities who adopt CCA's are left with:

1. A whole new EXPANDED layer of city government.
2. No additional "green" energy (since CCA's are merely a transfer of paper-certificates from one agency to another).
3. Potential loss of hundreds of thousands of dollars of start up funding and bad contracts.

But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and City Council unless the end-goal is seeking a new "Slush Fund". May I remind all of you that the recent council majority vote to purchase the Pipeline building, without proper due diligence has landed the city in a lawsuit.....I think it is safe to say that neither City Council nor staff should be afforded additional expansion or responsibility for ANYTHING, let alone something that could permanently jeopardize the citizens of Huntington Beach. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT.

AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission

As I previous wrote to you after the last attempt to destroy the Finance Commission, I find it hard to believe that we have arrived at a point where certain council would be advocating for LESS transparency and LESS oversight. As someone who attends most Finance Commission and many other meetings, it is apparent that there is simply NO WAY to articulate an annual work plan unless the goal is to neuter and silence this commission! If we are truly interested, as a city, in operating efficiently and transparently, all options for oversight must be "on the table" at all times! Whether or not a given council choses to look at the material coming from Finance Commission is and always has been optional, but to pre-identify a Work Plan is the complete removal of citizen oversight and participation in the finances of our city which should be the MOST TRANSPARENT aspect of any government entity. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS PRECIDENT.

Respectfully,
Jon and Susan Gary

COMMENTS & ADDITIONAL NOTES

Comment Re Council Member Item No. 21, the Community Choice Energy Feasibility Study, Aug. 5, 2019 meeting Dear Council Members: I support moving forward with a Community Choice Energy feasibility study. As noted, the Council held a detailed study session on this topic on August 7, 2017, and voted 5-2 to proceed with the NDA in furtherance of pursuing a feasibility study. According to the current agenda item, apparently the City got bids or information from consultants about performing a feasibility study, but that effort fizzled. It is unclear why this action stalled, despite clear support from the Council. I urge the current Council to engage in a transparent debate on this topic at the August 5, 2019 meeting, and move forward with the overdue feasibility study. Sincerely, Dan Jamieson Huntington Beach

COMMENTS & ADDITIONAL NOTES

In support of City Council Agenda item #21, Immediate Action to complete a Community Choice Feasibility study and receive results within six months of this data. As a fiscally conservative NPP Voter, I have found Community Choice Aggregation to be the smartest way for cities to protect their residents, businesses, and consumers from the high cost of electricity. A City knows the local needs best of it's constituents. Lancaster Choice Energy clearly states on its website, (www.lancasterchoiceenergy.com) that it brings in 60 Million Dollars per year back to its city in revenue. It provides charging stations in business parking lots, has created an electric bus company and 200 jobs, and now is working to change cleaner school busses to electric busses (ideal because they are only needed in the morning and afternoon and can charge at the cost efficient rate during the day). The evidence is easy to find on the successes of CCA's in California. Still, Orange County has NONE. Please take due diligent action and get the facts for your city by completing the feasibility study without delay.

I'm requesting the City Council move is support of item # 21 on the agenda and complete a Community Choice Aggregation study and have the results within the next 6 months.

Since CCA's have repeatedly shown fiscal benefits to communities throughout California, and are revenue based, (not using tax dollars), it is financially prudent to conduct a proper study for the residents, businesses, and customers of Huntington Beach, without delay.

Thank You

Subject: Agenda Items 21 & 22

Dear Mayor Peterson and Council Members,

I am writing to urge that you **OPPOSE** Agenda Items 21 and 22 and will provide more information below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

I had hoped this item would have permanently "died" a couple years ago when, following a Study Session, it was exposed that CCA's are not only a BAD idea for cities, but frankly very dangerous. Since the time of that Study Session, I have been following this topic very closely and can report that there is yet to be even one success among cities who have attempted this massive city-government-expansion. Cities continue to expose and reject this bad idea especially knowing that the only winners in the newest cottage industry of CCA's are the Consultants, Attorneys and, of course, Southern California Edison who conveniently get out of all their bad contracts and transfers the bad-contracts to cities who adopt CCA's. At the end of the day, cities who adopt CCA's are left with:

1. A whole new EXPANDED layer of city government.
2. No additional "green" energy (since CCA's are merely a transfer of paper-certificates from one agency to another).
3. Potential loss of hundreds of thousands of dollars of start up funding and bad contracts.

But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and City Council unless the end-goal is seeking a new "Slush Fund". May I remind all of you that the recent council majority vote to purchase the Pipeline building, without proper due diligence has landed the city in a lawsuit.....I think it is safe to say that neither City Council nor staff should be afforded additional expansion or responsibility for ANYTHING, let alone something that could permanently jeopardize the citizens of Huntington Beach. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT.

AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission

As I previous wrote to you after the last attempt to destroy the Finance Commission, I find it hard to believe that we have arrived at a point where certain council would be advocating for LESS transparency and oversight. As someone who attends most Finance Commission and many other meetings, it is apparent that there is simply NO WAY to articulate an annual work plan unless the goal is to neuter and silence this commission! If we are truly interested, as a city, in operating efficiently and transparently, all options for oversight must be "on the table" at all times! Whether or not a given council chooses to look at the material coming from Finance Commission is and always has been optional, but to pre-identify a Work Plan is the complete removal of citizen oversight and participation in the finances of our city which should be the MOST TRANSPARENT aspect of any government entity. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS PRECEDENT.

Respectfully,
Jan Kubica

Community Choice Energy Feasibility Study - Please do conduct this study. Huntington Beach takes a lot of pride in being independent and we should have accurate information so that we may make a decision that will allow our city this independence. Not only that, we will be better suited to support our local businesses, as well as attract new businesses. With a CCE, our city can offer reasonable rates and increased reliability to suit the power needs of our local businesses.

Please do conduct the Community Choice Energy Feasibility Study.

I expect that the results will show that CCE is the best choice for our city to show our independence and to support our local businesses, as well as attracting new businesses to Huntington Beach. Our local businesses (and residents, of course) deserve reasonable rates and reliability when it comes to power. Our residents deserve choices when it comes to purchasing electricity. With a CCE, we will have the option to either continue to buy electricity from SCE or we can choose to get our energy from the locally run, CCE, keeping more money within our Huntington Beach community.

Please allow the feasibility study to move forward. Only then will we be able to make an informed choice about whether or not this is best for our city. Thank you.

Subject: OPPOSE Agenda Items 21 and 22

Dear Mayor Peterson and Council Members,

I am writing to urge you to OPPOSE Agenda Items 21 and 22 for the reasons listed below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

I had hoped this item would have permanently "died" a couple years ago when, following a Study Session, it was exposed that CCA's are not only a BAD idea for cities, but in fact, very dangerous. Since the time of that Study Session, I have been following this topic very closely and can report that there is yet to be even one success among cities who have attempted this massive city-government-expansion. Cities continue to expose and reject this bad idea especially knowing that the only winners in the newest cottage industry of CCA's are the Consultants, Attorneys and, of course, Southern California Edison who conveniently get out of all their bad contracts and transfers the bad-contracts to cities who adopt CCA's. At the end of the day, cities who adopt CCA's are left with:

1. A whole new EXPANDED layer of city government ... no one needs or wants this!
2. No additional "green" energy (since CCA's are merely a transfer of paper-certificates from one agency to another).
3. Potential loss of hundreds of thousands of dollars of start up funding and bad contracts.

But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and the City Council unless the end goal is seeking a new "Slush Fund". May I remind all of you that the recent council majority vote to purchase the Pipeline building, without proper due diligence has landed the city in a lawsuit. I think it is safe to say that neither City Council nor staff should be afforded additional expansion or responsibility for ANYTHING, let alone something that could permanently jeopardize the citizens of Huntington Beach. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT.

~~AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission~~

I find it hard to believe that we have arrived at a point where certain council members would be advocating for LESS transparency and LESS oversight. As someone who attends most Finance Commission and many other meetings, it is apparent that there is simply NO WAY to articulate an annual work plan unless the goal is to neuter and silence this commission! If we are truly interested, as a city, in operating efficiently and transparently, all options for oversight must be "on the table" at all times! Whether or not a given council chooses to look at the material coming from Finance Commission is and always has been optional. In no way should they pre-identify a Work Plan as then, that is the complete removal of citizen oversight and participation in the finances of our city which should be the MOST TRANSPARENT aspect of any government entity. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS PRECEDENT.

From: SHARON OTT <ottcamp@verizon.net>
Sent: Sunday, August 04, 2019 4:16 PM
To: CITY COUNCIL
Subject: NO ON AGENDA ITEM 21 AND ~~ITEM 22~~ PLEASE

Dear Mayor Peterson and City Council:

I am writing today to express my opposition and ask for your "No" vote on two agenda items on Monday's city council meeting: Agenda Item 21 and Agenda Item 22.

Both these items have been discussed before and, I thought, deemed not worthy of future consideration. And yet, here we are again, with agendas and, frankly, personal vendettas being pursued.

With respect to Agenda Item 21- Feasibility Study for Community Choice Energy:

I attended the meetings held several years ago. And I thought this idea was put to bed and acknowledged that:

1. Although good-intentioned, this idea would not increase the use of green energy, but simply transfer the certificates of purchase from one agency to another.
2. CCA would increase the size and scope of our city government at a time when you should be addressing many, more pressing issues that require resources- both from a financial standpoint as well as an energy perspective. Those more pressing issues, where your energy would be better spent include: infrastructure costs that are unable to keep up with the needs, the failed purchase of a building to be used as a "Navigation" Center, the Ascon toxic waste dump, the mitigation of which is causing many health related issues to your constituents in Southeast Huntington Beach, The tank farm property, where a medium density, mixed use building project next door- and separated simply by a chain link fence to the previously mentioned Ascon toxic waste site is being pushed through our city at the speed of a bullet train.

And yet, several of you choose an item of great significance in which to invest your time, ignoring all the above. You propose to have the city relieve Southern California Edison of their historical duty of billing your constituents for their electricity use. Which brings me to question, WHY? Why is it that several of you deem this as so important? I can think of no other reason than to think that you are looking for additional sources of revenue for our city. And frankly, after the "Navigation" Center fiasco, where none of you listened when Mayor Peterson at the meeting informed you of an alternate solution that would have fulfilled our obligation to Judge Carter without spending OUR \$2.7MM, I do not trust your judgement currently with financial matters. I need to see this council begin making better financial decisions before considering a system whereby you will have control over our energy billing. I apologize for being so blunt. But you need to prove yourself more capable than you have.

Which segues perfectly into my opposition of the next agenda item- Agenda Item 22- Adopt Annual Work Plan for Finance Commission.

At a time when our financial resources are stretched, partially as a result of the poor decision making of this council, the proposal to "gut" the very commission charged with citizen review and oversight of our city's finances is brought forward? Interesting timing.

At an Ascon meeting at Edison High School I took the time to speak with a council member that I have grown to greatly respect. I expressed my concern that a city council would take ANY action to limit the voice of citizens in our city government- especially when it relates to financial issues. This council member agreed and supported the idea of increased citizen involvement- not less. The reality is that the citizen members of the Finance Commission act on behalf of everyone in the city- council members and citizens alike- to create a city government that operates in a fiscally responsible manner. They simply look for ways to save money and present those ideas to you seven. They understand they have no policy-making role. I urge you not to limit their role at a time when we need to find ways to streamline our operations and spend our money in responsible ways.

Additionally, I am greatly concerned what message this action will send to the citizen participants on every other board and commission. Why would anyone want to be nominated to a board or commission if they knew their actions would be limited and their opinions not considered. No, this is not the message you should be sending- now or ever.

Lastly, I am greatly concerned that this issue has become simply a personality issue. As elected members of our city you are leaders.

Leaders should rise above pettiness and personality conflicts- not create or inflame them. If you disagree with a member of a commission your job should not be to succumb to that pettiness- but be a leader and rise above it. I encourage all of you to work with the Finance Commission and make the citizen oversight and transparency stronger- not weaker.

Regards,
Sharon Ott

8-04-2019

Dear Mayor Peterson and Council Members,

I am writing to urge that you OPPOSE Agenda Items 21 and 22 and will provide more information below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

Hoping that you will due your due diligence and see that this is a horrible idea. Why do we need more government here in Huntington Beach? It seems that this is the least of our worries. Focus on what the public is crying for. Your leadership not more possible spending and loss.

I did find this quote and I couldn't have said it better "But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and City Council unless the end-goal is seeking a new "Slush Fund". I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT."

AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission

Please be brave and don't succumb to the pressure to destroy the Finance Commission. It is the way the citizens have a little oversight and input over our city. Why is that a bad thing. It is a voluntary position that people are doing to help this city. Everyone wants transparency these days, except the people who are hiding something or doing something wrong..

Please council care about the citizens.

Sincerely,

Deby Pierce

Comments

I support the City of Huntington Beach efforts to obtain a Community Choice Energy feasibility study.

I like Free markets, and a consumers right to choose. A CCE would give all HB residents a choose when buying their power.

I believe it is best to invest locally. With a CCE the rates residents pay for electricity would stay local rather than being paid to a far-off investor owned utility

I like it when things are controlled and overseen locally. I want local officials rather than far-away CEO's making decisions about our power.

I want better local power grid infrastructure. With a CCE rates paid for power stay local giving Huntington Beach funds to improve the resilience and reliability of our local electric grid.

With over 160 other California cities currently employing a Community Choice Energy system for power procurement, Huntington Beach is being left behind.

By failing to fully investigate the potential of this program, the residents of Huntington Beach are being short changed by their own local government.

CCE for HB ... NOW!

Subject: OPPOSE AGENDA ITEMS 21 and 22

Dear Mayor Peterson and Council Members,

I am writing to urge that you OPPOSE Agenda Items 21 and 22 and will provide more information below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

I had hoped this item would have permanently "died" a couple years ago when, following a Study Session, it was exposed that CCA's are not only a BAD idea for cities, but frankly very dangerous. Since the time of that Study Session, I have been following this topic very closely and can report that there is yet to be even one success among cities who have attempted this massive city-government-expansion. Cities continue to expose and reject this bad idea especially knowing that the only winners in the newest cottage industry of CCA's are the Consultants, Attorneys and, of course, Southern California Edison who conveniently get out of all their bad contracts and transfers the bad-contracts to cities who adopt CCA's. At the end of the day, cities who adopt CCA's are left with:

1. A whole new EXPANDED layer of city government.
2. No additional "green" energy (since CCA's are merely a transfer of paper-certificates from one agency to another).
3. Potential loss of hundreds of thousands of dollars of start up funding and bad contracts.

But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and City Council unless the end-goal is seeking a new "Slush Fund". May I remind all of you that the recent council majority vote to purchase the Pipeline building, without proper due diligence has landed the city in a lawsuit.....I think it is safe to say that neither City Council nor staff should be afforded additional expansion or responsibility for ANYTHING, let alone something that could permanently jeopardize the citizens of Huntington Beach. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT.

AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission

As I previous wrote to you after the last attempt to destroy the Finance Commission, I find it hard to believe that we have arrived at a point where certain council would be advocating for LESS transparency and LESS oversight. As someone who attends most Finance Commission and many other meetings, it is apparent that there is simply NO WAY to articulate an annual work plan unless the goal is to neuter and silence this commission! If we are truly interested, as a city, in operating efficiently and transparently, all options for oversight must be "on the table" at all times! Whether or not a given council choses to look at the material coming from Finance Commission is and always has been optional, but to pre-identify a Work Plan is the complete removal of citizen oversight and participation in the finances of our city which should be the MOST TRANSPARENT aspect of any government entity. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS PRECEDENT.

Respectfully,

Cari Swan

I am writing to urge that you OPPOSE Agenda Items 21 and 22 and will provide more information below.

AGENDA ITEM 21 - Feasibility Study for Community Choice Energy (aka CCA)

I had hoped this item would have permanently "died" a couple years ago when, following a Study Session, it was exposed that CCA's are not only a BAD idea for cities, but frankly very dangerous. Since the time of that Study Session, I have been following this topic very closely and can report that there is yet to be even one success among cities who have attempted this massive city-government-expansion. Cities continue to expose and reject this bad idea especially knowing that the only winners in the newest cottage industry of CCA's are the Consultants, Attorneys and, of course, Southern California Edison who conveniently get out of all their bad contracts and transfers the bad-contracts to cities who adopt CCA's. At the end of the day, cities who adopt CCA's are left with:

1. A whole new EXPANDED layer of city government.
2. No additional "green" energy (since CCA's are merely a transfer of paper-certificates from one agency to another).
3. Potential loss of hundreds of thousands of dollars of start up funding and bad contracts.

But perhaps the single most important reason to oppose even the mere idea of a CCA is the fact that NO City Council should given more ability to RAISE OUR UTILITY RATES.....PERIOD! There is absolutely no positive reason to shift the current Southern California Edison responsibility to city staff and City Council unless the end-goal is seeking a new "Slush Fund". May I remind all of you that the recent council majority vote to purchase the Pipeline building, without proper due diligence has landed the city in a lawsuit.....I think it is safe to say that neither City Council nor staff should be afforded additional expansion or responsibility for ANYTHING, let alone something that could permanently jeopardize the citizens of Huntington Beach. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS CONCEPT.

AGENDA ITEM 22 - Adopt Annual Work Plan for Finance Commission

As I previous wrote to you after the last attempt to destroy the Finance Commission, I find it hard to believe that we have arrived at a point where certain council would be advocating for LESS transparency and LESS oversight. As someone who attends most Finance Commission and many other meetings, it is apparent that there is simply NO WAY to articulate an annual work plan unless the goal is to neuter and silence this commission! If we are truly interested, as a city, in operating efficiently and transparently, all options for oversight must be "on the table" at all times! Whether or not a given council choses to look at the material coming from Finance Commission is and always has

been optional, but to pre-identify a Work Plan is the complete removal of citizen oversight and participation in the finances of our city which should be the MOST TRANSPARENT aspect of any government entity. I URGE ALL OF YOUR TO OPPOSE THIS DANGEROUS PRECIDENT.

Sincerely,

Janice Torres

Copied with permission, I couldn't have said it better myself.

Subject: Please OPPOSE Agenda Items 21 and 22

Dear Mayor Peterson and City Council:

I am writing today to express my opposition and ask for your "No" vote on two agenda items on Monday's city council meeting: Agenda Item 21 and Agenda Item 22.

Both these items have been discussed before and, I thought, deemed not worthy of future consideration. And yet, here we are again, with agendas and, frankly, personal vendettas being pursued.

With respect to **Agenda Item 21- Feasibility Study for Community Choice Energy:**

I attended the meetings held several years ago. And I thought this idea was put to bed and acknowledged that:

1. Although good-intentioned, this idea would not increase the use of green energy, but simply transfer the certificates of purchase from one agency to another.
2. CCA would increase the size and scope of our city government at a time when you should be addressing many, more pressing issues that require resources- both from a financial standpoint as well as an energy perspective. Those more pressing issues, where your energy would be better spent include: infrastructure costs that are unable to keep up with the needs, the failed purchase of a building to be used as a "Navigation" Center, the Ascon toxic waste dump, the mitigation of which is causing many health related issues to your constituents in Southeast Huntington Beach, The tank farm property, where a medium density, mixed use building project next door- and separated simply by a chain link fence to the previously mentioned Ascon toxic waste site is being pushed through our city at the speed of a bullet train.

And yet, several of you choose an item of great significance in which to invest your time, ignoring all the above. You propose to have the city relieve Southern California Edison of their historical duty of billing your constituents for their electricity use.

Which brings me to question, WHY? Why is it that several of you deem this as so important? I can think of no other reason than to think that you are looking for additional sources of revenue for our city. And frankly, after the "Navigation" Center fiasco, where none of you listened when Mayor Peterson at the meeting informed you of an alternate solution that would have fulfilled our obligation to Judge Carter without spending OUR \$2.7MM, I do not trust your judgement currently with financial matters. I need to see this council begin making better financial decisions before considering a system whereby you will have control over our energy billing. I apologize for being so blunt. But you need to prove yourself more capable than you have.

Which segues perfectly into my opposition of the next agenda item- **Agenda Item 22- Adopt Annual Work Plan for Finance Commission.**

At a time when our financial resources are stretched, partially as a result of the poor decision making of this council, the proposal to "gut" the very commission charged with citizen review and oversight of our city's finances is brought forward? Interesting timing.

At an Ascon meeting at Edison High School I took the time to speak with a council member that I have grown to greatly respect. I expressed my concern that a city council would take ANY action to limit the voice of citizens in our city government- especially when it relates to financial issues. This council member agreed and supported the idea of increased citizen involvement- not less. The reality is that the citizen members of the Finance Commission act on behalf of everyone in the city- council members and citizens alike- to create a city government that operates in a fiscally responsible manner. They simply look for ways to save money and present those ideas to you seven. They understand they have no policy-making role. I urge you not to limit their role at a time when we need to find ways to streamline our operations and spend our money in responsible ways.

Additionally, I am greatly concerned what message this action will send to the citizen participants on every other board and commission. Why would anyone want to be nominated to a board or commission if they knew their actions would be limited and their opinions not considered. No, this is not the message you should be sending- now or ever.

Lastly, I am greatly concerned that this issue has become simply a personality issue. As elected members of our city you are leaders. Leaders should rise above pettiness and personality conflicts- not create or inflame them. If you disagree with a member of a commission your job should not be to succumb to that pettiness- but be a leader and rise above it. I encourage all of you to work with the Finance Commission and make the citizen oversight and transparency stronger- not weaker.

Respectfully,

Rob Pool

To: CITY COUNCIL
Subject: NO ON AGENDA 21!

Importance: High

Hello

I am asking you to PLEASE VOTE NO on agenda 21.

Why you may ask, this is why...

1. City Council would have the ability to RAISE power rates anytime they need a new "slush fund".
2. Statewide, not one CCA has succeeded and, in fact, have cost their cities incredible up-front investment....FOR NO GOOD REASON.

3. Who are the winners? Consultants, Attorneys and SC Edison.

4. Very risky and could easily bankrupt the city if failed.

Do we want City staff or any 4 members of council responsible for our power bill?? Holy cow!!! Recall that this city council just landed us in a lawsuit after a poorly managed purchase of a commercial building for a Homeless Shelter (\$3million), supported by staff that FAILED to do due diligence....for a building that was NEVER NEEDED!!! Good Lord....we need to REDUCE city hall....NOT EXPAND IT!!!

This is NOT right for our city and it's citizens!

Ann Tarkington

Subject: Please OPPOSE Agenda Items 21 and 22

Dear Mayor Peterson and Council Members,

I am writing to urge that you **OPPOSE** Agenda Items 21 and 22.

Agenda Item 21 - Feasibility Study of Community Choice Energy (aka CCA)
I don't believe that we want any City Council that changes every two - four years have the ability to raise our utility rates. I also don't believe that there should be an expansion of government jobs with the current state of pensions. Please **OPPOSE** this item!

Agenda Item 22 - Adopt Annual Work Plan for Finance Commission
The commission does research and then provides information for City Council members to consider. The Council does not need to act on recommendations from the commission. Why would the Council want to restrict the commission right from the start? Please **OPPOSE** this item!

Kind Regards,

--

Subject: Oppose Agenda Items 21 & 22

Dear City Council of Huntington Beach,

We are writing to oppose two very dangerous agenda items.

We urge you to oppose Agenda Items 21 and 22.

In reading and learning about these agenda items they are a bad approach for our City.

We do not need more government control - and we don't want our City Council to have the ability to raise our utility rates.

We feel that this would jeopardize the citizens of Huntington Beach - just based on too many variables.

Re: Agenda Item #22

We do not want less transparency & oversight ... we do not want to neuter the Finance Commission.

Why do we need to pre-identify a Work Plan?

Please oppose.

Thank you for your service.

Respectfully yours,

Kurt and Dee Wood

Huntington Harbour Residents

Dee Wood

Agenda Item No.: #21 (19-825)

COMMENTS & ADDITIONAL NOTES

Agenda Item 21 CCE on the August 5th agenda. I am asking that the HBCC approve agenda item 21 at tonight's council meeting. CCE gives more local control to the community while providing citizen options for their energy source. The item on the agenda reads as follows: 21. 19-825 Submitted by Councilmembers Delgleize and Carr - Community Choice Energy Feasibility Study Recommended Action: Direct the City Manager and the Public Works Director to complete a Community Choice Energy Feasibility Study and report back to the City Council within six (6) months. This feasibility study could save citizens and city enormous amounts of capital in the upcoming years, while giving everyone a chance to opt in for cleaner energy providers. I believe due diligence is in order to at least look at the viability of this as an option for Huntington Beach if cost savings is an option. Sincerely, KC Fockler
