PORTFOLIO OVERVIEW

For the quarter ending September 30, 2019, the market value of the portfolio surpassed the book value of the portfolio at \$214.1 million versus \$212.2 million, respectively. This was due to the overall decrease in market interest rates, which served to increase the prices (value) of some of the existing securities in the portfolio. This was a reversal of what had occurred earlier this year, when market interest rates had been increasing.

Currently, funds within this portfolio are invested in federal agency securities, corporate bonds, the Inter-American Development Bank ("IADB"), U.S. Treasury Securities, and the State of California's pooled account (Local Agency Investment Fund "LAIF"). Only the investment types allowed under California Government Code Section 56301 are utilized. As is typical, the largest holding by security type at month-end was federal agencies at approximately 55% of the total overall portfolio.

Earnings for the month of September were \$396,532, an increase of 52% from the previous year. As well, fiscal year-to-date earnings of \$1,266,304 were also up from the previous year by 42%. This solid increase in earnings was due to the higher interest rates, as well as due to following a specific and targeted investment strategy with regards to when and where to invest.

The effective rate of return for the month was 2.25%, with a fiscal year-to-date return of 2.20%. This is in-line with the benchmark of the 12-month moving average of the interpolated 1.5-year U.S. Treasury.

The portfolio is in conformity with all relevant State regulations and the City's Investment Policy statement as approved by the City Council on February 4, 2019. The investment program herein shown provides sufficient cash flow liquidity to meet the next six months' obligations.

The Federal Open Market Committee (FOMC) met in September to discuss the current state of the economy and to examine potential future interest rate adjustments. They concluded that the labor market remains strong and that economic activity has been rising at a moderate rate. They stated, "Although household spending has been rising at a strong pace, business fixed investment and exports have weakened. Market-based measures of inflation compensation remain low; survey-based measures of longer-term inflation expectations are little changed." The Committee will continue to monitor actual and expected inflation developments as the year progresses to determine the timing and size of future adjustments to the federal funds rate.

In light of the implications of global developments for the economic outlook as well as muted inflation pressures, the Committee decided to lower the target range for the federal funds rate to 1-3/4 to 2 percent.

Fixed Income/Equity Markets: The yield on the 10-year U.S. Treasury finished the quarter at 1.68%, down from 2.00% from the end of the previous quarter, for a -16.00% decrease quarter over quarter. The S&P 500 and DOW both increased by 1.19% over the same period.

Employment: Total nonfarm payroll employment increased by 136,000 in September, and the unemployment rate declined 0.2 percentage points to 3.5 percent. Over the past 3 months, job gains have averaged 157,000 per month. The labor force participation rate remained relatively unchanged throughout the year at around 63 percent.

INTEREST RATE COMPARISON

The 2-year, 5-year and 10-year interest rates rose through the end of 2018, then fell and converged over 2019. The 2-year and 5-year rates remained very close in 2019, while shorter-term interest rates moved higher as the yield curve inverted slightly. Treasury rates saw volatility over the past few months due to the Federal Reserve uncertainty and optimism of a China trade deal.
