Subject: 6/1 No mandatory masks in Huntington Beach require social distancing as other state orders

To all Councilman,

As a life long Orange County, CA. resident I'm outraged by mandating wearing masks for the following reasons.

* Orange County has been mask free the entire Covid -19 March until May with lowest cases/ death rates in California.

No reason to suddenly MANDATE masks now.

* The World Health Organization is recommending healthy people, including those who don't exhibit COVID-19 symptoms, only wear masks when taking care of someone infected with the contagion, a sharp contrast from the advice given by American public health officials who recommend everyone wear a mask in public. *(see link below)*

* Masks are the perfect breeding ground for bacteria that can end up in your mouth & down into your lungs. I have learned that there are many harmful effects of rebreathing Carbon Dioxide (CO2)."

* Touching mask and surfaces spread germs. Contaminants sit within mask fibers, get rein-haled. Fresh air is vital for immune health!"

* Mandating restaurant worker's to wear masks is absurd. I have worn a mask as a server and have been getting sick, and over heating during my shifts. We are running around and our breathing is reduced during 6 hour shifts causing serious health concerns. The workers are temperature checked before shifts there is NO medical reason to MANDATE employees to wear masks.

* **The only people who should wear a mask are the sick or people treating the sick per WHO.**

* The only masks that really work are N95 saved for health professionals.

The people who are well should continue to wash hands and continue social distancing 6ft as other states are recommending to wear masks only if social distancing can't be done.

We will not be shamed into wearing masks when CDC ,WHO and other states have stated wearing masks does not provide a benefit but actually can harm individuals breathing in their own carbon dioxide. (see below).

I would appreciate a response and for these concerns to be addressed with OC. BOS.

Thank You,
Jeanine Davis
