**Subject:** So you had no plan huh?

UNBELIEVABLE.

You have oil rigs just off your beaches, in plain sight.

You knew about the Gulf in 2010.

You knew about Santa Barbara.

And yet you had no plan to deal with a leak.

No equipment anywhere nearby.

No established task force with the equally useless Cal Fish and Wildlife. (They had no plan either)

No well established connection with the rig owners for mitigation plans and early warning.

You are partially responsible for the impacts upon wildlife and the wetlands. (Although I am betting you only care about the loss of tourist dollars!)

Shame on you all for having zero foresight.

**Subject:** Decommission Oil Rigs to Avoid Future Spills

Dear City Councilmembers,

I'm writing to you today to urge you to decommission the oil rigs off the coast of Orange County in order to avoid future oil spills.

I'm a lifelong resident of Orange County. Huntington Beach was always the beach that my family and I went to even though we lived right next to Seal Beach. I remember thinking the oil rigs were not only a tremendous eyesore but also a symbol of our disgusting dependence on oil.

As a child, I was very concerned about climate change and hoped that there would be alternatives to fossil fuels. Thankfully, there are. And yet, we are still completely dependent on them. There's a very clear solution: Electric Vehicles (EVs).

How many more oil spills do there need to be before we do something about it?

Quite frankly, it's only a matter of time before the next oil spill. And yet, we've seen so many of these happen in recent years and still we do nothing about it. Each time it's upsetting. Each time it's called an environmental or ecological disaster. We clean up, move on, and do nothing.

Do something about it now. Orange County's beaches are some of the most beautiful in the world. Let's keep it that way. Close these oil rigs and transition towards EVs instead. We must end our dependence on oil. It's literally killing us, marine life, and our beautiful coastlines.

Thank you,

Julia Manis  
90720

**Cc:** Chi, Oliver <oliver.chi@surfcity-hb.org>  
**Subject:** Emergency Declaration / Item 21-750

Dear Mayor Carr and honorable members of the Council:

The council has the grave responsibility of managing a citywide response to the recent oil spill affecting our single most important natural resource. The ecological impacts are acute and pressing, and managing the economic impact is likely to claim the lion's share of the council's attention and working efforts over the next few months. While the impact to the city and our reputation as a healthy venue for outdoor activities organized at the water's edge is unknown, those water's edge activities underly the value of every piece of real estate in the city, both commercial and residential. Even during a global pandemic, those activities remained in place and were the reason that we and our neighbors would come to our parking lots, enjoy meals in our restaurants, book stays in our hotels. The disruption to the city economy caused by the pandemic was very well managed by the Council and the legions of hard-working city staff, led by City Manager Chi.

Even in the absence of a detailed picture of the damage done thus far, I have been a close observer of this council in action. You have addressed issues both chronic (homelessness, the availability of crisis stabilization mental health services, the housing affordability crisis for the "missing middle") and acute (primarily the city response to the pandemic itself). I have every confidence in this council to address our current challenge.

While the future is uncertain, the whole and entire point of representative government is that you – the citizens elevated to the dais – are in the right place, and at the right time, with clear minds, full hearts and strong hands as you address this issue.

With best wishes,

Galen Pickett

**SUPPLEMENTAL  
COMMUNICATION**

Meeting Date: 10/4/2021

Agenda Item No.: 1(21-750)

Good morning Mayor Carr,

I am saddened to hear about the oil leak that is creating havoc to the beaches in the city your serve. I have friends and family that live in Huntington Beach, and they are concerned with the current damage and long-lasting damages that will happen to their beaches and wildlife.

I reached out to contact that I have that his organization has experience in oil clean up with larger oil spills throughout the world and his product is fast acting and environmentally safe.

My contact (Ralph Salazar) is the President/CEO of Ovation-Scientific.com have enough drums available to address the entire 126,000-gallon spill near Huntington Beach, OSE II can be applied easily with firefighting equipment from any commercial vessel, 2 to 4 vessels could apply enough OSE II to render the spill nontoxic and prevent further natural resource damage.

No product or process in the world has ever come remotely close to being as effective as **Oil Spill Eater II** ( OSE II) with a 98 and 99% clean-up of a 150,000-gallon spill on open ocean water as well as 18 kilometers of shoreline, including a few kilometers of mangroves in Nigeria. The spill was 99 and 98% removed from the environment within 3 weeks, with a 77% reduction in costs normally associated with spills like this in the US.

See video <https://www.osei.us/archives/1519>

OSE II will make easy, effective, safe spill response that will end quickly with less destroyed natural resources, there is no other way than with OSE II

Ralph's direct phone number is **626 755 5064** and his email is [ralphsalazar@opms.biz](mailto:ralphsalazar@opms.biz).

Below is additional information you will find helpful.

Mr. Salazar has projects with current local cities and sports venues (LAFC). I believe he can assist you and all the residents of Huntington Beach.

Thank you and God Bless.

### [OSE II successfully cleaned up the AGIP Brass Terminal oil spill | OSEI](#)

OSE II successfully cleaned up the AGIP Brass Terminal oil spill, which was approximately 150,000 gallons or 550,000 liters.

[www.osei.us](http://www.osei.us)

554 page plan and test results for 99 and 98% efficacy/removal <https://www.osei.us/wp-content/uploads/OSEI-Nigeria-AGIP-Brass-Terminal-Clean-up-complete-data-set-4-14-14-.pdf>

**OSE II has been part of over 60,000 spills** in almost ever conceivable place hydrocarbons or hydrocarbon based material over the last 32 years. There is an enormous catalogue of peer reviewed efficacy test with OSE II as well as 35 toxicity tests from 9 different countries including the US EPA.

**OSE II is safe for humans responders, marine species, and has a track record of efficacy testing and case studies by governments, Universities, Oil Companies, contractors as well as end users, there simply is nothing in the world that compete with OSE II on any levels especially number of spills cleaned up!**

There is no reason not to use this product who has a 32 year history of amazing clean ups while protecting natural resources. There are links to the RRT IV required response plan which OSE II has met and surpassed, as well as a concise response plan. OSE II has supervisors in the La area, and the CEO is available as well for supervision.

Hi,  
I was wondering if I could get a list of materials used by the county to clean up the Huntington Beach oil spill. I work with several large chemical companies that can supply anything from the dispersants, fertilizers and surfactants to protective gloves and masks. Let me know if I can help!

Thanks,

Hi Cathy,

The team at Surf City Marathon has been following the news unfold around the recent oil spill impacting Huntington Beach. We are incredibly saddened to hear of the environmental ramifications being felt by this tragedy. Please let the Mayor and council know we will keep the community of Huntington Beach close in our hearts as clean-up efforts are under way...if there is anything we can do, please let us know.

Best,  
Natalia Mendez

Notes

I worked three years on the Exxon-Valdez and the Anacortes oil cleanup and I can tell you that the "ONLY" way to get rid of the oil is to dig it up. Amazingly rocks/sands, esp rip rap, are big oil sponges. And no matter what you do to them when the sun hits them they bleed. Had I of not recommended that they dig everything up that oil touched at Anacortes they would still be dealing with it. We still are in Prince William Sound. You will do less damage than any other method. Don't be convinced otherwise. I have been there, done that. So get your front end loaders, backhoes and line your dumps so you can haul it off. For sure you can find some remote road that could use the sand and oil. Exxon did,

Subject: Oil Spill@HB

Mayor Carr

Briefly stated: spill can be contained in the sense that ocean that received 3000 barrels from a leaked oil carrying pipe  
Most of the oil, due to wind currents, reaches the shores which is of concern to animals and citizens  
300 barely of eco friendly(non toxic) solution may be released near the area where the leak occurred In a matter of forty  
eight hours, all will be back to normal Keep this low profile as unnecessary attention and interference are not warranted  
as that would delay deployment of an urgent preventive and protective step Hopefully you get to read this and revert

To: Carr, Kim <Kim.Carr@surfcity-hb.org>  
Cc: Fikes, Cathy <CFikes@surfcity-hb.org>  
Subject: Oil Spill-People want to save wildlife

We want to help save wildlife harmed by oil spill, but it takes training and certification. The HB Wetlands & Wildlife Care Center is desperate for financial donations. They have more than enough volunteers but this crisis requires community financial support. They referred me to this donation link: [wetlands-and-wildlife-care-center.snbll.com](http://wetlands-and-wildlife-care-center.snbll.com)  
Please help spread this information.

Kindly,  
Tina Cremer  
Westminster Resident

**Subject:** Volunteering - Oil Spill

Dear Mayor Carr,

I would like to volunteer to help clean up the beaches and wildlife impacted by the oil spill from Platform Elly.

Can you please advise me of an organization to contact, so that I may volunteer my services for a cleanup.

My contact information:  
Cell: (714) 313-8943  
Eml: [kellyirish@cox.net](mailto:kellyirish@cox.net)

Thank you!

Regards,

Barbara

**Subject:** Oil Spill Cleanup Volunteer?

Thanks for a great Air Show. Really super this year. Understandable you decided to cancel, I support the decision.

While I am aware of all the city volunteer opportunities listed on the website - PLEASE update us as to the specific way residents can assist with the oil clean up, wildlife, land clean-up etc. Many of us have time and want to help with this human caused disaster.

Maybe a heading on the city website with regular updates as the situation progresses over the next several weeks.

Thanks again for your leadership and commitment to HB.

Synde Manion, homeowner and resident.

**Subject:** Oil spill

Good morning Kim

I have been reading the devastating news of the oil spill or leak off your coast, which has cause traumatic impact to the wildlife, beaches and waterway.

I am reaching out from Nanaimo, Vancouver Island Canada. I have a product with would be able to assist immediately with the oil clean up.

We have just launched we have a large model which extract the oil out of the water, also clearing the sheen.

The Clean Bilge is a product which has been designed for large bilges of Tug boats and large fishing boats, but one of our products is used in marinas, to make sure no oil goes out to sea from sitting boats.

The oil which is extracted from the water is trapped into a container which is then completely recyclable.

We have a air-force base very close, plus a US Navy port 15 mins away. We would be able to figure out some way to get them to you.

My cell number is 778-999-5087  
Please connect if we are able to help.

Blessing  
Shelley Roy Noel

**Subject:** Oil Spill

Hi Cathy,

The team at Surf City Marathon has been following the news unfold around the recent oil spill impacting Huntington Beach. We are incredibly saddened to hear of the environmental ramifications being felt by this tragedy. Please let the Mayor and council know we will keep the community of Huntington Beach close in our hearts as clean-up efforts are under way...if there is anything we can do, please let us know.

Best,  
Natalia Mendez  
Surf City Marathon
