Subject: Oil Spill on Huntington Beach!!!

My name is Tailor Guerrero, and I find it important to address this issue with you on your serious oil spill that had devastated your beaches. My father, Vince Guerrero has invented oil machines since 1989 that can totally cleanup oil spills World wide within days or weeks. We would like to offer you this technology to cleanup not only the beach areas, rock corries, and the remaining oil in the ocean. We are the only company in the world that can do this. I am willing to offer my services for free since when I was a kid I spent alot of time at Huntington Beach. All that I ask in return is that you pay for labor and small tools needed. The company that will be doing this service for you is 3VITechnologies. This matter needs your immediate response to show the world that it can be done.
