Subject: Please vote yes on Item 30: 100% Renewable Electricity

Good afternoon Mayor Carr and City Councilmembers,

I appreciate the consideration to develop a Plan and Cost Analysis to utilize Renewable Electricity. I hope the Council decides to move ahead with this Plan. Hopefully the SCE "Green Rate" will prove to be the recommended option of said Plan.

The recent oil spill had impacted the City, local businesses, beachgoers and wildlife. Any steps toward ending our dependency on fossil fuels should be taken at the earliest reasonable opportunity. This change will be a fairly easy and inexpensive step in that direction. Our beaches have shown us that we need to stop using oil and other fossil fuels ASAP in order to have a livable future. Please vote in support of item 30.

Thank you,
Keith Linker
Orange County Resident/ surfer and business patron of Huntington Beach

Subject: Item 30: Yes to 100% renewable electricity!

Dear Mayor Carr and City Councilmembers,

I regard human-caused climate change as the greatest challenge of our time and a major test of our ability to have a functioning democracy that serves the common good. For anyone who holds the slightest interest in politics and current events, climate issues cannot be ignored, for they intersect with virtually every other issue, from national security to energy production to transportation infrastructure to biodiversity to clean air to terrorism to taxation and regulation, and above all, to morality and ethics. We owe it to future generations to take a strong stand in support of clean energy. A strong position here is absolutely necessary given the inaction at the federal level.

Our beaches have shown us that we need to stop using oil and other fossil fuels ASAP in order to have a livable future. Please vote in support of item 30 by Councilmember Dan Kalmick and also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

Subject: Oil and Gas

Dear Honorable Mayor Carr and City Councilmembers,

As our beaches have shown us over the last few weeks, we need to stop using oil and other fossil fuels ASAP. Please vote in support of **item 30** by Councilmember Dan Kalmick and also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

On another note, Item 31 looks to divest the portfolio holdings in Chevron. I would rather the city look to "add" renewable energy to the portfolio, while still holding some interest in Chevron, as long as the yield is acceptable. Not eliminate it in its entirety, just because it is in the oil industry. The oil industry still provides material that has many uses outside of just providing electricity for powering homes, and therefore it remains a viable company and industry in which to invest. Invest in multiple sources and diversify the city's holdings is what I would advise moving forward. Investing in bonds and other dividend yielding companies would be prudent and, overall, it protects the investment of the city.

Thank you again for passing the Recent City Resolution calling for a *ban to new offshore oil and gas drilling in federal waters*, that shows what the city is about...surfing, not cleaning up the catastrophes of man.

Thank you,

KC Fockler

Meeting Date: 11/2/2021
Agenda Item No.: 30(21-826)

Re: Huntington Beach City Council Vote on 100% Renewable Electricity Through OCPA

Dear Mayor Carr and City Councilmembers,

As a coalition of organizations representing faith, environmental, justice and other community groups and interests in Huntington Beach and the broader Orange County community, we appreciate your work to accelerate equitable climate action in Huntington Beach and call on you to help provide all Huntington Beach families 100% clean electricity as soon as possible.

The climate crisis will harm all families, but will harm low-income communities and communities of color the first and worst. In order to clean our air, protect our health, and slash our carbon pollution, we must power our lives with 100% clean electricity.

We have an incredible opportunity to offer Huntington Beach families 100% clean electricity through the newly launched nonprofit public power agency, the Orange County Power Authority. In order to make this happen, the Mayor and Council must vote to make 100% renewable electricity the default option for all Huntington Beach families.

We also understand that we must evaluate the rate impacts of all OCPA decisions, and we are eager to have a public hearing on what the projected rate impacts for 100% clean electricity will be.

For these reasons, we request that you place an item on the Huntington Beach City Council agenda as soon as possible to facilitate a discussion and vote on 100% renewable electricity for Huntington Beach through OCPA. With OCPA's launch planned for April 2022, these decisions need to be made soon.

These actions can enable Huntington Beach to join the growing list of California cities that have selected 100% renewables as their default product through Community Choice, ensure the success of OCPA, and help solidify your legacy as leaders on climate and equity issues.

Subject: Commitment to Clean Energy

Dear Huntington Beach City Council,

I urge you to make a commitment to 100% clean energy. We have seen the damage fossil fuels do to our environment, ecosystems, and air quality. These disasters are not one off events, but inevitable bumps in the road when reliant on fossil fuels. If global warming wasn't enough of a dire existential threat, then pledge to clean energy to protect our beaches and guarantee our grandchildren can swim in the same waters we grew up in.

with regards,

Ashton Gilbert

Subject: Item 30: 100% Renewable Energy!

Hello,

I support every decision that you make that leads us towards a healthier Earth. Item #30 at the City Council meeting on 11/2/21 is another opportunity to stop using fossil fuels and start the discussion about 100% carbon free electricity for HB citizens through the Orange County Power Authority. Please vote in support of item #30! At the meeting on November 2nd, please plan to switch the city's power use to 100% renewable energy and reinvest financing away from fossil fuel companies.

Polling data shows that people overwhelmingly want leaders to take dramatic action to tackle the climate crisis. There is a very strong level of public support in favor of a 100% renewable energy option upon the CCA rollout next year (preferably this would be the default).

In this moment of crisis and uncertainty, I remain hopeful that together we all prioritise the climate crisis and make good decisions towards a healthy future. Thank you very much,

Sandy Smallshaw

Subject: Item 30: Yes to 100% renewable electricity!

Dear Mayor Carr and City Council Members,

Power generation using fossil fuels is one of the major producers of greenhouse gas emissions that contribute to climate change.

The negative effects of climate change are costly for us all and the financial, environmental, and public health effects continue to worsen.

It is critical that we move away from fossil fuels.

I urge your support of Item 30 on the November 2, 2021 Council Agenda, to direct city staff to perform an analysis of 100% renewable energy pricing from both SCE and OCPA based on the City's municipal usage across all funds and rate classes and develop timelines for moving municipal accounts to 100% renewable energy.

This is a good step in the right direction.

Thank you,

Grace Winchell

Subject: Item 30: Yes to 100% renewable electricity!

Dear Mayor Carr and City Council Members,

For our businesses, our beaches, our residents, our community, please vote for 100% renewable electricity. Studies show renewable energy is part of a city's strategy toward cleaner air, cleaner beaches, and a vibrant economy - because businesses, schools, residents, and cities save more money over time than fossil fuels. And renewable energy prevents rolling blackouts.

Please vote in support of item 30 by Councilmember Dan Kalmick and also agendaize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

Thanks

Subject: Item 30: Yes to 100% renewable electricity!

Dear Mayor Carr and City Councilmembers, I am a long time resident of Orange County and feel privileged to live here. With privilege comes responsibility, specifically responsibility to tackle the damage being done to our environment by fossil fuels. We had but a "taste" of disaster with the recent oil spill. As a psychologist, I understand how easy it is to avoid or deny unpleasant realities until they are hitting you on the head.

Please vote in support of item 30 by Councilmember Dan Kalmick and also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

Huntington Beach, take the lead!

Thank you,

Maurie Edelman, Ph.D.

Subject: Support for Agenda **Items 30** and 31

Dear Mayor and City Council Members, it is so exciting and encouraging to see all the actions our City is taking to become more sustainable and protect our beautiful environment. Thank you for your excellent leadership in this area! I am writing today to support **Agenda items 30** and 31 that will facilitate a transition from fossil fuels to renewable energy sources. We are finally at a tipping point where renewable energy sources make good economic sense, and the environmental benefits are critical for the future of our City and the planet. I am especially supportive of Item 30 because it will send a strong message to the Orange County Power Authority that a key member city supports a strong portfolio of renewable energy sources. This will promote a 100% renewables option for residential customers which I strongly support.

Regards,

Lisa Swanson

Subject: Item 30: 100% renewable electricity, a big YES!

Dear Mayor Carr and City Councilmembers,

Some problems allow for time to solve them. Oil spills and climate change are NOT those types. The timing of our actions matters. Scientists agree that a 4 degree C hotter Earth is vastly WORSE than a 2 degree C hotter Earth.

Huntington Beach has an opportunity to show the power of 100% renewable energy. DOWN with burning fossilized sun and UP with harnessing the power of fresh sun, as well as the many other renewable sources.

I ask for your YES vote of:

- 1) item 30 by Councilmember Dan Kalmick and
- 2) also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

Grateful for your urgent response to the need for ACTION.
Craig

Hello, Mayor Carr and City Councilmembers,

I am a first year college student of Orange County, and my family has long loved the Huntington Beach Community. My mother has worked for Boeing for over 25 years and spent much of her career at Boeing's Huntington Beach facilities ever since my childhood, and it has been inspiring to see the city of Huntington Beach support my mom and her peers in some of our country's best technological advancements. Frequently visiting the Huntington Beach Boeing and seeing innovations made my 10 year old eyes sparkle, and from that point on, inspired me to pursue science research, bioengineering, and years of medical volunteering throughout school and in my future career.

Another huge part of my childhood has been our beloved beaches in Huntington Beach and seeing the beautiful wildlife at our beaches. However, we are at risk of losing this, for these past few years have shown us that we need to stop using oil and other fossil fuels ASAP in order to have a livable future. I ask that you please vote in support of item 30 by Councilmember Dan Kalmick and also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority. Thank you so much.

Sincerely,
Rachel Abalos

Subject: In support of **item 30** and 31

Dear HB City Council,

You have shown strong leadership in your role to keep Huntington Beach a thriving beach community and lead the way in establishing the first Community Choice Energy agency in Orange County, OCPA.

Please continue to show leadership in sustainability by voting YES on **Item 30** and 31, establishing a plan for 100% renewables for municipal power consumption, and divesting from fossil fuels.

I also support ASAP placing a discussion on a future agenda of 100% clean power default for Huntington Beach. A default means customers start at that level. They can easily choose to "Opt-Down" if they want to choose another power mix.

A 100% clean power mix with OCPA is the easiest way for businesses and residents to significantly reduce their carbon footprint.

Thank you!
