Subject: Oil and Gas

Dear Honorable Mayor Carr and City Councilmembers,

As our beaches have shown us over the last few weeks, we need to stop using oil and other fossil fuels ASAP. Please vote in support of item 30 by Councilmember Dan Kalmick and also agendize a discussion of 100% carbon free electricity for every HB energy user through the OC Power Authority.

On another note, **Item 31** looks to divest the portfolio holdings in Chevron. I would rather the city look to "add" renewable energy to the portfolio, while still holding some interest in Chevron, as long as the yield is acceptable. Not eliminate it in its entirety, just because it is in the oil industry. The oil industry still provides material that has many uses outside of just providing electricity for powering homes, and therefore it remains a viable company and industry in which to invest. Invest in multiple sources and diversify the city's holdings is what I would advise moving forward. Investing in bonds and other dividend yielding companies would be prudent and, overall, it protects the investment of the city.

Thank you again for passing the Recent City Resolution calling for a *ban to new offshore oil and gas drilling in federal waters*, that shows what the city is about...surfing, not cleaning up the catastrophes of man.

Thank you,

KC Fockler

Subject: Nov 2, 2021 City Council Agenda Items 30 & 31

Dear Mayor Carr and City Councilmembers:

To mitigate the effects of climate change and protect our local environment, it is essential that power consumers move away from the use of fossil fuels as soon as possible.

The Orange County League of Conservation Voters urges your support of Item 30 on the November 2, 2021 Council Agenda, to direct city staff to perform an analysis of 100% renewable energy pricing from both SCE and OCPA based on municipal usage, across all funds and rate classes and develop timelines for moving municipal accounts to 100% renewable energy.

OCLCV further urges your support of Item 31 to direct the Investment Advisory Board, in conjunction with the City Treasurer to establish a plan divest City investment holdings of Chevron Corporate Bonds and reinvest in an alternate fund, not including fossil industry investments.

Thank you,

Denise Erkeneff
President, OCLCV

Subject: Support for Agenda Items 30 and 31

Dear Mayor and City Council Members, it is so exciting and encouraging to see all the actions our City is taking to become more sustainable and protect our beautiful environment. Thank you for your excellent leadership in this area! I am writing today to support Agenda items 30 and 31 that will facilitate a transition from fossil fuels to renewable energy sources. We are finally at a tipping point where renewable energy sources make good economic sense, and the environmental benefits are critical for the future of our City and the planet. I am especially supportive of Item 30 because it will send a strong message to the Orange County Power Authority that a key member city supports a strong portfolio of renewable energy sources. This will promote a 100% renewables option for residential customers which I strongly support.

Regards,

Lisa Swanson

Subject: In support of **item 30 and 31**

Dear HB City Council,

You have shown strong leadership in your role to keep Huntington Beach a thriving beach community and lead the way in establishing the first Community Choice Energy agency in Orange County, OCPA.

Please continue to show leadership in sustainability by voting YES on **Item 30 and 31**, establishing a plan for 100% renewables for municipal power consumption, and divesting from fossil fuels.

I also support ASAP placing a discussion on a future agenda of 100% clean power default for Huntington Beach. A default means customers start at that level. They can easily choose to "Opt-Down" if they want to choose another power mix.

A 100% clean power mix with OCPA is the easiest way for businesses and residents to significantly reduce their carbon footprint.

Thank you!
